## G1 The writing system

The writing system comprises three scripts: 平仮名 (ひらがな)、片仮名 (カタカナ)、漢字 (かんじ). For details of the former two scripts, refer to the supplementary PDF.

### G1.1 [Interlude] Morphemes, phonemes, phones

*This entire section is courtesy of SL.*

**Phonemes** are the smallest unit of mental representation of sound. They do not carry meaning by themselves, but they can alter the meaning pictured by the listener.

**Morphemes** are the smallest unit of meaning, and comprise two levels: a phonological level and a semantic level. The phonological level states how it is pronounced (a string of phonemes), and the semantic level states what meaning is attached to the phonology.

For instance, 日々 contains a repetition of the same phoneme because the sound and meaning of the two 漢字 are identical. In contrast, 日日 contains two different morphemes, because the sound (and meaning) of the two 漢字 are different!

When determining whether a morpheme is repeated or not, consider the sound and meaning first before looking at the orthography. “Orthography is truly an afterthought[, in the design of languages].”

### G1.2 Iteration marks

Read main article on [Wikipedia](#).

Only the (horizontal text) 漢字 iteration mark 々 is commonly used today. It is used to represent a duplicated character representing the same morpheme. For example, 日々 means “daily, day after day”.

Writing 々 instead of repeating the 漢字 is preferred, provided that:

1. (tl;dr: morpheme is repeated) the reading of the repeated 漢字 must be the same, though certain changes are permitted such as *rendaku* (unvoiced consonant becomes voiced, i.e. the dakuten, e.g. in 人々, ひ → び) and *gemination* (consonant lengthening, i.e. the つ, e.g. in 刻々), and
2. the repetition must be within a single word/phrase.

If the above aren't satisfied:

- If repetition isn't repetition of the same morpheme, for disambiguation the second 漢字 is spelt out in 平仮名 (e.g. 日にち).
- If repetition crosses word boundaries, then the 漢字 is repeated (e.g. 民主主義, democracy).

There are exceptions to this! 民主々義 is rarely used but exists. A notable exception is in the signages for neighbourhood associations 「～町内会」. Because the name of neighbourhoods often end in ～町, suffixing with ～町内会 yields ～町町内会, which is then informally abbreviated to ～町々内会, despite the repetition crossing a word boundary.

Interpretations when 々 is used:

- Reduplication (linguistics terminology) to indicate plurality  
人々 (people)、日々 (daily/day after day)、山々 (mountains)
- Various alterations in meaning

- ▶ 個 (piece) → 個々 (individually)
- ▶ 時 (time) → 時々 (sometimes)
- ▶ 翌日 (next day, as in 隔天/隔一天 (CN)) → 翌々日 (next next day, as in 隔两天 (CN))

Note that 翌日 is not the same as 明日, just like how 隔天 and 明天 are used in different contexts in CN!

Repetition marks can be typed using commands in Table 1.

Table 1: Miscellaneous keyboard commands. Today, ˆ, ˇ, ˘ and ˙ only appear in proper names.  
As examples, じˆ = じし and じˇ = じじ.

Keyboard command		Purpose
ˆ	ˆ onaji → space*	平仮名 previous character repeater (enforce without dakuten)
ˇ	ˇ onaji → space*	平仮名 previous character repeater (enforce with dakuten)
˘	˘ onaji → space*	片仮名 previous character repeater (enforce without dakuten)
˙	˙ onaji → space*	片仮名 previous character repeater (enforce with dakuten)
々	々 noma → space*	漢字 previous character repeater (ノ + マ)

### G1.3 漢字

Some preliminary notes:

- There exists over 40000 漢字 but only about 2000 account for >95% of characters actually used in written text.
- There are no spaces in Japanese, so 漢字 is necessary for distinguishing separate words within a sentence, and discriminating between homophones.
- Words that mean practically the same thing can have different 漢字 to distinguish nuances.

Here's an example:

- ▶ 訊く means to ask.
- ▶ 聞く means to listen, or to ask.
- ▶ 聴く means to listen attentively. Preferred when talking about listening to music.

Another example:

- ▶ 見る means to see.
- ▶ 観る means to watch a movie.

Another example:

- ▶ 書く means to write.
- ▶ 描く means to draw.

When depicting/imagining an abstract image (e.g. a scene in a book), we use 描く.

Another example:

- ▶ The different pronunciations 今日, 今日 and 今日 are each preferred in different contexts.

## G1.4 Pronunciation

It is not practical to memorise or attempt to logically create rules for pitches, especially since it can change depending on the context or the dialect. Even the intonations provided in dictionaries are there for guidance; they morph when used in different contexts.

The only practical approach is to get the general sense of pitches is by mimicking native Japanese speakers with careful listening and practice.

Some special notes:

- Voiced consonants vibrate the vocal cords, while unvoiced consonants don't (see [Tofugu](#) article).
- In the modern 東京 dialect, ズ and づ are pronounced exactly the same way: "zu", as expressed in their identical Hepburn romanisation [§G1.5](#).
- When in the middle of words, がぎぐげご may be pronounced with a "ng-" start instead of a "g-" start. This is a regional variation (that's not too uncommon); both ways are acceptable (see [Tofugu](#) article).
- The native Japanese speaker will pronounce the "v" family (ヴ、ヴァ、ヴィ、ヴェ、ヴォ、ヴェュ) as /b/.
- Vowel extensions [§G1.4.1](#) are pronounced as vowel extensions; do not pronounce the extender if it's a different vowel! For example, 先生 is pronounced *sen-se* with an elongated trailing "e" vowel. There is no "i" vowel sound!
- Almost every 漢字 character has two different readings (see [§G1.7](#)):
  - ▶ 音読み: Chinese-derived. Used in compound 漢字 and idioms (both known as 熟語).
  - ▶ 訓読み: native Japanese. Used in solo 漢字, solo 漢字 appended with 送り仮名, adjectives and verbs.

The purpose of trailing 送り仮名 is to preserve the pronunciation of the 漢字, even as the word is conjugated<sup>1</sup> to different forms. It is also used to differentiate transitive and intransitive verbs [§G2.7.1](#).

Note that although sometimes you may see 音読み pronunciations written in 片仮名 and 訓読み pronunciations written in 平仮名, this is only used in dictionaries for differentiation. In standard 振り仮名, only 平仮名 is used.

- The actual readings of 漢字 can change slightly in compound words to make them easier to say (e.g. 一本 is いっぽん instead of いっほん).

When repeating 漢字 using 々, *rendaku* (see [§G1.6](#); unvoiced consonant becomes voiced, i.e. the dakuten, e.g. in 人々, ひ → び) and *gemination* (consonant lengthening, i.e. the っ, e.g. 刻々) may occur.

### G1.4.1 Vowel extension

Vowel extensions follow the rules in Table 2. For notes on pronunciation, see [§G1.4](#).

Table 2: Vowel extension rules. Exceptions are bracketed in blue. /a/ is the phoneme representation.

<sup>1</sup>Conjugation: change of word form to fit a given context.

Vowel to extend	Extend by appending		Example
	平仮名	片仮名	
/a/	あ		おばあさん、おかあさん
/i/	い		
/u/	う	ー	
/e/	い (え)		せんせい、がくせい、(おねえさん)
/o/	う (お)		きょう、おはよう、(おおきい)、(とおまわり)

## G1.5 Hepburn romanisation

Read main article on [Wikipedia](#).

The official (as of Jan 2024) romanisation system of Japan. There are only a few rules.

**Vowel extension (§G1.4.1)** When vowels “a”, “e”, “o”, “u” are extended as part of the same morpheme, it is expressed with a macron (overbar), and the extender vowel is dropped.

Extension of “i” and the “e+i” combination are exceptions: they remain repeated.

- お婆さん <sup>ばあ</sup>obaasan → obāsan
- 新潟 (city name) <sup>にいがた</sup>niigata
- 数学 <sup>すうがく</sup>suugaku → sūgaku
- お姉さん <sup>ねえ</sup>oneesan → onēsan
- 先生 <sup>せんせい</sup>sensei
- 遠回り <sup>とおまわり</sup>toomawari → tōmawari
- 勉強 <sup>べんきょう</sup>benkyou → benkyō

This does not apply when the repetition crosses word boundaries or morpheme boundaries.

- 邪悪 <sup>じゃあく</sup>jaaku
- 灰色 <sup>はいいろ</sup>haiiro

Also for terminal adjectives (???): いい ii

- 湖 <sup>みずうみ</sup>mizuumi

Also for terminal verbs (???): 食う <sup>く</sup>kuu (eat)

- 濡れ縁 <sup>ぬ えん</sup>nureen (“open veranda (roofed hallway)”)
- 小躍り <sup>こ おど</sup>koodori (dance of joy)
- 仔牛 <sup>こ うし</sup>koushi (calf)

Also for terminal verbs (???): 迷う <sup>まよう</sup>mayou (to get lost)

**片仮名 loanwords** The macron is used iff 「ー」 is used to extend a vowel.

**Japanese words adopted into English** Common place names like Tokyo, Kyoto and Osaka, while properly romanised as tōkyō, kyōto and ōsaka, are simply romanised as Tokyo, Kyoto and Osaka.

**Particles** When は、へ、を are used as particles, they are romanised as wa, e and o respectively.

**Syllabic ん** ん is romanised as n’ (with the apostrophe) if followed immediately by any lone vowel or “y”. This is to disambiguate んあ、んい、んう、んえ、んお、んや、んゆ、んよ (n’a, n’i, n’u, n’e, n’o, n’ya, n’yu, n’yo) from な、に、ぬ、ね、の、にゃ、にゅ、によ (na, ni, nu, ne, no, nya, nyu, nyo) respectively.

Examples: 簡易<sup>かんい</sup> kan'i (simple), 信用<sup>しんよう</sup> shin'yō (trust).

**Geminated consonants (っ、っ)** Double the next consonant, except if “ch” is repeated: in that case we use “tch” instead of “cch”.

Examples: 抹茶<sup>まっちゃ</sup> maccha → matcha, こっち kocchi → kotchhi

## G1.6 Rendaku

Read the main articles on [Tofugu](#).

Rendaku occurs when multiple words join together to form one **compound word**, and the initially unvoiced consonant of a second word becomes a voiced consonant. In written form, the second word's first syllable gains a dakuten/handakuten mark. All dakuten/handakuten-marked characters have voiced consonant beginnings (the “p” sound for handakuten-marked characters are considered to be “semi-voiced”).

Compound words comprise words that can independently exist as words on their own.

Here are some general rendaku rules, though note that exceptions exist:

- Basic conditions:
  1. Two words come together to form a compound word.
  2. The leading consonant of the second word is unvoiced.
  3. The leading consonant of the second word is one of the four sets of characters that can change into a voiced consonant with dakuten or handakuten (“k”, “s”, “t”, or “h”).
  4. Surrounding the leading consonant of the second word are voiced vowels (or sometimes nasals like ん: those do not stop rendaku).

- If the first word ends in つ or ん, the “h” leading consonant of the second word usually rendakus to “p”, “b” otherwise by default.

E.g. 出<sup>しゅつ</sup> + 発<sup>はつ</sup> = 出発<sup>しゅつぱつ</sup>.

E.g. 鉛<sup>えん</sup> + 筆<sup>ひつ</sup> = 鉛筆<sup>えんぴつ</sup>.

- When the second word is of Japanese origin (和語<sup>わご</sup>), and the basic conditions above are met, then it undergoes rendaku. When the second word is of Chinese origin or a foreign loanword (漢語<sup>かんご</sup>、外来語<sup>がいらいご</sup>), rendaku is *usually* prevented (unless the 漢語 is *vulgarised*, meaning it's become so common that it's treated as a 和語 word, which doesn't prevent rendaku).

This is for avoidance of ambiguity in spoken language: 和語 words mostly start with unvoiced consonants, so rendaku makes it clear that a compound word is used instead of two independent words. 漢語 and 外来語 words can and often start with voiced consonants, so rendaku would cause confusion by morphing rendaku-ed words into another different word.

A vulgarised exception is 夫婦<sup>ふうふ</sup> + 喧嘩<sup>けんか</sup> = 夫婦喧嘩<sup>ふうふけんか</sup> (喧嘩 is vulgarised). Other vulgarised words: 会社<sup>かいしゃ</sup>、写真<sup>しゃしん</sup>.

- When the first word is a 漢語 (in 漢語 + 和語 compound words, where the first element uses the 音読み reading and the second element uses the 訓読み reading), rendaku can be blocked. A notable example is 「大<sup>だい</sup>〜」.

In 熟語<sup>じゅくご</sup> compound words where both constituent words use 音読み, rendaku does not occur in the grand majority of cases.

- Lyman's Law: If the second word has a voiced consonant or handakuten anywhere in it, rendaku does not occur.

This may be explained by the observation that two voiced consonants don't appear together side by side in single 和語 words or phrases.

"Lyman's Law in reverse" says that sometimes, when the second word has a second voiced consonant, that can become unvoiced and the first consonant becomes voiced (rendaku). This is a rarity and won't be discussed further here.

- If voicing in the first word is too close to the second word, rendaku may (50/50) not occur. "Japanese doesn't really like having a bunch of dakuten and handakuten very close to each other."
- In words that come together to mean "X and Y," rendaku does not occur. In English, such words are rare but examples include "bittersweet", "stir-fry" and "sleepwalk".

E.g. 山川 can mean either "mountains and rivers" or "a mountain river". For the former, when both sides are "equal status", rendaku does not happen and it is read 山川<sup>やまかわ</sup>. For the latter, when the first word is a noun modifier for the second, rendaku happens and it is read 山川<sup>やまがわ</sup>.

E.g. 白黒<sup>しろくろ</sup> does not rendaku (white and black are equals), but 色白<sup>いろしろ</sup> and 色黒<sup>いろくろ</sup> do (colour is a descriptor of white/black).

- Repeating onomatopoeia do not rendaku.

E.g. キラキラ as the sound of something sparkling/glittering, does not rendaku.

- Certain prefixes block rendaku and certain suffixes resist rendaku.

Blocking prefixes:

- ▶ 半<sup>はん</sup>〜 (half)
- ▶ 御<sup>お</sup>〜/御<sup>み</sup>〜 (honorific)

E.g. お手洗<sup>てあらい</sup>い、御心<sup>みこころ</sup>

- ▶ 毎<sup>まい</sup>〜 (every)
- ▶ 一<sup>ひと</sup>〜 (one)
- ▶ 二<sup>ふた</sup>〜 (two)
- ▶ 片<sup>かた</sup>〜 (one-sided)

E.g. 片仮名<sup>かたかな</sup> (rendaku blocked) vs. 平仮名<sup>ひらがな</sup> (rendaku happens).

- ▶ 唐<sup>から</sup>〜 (Chinese)
- ▶ 白<sup>しろ</sup>〜 (white)
- ▶ 黒<sup>くろ</sup>〜 (black)

Resisting suffixes:

- ▶ 〜先<sup>さき</sup> (previous/tip)
- ▶ 〜紐<sup>ひも</sup> (string/cord)
- ▶ 〜浜<sup>はま</sup> (beach)
- ▶ 〜姫<sup>ひめ</sup> (princess)
- ▶ 〜煙<sup>けむり</sup> (smoke)
- ▶ 〜土<sup>つち</sup> (dirt)
- ▶ 〜潮<sup>しお</sup> (tide)
- ▶ 〜血<sup>けつ</sup> (blood)

・ ～<sup>した</sup>下 (below)

## G1.7 音読み and 訓読み and mixing the two

Read the main article on [Tofugu1](#) and [Tofugu2](#).

### G1.7.1 History and why 漢字 is the way it is

According to Tofugu, 漢字 was imported from China via religious texts (which the Japanese appreciated a lot). They merged the Chinese writing system into olden Japanese, but olden Japanese was already established and had its own set of pronunciations. The Japanese decided to adopt Chinese orthography, while co-opting both the Chinese-derived pronunciations (音読み) and the native Japanese pronunciations (訓読み).

While 漢字 words adopted in the above manner have both 音読み and 訓読み readings, some 漢字 words used today only have one:

- Those that only have 音読み readings were imported from China wholesale, either because the concept didn't yet exist in Japanese vocabulary, or because there were multiple incompatible native terms for the concept which cannot be unified properly (back then, Japan wasn't one unified country, but comprised unrelated groups with unique systems of government, and presumably sub-languages).

E.g. 肉 (meat)、材 (lumber)、感 (feeling)、点 (point)、医 (doctor)、茶 (tea)、胃 (stomach)、職 (work)、象 (elephant)、秒 (time second).

- Those that only have 訓読み readings were invented in Japan for a concept that was native to Japan.

E.g. 畑 (field)、姫 (princess)、匂い (fragrant)、峠 (mountain pass)、枠 (frame)、粳 (unhulled rice)、鰯 (sardine)、枥 (horses' chestnut)、込む (to be crowded)、咲く (to bloom).

Furthermore, olden China was always in a state of infighting and changing of powers. As power in China changed, so did the "official" language. The introduction of 漢字 from China to Japan happened over a long period of time, across many Chinese powers and thus many "then-official" versions of the olden Chinese language. This explains why some 漢字 have multiple 音読み readings: Japanese scholars decided to co-opt them as new readings came, without deprecating the "older" readings. (*"There were three major reading adoption periods in the history of the Japanese language: 呉音 (4–6th century; the Wu Dynasty's pronunciation), 漢音 (7–9th century; the Han Dynasty's pronunciation), and 唐音 (1185–1573 the modern day Mandarin Chinese" pronunciation).*)

The presence of multiple 訓読み has a different historical explanation. Spoken Japanese existed before written Japanese. Multiple similar "senses" of a concept (e.g. to raise, to rise, to climb) have different pronunciations in spoken language, but were gathered under the same orthography when the written language was developed (e.g. 「上～」).

## G1.8 When to use 音読み and 訓読み

- (lone 訓読み 漢字: majority) These comprise majority of beginner words found in textbooks. Mostly nouns. 訓読み is used.
- (lone 音読み 漢字: minority) These are characters with significant meaning, and includes things like counters and single 漢字 numbers. 音読み is used.

- (音読み 漢字 compounds: majority; 熟語) These are compound 漢字 words without any trailing 送り仮名. All the constituent 漢字 have Chinese origins and thus 音読み is used.
- (訓読み 漢字 compounds: minority) These are a special class of compound 漢字 and comprise nature concepts (especially the very Japanese ones) and cardinal directions. 訓読み is used for all the constituent 漢字.
- (訓読み 漢字 with trailing 送り仮名) Mostly adjectives and verbs, with the occasional nouns. When trailing 送り仮名 are present, 訓読み is used most of the time.
- (重箱読み 漢字 compounds) These compound 漢字 words take words with mixed origins: the first Chinese-derived and the second Japanese-derived. The first word takes 音読み, the second word takes 訓読み.

E.g. 金色 (gold colour).

- (湯桶読み 漢字 compounds) These compound 漢字 words take words with mixed origins: the first Japanese-derived and the second Chinese-derived. The first word takes 訓読み, the second word takes 音読み.

E.g. 場所 (place), 合気道 (martial arts Aikido).

- (当て字 I: borrow Chinese reading, invent meaning) Part of the precursor to modern-day 平仮名 and 片仮名: 万葉仮名. This archaic orthographic system used (multiple) Chinese characters to represent each Japanese sound.

E.g. 亜米利加 (America; today we use 米国 or アメリカ), 仏蘭西 (France; today we use 仏国 or フランス), 寿司 (sushi), 亜細亜 (Asia; today we use アジア), 珈琲 (coffee; today we use コーヒー), 流石 (as expected; today we use さすが), 沢山 (many; today we use たくさん).

- (当て字 II: borrow Chinese meaning, invent reading) These were adopted when a concept could not yet be expressed directly in the adopted Chinese orthography at the time, but when broken down into simpler concepts, can be expressed using Chinese orthography at the time. The pronunciation follows neither 音読み nor 訓読み of the borrowed Chinese orthography, but instead how the concept would be pronounced in spoken Japanese at the time (that does not later fall into 訓読み).

E.g. 煙草 (Tobacco (smoke + grass); today we use タバコ), 台詞 (speech; today we use セリフ), 南瓜 (Japanese squash/pumpkin; today we use かぼちゃ), 海老 (shrimp; today we use エビ), 海苔 (Japanese seaweed; today we use のり).

- (当て字 III: borrow both Chinese meaning and the associated reading) Sometimes Japanese scholars were able to find Chinese orthography whose meaning and reading were both desired when representing a concept. These are happy coincidences, perhaps.

E.g. 合羽 (raincoat; today we use カッパ), 倶楽部 (club; today we use クラブ), 算盤 (abacus; today we use そろばん), 剃刀 (razor; today we use カミソリ), 田舎 (countryside).

Honestly, any time you see pronunciations that don't fall under 音読み or 訓読み, it's safe to assume they're under 当て字, where things are borrowed and crafted from somewhere else; it's a bit unclear and the concept is probably even more complicated than what Tofugu presents (which is an incomplete overview): some of the pronunciations in 当て字 III come from nowhere.

- (lone 外来語 漢字) These are foreign loanwords that attained their own 漢字. These are units of measure (e.g. metric system) and common words. These readings have been adopted into 訓読み.

E.g. <sup>メートル</sup>米 (metres; today we use メートル or <sup>トル</sup>トル), <sup>ページ</sup>頁 (page; today we use ページ or <sup>ペ</sup>ペ), <sup>ゼロ</sup>零 (zilch; today we use ゼロ).

Finally, there's the bizarre class of Japanese names (名<sup>な</sup>の<sup>の</sup>乗り) which we best leave untouched here.

## G2 Basic grammar

This section will grant you an overview of basic grammatical structures. The vocabulary associated with this section is fragmented by nature and only present to illustrate the grammatical concepts; vocabulary required for day-to-day conversation is left to §G3.

Some preliminary notes:

- The articles “the” and “a” do not exist in Japanese.
- Japanese does not distinguish between a future action and a general statement (e.g. “I will go to the store” vs. “I go to the store”).

### G2.1 Building clauses and sentences

Read the main article on [Tofugu](#).

**Essential clause elements** are necessary parts of any clause. In 日本語, the only essential clause element is the **predicate**, which is the information about the subject (which is often omitted if clear from context). Concretely, the predicate is either a clause-trailing verb (e.g. 「食べる。」 is a complete sentence) or an [implied] state-of-being (e.g. 「学生[だ]。」 is a complete sentence). In contrast, in English, both subject and predicate are essential to every valid clause.

**Non-essential clause elements** add complexity to the conveyed meaning. There are multiple:

- An **object** is the element of a clause acted upon by a transitive verb (§G2.7.1). It is suffixed by を, the object marker particle.

A **direct object** is the person or thing that directly receives the action or effect of the verb. It answers the question “what” or “whom”. (**CAUTION:** Using the “The subject verbed what?” as a test for transitivity is **not foolproof** and doesn’t always work! It’s merely a crutch. This is because certain verbs that are purely transitive in English can be expressed intransitively in Japanese (and vice versa). An **indirect object** answers the question “for what”, “of what”, “to what”, “for whom”, “of whom”, or “to whom” and accompanies a direct object. (Source)

E.g. お寿司を作る。 (Make sushi.)

- A **subject** is the entity that controls the verb in a clause. It is suffixed by が, the subject marker particle.

E.g. お父さんがお寿司を作る。 (My father makes sushi.)

- A **topic**. This is NOT to be confused with a subject. In English. It is suffixed by は, the topic-binding particle. For further details, see §G2.2.

E.g. 毎週日曜日はお父さんがお寿司を作る。 (Every Sunday, my father makes sushi.; 日曜日: Sunday.)

- An **adverbial** provides information about the circumstances surrounding a sentence, such as the who, what, when, where, why and how. It is suffixed by the に and で particles.

E.g. 毎週日曜日はお父さんが台所でお寿司を作る。 (Every Sunday, my father makes sushi in the kitchen.; 台所: kitchen.)

- A sentence final particle adds nuance to the sentence. の adds an explanatory nuance (§G2.10.4). よ adds an informational nuance (§G2.12). ね adds an agreement-expecting nuance (§G2.12).

E.g. 毎週日曜日はお父さんが台所でお寿司を作るの。(Every Sunday, my father makes sushi in the kitchen.)

Japanese is primarily an SOV language, but this order is fluid and can be switched up to convey different emphases. We may bring parts-of-speech forwards to the beginning of sentences for emphasis. We may bring parts-of-speech backwards to the end of sentences to tuck away and de-emphasise information. This is possible due to the case-marking particles.

Complex sentences can be formed by linking clauses using **conjunctive particles** (e.g. から (therefore), ので, けど, なら), which makes the connection (e.g. the therefore relationship) more explicit, or the **conjugation** of verbs and い-adjectives (e.g. the てる form), which de-emphasises the connection. Apart from linking clauses, **embedding clauses** is also possible, typically used via **direct quotation** (using optional 「」 marks, or ～と言いました (said).), **indirect quotation** (using ～と思う; the と particle acts like a spoken quotation mark) and **noun modification by adjective-clauses**.

## G2.2 Topics vs. subjects: は、が particles

(Read discussion on [Reddit](#), and Tofugu pages for [clauses and sentences](#), [は](#), [が](#), and [their differences](#).)

### G2.2.1 Subject as part-of-speech, topic as meta-concept

The subject and topic of a sentence is hard to distinguish from an English perspective, since in English, the subject is also the topic by default. However, in Japanese, they are not necessarily the same. Whereas the subject can change from clause to clause, the topic can remain the same across numerous clauses (spanning a phrase, sentence or even paragraph). Note that the topic is not a grammatical part-of-speech! The topic is the theme of discourse.

### G2.2.2 は particle: the topic marker

は roughly translates to “as for” in English, but is used far more often than “as for”.

は casts **focus/spotlight on a topic**, and **implicitly conveys the idea that other potential topics are cast aside**. This strength of this **implicit contrast** depends on context and usage, specifically how unusual it is to see は used in place of case-marking particles. Here is an illustration of the implicit contrast:

- コーヒーを飲みますか? The を particle singles out coffee as the object (which the verb 飲み acts upon) of the question.
- コーヒーは飲みますか? The は particle shines the spotlight on coffee, but implies the existence of other drinks. The speaker may be talking about other drinks, then moved the conversation to coffee. The speaker may want to offer coffee but imply the availability of other options.

The topic is always something already in the listener’s consciousness. Therefore, in clauses containing は, emphasis is placed on the new information following the particle は.

Here are its various purposes:

**は as a topic marker** Suffixed to a noun-phrase which is the intended topic.

Examples (topic is bolded):

- 日本語は面白い。(Japanese is interesting.)

- これは何ですか? (What's this?; なに is known from context; “this”)
- <sup>なつ</sup>夏は日本へ行くつもりです。 (I plan to go to Japan in the summer.; つもり: plan/intention; the speaker assumed that the listener doesn't know that they were planning to go to Japan.)

日本へ行くのはいつですか? (When is it that you're going to Japan?; の turns the verb into a noun-phrase; いつ: when)

**は for contrasting two topics** This happens when two (or more) topics are used in the same sentence.

Examples (topic is bolded):

- E.g. **東京**は物価が高いけど、**田舎**は物価が安い。 (Tokyo has a high cost of living, but the countryside has a low cost of living.; 物価: cost of living; 田舎: countryside; 安い: cheap).
- E.g. **お肉**は食べないけど、**魚**は食べるよ。 (I don't eat meat, but I do eat fish.)

If the effect of contrast isn't required, then が is usually used instead:

- E.g. **東京**が物価が高い。 (The cost of living of Tokyo is high.)
- E.g. **お肉**は食べない。 (I don't eat meat, (but...))

**は in middle of negative い-adjectives to add implicit/explicit nuance/spotlight** The added nuance is like that of “while”/“although”/“that's not the whole story”, and the clause containing は X い is typically followed by a clause adding continuation (though not compulsory, if the nuance's content is implied).

E.g. 日本語は難しくない。 (Japanese is not difficult.)

E.g. 日本語は難しく**はない**[けど、ただ時間がかかる]。 (It's not (exactly) difficult, it's just time-consuming.; かかる: take a resource)

E.g. 日本語は難しく**はありませんか**、時間がかかります。 (It's not (exactly) difficult, it's just time-consuming.; formal language)

E.g. 日本語は難しく**はある**けど、面白い。 (It is difficult, but it's also fun.; ある: exist, opposite of ない)

**は in middle of negative nouns and な-adjectives to add implicit/explicit nuance/spotlight** Similar effect to the above.

E.g. 有名**ではない**[が、人気はある]。 (They're not (exactly) famous, but they are popular.; 有名: famous; 人気: popularity; They're not exactly famous, but they are popular.)

E.g. 先生**ではありませんが**、説明が上手な人です。 (They're not (actually) a teacher, but they are really good at explaining things.)

人気 is a noun that is typically used as 人気がある or 人気がない. 人気じゃない is possible, means the same thing, but is colloquial.

These are examples of the compound particle では.

**は incompatible with question words, but commonly used in answers** は cannot be suffixed to question words like 誰, 何 and どこ (except special circumstances). The topic is always something that is already in the listener's consciousness: it isn't unknown! Instead, question words are suffixed by が, を, etc. depending on their role in the sentence.

It is however common to answer such questions は to establish the now known topic.

E.g. 誰がいましたか? (Who was there?)

E.g. 誰が<sup>やまだ</sup>山田さんですか？山田さんはあの人です。(Who is Yamada-san? That's Yamada-san.)

**は suffix in compound particles to add implicit/explicit nuance/spotlight** When forming compound particles, は cannot be suffixed to も, が or を.

- は can either “replace” に or become には.

E.g. 日本に<sup>い</sup>行ったことがある。(I've been to Japan; neutral statement.)

E.g. 日本[に]は行ったことがある。(I've been to Japan; + implicit comparison with other countries, perhaps I've never been to those.) (は is more casual than には.)

E.g. 台<sup>だい</sup>所<sup>どころ</sup>で犬<sup>いぬ</sup>が吠<sup>ほ</sup>えています。(The dog is barking in the kitchen; neutral statement.)

E.g. 台所<sup>だいどころ</sup>では犬<sup>いぬ</sup>が吠<sup>ほ</sup>えています。(The dog is barking in the kitchen; + implicit comparison with other locations.)

E.g. 弟<sup>おとうと</sup>と映画館<sup>えいが かん</sup>に行きました。(I went to the movies with my younger brother; neutral statement.)

E.g. 弟<sup>おとうと</sup>とは映画館<sup>えいが かん</sup>に行きました。(I went to the movies with my younger brother; with focus cast on brother, and implicit nuance that we don't know who else I did or didn't go with.)

**は to convey hesitation** Usually prefixed to ね to form the compound particle はね in such scenarios.

E.g. お寿司は[ね]... (Hmm, sushi...)

**は for changing scenes** The speaker can intentionally break the conversation's storyline or momentum to emphasise something. This is done by repeating and re-shining the spotlight on the topic, even though it's already obvious to the listener.

E.g. 昨日<sup>きのう</sup>は<sup>お兄ちゃん</sup>が勉強<sup>きんぎょう</sup>を教<sup>おし</sup>えてくれた。まず、英語<sup>えいご</sup>の勉強<sup>きんぎょう</sup>を教<sup>おし</sup>えてくれて、それから国語<sup>こくご</sup>の勉強<sup>きんぎょう</sup>だった。でも、算数<sup>さんすう</sup>の宿題<sup>しゅくだい</sup>をしている途<sup>と</sup>中に、お兄ちゃん<sup>お兄ちゃん</sup>はゲームを始めた。(Yesterday, my big brother helped me study. To start with, he helped me with English, and then with Japanese. But he started playing a game while we were in the middle of doing my math homework; focus/topic shifted from brother teaching to brother playing game.)

**Softening implicit comparison with comma 、 (in writing only)** This is commonly done with time phrases such as 来週<sup>らいしゅう</sup>、先月<sup>せんげつ</sup>、今年<sup>ことし</sup>.

E.g. 今年<sup>ことし</sup>、日本<sup>にほん</sup>に行くんです。(This year I'm going to Japan.)

E.g. 日本語<sup>にほんご</sup>、面白い。(Japanese is interesting.)

E.g. 少し、食べました。(I ate a little.)

Note that は is NOT a case-marking particle, whose job is to mark the grammatical role an element plays in a sentence. Instead, it binds a sentence to some known context. “は tells us nothing about the grammatical role the item it marks plays in a sentence, it only establishes that item as the context under which the rest of the sentence holds true. So any word or phrase can become the topic, regardless of whatever grammatical role it plays otherwise. So the topic can be the subject, or the topic can be the direct object, or the topic can be the indirect object, or an adverb, etc. The topic can be anything.”

Also note that は cannot be used in adjective phrases if there is no contrast involved:

- ジェニー[の/が/は]落ちた学校に私は受かった。(I was accepted by the school that Jenny failed to get into.)
- ジェニー[の/が]落ちた学校にわたしも落ちた。(は is illegal here because there is no contrast!)

### G2.2.3 が particle

Read the main article on [Tofugu](#).

が is simply the grammatical subject marker particle. が is suffixed to noun phrases. It “points a finger at” the subject of a sentence, and implicitly puts emphasis on that subject (making it clear nothing else is the subject).

E.g. あの犬[が]吠えた。(That dog barked.)

E.g. 誰か[が]いる。(Someone’s here.)

E.g. この納豆[が]おいしい。(This natto is delicious.)

The subject is often omitted if clear. In fact, inclusion of the subject in cases where it’s usually omitted brings about a kind of emphasis (e.g. “Did our dog do something to you? *Your* dog barked.”).

Sometimes, が itself is omitted instead, especially in spoken context. There is no change to the level of emphasis. This is up to personal preference. However, if the clause carries the meaning of singling out a particular member from a crowd, then が cannot be omitted: ジェニー **が** 犯人だ。

## G2.3 Prelude: Basic grammatical structures

Conjugation is the change in **verb** or **い-adjective** form to fit contexts.

- うん、ううん: informal yes/no
- でも: but

## G2.4 Expressing state-of-being

There is no “to be” (is, are, was, were, am) in Japanese.

- だ: declarative/assertive present state-of-being, suffixed to nouns and な-adjectives only.

An “assertive” marker. Using it without a communicative particle like よ or ね would sound standoff-ish and abrupt (i.e. rude) in spoken Japanese. A sentence ending with だ wouldn’t sound like something that’s used in an actual conversation, and is only natural in select cases:

- ▶ inside of indirect quotations (when paraphrasing what someone else said).

E.g. 人間は火星に住めないと思う。(I don’t think that humans can live on Mars.)

E.g. 近所の人から桜が満開だと教えてもらった。(A neighbour told me that the cherry blossoms were in full bloom.)

- ▶ when you find or notice something

E.g. あ、[雪/雨/虹]だ! (Ah, it’s snowing/a rainbow!)

E.g. あ、電話だ。(Ah, it’s my phone.)

- ▶ when you feel strongly about something

E.g. 有名なアイドルのこと写真撮ったんだ！ (I took a picture with a famous idol! 撮る: to take a picture, variant of 取る.)

E.g. 本当だ！ (It's true!)

E.g. はあ、明日は漢字のテストだ。 (Ahh, there is a Kanji test tomorrow.)

- じゃない: negative present state-of-being, suffixed to nouns and な-adjectives only.
- だった: past state-of-being, suffixed to nouns and な-adjectives only.
- じゃなかった: negative past state-of-being, suffixed to nouns and な-adjectives only.

E.g. 元気？元気[だ]。 (Greeting and response)

E.g. 元気じゃない / 元気だった / 元気じゃなかった。

## G2.5 Starter particles は、も、が

For は and が, see §G2.2.

- は: introductory topic marker “as for/about”, suffixed to the topic you’re introducing.

Unless you’re making a comparison, you usually do not use more than one は in a sentence (see discussion on [StackOverflow](#)).

E.g. アリスは学生？うん、学生。 (Alice, are you a student? Yeah, I am.)

E.g. 今日は試験だ。ジョンは？ジョンは明日。 (Today is exam. What about John? His exam is tomorrow.)

- も: inclusive topic marker (“also”), suffixed to the topic you’re including.

E.g. アリスは学生？うん、トムも学生。 (Alice, are you a student? Yeah, and Tom is a student too.)

E.g. アリスは学生？うん、でもトムは学生じゃない。 (Alice, are you a student? Yeah, but Tom is not a student.; **it is incorrect to use も here, as it is not inclusive with the positive state-of-being!**)

E.g. アリスは学生？ううん、トムも学生じゃない。 (Alice, are you a student? Nope, and Tom is also not a student.)

- が: identifier/subject marker “the one”, suffixed to a question or the identified. Used when the topic is unknown, and you are either asking for what the topic is, or identifying what the topic is.

E.g. 誰が学生？私が学生。 (Who the one student? Me the one student.)

## G2.6 Adjectives

Adjectives (adjective phrases) modify a noun that comes after it.

- な-adjectives: act like nouns and use the same particle rules as in §G2.5. Use な to directly modify the noun that comes after な, only in the present-positive case.

E.g. 静かな人、きれいな人。 (Quiet person, pretty person.)

E.g. 友達は親切。 (Friend is kind.) 友達は親切な人だ。 (Friend is kind person.)

E.g. ボブは何が好き[じゃない/だった/じゃなかった]? (What does/doesn't/did/didn't Bob like?) ボブは魚が好き[だ/じゃない/だった/じゃなかった]。(Bob likes/doesn't like/liked/didn't like fish.)

E.g. 魚が[好きな/好きじゃない/好きだった/好きじゃなかった]人。(Person that likes/does not like/liked/did not like fish.) The entire clause before 人 is an adjective.

E.g. 魚が好きじゃない人は、肉が好きだ。(Person who doesn't like fish likes meat.)\ E.g. 魚が好きな人は、野菜も好きだ。(Person who likes fish also likes wild vegetables.)

- い-adjectives: always end with 平仮名「い」 that is not part of a 漢字 word's pronunciation: it must literally be a 平仮名「い」. As examples, 好き、きれい (綺麗)、きらい (嫌い) are all not い-adjectives; they are な-adjectives. 嫌い being a な-adjective has to do with 嫌い being derived from the verb 嫌う. **REVISIT FUTURE**

Do not attach the だ suffix to い-adjectives, just as you don't use だ with じゃない。な is not applicable for い-adjectives: there is no need for any attachments.

E.g. 値段が<sup>ねだん</sup>高い<sup>たか</sup>レストランはあまり好きじゃない。(I **don't really** like expensive restaurants.)<sup>2</sup>

Regarding conjugation, one い-adjective family is an exception: いい. Historically, the word for good changed over time from 良<sup>よ</sup>い to いい, but conjugations are still take 良<sup>よ</sup>い as the base. Same applies to 格<sup>かつ</sup>好<sup>こ</sup>いい, which takes 格<sup>かつ</sup>好<sup>こ</sup>良<sup>よ</sup>い as the base.

Table 3 shows the conjugations and usage syntax for な- and い- adjectives.

Table 3: Adjective conjugations. I purposely use よかった instead of 良かった (and their variants) here to show that you can use either; it's up to personal preference. I personally prefer the use of 漢字 (i.e. 良かった) because it can be more specific and it's easier to read (in that at a glance, it's easier to derive meaning from 漢字's widely varying word shapes, compared to a sea of 平仮名 characters). **Note however that 良<sup>よ</sup>い is usually written in 仮名 alone when used as part of conjugations, as in this table.**

	Positive	Negative
Present	<na-adj>な<nn>	<na-adj>じゃない<nn>
	<i-adj root>い <nn>	<i-adj root>くない <nn>
	いい <nn>	よくない <nn>
	かっこいい <nn>	かっこよくない <nn>
Past	<na-adj>だった<nn>	<na-adj>じゃなかった<nn>
	<i-adj root>かった <nn>	<i-adj root>くなかった<nn>
	よかった <nn>	よくなかった<nn>
	かっこよかった <nn>	かっこよくなかった <nn>

## G2.7 Verbs

Read the main article regarding verb classes and conjugations on [Tofugu](#).

<sup>2</sup>あまり is typically used as an intensifier modifier for *negative* adjectives: “don't really, 25-50%”. It can also be used as a modifier for positive adjectives, excessive“, but in those cases it must be trailing: 食べるあまり、悲しさのあまり。(MT)

Verbs always come at the end of clauses.

Verbs are categorised into three groups, as shown in Table 4. Be flexible: all these terms are used in different textbooks and dictionaries. Thankfully, they are easy to remember, along with the observation that there are way more Group I verbs than Group II verbs, and there are only two Group III verbs (or up to a dozen, depending on how you count them).<sup>3</sup>

Table 4: Verb classifications. \*There isn't a Japanese term for exception verbs; する and 来る are the only members of the 不規則動詞 subclass.

	Group 1	Group 2	Group 3
	Pentagrade verb ごだんどうし 五段動詞	Monograde verb いちだんどうし 一段動詞	Irregular verb ふきそくどうし 不規則動詞*
Synonyms	Godan verb	Ichidan verb	Special class
	Group I verb	Group II verb	Group III verb
	う-verb	る-verb	Exception verb
	Consonant-root/stem verb	Vowel-root/stem verb	-

In a nutshell, **る-verbs is the class of almost all -iru/-eru verbs**. Exceptions include 帰る、切る、知る which are う-verbs.

Conjugations for verbs are the most complicated among all parts-of-speech, and are shown in Table 6.

The reason for the class names are as such:

- う-verbs all end with the ～う sound. As う-verbs conjugate, the ending ～う sound shifts through all five vowels ～あ (negative)、～い (polite)、～う (dict)、～え (potential)、～お (volitional), thus the name 五段 (five-level).

Conjugation of verbs occurs at the phonological level (sounds of the language), which transcends the abilities of the orthography. The **root/stem** of verbs stops at the terminal consonant, thus the name consonant-root/stem. (E.g. the root of 聞く is /kik/ and this remains unchanged through conjugations!)

- る-verbs all end with the る character. As る-verbs conjugate, the る character is replaced for other endings. The **root/stem** (the part before the る ending) remains unchanged through conjugations and doesn't cycle through the five vowels, thus the name 一段 (one-level). The root/stem stops at the terminal vowel, thus the name vowel-root/stem. (E.g. the root of 食べる is /tabe/ and this remains unchanged through conjugations!)

Since there is no consensus on the definitions of root/stem, I'll use "root" to refer to /kik/, and "stem" to refer to the stem form 聞き.

### G2.7.1 Transitive and intransitive verbs

Read the main article on [Tofugu](#).

A **transitive verb** takes a direct object, while an **intransitive verb** does not take a direct object. A **direct object** is the person or thing that directly receives the action or effect of the

<sup>3</sup>Mnemonic I'm using: Group I is the most superior; 五段 is superior to 一段; う comes before る in the 平仮名 alphabet chart.

verb. It answers the question “what” or “whom”. (**CAUTION:** Using the “The subject verbed what?” as a test for transitivity is **not foolproof** and doesn’t always work! It’s merely a crutch. This is because certain verbs that are purely transitive in English can be expressed intransitively in Japanese (and vice versa). An **indirect object** answers the question “for what”, “of what”, “to what”, “for whom”, “of whom”, or “to whom” and accompanies a direct object.} (Source)

Some verbs have two forms: transitive and intransitive. These two forms sometimes have different pronunciations. I guess it comes down to experience. Examples shown in Table 5.

There are no easy tricks to tell whether a verb is transitive or not. There are no simple rules that say a particular 送り仮名 implies a certain transitivity. Japanese verbs are a mess!

**DO NOT** confuse transitivity with passiveness. English dictionaries like to define verbs using the “to ...” construct, and this is carried over to English-Japanese dictionaries. Intransitive verbs are often defined using passive voice, but

passive voice  $\nRightarrow$  verb is intransitive  
verb is intransitive  $\nRightarrow$  passive voice

A counterexample to the first implication is “The apple was eaten.”. Here, “eat” is transitive (the direct object is the apple, and the subject, now oblique/non-obligatory, is omitted)! A counterexample to the second implication is “I slept”. Here, “sleep” is intransitive, and active voice is used.

Thus we can’t use the passive voice as a marker for intransitivity. In fact, in Japanese, the passive voice has a conjugation of its own, which applies for both transitive and intransitive verbs (yes, intransitive verbs in Japanese can take passive voice too, §G4.1.2). Take special care NOT to interpret the passive voice “to be ...” (endemic to English definitions) in §GA.1.4 as equivalent to intransitivity. **Transitivity and passiveness are intertwined (SL) but remain independent concepts.**

In fact, in English only and not in Japanese, the converse of the two implications above are true, because intransitive verbs do not have a passive form, due to the lack of objects (and thus no object to promote to subject role, which is part of passivisation).

passive voice  $\Rightarrow$  verb is transitive  
verb is intransitive  $\Rightarrow$  active voice

(In fact these two are now contrapositives, i.e. they convey the same meaning.)

Table 5: Example transitive verbs and their intransitive counterparts.

Transitive	Meaning	Intransitive	Meaning
起こす	to pick up	起きる	to rise

## G2.9 Verb particles を、に、へ、で

- を: direct object marker, suffixed to the target object of transitive verbs.

E.g. 魚を食べる。(Eat fish.)

E.g. ジュースを飲んだ。(Drank juice.)

Direct objects can be **places** in Japanese too, since the motion verb is done *to* the place.

This is the only exception where を can be used for intransitive verbs. <location>を<motion verb> expresses the meaning that the motion verb is performed to traverse the location.

E.g. 街をぶらぶら歩く。(Aimlessly walk through town.; ぶらぶら: aimlessly, 歩く: walk (intransitive)).

E.g. 高速道路を走る。(Run through expressway.; 走る: run (intransitive))

**Invisible を in <noun>を**する: する (do) can be suffixed to nouns, and the を while technically needed, is optional.

E.g. 毎日、日本語を勉強をする。(Study Japanese everyday.; 勉強をする)

E.g. メールアドレスを登録<sup>とうろく</sup>した。(Registered email address.; 登録<sup>とうろく</sup>する)

- に: target marker, suffixed to the target (physical or abstract) of any verb (transitive or non-transitive). The target is emphasised as the final destination. The notion of a “target” is not restricted to motion verbs; the location of objects is the target of the verbs for existence (ある and いる); time (e.g. today, last week) is also a common target.

% E.g. ボブは日本に行った。(Bob went to Japan.)

E.g. 家<sup>いえ</sup>に帰らない。(Not go back home.; 家<sup>いえ</sup> means home, 家<sup>うち</sup> means own home.)

% E.g. 部屋<sup>へや</sup>に来る。(Come to room.)

E.g. 椅子<sup>いす</sup>が台所<sup>だいどころ</sup>にあった。(Chair was in the kitchen.)

E.g. 猫は部屋にいる。(Cat is in room.)

E.g. いい友達<sup>ともだち</sup>に会<sup>あ</sup>った。(Met good friend; past tense of 会<sup>あ</sup>う.)

E.g. ジムは医者<sup>いしや</sup>になる。(Jim will become doctor; なる: become)

E.g. 先週<sup>せんしゅう</sup>に図書館<sup>としょかん</sup>に行った。(Went to library last week.)

When suffixed to time, に is not always required. Its presence emphasises a “promise” element to the target. To remove this emphasis, use 「、」 instead.

E.g. 友達<sup>ともだち</sup>は、来年<sup>らいねん</sup>に日本に行く。(Friend go to Japan next year.)

To mean “from”, use the 「から」 from-marker particle.

E.g. アリスは、アメリカ<sup>き</sup>から来た。(Alice came from America.; past tense of 来る<sup>くる</sup>)

The start and end can be specified with 「<from>から<to>まで」.

E.g. 宿題<sup>しゅくだい</sup>を今日<sup>けふ</sup>から明日<sup>あした</sup>までする。(cWill do homework from today to tomorrow.)

- へ: direction marker, suffixed to direction of verbs (transitive or non-transitive). Pronounced え. Unlike に, which specifies target/destination, へ specifies the general direction we're heading towards, from the starting point. Also, unlike に, it does not guarantee that the target is the final destination. へ is restricted to verbs with a physical direction (in the physical or abstract sense) like 行く、来る、向かう; verbs like なる (become) have no direction associated with it and so clauses containing なる as the trailing verb cannot use へ!

E.g. 部屋<sup>へや</sup>{に/\*へ\*}来る。(Come {towards/to} room.)

E.g. 勝ち<sup>かち</sup>へ向かう。(Go towards victory.)

- で: context marker; “by way of”. It provides supplementary context: where, what, how.

E.g. 映画館<sup>えいがかん</sup>で見た。(Saw at movie theatre.)

E.g. バスで帰る。(Go home by bus.)

E.g. レストランで昼<sup>ひる</sup>ご飯を食べた。(Ate lunch at restaurant.)

Note that を can only be used with transitive verbs, unless the direct object is the **location** of an intransitive motion verb, as mentioned above when introducing 「を」.

E.g. 私が電気<sup>でんき</sup>をつけた。(I turned on the lights; past tense of つける)

E.g. 電気<sup>け</sup>を消す。(Turn off the lights.)

E.g. 電気がついた。(The lights turned on; **incorrect to use を here as つく is intransitive and doesn't have any active agent**)

E.g. 電気が消えた。(The lights turned off; past tense of 消える; **incorrect to use を here as 消える is intransitive and doesn't have any active agent**)

E.g. 誰が窓を開けた? (Who opened the window?; 窓: window)

E.g. 窓がどうして開いた? (Why did the window open?; past tense of 開く; **incorrect to use を here as 開く is intransitive and doesn't have any active agent**)

E.g. 部屋を出た。(past tense of 出る)

### G2.9.1 なにで and なんで in questions

“What” is expressed as **なに**. “Why” is expressed as どうして (proper)、なぜ (forceful/formal)、**なん****で** (colloquial). Note that **なん****で** has nothing to do with the で particle; it is a completely separate word.

When asking a question as a speaker, use the correct one: なにで for “what”, and なんで for “why”. When reading written text, obtain context from the answer. **As a general rule of thumb, asking why (なんで) is much more common.**

E.g. 何で来た? バスで来た。(Came by way of what? Came by way of bus.) (So in this case, the question is read なにで来た?)

E.g. 何で来た? 暇だから。(Why did you come? Because I am free.) (So in this case, the question is read なんで来た?)

Note that だから here has got nothing to do with から as in “from”, we’ll see this later in compound sentences (§G3.6.3).

### G2.9.2 Compound particles には、にも、へは、へも、では、でも to set location topic

に、へ、で can be suffixed with は/も to set the topic/inclusive topic when the location becomes a topic.

E.g. 学校に行った? 行かなかった。図書館には? 図書館にも行かなかった。  
(Did you go to school? Didn't go. What about library? Also didn't go to library.)

E.g. どこで食べる? イタリアレストランでは思う? (Eat where? How about Italian restaurant?; 思う: think)

### G2.9.3 Particle は to set direct object topic

を cannot form compound particles. To set direct object as topic, simply use は.

E.g. 日本語{を/は}習う。(Learn Japanese.; **It is incorrect to use をは; that compound particle doesn't exist.**)

## G2.10 Noun modification

な-adjectives and い-adjectives can be used to modify a following noun, using “connectors” like {な、じゃない、だった、じゃなかった} and {の、くない、かった、くなかった} respectively.

Verbs and nouns too can be used to modify a following noun.

### G2.10.1 Relative verb clauses as adjectives: verbs modifying following nouns

Relative verb clauses (verb phrases) can be directly used to modify nouns.

- (present-positive) ボブは、いつも勉強する人だ。(Bob is a person who always studies.)
- (present-negative) 赤いズボンを買った友達はボブだ。(Friend who buy red pants is Bob.;  
ズボン: pants)
- (past-positive) 先週に映画を見た人は誰？(Who is person who watched movie last week?)
- (past-negative) 晩ご飯を食べなかった人は、映画で見た銀行に行った。(Person who did not  
eat dinner went to the bank she saw at the movie.)

### G2.10.2 Noun chain

A string of present-positive nouns is grammatically correct only if they are not meant to modify each other.

E.g. 国際教育センタ (International Education Centre)、登場人物 (stage character)、立入禁止  
(no entry/trespassing)、通勤手当 (travel allowance).

### G2.10.3 Noun phrases as adjectives: nouns modifying following nouns

Present-positive modifiers require noun-related particles (と、や、とか、の, see §G2.10.4). The other three tenses (present-negative, past-positive, past-negative) can directly modify nouns without any additional particle.

- (present-negative) 学生じゃない人は、学校に行かない。(Person who is not a student do not go to school.)
- (past-positive) 先週医者だったボブは、仕事を辞めた。(Bob who was a doctor last week quit his job.)
- (past-negative) 友達じゃなかったアリスは、いい友達になった。(Alice who was not a friend, became a good friend.)

### G2.10.4 Noun-related particles と、や、とか、の

Noun-related particles are used to connect nouns together.

- と: inclusive noun connector (exclusive listing or together-with). It is used *between nouns in a list, not as a marker at the end of each noun*. It is similar to 「も」 in terms of *inclusivity*. It can also be used to show an action was done together with something or someone.

E.g. 本と雑誌と葉書を買った。(Bought book, magazine and postcard.)

E.g. 友達と話した。(Talked with friend.)

E.g. 先生と会った。(Met with teacher.)

- や: noun vague listing connector. Similar to と, it is used *between nouns in a list, not as a marker at the end of each noun*, with the implied meaning that the list is non-exhaustive, and some items on the list may not apply. In English, this is like the “and/or, etc.” constructs.

E.g. 飲み物やカップやナプキンは、いらない？(You don't need (things like) drink, cup, or napkin, etc.?.; present-negative of いる as in 要る)

E.g. 靴やシャツを買う。(Buy shoes and shirt, etc.)

- とか: vague listing particle (colloquial). Used exactly like や but in informal settings. It is used *between nouns in a list, not as a marker at the end of each noun*.

E.g. 飲み物とかカップとかナプキンは、いらない？(You don't need (things like) drink, cup, or napkin, etc.?.; present-negative of いる as in 要る)

E.g. 靴<sup>くつ</sup>とかシャツを買う。(Buy shoes and shirt, etc.)

- の: possession marker, generic noun, or explanatory particle. The の particle has three uses:

**Possession marker** <Owner>の<ownee>. Can refer to hierarchical classifications too.

E.g. ボブの本。(Book of Bob).

E.g. 本<sup>ほん</sup>のボブ。(Bob of book; probably a mistake.)

E.g. ボブは、アメリカの大学の学生だ。(Bob is student of college of America.)

The ownee (noun that is modified) may be omitted if clear from context.

E.g. そのシャツは誰の<sup>その</sup>シャツ?ボブの<sup>ボブ</sup>シャツだ。(Whose shirt is that shirt? It is the shirt of Bob.)

Note that この、その、あの are abbreviations of ことの、そのの、あれの respectively.

**Generic noun (nominaliser)** The の particle can be suffixed to relative clauses (adjective-phrases and verb-phrases) to represent a generic noun, taking the place of an actual noun. This usage allows us to treat adjectives, adjective-phrases, verbs and verb-phrases as nouns using a の suffix. Then, particles applicable to nouns can be used as a suffix to the noun-phrase: は、も、が、を. Detailed uses are in §G2.10.6.

E.g. (な-adjectives) 静かな<sup>しずかな</sup>のが、アリスの部屋だ。(Quiet one is room of Alice.) (Note that the な cannot be dropped! All previous rules still apply.) 「静かな部屋が、アリスのだ。」 (“The quiet room is Alice’s.”) is also ok.

E.g. (い-adjectives) 白い<sup>しろい</sup>のは、かわいい。(Thing that is white is cute.)

E.g. (verbs) 毎日勉強<sup>じゅうぎょう</sup>するのは大変。(Studying every day is tough.)

E.g. (verbs) 授業<sup>じゅうぎょう</sup>に行くのを忘れた。(Forgot the event of going to class.)

E.g. (relative clause) 毎日同じ物<sup>おな</sup>を食べるのは、面白くない。(It’s not interesting to eat the same thing every day.)

Alternatively, 物<sup>もの</sup> and こと can be used for generic objects and events respectively, instead of の.

E.g. 白い物<sup>もの</sup>は、かわいい。(Thing that is white is cute.)

E.g. 授業<sup>じゅうぎょう</sup>に行くことを忘れた。(Forgot the thing of going to class.)

Note that in the case of verbs/relative verb clauses (verb phrases), the plain form must be used; the polite ~ます form is wrong.

E.g. お父さんが買ったのは、バナナです。(The thing that dad bought, is a banana.; It is incorrect to use 買いました in place of 買った.)

The nominaliser の can be modified by prefixing the *こそあど* words (Japanese demonstratives). These are *こんな*、*そんな*、*あんな*、*どんな* and *こういう*、*そういう*、*ああいう*、*どういう* (this kind/that kind/that kind/what kind, respectively for both; we use the former set in more emphatic settings and the latter in more literal settings, see discussion on [StackOverflow](#)). These correspond to the pronouns *これ*、*それ*、*あれ*、*どれ* (this, that, that (far), which (between 3 or more)).

E.g. *こんな*の要らないよ。(I don’t need things like this.)

E.g. **そういうのは、前もって教えてください。** (Please let me know things like that in advance.)

**Abstract noun/explanatory の** as a sentence-ending particle conveys an explanatory tone in responses, and explanation-seeking tone in questions. It represents the abstract noun “the thing is...”, and is believed to be an abbreviation of 「～のです」. の can also be used as a suffix to な-adjectives or state-of-being noun-phrases, though in those cases **なの** must be used in order to differentiate it from the possession marker or generic noun purposes of の. **One exception to this disambiguating function is な-adjectives: both generic noun and explanatory purposes use ～なの. Prefer ～なん{だ/です} for explanatory.**

E.g. <sup>いま</sup>今は<sup>いそが</sup>忙しい**の**?今は忙しい**の**[だ]。 (Is it that you are busy now? The thing is that I’m busy now.; 忙しい: busy; the absence of the trailing だ in the response is feminine; adult males add the だ in the response; **だ cannot be used in the question**)

E.g. ジム**のだ**。 (It belongs to Jim.)

E.g. ジム**なの**だ。 (It is Jim; with explanatory tone.)

This explanatory tone results in の being used in strong commands, explaining things you should or shouldn’t do, or explaining parts of a procedure.

E.g. <sup>じゅぎょうちゅう</sup>授業中は、おしゃべりしない**の**! (Don’t chat during class!; しゃべる: chat)

E.g. まずは、<sup>あら</sup>洗う**の**? (Do you clean first?) まずは、あらう**の**[です]。それで、きれいになったら、こうやって切る**の**[です]。 (First, clean it. Then, once it is clean, cut it like this; the 「です」, if dropped, causes the reply to become informal/childish/feminine.)

The の in sentence-end expressions are typically substituted by ん as it’s easier to say (e.g. のだ → んだ). んだ is however also used with all forms of nouns, adjectives, and verbs, and has its own set of conjugation rules, as shown in Table 7.

E.g. ジム**なんだ**。 (It is Jim; with explanatory tone.)

Further examples with polite speech:

E.g. どうして<sup>おく</sup>遅れた**{の/ん}**ですか? (Why were you late?)

E.g. どうしてパーティーに行きませんでしたか?時間がなかった**{の/ん}**です。 (Why didn’t you go to the party? Because I didn’t have time.; polite)

E.g. パーティーに行かなかったの?うん、時間がなかった**{の/のだ/んだ}**。 (You didn’t go to the party? Yeah, because I didn’t have time.; casual)

E.g. 私は学生**な{の/ん}**で、お金がない**ん**です。 (I am a student, therefore I have no money.)

E.g. ここは静か**な{の/ん}**で、とても<sup>おだ</sup>穏やかです。 (It is quiet here, therefore it is very calm here.)

E.g. **な{の/ん}**で、友達に会う時間がない。 (Therefore, there is no time to meet friend.; this omits the reason and thus the な is compulsory, see §G3.6.3)

For verbs, any form is usable (beyond {positive, negative} × {present, past}), except forms like the command form or the volitional form, which do not make sense for explanations. Also, the

polite verb form 「～ます」 and polite い-adjective form 「～です」 cannot be used with 「～んだ」; use the plain form. If you want to be polite, use 「～んです」.

の is used in formal settings and ん in informal settings. The first casual form attaches んだ to any tense of a noun/adjective/verb; the second casual form attaches んだ to the dictionary-form, then conjugating the だ. Both casual forms have slightly different nuances.

- の/のだ/のです/んだ/んです: these are simply the sentence-ending explanatory の particle.
- なんだった: used to express that you just remembered to do something, typically used with そういえば.

E.g. あ、そういえば出かける<sup>で</sup>なんだった。(Ah, that reminds me, I am going out.)

- んじゃない/んじゃありません: mildly slang, to prohibit or request that something not be done: “don’t, mustn’t”. The latter form is more formal, and used when the speaker wants to forbid something but not sound angry (e.g. adult talking to a child).

E.g. 馬鹿にする<sup>で</sup>んじゃない! (Don’t make fun of me!)

E.g. 嘘をつく<sup>で</sup>んじゃありません。(You shouldn’t lie.; 嘘をつく: to lie)

- んじゃなかった: mildly slang, to express nuance of regret/disappointment: “shouldn’t have”.

E.g. こんな安い車を買う<sup>で</sup>んじゃなかった。(I shouldn’t have bought a cheap car like this one.)

E.g. 食べる<sup>で</sup>んじゃなかった。(Shouldn’t have eaten it.)

Read more about these nuances at Sources [1](#), [2](#), [3](#).

## G2.10.5 の particle I: the noun modifier (label maker)

Read the main article on [Tofugu](#).

Applicable schemae:

- <noun label>の[<noun labelled>]. The labelled can be omitted if clear from context. The label can be stacked.

E.g. 私の<sup>くるま</sup>[車]。

E.g. 犬のおもちゃ<sup>みせ</sup>の店。(おもちゃ: toy)

- <particle>の<noun labelled>.
  - ▶ への: “to” label. E.g. アメリカへの飛行機。 (Airplane bound for America.)
  - ▶ からの: “from” label. E.g. アメリカからの飛行機。 (Airplane from America.)
  - ▶ だけの: “only” label. E.g. 寝るだけの人生。 (A life of only sleeping.)
  - ▶ との: “quote” label. E.g. 「早く帰ってきてね！」とのメッセージ。 (A message saying “Come back soon!”.)

Here are its various purposes. Note that possession isn’t the only one!

の as possession marker <owner>の<ownee>.

E.g. 私の母。 (Ny mother.)

の as affiliation marker <affiliation>の<affiliated/position>. Typically used in business settings to show which organisation someone belongs to.

E.g. トーフグのキョーコです。 (This is Kyoko from Tofugu.)

E.g. 東京大学の教授。 (Professor at Tokyo university.)

の as “about” marker <about>の<labelled>.

E.g. バナナ[について]の{知識/研究}。 (について: regarding; used for disambiguation because バナナの研究 could mean research of someone named バナナ.)

の as location/time label Whereas with the に particle we needed to specify a verb after に, with the の particle the location/time is treated as a label for the main noun.

E.g. 朝五時のアラーム。 (The 5am alarm.)

の as “degree” marker This refers to labels indicating amount, quantity, price, size, etc.

E.g. 五十人のアメリカ人。 (Fifty American people.)

E.g. 四千円のマンゴー。 (A four-thousand yen mango.)

の as order/rank marker Things like first, second, third, etc.

E.g. 最初のテスト。 (First test.)

E.g. 世界一の温泉。 (World’s number one hot spring.)

の for apposition Apposition: the relationship between different words that mean the same thing.

E.g. フルーツのバナナ。 (The fruit, banana.)

E.g. 校長のスズキ先生。 (The principal, Suzuki Sensei.)

の as materials/ingredients marker Typically used in menus to indicate ingredients used in dishes.

E.g. アサリの味噌汁。 (Miso soup with clam.)

E.g. プラスチックのカップ。 (Plastic cup.)

の as a replacement for な for の-adjectives (compared to な-adjectives) Adjective-like nouns like 普通 and 久しぶり take の when modifying nouns.

E.g. 普通の車。 (Normal car.)

E.g. 久しぶりの再会。 (long-awaited reunion)

**の as a replacement for が in relative clauses** Relative clauses are clauses that precede and modify nouns.

For further elaboration on の-adjectives, see §G2.10.7.

E.g. カナエ{が、の}作ったネックレス。(The necklace Kanae made.)

## G2.10.6 の particle II: the nominaliser

Read the main article on [Tofugu](#).

Basic usage is as in the initial description of の earlier, under “generic noun” and “explanatory”. This section covers the various contexts in which we use の to nominalise other parts-of-speech:

**Non-physical things** の can turn immaterial things like events, ideas, facts, and thoughts (expressed as embedded clauses ending with verbs) into nouns. These are covered under the nominaliser こと.

E.g. 一人でトイレに行った{こと/の}が、よく思い出せない。(I can't really remember having gone to the bathroom by myself; 思い出す: to recall.)

E.g. バック転できない{こと/の}が、悔しい。(I'm frustrated about not being able to backflip; できる: to be able to do.)

**Material things** の can turn adjective-phrases describing material things into nouns.

E.g. 甘いのが食べたい。(I want to eat sweet things.)

E.g. 昔飼っていたのは、犬です。(What I used to have as a pet was a dog; 昔: olden days; 飼う: to keep a pet)

E.g. そこにいるのは、誰ですか？(Who's there?)

**Time and location** の can turn clauses describing time or location of events (expressed as embedded clauses ending with verbs) into nouns. The resultant outer clause often contains elements indicating a particular time or location.

E.g. スーツケースが届くのは明日です。(The suitcase will be delivered tomorrow; 届く: to be delivered/arrive)

E.g. この町が美しかったのは、五十年前です。(This city was beautiful fifty years ago.)

E.g. 次のオリンピックが開催されるのは東京です。(The next olympics will be held in Tokyo; 開催する: to host an event)

E.g. 生まれたのはニューヨークです。(I was born in New York; 生まれる: to be born)

**Reason** の can be a placeholder for an explanation, similar to its sentence-ending explanatory usage.

E.g. アメリカに住みたいのは、英語の勉強がしたいからです。(The reason why I want to live in the U.S. is because I want to study English; したい: want to do; から: because (also means from))

E.g. そう思ったのは、なぜですか？(Why did you think so?)

**Listing** の can be used to *complainingly* list things (similar to the inclusive noun particle と and vague listing particle や, with the added complaining tone). When listing verbs, use ～

の. When listing nouns or な-adjectives, use **～だの** (not **なの!** That is for the explanatory usage.). while emphasising the similarity or contrast between items in a list.

E.g. レストランに行く**の**行かない**の**でもめた。(We argued over whether to go to a restaurant or not; もめる: to dispute)

E.g. テスト勉強**だ**の部活**だ**ので忙しいよ。(I'm busy with things like studying for exams and club activities.)

There is a special idiomatic pattern used to enthusiastically say that something is extraordinary. Take the same adjective and repeat it twice, once in the positive and once in the negative, using the **～の** suffix.

E.g. ポートランのピール、そりゃおいしい**の**、おいしくない**の**って！ (Beer in Portland is beyond delicious!; そりゃ is a variant of **それは** and both are adverbs meaning very/extremely) (Literally: Beer in Portland is not even a matter of delicious or not delicious.)

This can often also be expressed with another idiomatic expression **～のなんのって** (supplementary reading [here](#)).

E.g. ポートランのピール、美味しい**のなんのって**！ (Beer in Portland is beyond delicious!)

## G2.10.7 The adjective-noun spectrum: な-adjectives and の-adjectives

Read the main article on [Tofugu](#).

In short, な is used when you want to describe nouns, and の is used when you want to label nouns (e.g. **きれいな人** vs. **きれいの人** respectively).

Many な-adjectives exhibit this flexibility of converting between adjectives and nouns, based on whether they are suffixed by な or の. Linguists refer to な-adjectives as “*adjectival nouns*” or “*nominal adjectives*”.

There exists a adjective-noun spectrum for adjectives: some are suffixed with な more often, and others の more often. Table 8 provides examples.

Table 8: な/の-adjectives on the adjective-noun spectrum. い-adjectives do not apply.

な ≧ の	Meaning	な > の	Meaning	の > な	Meaning	の ≧ な	Meaning
好き	like	元気	well/fine	大量	large amount	少し	a little
簡単	simple	健康	health(y)	病気	illness/disease	本当	true/truth
大切	important	安全	safe(ty)	最高	best/highest	永遠	eternity
だめ	no good/not allowed	美人	beautiful woman	普通	normal/ordinary	最大	largest/maximum
静か	quiet	不思議	wonderful/miraculous	未定	to be decided/pending	最小	smallest/minimum
大変	very	平和	peace/harmony	独自	unique/original	たくさん	a lot
素敵	splendid	幸せ	happiness	最速	fastest	真実	truth/reality
勝手	selfish(ness)	不幸	misfortune/disaster	一流	first-class/top-ranking	一杯	one cup
複雑	complicated/complex	不安	anxiety/worry/fear	個別	individual/separate		
妙	strange	高級	premium/luxury	固有	characteristic/native		
正解	correct	平等	equality/impartiality	別	another/difference		
変	strange			無名	anonymous/nameless		
必要	necessary/needed			未知	unknown		
深刻	serious			少量	small amount		
困難	difficulty/hardship						
苦手	weak at/bad at						
危険	danger						
嫌い	disliked						
無理	impossible						

な ≧ の	Meaning	な > の	Meaning	の > な	Meaning	の ≧ な	Meaning
異常 (いじょう)	strange/abnormal						
正直 (しょうじき)	honest(ly)						
親切 (しんせつ)	kind/generous						
残酷 (ざんこく)	cruel						
有能 (ゆうのう)	competent						
冷静 (れいせい)	calm						
真剣 (しんけん)	serious						
慎重 (しんちょう)	cautious						

The different parts of the spectrum are described as follows:

- “な-adjectives”: the adjective side of the spectrum. These are frequently used to describe nouns, and are tagged as な-adjectives in many Japanese-English dictionaries.
- “の-adjectives”: the noun side of the spectrum. These are frequently used with the の suffix to form labels for nouns, and are tagged as の-adjectives in many Japanese-English dictionaries.

Words in this category are broadly divided into two groups: those that express absolutes (e.g. 本当、最大、最小) and those that express quantities (e.g. 少し、たくさん、少量、大量).

Those that express absolutes usually cannot take adverbs (there is no “little” absolute or “big” absolute; an absolute is a binary thing, either it’s absolute or not). Those that express quantities can.

E.g. 昨日<sup>きのう</sup>すごくたくさんの魚が釣<sup>つ</sup>れました。(I was able to catch incredibly many fish yesterday.)

E.g. 電源<sup>でんげん</sup>が切れた途端<sup>とたん</sup>に、かなり大量<sup>だいたいよう</sup>のデータが消<sup>け</sup>されてしまいました。(Right when the power ran out, quite a large amount of data was erased.)

- Words in the middle of the spectrum: these have subtle shifts when suffixed with な vs. の, but one is typically used more frequently than the other. Typically, の is used with a slight bias towards the act of objective labelling, while な is used with a slight bias towards the act of subjective describing/judging. As a result, using な for some of the adjectives can seem negative or even rude. It’s safer to use の, if unsure.

E.g. 新しい彼氏<sup>あたらしい</sup>、有名人<sup>し</sup>なの？ (Is your new boyfriend a famous person?; 氏: Mr./Mrs./Ms. polite suffix) ううん、普通<sup>ふつう</sup>の人だよ。(No, he’s a normal (objectively ordinary) person.)

E.g. 新しいの彼氏、変<sup>へん</sup>な人なの？ (Is your new boyfriend a weirdo?) ううん、普通<sup>ふつう</sup>な人だよ。(No, he’s a normal (not weird) person.)

E.g. その施設<sup>しせつ</sup>には、病気<sup>しん</sup>の人が多い。(There are many sick (objective) people at that institution; 施設: facility)

E.g. その施設<sup>しせつ</sup>には、病気<sup>しん</sup>な人が多い。(There are many sick (judgmental) people at that institution; 施設: facility)

Lastly, there is the 「～な気分<sup>きぶん</sup>」 construct. Although 気分 is typically used as 気分がいい or 気分が悪い, we can suffix nouns with ～な気分 to convey the “mood” associated with the noun. Examples include ワインな気分 (“I’m feeling like wine tonight/It’s a wine kinda evening.”), 90年代<sup>ねんだい</sup>な気分 (“I’m feeling really 90’s today”), 海<sup>うみ</sup>な気分 (“feeling those beachy vibes”) and 終わ<sup>お</sup>りな気分 (“feeling like it’s over”).

## G2.11 Adverbs

Just as adjectives describe nouns, adverbs describe adjectives, verbs, other adverbs, or whole sentences. They come before the thing they describe, and the common ones are:

- それは/そりゃ: very/extremely
- めっちゃ: very/extremely/excessively
- 大変: very/greatly/terribly
- すごく: super
- とても: very
- たくさん: many/a lot
- 結構/かなり: fairly
- ちょっと: a little
- 少し: a little
- あまり<negative conj>: not very
- 全然: (not) at all

To turn adjectives into adverbs:

- な-adjectives: 「」 → 「」に

E.g. アリスは自分の部屋をきれいにした。(Alice did her own room toward clean / Alice did her room cleanly / Alice cleaned her room; した is the past tense of する)

E.g. 図書館<sup>なか</sup>の中では、静かにする。(Inside the library, do things quietly.)

- い-adjectives: 「」い → 「」く

E.g. ボブは朝ごはんを早く食べた。(Bob ate breakfast quickly/early (depending on context); 早い → 早く)

E.g. この町<sup>まち</sup>は、最近<sup>おと</sup>大きく<sup>か</sup>変わった。(This town changed greatly lately; 大きい → おおきく)

Note that not all adverbs are derived from adjectives.

E.g. 映画をたくさん見た。(Saw a lot of movies.)

E.g. 最近、全然食べない。(Lately, don't eat at all.)

## G2.12 Sentence ending particles ね、よ、よね

- の: explanatory tone. Explained above in §G2.10.4.
- ね: to express seeking and expectation of agreement, like “right?/isn't it?” in English. In the reply 「そう[だ]ね」, the optional だ is often used in masculine contexts.

E.g. いい天気だね? そう[だ]ね。(Good weather, huh? Sure is; そう: in that way, as such; そう[だ]ね: it is indeed that way/as such.)

E.g. 面白い映画だったね。え? 全然面白くなかった。(That was an interesting movie, wasn't it? Huh? No, it wasn't interesting at all)

- よ: to express that you're informing something *new*, like “you know...” in English.

E.g. 時間がないよ。大丈夫だよ。

E.g. 今日はいい天気だね。うん。でも、明日う雨が降るよ。(Good weather today, huh? Yeah. But it will rain tomorrow, you know.)

よ and ね can be combined to both inform about something new and expect agreement at the same time.

E.g. ボブは、魚が好きなんだよね。そうだね。 (You know, you like fish, don't you? It is indeed the case, huh?)

## G3 Essential grammar

Now that we have an understanding of the basics, fundamentals, and foundations of Japanese grammar, this section provides specific grammar for practical situations.

### G3.1 Verb stems

*It seems that “stem” and “root” are used interchangeably; there is no consensus on their definitions, and different sources use either term to refer to the same concept...*

Since there is no consensus on the definitions of root/stem, I'll use “root” to refer to /kik/, and “stem” to refer to the stem form 聞き.

Also known as the ます-stem in other texts (we refrain from that term as the stem is used in many more conjugations, not just in ます), stems can be obtained from verbs via the rules in Table 16.

Verb stems are sometimes (not always!) the noun forms of the verbs, e.g. 休み<sup>やす</sup> is the noun form of 休む.

We can suffix the stem with target particle に or directional particle へ, then follow with a motion verb (almost always 行く or 来る). This <stem>{に/へ}{行く/来る/...} construct means “to go/come do <stem>”. Use に to mean going/coming for the purpose of doing <stem>; use へ to put emphasis on the literal act of going/coming.

E.g. 明日、映画を見に行く。(Tomorrow, go to see movie.)

E.g. 昨日、友達が遊びへ来た。(Yesterday, friend came towards a playing activity.; sounds weird)

E.g. 昨日、友達が遊びに来た。(Yesterday, friend came to play.)

The expression 「楽しみにする」 (looking forward to) is formed from a similar grammar rule (though it's a special case and should be considered a set expression).

Compound verbs can be formed by appending verbs to stems. However, there aren't formulaic rules for these; memorise them as separate verbs in their own right.

E.g. 走り出す (break into a run)、切り替<sup>か</sup>える (switch to something else)、付け加<sup>く</sup>える (to add something by attaching it)、言<sup>い</sup>い出す (to start talking)、言<sup>い</sup>いさす (to stop talking)、読<sup>よ</sup>み出す (read out data/retrieve)、読<sup>よ</sup>みさす (to leave half-read).

### G3.2 Polite forms ます、です

The Japanese covered thus far in §G2 is fine for five-year-olds, but adults are expected to use 丁寧語<sup>ていねいご</sup> (polite language), 尊敬語<sup>そんけいご</sup> (honorific language) and 謙譲語<sup>けんじょうご</sup> (humble language) where appropriate.

丁寧語 is used when speaking to people of higher social rank or people you're unfamiliar with. 尊敬語 and 謙譲語 are used in professional settings, and builds upon 丁寧語.

The only indicator of which language style is in use is sentence endings. It's not possible to tell whether someone is speaking in casual or polite speech until the sentence is finished.

In 丁寧語, use 「～ます」 and its conjugations to make verbs polite, and use 「～です」 for nouns and adjectives (note that the polite です is incompatible with the assertive だ). Detailed rules are in Table 16. Note that ます and です must come at the end of a complete sentence, and never inside any embedded/relative clauses. Refer to §GA.1 for a full table of 丁寧語 conjugations.

Polite verb examples:

- (present-positive) 明日、大学に行きます。(Tomorrow, I go to university.)
- (present-negative) 面白くない映画は見ません。(I did not see uninteresting movies.)
- (past-positive) 先週、ボブに会いましたよ。(Last week, I met Bob, you know.)
- (past-negative) 昼ご飯を食べませんでしたね。(Didn't eat lunch, right?)

Polite adjective examples:

- (present-positive) 子犬はとても好きです。(I like puppies very much/puppies like something very much.)
- (present-negative) その部屋はあまり静かじゃないです。(The room is not very/really quiet.)
- (past-positive) 先週に見た映画は、とても面白かったです。(The movie I saw last week was very interesting.)
- (past-negative) 昨日、時間がなかったんです。(Yesterday, there was no time.; ある → なかった (past negative) → なかったんだ (explanatory) → なかったんです (polite))

### G3.2.1 です is NOT the polite form of だ, they are completely separate constructs

This is a common misconception! です and だ are two fundamentally different concepts:

- だ is declarative, whereas です is polite.

E.g. そうだ is the declarative form of そう. そうです is the polite form of そう (see Table 16), but not the polite form of そうだ!

- だ can be used both at the end of both complete sentences and relative clauses, whereas です can only be used at the end of complete sentences.

E.g. そうだと思います。(In an indirect quote, it is wrong to quote です: it must be changed to だ.)

E.g. 「はい、そうです」と答える。(The only place where です can be in an embedded clause is in direct quotes.)

## G3.3 Addressing people

Take care to use the correct level of politeness.

### G3.3.1 Referring to yourself

To refer to yourself, use one of the following (in descending order of politeness):

- 私<sup>わたくし</sup>: used by both males and females, formal
- 私<sup>わたし</sup>: used by both males and females, normal polite (you should use this most of the time)
- 僕: used by males, semi-polite to semi-casual
- 俺: used only by males, very casual, very rough
- あたし: used by females, cutesy and girly (most girls today use 私<sup>わたし</sup> instead)
- your own name: used by children, feminine
- わし: used by elderly (males)

E.g. 私の名前はジャッキーです。

### G3.3.2 Referring to the listener (second-person)

Even when directly addressing other people, you rarely use variants of “you”, as constantly hammering the listener with “you” that comes across as accusatory and confrontational.

Instead, we use one of the following (in descending order of politeness):

- <title>: common polite (e.g. 社長 <sup>しゃちょう</sup> president/director, 課長 <sup>かちょう</sup> section manager, 先生 teacher/ anyone with significant expertise including doctors)
- <last name><title>: common polite
- <last name>さん: common polite, in case no suitable title exists
- <first name>さん: common semi-polite
- <last name>くん: for males, casual/endearing, of equal or lower social position
- <last name>ちゃん: for females, casual/endearing, of equal or lower social position
- <last name>: common
- <first name>[{くん, ちゃん}]: only for people you're on first-name basis with
- <nothing>: common. In normal Japanese conversations, the topic/subject is commonly implied to be the listener. It's completely normal not to use anything at all, since you're directly addressing the listener!
- そちら: you, polite
- 君: casual, assuming/very close, used by males to address females, potentially rude
- あなた: **red if spoken**, use only in contexts where you must refer to the audience (e.g. on a physical questionnaire)
- **THOU SHALT NOT CROSS THIS LINE**
- あんた: rude, assuming/familiar, expresses annoyance
- お前/おめえ: rude, rough and coarse, used by males
- てめえ: very rude, sounds like you want to beat someone up (used exclusively in movies and comics)
- 貴様 <sup>きさま</sup>: extremely rude, sounds like you want to take someone out (used exclusively in movies and comics)

<sup>あなた</sup>貴方 is an old-fashioned way for women to refer to their lover or husband, nowadays only used by married middle-aged women.

### G3.3.3 Referring to the third person

For people outside of your family, use one of these:

- 彼 <sup>かれ</sup>: he
- 彼女 <sup>かのじょ</sup>: she
- 彼/ボーイフレンド: boyfriend (prefer former)
- 彼女/ガールフレンド: girlfriend (prefer former)

When referring to family members, there are two levels of politeness: polite and casual. We only use the casual form when we are talking about our own family members to other people. When talking about the listener's family members or when talking directly to your family members, use the polite form.

The polite form comes before the casual form:

- Parents: ご両親 <sup>りょうしん</sup> / 両親 <sup>りょうしん</sup>
- Mother: お母さん <sup>かあ</sup> / 母 <sup>はは</sup>
- Father: お父さん <sup>とう</sup> / 父 <sup>ちち</sup>
- Wife: 奥さん <sup>おく</sup> / 妻 <sup>つま</sup>
- Husband: ご主人 <sup>しゅじん</sup> / 夫 <sup>おつと</sup> (don't drag the trailing お vowel)
- Older sister: お姉さん <sup>ねえ</sup> / 姉 <sup>あね</sup>
- Older brother: お兄さん <sup>にい</sup> / 兄 <sup>あに</sup>

- Younger sister: 妹さん / 妹 いもうと
- Younger brother: 弟さん / 弟 おとうと
- Son: 息子さん / 息子 むすこ
- Daughter: 娘さん / 娘 むすめ

Yes, ご主人様 (master/husband) is an extension of ご主人 (husband).

### G3.4 The question marker か particle

These are common question words (see Table 72 for a more complete list):

- 誰: who
- 何: what
- いつ: when
- どこ: where
- なぜ/どうして/なんで: why

なぜ is formal and forceful

どうして is softer

なんで is informal (Source)

- どう/どうやって: how

どう is more general (Source)

- どれ/どちら/どっち: which

どれ: three or more

どちら: two

どっち: two (informal; Source)

#### G3.4.1 か in polite questions

The purpose of か is to clearly mark a question in polite sentences. It's not strictly necessary, since polite sentences without a trailing か can be interpreted as a question using a rising trailing intonation during speech. However, it's commonly attached.

There is no need to use a question mark when か is used; the full-stop is used instead. Because か is polite, it is incompatible with the declarative だ.

E.g. お母さんはどこですか。母は買い物に行きました。(Where is your mother? My mother went shopping.; 買い物 can refer to both purchased goods and the act of shopping)

E.g. イタリア料理を食べに行きませんか。すみません。ちょっと、お腹がいっぱいです。(Shall we eat Italian food? Sorry, my stomach is a little full.; いっぱい: full; Note that the question is phrased in the negative, see §G3.4.2)

#### G3.4.2 Positive and negative polite questions

See discussion at (HiNative).

Positive polite questions are plain questions; negative questions have a nuance of suggestion/invitation.

- 食べに行きますか?: Are you going to eat?

- 食べに行きませんか?: Shall we go eat?

### G3.4.3 か in casual questions: binary and sarcasm

か has a slightly different purpose in casual speech. Casual questions usually either use explanatory 「の?」 or nothing at all, so か is not used here to craft questions. Instead, it is used specifically to:

- question whether something is true or not

E.g. こんなのを本当に食べるか? (This kind of thing, will they really eat?; こんなのは is こんな + の (possession), where こんな means this type of)

- make rhetorical questions/express sarcasm

E.g. そんなのは、あるかよ! (That kind of thing, do I look like I would have something like that!; そんなのは is そんな + の (possession), where そんな means that type of)

Most actual questions use explanatory の or nothing at all apart from a rise in intonation.

E.g. こんなのを本当に食べる? (Something like this, are you really going to eat?)

E.g. そんなのは、あるの? (Do you have something like that?)

### G3.4.4 か in embedded clauses: referring to embedded questions

This functions similar to direct quoting, and marks the questions in an embedded clause. The outer clause can then talk about the embedded question.

E.g. 昨日何を食べたか忘れた。 (What I ate yesterday, I forgot.)

E.g. 彼は何を言ったか分からない。 (What he said, I don't understand.)

E.g. 先生が学校に行ったか教えない? (Whether the teacher went to school (binary question), would you please inform me (invitation)?)

To ask “whether or not” (binary question), we can use either <positive>かどうか, or <positive>か<negative>か.

E.g. 先生が学校に行ったか行かなかったか知らない。 (Whether the teacher went to school or not, I don't know.)

E.g. 先生が学校に行ったかどうか知らない。 (Whether the teacher went to school or not, I don't know.)

See more detail in §G3.18.2.

### G3.4.5 Modifying question words with suffixes か、も、でも

「」か refers to a particular existence (sometextasciitilde), 「」も refers to the universal (everytextasciitilde), and 「」でも refers to a non-particular existence (anytextasciitilde) (not to be confused with でも for “but”). Question words and their variants are showed in Table 9.

Table 9: Question words and their modified variants. Treat these all as normal nouns. †: 誰も is usually used in negative sentences to mean nobody can do the verb, and to express the positive universal everybody we typically use 皆[さん]; ‡: 何も is used exclusively in negative sentences.

「」	Meaning	「」か	Meaning	「」も	Meaning	「」でも	Meaning
誰	who	誰か	someone	誰も	nobody†	誰でも	anybody
何	what	何か	something	何も	nothing‡	何でも	anything
いつ	when	いつか	sometime	いつも	always/never	いつでも	anytime

「」	Meaning	「か	Meaning	「も	Meaning	「でも	Meaning
どこ	where	どこか	somewhere	どこ[に]も	everywhere/ nowhere	どこでも	anywhere
なぜ	why	なぜか	some reason				
どう	how	どうか	somehow	どれも	somehow	どうでも	anyhow
どれ	which (3 or more)	どれか	one from many	どれも	all/none	どれでも	any of many
どちら	which (2)	どちらか	one of two	どちらも	both/neither	どちらでも	any of two

To mean “For some reason...” you can say 「どういうわけか...」.

「」か examples:

- 誰<sup>たれ</sup>がおいしいクッキーを全部食べた。(Someone ate all the delicious cookies.)
- 誰<sup>むす</sup>が盗<sup>ぬす</sup>んだのか、誰か知りませんか。(Who stole it, doesn't anyone know?; 盗む: steal)
- 犯人<sup>はんじん</sup>をどこかで見ましたか。(Did you see the criminal somewhere?)
- この中<sup>なか</sup>からどれか<sup>えら</sup>を選ぶの。(You are to select a certain one from inside this.; から: from, 選ぶ: choose)

「」も examples:

- この質問<sup>しつもん</sup>の答え<sup>こた</sup>は、誰も<sup>たれ</sup>知らない。(The answer to this question, nobody knows.)
- 友達<sup>ともだち</sup>はいつも遅<sup>おく</sup>れる。(Friend is always late.)
- ここにあるレストランはどれも<sup>たれ</sup>おいしくない。(All restaurants that are here are not tasty.)
- 今週末<sup>こんしゅうまつ</sup>は、どこにも<sup>どこ</sup>行<sup>い</sup>かなかった。(This weekend, went nowhere.; どこにも means “target is nowhere”, も is grammatically the topic particle and should come after the target particle に, so どこ~~にも~~ is incorrect. Treat this as an exception.)

「」でも examples:

- この質問<sup>しつもん</sup>の答え<sup>こた</sup>は、誰でも<sup>たれ</sup>分かる。(The answer to this question, anyone understands.)
- 昼ご飯<sup>ひるごはん</sup>は、どこでも<sup>どこ</sup>いいです。(For lunch, anywhere is good.)
- あの人は、本当に何でも<sup>なんでも</sup>食べる。(That person really eats anything.)

## G3.5 Apologising

Read a full article [here](#).

Use one of the following (in descending order of politeness):

- すみません: formal
- ごめんなさい: semi-formal
- ごめん[ね]: causal
- 悪い<sup>わる</sup>: very casual, only for non-serious matters

Can be used for past offence: 悪<sup>わる</sup>かった。

## G3.6 Compound sentences

This section concerns combining multiple sentences into one complex sentences, such as combining “I ran.” and “I ate.” into “I ran and ate.”.

### G3.6.1 て form

The て-form of nouns, adjectives and verbs are used to form sequences of states (nouns/adjectives) or actions. The conjugation rules are in [§GA.1](#).

て-form conjugations for です/ます/ません exist but they are part of 尊敬語 and are outside the scope of 丁寧語. In a chain of nouns/adjectives/verbs, only the last one takes the polite form です/ます/ません; everything before takes the plain form. Since て is used when connecting sentences, there is no need for です/ます/ません to have a て-form in 丁寧語.

### G3.6.2 Compound sentences (chain of descriptors/actions) using て/で and て-form

Similarly to how we can join “My room is clean. It is quiet. I like it a lot.” into “My room is clean, quiet, and I like it a lot.” in English using the “and” connector, we can do the same using “て/で” as a connector. Just as と is the noun connector (in exclusive listings), て/で is the connector for nouns, adjectives and verbs.

The syntax is [v te]\*[<plain/polite form>]. て/で functions like a connector (between two nouns/adjectives/verbs). The entity that comes before is turned into the て-form. The final one in the list does NOT use て-form (use either plain or polite), and determines the tense (present/past) of the entire chain.

E.g. 食堂<sup>しょくどう</sup>に行って、昼ご飯を食べて、昼寝をする。 (I will go to canteen, eat lunch, and take a nap.)

E.g. 食堂<sup>しょくどう</sup>に行って、昼ご飯を食べて、昼寝をした。 (I went to canteen, ate lunch, and took a nap.)

E.g. 時間があって、映画を見ました。 (There was time, and I watched a movie.)

### G3.6.3 Causation and reasoning particles から、ので

To express the direct causation (because) and reasoning (therefore) relationships, use から and ので particles:

- から: direct cause marker particle (also from-marker: §G2.9; see also Table 137). The possible syntaxes are: begin{itemize}

- ▶ <direct cause>[だ]から<result>

If the cause is a non-conjugated noun or な-adjective, you must add だ to differentiate it from the from-marker usage of から.

E.g. 時間がなかったからパーティーに行きませんでした。 (There was no time, so didn't go to party.)

E.g. 友達からプレゼントが来た。 (Present came from friend.; from-marker usage)

E.g. 友達だからプレゼントが来た。 (Present came because of friend.; cause marker usage; this sentence sounds a bit odd)

- ▶ だから<result>

The cause can be omitted if clear from context. Here, だ is compulsory.

E.g. 時間がなかった。だからパーティーに行かなかったの? (I didn't have time. Is that why you didn't go to the party?)

- ▶ <direct cause>[だ]から[です]

The result can be omitted if clear from context. から can be treated as a regular noun, so in polite speech, add the です suffix.

E.g. どうしてパーティーに行きませんでしたか？時間がなかったからです。(Why didn't you go to the party? Because I didn't have time.; polite)

E.g. パーティーに行かなかったの？うん、時間がなかったから。(You didn't go to the party? Yeah, because I didn't have time.; casual)

- ので: non-causal explanation/reason marker, carries flavour of explanatory-の. Similar usage patterns as から (almost interchangeable), but less binding than から in that ので doesn't assert that the marked reason is the direct cause of the result. ので is thus softer and more polite, and preferred when explaining a reason for doing something considered discourteous.

Because で is involved, ので is a connector that must exist between two sentences (if dangling, the sentence is implied to be a dangling sentence).

- ▶ <reason>[な]ので<result>.

If the cause is a non-conjugated noun or な-adjective, you must add な to differentiate it from the possession marker usage of の.

E.g. 時間がなかった**ので**パーティーに行きませんでした。(There was no time, therefore didn't go to party.)

E.g. ちょっと忙**し**い**ので**、そろそろ失礼します。(I'm a little busy, therefore I'll be making my leave soon.; 失礼します literally means "I'm doing a discourtesy" and is used to politely mean you're make your leave or disturbing someone's time.)

E.g. 私は学生**な**{の/ん}で、お金がないんです。(I am a student, therefore I have no money.)

E.g. ここは静**か****な**{の/ん}で、とても穏やかです。(It is quiet here, therefore it is very calm here.)

If omitting the reason or result (which is clear from context), use the explanatory-の particle instead (の[だ]/のです/んだ/んです see §G2.10.4).

- ▶ な{の/ん}で<result>

Here, な is compulsory.

E.g. **な**{の/ん}で、友達に会う時間がない。(Therefore, there is no time to meet friend.)

- ▶ <reason>{の/のだ/のです/んだ/んです}

E.g. どうして遅**お**れた**の**です/んですか？(Why were you late?)

E.g. パーティーに行かなかったの？うん、時間がなかった**の/のだ/んだ**。(You didn't go to the party? Yeah, because I didn't have time.; casual)

E.g. どうしてパーティーに行きませんでしたか？時間がなかった**の/のです/んです**。(Why didn't you go to the party? Because I didn't have time.; polite)

### G3.6.4 Despite marker particle のに

To express the idea of "despite", the のに marker is used. The schema is <despite>のに、<sentence>.

E.g. 毎日運動した**のに**、全然**や**瘦せなかった。(Despite exercising every day, I didn't get thinner.; 痩せる: to slim)

Note that non-conjugated state-of-being nouns and na-adjectives must be tagged with the な particle, similar to rules for explanatory の.

E.g. 学生なのに、彼女は勉強しない。(Despite being a student, she does not study.)

### G3.6.5 General and contradiction connector particles けど(、けれど、けれども)、が

けど and が are used as general connectors of any two sentences, like how we construct running sentences in English using “and”. Also, they can be used to express the idea of contradiction between the two sentences: in this usage, が is slightly more polite (stronger contradiction) than けど. Politer forms of けど are けれど and けれども (???). The schema is <sentence 1>{が/けど/けれど/けれども}, <sentence 2>.

E.g. マトリックスを見たけど、面白かった。(general connector; I watched “The Matrix” and it was interesting.)

E.g. デパートに行きました~~が~~、いい物がたくさんありました。(general connector; I went to the department store and there was a lot of good stuff.)

E.g. デパートに行きました~~が~~、何も欲しくなかったです。(contradictory connector; I went to the department store but there was nothing I wanted.)

Note that non-conjugated state-of-being nouns and na-adjectives must be tagged with the だ state-of-being assertion.

E.g. 今日は暇~~だ~~けど、明日は忙しい。(I’m free today but I will be busy tomorrow.)

E.g. ~~だ~~けど、彼がまだ好き~~な~~の。(That may be so, but I still like him.)

### G3.7 Reason vague listing connector し

し is used to list reasons for a verb or state-of-being. It is vague in the same sense as the や particle (§G2.10.4): there is a nuance that there may be other reasons not listed. The schema is (<reason> し)\*<reason>.

E.g. どうして彼が好きなの? 優しいし、かっこいいし、面白いから。(Why do you like him? Because he’s kind, attractive, and interesting (among other things).; から means because here.)

Note that non-conjugated state-of-being nouns and na-adjectives must be tagged with the だ state-of-being assertion.

E.g. どうして友達じゃないんですか? 先生~~だ~~し、<sup>としうえ</sup>年上~~だ~~し...  
(Why aren’t they your friend (seeking explanation)? Well, they are the teacher, and older...)

For a less vague, more closed listing, use the て-form instead.

E.g. どうして彼が好きなの? 優しくて、かっこよくて、面白いから。  
(Why do you like him? Because he’s kind, attractive, and interesting (among other things).)

### G3.8 Adjective and verb vague listing construct へたり[です]

This is the verb/adjective version of the や particle (§G2.10.4). For each verb/adjective in the sequence, conjugate to past tense and add 「り」. Additionally, for the final one, tag on a 「する」, which will control the tense ({positive, negative} times {present, past}) of the entire sentence. The schema is (<past adj/v>り、)\*<past adj/v>りする.

E.g. 映画を見たり、本を読んだり、昼寝したりする。(I do things like watch movies, read books, and take naps (among other things).)

E.g. この大学の授業は簡単だったり、難しかったりです。(Classes in this university are sometimes easy, sometimes difficult (and sometimes other descriptors).)

The tense of the entire sentence can be changed by conjugating the trailing する.

E.g. 映画を見たり、本を読んだり、昼寝したりしない。(I don't do things like watch movies, read books, and take naps (among other things).)

E.g. 映画を見たり、本を読んだり、昼寝したりした。(I did things like watch movies, read books, and take naps (among other things).)

E.g. 映画を見たり、本を読んだり、昼寝したりしなかった。(I didn't do things like watch movies, read books, and take naps (among other things).)

### G3.9 Progressive form 〜ている (enduring state of action, enduring state-of-being)

To express an enduring state of action (-ing in English), conjugate the verb to the てる-form (§G3.6.1), then append 〜ている. This form can be used regardless of whether the verb subject is animate or inanimate. Further conjugations of the progressive form follow rules of the いる verb.

*Interestingly, ある does not have a progressive form. See discussion in §G3.13.*

E.g. 友達は何をしているの？ 昼ご飯を食べている。(What is friend doing? Eating lunch.; している is the progressive form of する.)

E.g. 何を読んでいますか。教科書を読んでいます。(What are you reading? I am reading textbook.; います is the polite form of いる.)

E.g. 話を聞いていますか。ううん、聞いていません。(Are you listening to me? No, I'm not listening.; いません is the polite form of いない.)

In casual speech (not applicable in writing!), 〜ている can be shortened to 〜てる. However, the い is not dropped in the polite progressive form 〜ています. **Try not to let this casual speak become a habit too early on! Learn the correct form first.**

E.g. 友達は何をしてるの？ 昼ご飯を食べてるの。(What is friend doing? Eating lunch.; 食べてる = eating (casual); 食べる = eat (dict))

In fact, laziness can go further: 何をしているの can be shortened by dropping particles and unnecessary vowels to become 何してんの？ A related lazy casual expression is 「何やってんの」, which is a contraction of 「何をやっているの」.

The same form can also be used to convey **enduring state-of-being**, after a verb is performed. **This is decided by context.** E.g. 結婚している can either mean someone is currently getting married, or that someone is married and is currently in the married state. **This becomes less context-based and more of a rule for the verbs 知る, 分かる, and motion verbs.**

- 知っている means to be/have been in the enduring *state* of knowing. 知る refers to the *change* of state from not knowing to knowing, it's different and rarely used in its unconjugated form! (HN1), (HN2)

E.g. 道は知<sup>みち</sup>っていますか？ はい、今日に知りました。(Do you know the way? Yes, I found out about it today.)

E.g. この歌を知<sup>うた</sup>っていますか。はい、1年前から知<sup>うた</sup>っていますよ。(Do you know this song? Yes, I've known it for a year now.)

- わかっている means to be/have been in the enduring *state* of understanding. わかる refers to the *change* from not understanding to understanding, it's different! (HN)

E.g. 前方<sup>ぜんぽう</sup>は危ない、わかりますか。はい、はい、わか<sup>ぜんぽう</sup>りました。(The area in front is dangerous, do you understand? Yes, yes, I am aware of that.)

E.g. 前方<sup>ぜんぽう</sup>は危ない、わかりますか。はい、はい、わか<sup>ぜんぽう</sup>っています。(The area in front is dangerous, do you understand? Yes, yes, I am already aware of that, you don't have to tell me.)

わかっている, in certain contexts, can make you sound proud or dismissive. Be careful!

- <motion verb て-form>ている means to <motion verb> and exist (<v> + いる), and refers to the state-of-being after performing the verb.

E.g. 鈴木<sup>すずき</sup>さんはどこですか。もう、家<sup>いえ</sup>に帰<sup>かえ</sup>っている。(Where is Suzuki-san? He is already at home.)

E.g. 美恵<sup>みえ</sup>ちゃんはどこですか。もう来<sup>こ</sup>ているよ。(Mie-chan is already here, you know.; 行<sup>い</sup>つて is the て-form of 行く; 来<sup>こ</sup>て is the て-form of 来る, “来<sup>こ</sup>って” is wrong!)

### G3.10 Resultant state ～てある

To express that an action is completed, with the implicit nuance that the action was completed in preparation for something else, we use ～てある.

E.g. 準備<sup>じゅんび</sup>はどうですか？準備は、もうしてあるよ。(How are the preparations? The preparations are already done.)

E.g. 旅行<sup>りょこう</sup>の計画<sup>けいかく</sup>は終わった？うん、切符を買<sup>か</sup>ったし、ホテルの予約<sup>よやく</sup>もしてある。(Are the plans for the trip complete? Uh huh, not only did I buy the ticket, I also took care of the hotel reservations.)

### G3.11 The auxiliary verb 置く<sup>お</sup> in ～ておく、～とく

To express that an action is completed (or will be completed), with the explicit nuance that the action was completed in preparation for something else, we use the auxiliary verb ～ておく. 置く<sup>お</sup> when used directly (meaning “to put/place”) is written in 漢字, but when used as an auxiliary verb it is written in 仮名 alone. Further conjugations of the compound verb follow rules of the 置く<sup>お</sup> verb.

E.g. 晩ごはんを作<sup>つく</sup>っておく。(Make dinner (in advance for the future).)

E.g. 電池を買<sup>か</sup>っておきます。(I'll buy batteries (in advance for the future).)

「～ておく」 can be contracted to 「～とく」. Further conjugations follow rules of the とく auxiliary verb (which means to do something in readiness for).

E.g. 晩ごはんを作<sup>つく</sup>とく。(Make dinner (in advance for the future).)

E.g. 電池を買<sup>か</sup>ときます。(I'll buy batteries (in advance for the future).)

### G3.12 Spatial and temporal directional auxiliary verbs ～ていく、～てくる

To express that an action is spatially oriented towards or from some place, we use the ～ていく and ～てくる auxiliary verbs respectively. Think of them as “<v> + go” and “<v> + come” respectively. Further conjugations of the compound verb follow the rules of the trailing いく or くる verb.

E.g. 鉛筆<sup>えんぴつ</sup>を学校へ持っていく? (spatial; Are you taking pencil to school?)

E.g. 鉛筆<sup>うち</sup>を家に持ってくる? (spatial; Are you bringing pencil back home?)

E.g. お父さんは、早く帰ってきました。 (spatial; きました is the polite past-tense of くる)

E.g. 駅<sup>えき</sup>の方<sup>ほう</sup>へ走っていった。 (spatial; いった is the past tense of いく; 駅 is train station; 方 is direction)

The same auxiliary verbs have a temporal usage. ～ていく can be used to mean “<v> continuously/progressively into the future”. ～てくる can be used to mean “<v> performed up to the present”.

E.g. 冬<sup>はい</sup>に入<sup>はい</sup>って、コートを着ている人が増えていきます。 (temporal; Entering winter, people wearing coat will gradually increase.; The 入 in 入る is only read as い when used in compound verbs where the meaning of “entering” is faded.)

E.g. 一生懸命<sup>いっしょうけんめい</sup>、頑張っていく! (temporal; With all my might, I will try my hardest moving into the future!)

E.g. 色々な人<sup>あ</sup>付き合<sup>あ</sup>ってきたけど、いい人はまだ見つからない。 (temporal; Went out with various types of people up till the present, but a good person hasn't been found yet.; 付き合ってきた is the past-tense of 付き合ってくる.)

E.g. 日本語をずっと前から勉強<sup>けっきよく</sup>してきて、結局早めた。 (temporal; Studied Japanese from way back before, and eventually quit.; 勉強してきて is the て-form of 勉強してくる.)

### G3.13 Potential form ～える/～られる/～できる/～来られる

To express the ability to perform a verb, the verb is conjugated. できる is actually the potential form of する! For detailed conjugation rules, refer to §GA.1. All potential form verbs are る-verbs. Further conjugations follow る-verb rules.

Interestingly, ある does not have a potential form. See more in §G3.13.2.

In casual/slang speech, ～られる (for originally る-verbs and 来る) can be shortened to ～れる, so 食べられる can be shortened to 食べれる. Try not to let this casual speak become a habit too early on! Learn the correct form first.

E.g. 漢字は書けますか? (Can you write Kanji?; 書けます is the polite potential form of 書く.)

E.g. 残念だが、今週末は行けない。 (行けない is the negative potential form of 行く.)

E.g. もう信じられない。 (信じられない is the negative potential form of 信じる.)

Importantly, potential forms do not have direct objects, since no actual action is taken, so を cannot be used. Whenever を is to be used, use が or the topic particles は、も、etc. instead.

E.g. 富士山<sup>のぼ</sup>が登れた。 (I could climb Mt. Fuji.; 富士山を登れた is wrong!)

E.g. 重い荷物<sup>にもつ</sup>は持てます。(I am able to hold heavy luggage.; 持てます is the polite potential form of 持つ: the potential form is 持てる.)

### G3.13.1 The special cases 見られる、聞ける and the alternatives 見ることができる、聞くことができる (vs. 見える、聞こえる)

The transitive verbs 見る and 聞く are paired with their intransitive counterparts 見える and 聞こえる. However, the potential forms of 見る and 聞く, 見られる and 聞ける, exist. For these two cases, expression of the “ability to perform a verb” meaning is left to the intransitive counterparts. The potential forms take on a special, additional layer of meaning: **to be given the opportunity** to see or hear something.

E.g. 今日は晴れて、富士山が見える。(It cleared up today and Mt. Fuji is visible.; 晴れる: (of sky) to clear up)

E.g. 友達のおかげで、映画はタダで見られた。(Thanks to my friend, I was able to watch the movie for free.; タダ: free-of-charge)

E.g. 周り<sup>まわ</sup>がうるさくて、彼が言っていたことがあんまり聞こえなかった。(The surroundings were noisy and I couldn't really hear what he was saying.; 周り: surroundings)

E.g. 久しぶりに彼の声が聞けた。(For the first time in a long time, I was able to hear his voice.)

That said, it is actually more common to express “given the opportunity” as “the seeing/hearing thing is doable (～{こと/の}ができる)”, as in the following examples.

E.g. 友達のおかげで、映画はタダで見ると{こと/の}ができた。(Thanks to my friend, I was able to watch the movie for free.; タダ: free-of-charge)

E.g. 久しぶりに彼の声が聞く{こと/の}ができた。(For the first time in a long time, I was able to hear his voice.)

### G3.13.2 Potential to exist: あり ruby{得{え/う}る}

Interestingly, ある doesn't have a potential form. The round-about way of saying “possible to exist” is 「あることができる」, but this is almost never used. Instead, we use あり得る, which is actually a compound verb made from ある and the auxiliary verb 得る<sup>え/う</sup> (meaning to be able to), and not considered to be a potential form of ある by natives (see discussion on [Reddit](#)).

For 得, the unconjugated form can be read as う (slightly more formal and traditional), but all conjugated forms use え. I'd stick to え always, the modern pronunciation (see discussion on [HN](#)).

E.g. そんなことはあり得る。(That kind of situation/event is possible.)

E.g. そんなことはあり得ない。(That kind of situation/event is impossible.)

E.g. 彼が寝坊<sup>ねぼう</sup>したこともうあり得るね。(It is possible that he overslept.; 寝坊する: to oversleep)

E.g. 其れは、あり得ない話だよ。(That's an impossible story/scenario.)

## G3.14 ～にする、～になる auxiliary verbs

All forms in this section allow further conjugations based on the rules of ～する and ～なる.

For adjectives, both <adj>にする and <adj>になる have the standard interpretation of causing something to become the adjective, or to become the adjective itself respectively:

- (revision and extension of §G2.11) <na-adj>にする/<i-adj root>くする means to make something become <adj>.

E.g. 静かにする (be/make quiet)、きれいにする (make clean).

E.g. 強くする (make stronger)、小さくする (make smaller).

- <na-adj>になる/<i-adj root>くなる means to become <adj>.

E.g. 去年から背が高くなったね。 (Your height has gotten taller from last year, huh?; 背: height)

E.g. 運動しているから、強くなる。 (Because I am exercising, I'll become stronger.)

E.g. 勉強をたくさんしたから、頭がよくなった。 (Because I studied a lot, I became smarter.)

For nouns, <nn>にする has a special meaning, though <nn>になる preserves the standard interpretation:

- (new!) <nn>にする means to decide on <nn> (“do with <nn> as destination”), and is commonly used when ordering things from a menu.

E.g. 私は、ハンバーガーとサラダにします。 (I'll go with the hamburger and salad.; にします is the polite form of にする.)

E.g. 他にいいものがたくさんあるけど、やっぱりこれにする。 (There are many other good things, but as I thought, I'll go with this one.; 他に: besides/in addition to)

- <nn>になる means to become <nn>.

E.g. 医者になる。 (Become a doctor.)

For verbs, while we recognise that adverbs can modify verbs, we do not have a way to convert verbs into a modifying adverb, unlike what we can do with adjectives. Instead, we refer to the verb using こと (event/thing) or 様 (manner), then tag on ～にする or ～になる. In fact, ～ことにする、～ことになる、～ようにする、～ようになる have special meanings (the last two are usually written in 仮名 alone).

<v>ことに{する/なる} have an nuance of *deciding to* <v>. <v>ようにする specifically means *to try to do* <v>. <v>ようになる specifically indicates a *change towards* <v> which has/will take place.

- <v>ことにする means to decide to <v>. A related form, <v>ことにしている, means to decide to make it a rule/practice to <v> (“to continuously decide to <v>”).

E.g. 海外に行くことにした。 (I decided that I will go abroad.)

E.g. 私は6時に起床することになっている。 (I make a practice of getting up at six.)

- <v>ことになる means to have been arranged/decided so that <v>.

E.g. 海外に行くことになった。 (It's been arranged/decided that I will go abroad.)

- <v>ようにする means to try to make sure that <v>.

E.g. 肉を毎日食べないようにする。 (I will try not to eat meat everyday.)

To express something like “I’m trying to study”, use 「勉強するようにしている」. My previous attempt “勉強しているようにする” is unnatural, because ようにする refers to you trying

to do something *in the future*, and 勉強している is already happening. Furthermore, this incorrect form may be misconstrued as “I’m acting like I’m studying”. [GMN]

- <v>ようになる means to come to be that/start to <v>. The implicit nuance is on a change of state from not <v> to <v>.

E.g. 肉を毎日食べないようになった。 (I started to not eat meat everyday.)

Furthermore, because potential verbs describe a state of possibility rather than an actual action, <v potential>ようになる is often used to describe a change (from a state of infeasibility) to a state of feasibility.

E.g. 日本に来て、寿司が食べられるようになった。 (After coming to Japan, I became able to eat sushi.)

E.g. 1年間練習したから、ピアノが弾けるようになった。 (Because I practised for a year, I became able to play the piano.; 弾く: to play a stringed/keyboard instrument)

E.g. 地下に入って、富士山が見えなくなった。 (After going underground, Mt. Fuji became not visible.; 見える → 見えない → 見えなくなる → 見えなくなった)

### G3.14.1 ~なくなる versus ~ないようになる

In the final example in the previous section, 見えないようになった is also acceptable. Both mean the same, though 見えないようになった focuses on the *change*. 見えなくなった focuses on the *result*, and is more commonly used. [HN], [goo], [GMN]

E.g. 地下に入って、富士山が見えなくなった。 (After going underground, Mt. Fuji became not visible.; 見える → 見えない → 見えなくなる → 見えなくなった)

E.g. 地下に入って、富士山が見えないようになった。 (After going underground, Mt. Fuji became not visible.)

### G3.14.2 Decoupling form and function in Japanese grammar

Read the main discussion on SOF, courtesy of MT.

The phrase 「見えなくなった」 is grammatically correct, but explaining how it came to is not straightforward.

One important takeaway is that “Japanese is not like Indo-European languages, and so at some point, clinging to Indo-European grammatical categories can get in the way”.

It is a misconception to parse 見えなくなった as “見えなく (adverb form of adjective 見えない) + なった (past tense of なる)”.

An adverb refers to a grammatical *function*, specifically the function of describing the *manner* something is or some action is done. Since 見えなく does not mean “in a manner that is not visible”, it is not serving the function of the adverb. “In English, you can say adverbs end in ‘ly’. Does that mean that *bully* is an adverb or that *silly* is an adverb?”

見えなく merely takes on the same grammatical *form* as adverbs. 見えない is in the *form* of an い-adjectives, and so it conjugates like い-adjectives: conjugation rules are based on form, not function. In Japanese, 見えなく is the 連用形 (conjunctive form) of 見えない, the form used during conjugation with other grammatical units. No native will understand 見えなく as “in a manner

that is not visible”; “it’s just part of the form into which the word must *inflect* to function properly in the sentence”.

Specifically, 見えなくなった is made of 見える + ない + なる. To link these into a phrase, each component must be converted into the 連用形 (actually ない comes after the 未然形 (nai stem of a verb) of 見える, which is 見え). Thus the required forms are 見え (未然形)、なく (連用形)、なった (past), resulting in 見えなくなった.

### G3.15 Conditionals

There are four ways to say “if” in Japanese.

#### G3.15.1 Conditional form ～ば

*The Takoboto dictionary refers to this as the “provisional form”, for some reason.*

This is the simplest, most general conditional, and is a conjugation of nouns, adjectives and verbs. Refer to §GA.1 for detailed conjugation rules. It means if <future ...>ば, then <...>“. The focus is on the conditional predicate, i.e. the part before the ば, not on the statement that follows.

The conjugation rule for nouns and な-adjectives is suffixing 「～であれば」, which is actually using the conditional form あれば of the verb ある. 「である」 is a formal expression we will see much later (???).

In the examples that follow, the focus is underlined.

E.g. 友達に会えれば、買い物に行きます。(If I can meet my friend, we will go shopping.; 会えれば is the conditional form of the potential verb 会える)

E.g. お金があればいいね。(If I had money, it would be good, huh?)

E.g. 楽しければ、私も行く。(If it's fun, I'll go too.)

E.g. 楽しくなければ、私もう行かない。(If it's not fun, I'll also not go.)

E.g. 食べなければ病気になるよ。(If you don't eat, you will become sick.)

#### G3.15.2 Past conditional form ～たら[ば]

The past conditional form conveys the same idea as the basic conditional form (§G3.15.1), but with a difference in focus: the focus is on the statement that follows the conditional predicate, i.e. the part after the たら[ば], not on the predicate itself. The optional [ば] is used for formality; in causal speech it is omitted.

The predicate always takes on the past tense, though this doesn't necessarily mean the predicate must have happened in the past. It can be a future, not-yet-happened event too, just like English's “if ... *were* to happen/if I *were* ..., then ...”.

In the examples that follow, the focus is underlined.

E.g. 暇だったら [ば]、遊びに行くよ。(If I am free, I'll go to play.)

E.g. 学生だったら [ば]、学生割引で買えます。(If you're a student, you can buy with a student discount.)

E.g. 友達に会えたら [ば]、買い物に行きます。(If I can meet my friend, we will go shopping.)

E.g. お金があったら [ば] いいね。(If I had money, it would be good, huh?)

There is also a second usage, to express surprise at an unexpected past outcome, via the schema <past predicate/prior event>たら[ば]、<unexpected past outcome>.

E.g. 家に帰ったら<sup>うち</sup>[ば]、誰もいなかった。(When I went home, there was (unexpectedly) no one there.)

E.g. アメリカに行ったら[ば]、たくさん太<sup>ふと</sup>りました。(As a result of going to America, I (unexpectedly) got really fat.; 太<sup>ふと</sup>りました is the past polite form of 太<sup>ふと</sup>る)

The way to disambiguate between the two usages is to first recognise that in either case, when we see/hear たら[ば], we focus on what comes next. Then, if what comes next is in present tense, there's no surprise nuance; if what comes next is in past tense, then there is a surprise nuance.

### G3.15.3 Expected consequence conditionals with と

*This is similar in nuance to the Cだったら E construct (see 137), with the added element of expectedness.*

A と B means that if A happens, then as a natural consequence B is *expected* to happen. The schema is C[だ]と E. Note that the state-of-being だ must be made explicit for nouns and な-adjectives, for disambiguation with other usages of と!

E.g. 先生だと、きっと<sup>としよう</sup>年上なんじゃないですか。(If he's a teacher, surely he is senior, right?; きっと: surely; なん is the contraction of なの (noun explanatory ender), じゃないですか is a polite form of asking)

E.g. ボールを落とすと落ちる。(If you drop the ball, it will fall.)

E.g. 電気を消すと暗<sup>くら</sup>くなる。(If you turn off the lights, it will become dark.; 暗<sup>くら</sup>い: dark)

E.g. 学校に行かないと友達と会えないよ。(If you don't go to school, you can't meet your friends.)

E.g. たくさん食べると太<sup>ふと</sup>るよ。(If you eat a lot, you will get fat.)

### G3.15.4 Contextual conditionals with なら[ば]

Contextual conditionals express the nuance that the statement will occur *given that* the contextual predicate holds. It's translated as "If given <predicate>, then <statement>". The schema is <context>なら[ば]、<statement>. The optional [ば] is used for formality; in casual speech it is omitted.

E.g. みんなが行くなら[ば]私も行く。(If given that everyone is going, then I'll go too.)

E.g. アリスさんが言うなら[ば]問題ないよ。(If given that Alice says so, then there's no problem.)

E.g. 図書館はどこですか。図書館なら[ば]、あそこです。(Where is the library? If given that you're talking about the library, then it's over there.)

### G3.15.5 もし as an uncertainty embellishment

The adverb もし (and related ones like もしや、もしかし) are only a supplement to add the nuance of uncertainty on whether the predicate/condition is true ("perhaps/by any chance"). One of the four forms above must still be used.

E.g. もしよかったら、映画を見に行きますか。(past conditional; If by any chance it's ok with you, go to watch movie?; 見<sup>み</sup>に is the adverb of 見る)

E.g. もし時間がないなら、明日でもいいよ。(contextual conditional; If by chance given that there's no time, tomorrow is fine as well.)

## G3.16 Prohibition, requirement and permission

Expressing the idea that something must not be done, must be done, or that it's ok to do/not do is common in Japanese.

### G3.16.1 Prohibition (things that must not be done) ～ては{だめ/いけない/ならない}

There are three adjectives that convey prohibition: だめ、いけない、ならない. Of the three, だめ is casual (ダメ is even more casual, used in friendly settings; [HN]). Also, ならない is used more for general rules, laws and policies that apply for more than one person, so it can be interpreted as the sternest of the three. In terms of sternness, だめ < いけない < ならない.

いけない comes from <sup>い</sup>行けない which means bad/wrong/naughty, but when used in the prohibitory manner is written in 仮名 alone.

All conjugations of the three adjectives are shown in Table 10. The polite forms taken by いけない and ならない can be explained by interpreting them as present-negative forms of the verbs いく (meaning to go well) and なる (to become) respectively.

Table 10: Prohibition conjugations.

Present prohibition	だめ	いけない	ならない
Past prohibition	だめだった	いけなかった	ならなかった
Present prohibition (polite)	だめです	いきません	なりません
Past prohibition (polite)	だめでした	いけませんでした	ならませんでした

The long-form schema for prohibition is <v te>は{だめ/いけない/ならない}.

E.g. ここに入っ**て**はいけません。(You must not enter here.)

E.g. それを**食**てはだめ！(You can't eat that!)

E.g. 夜、遅くまで**電**話してはならない。(You must not use the phone until late at night.)

E.g. 早く**寝**てはなりませんでした。(I wasn't allowed to sleep early.)

E.g. **死**んではダメだよ！(You can't die!)

E.g. **泳**いではなりません。(Do not swim.)

The contractions for expressing prohibition involve the following replacements. Note that the {だめ/いけない/ならない} must not be omitted for contracted prohibition.

$$\begin{array}{lcl}
 \overbrace{\dots\text{て}}^{\text{v te}}\text{は}\{\text{だめ/いけない/ならない}\} & \mapsto & \overbrace{\dots\text{ちゃ}}^{\text{v te fragment}}\{\text{だめ/いけない/ならない}\} \\
 \overbrace{\dots\text{で}}^{\text{v te}}\text{は}\{\text{だめ/いけない/ならない}\} & \mapsto & \overbrace{\dots\text{じゃ}}^{\text{v te fragment}}\{\text{だめ/いけない/ならない}\}
 \end{array}$$

Equivalently, ては  $\mapsto$  ちゃ, では  $\mapsto$  じゃ.

The second form is used for verbs with endings in {ぐ, む, ぬ, ぶ}; their て-forms use で.

The contracted schema for prohibition is <v te fragment>{ちゃ/じゃ}{だめ/いけない/ならない}.

E.g. ここに入っちゃいけません。 (You must not enter here.)

E.g. それを食べちゃだめ！ (You can't eat that!)

E.g. 夜、遅くまで電話しちゃならない。 (You must not use the phone until late at night.)

E.g. 早く寝ちゃなりませんでした。 (I wasn't allowed to sleep early.)

E.g. 死んじゃダメだよ！ (You can't die!)

E.g. 泳いじゃなりません。 (Do not swim.)

*Side note: 「死んじゃった」 is actually a contraction of 「死んでしまう」, where しまう is an auxiliary verb meaning “to do accidentally”, and しまう is contracted to じゃう, then conjugated into the past tense as じゃった. It's got nothing to do with the 死んじゃ we see in this section, which comes from 死んでは.*

Finally, the ちゃ/じゃ contractions here are slightly feminine.

### G3.16.2 Requirement (things that must be done)

Requirement is expressed as the negation of prohibition. The <v te> is the one that is negated, and there are three grammatical schemae that can be used. All are correct, and are all used at least in formal writing, so learn them all.

The three long-form grammatical schemae for requirement:

1. <v te-negative>は{だめ/いけない/ならない}.

E.g. 毎日学校に行かなくてはなりません。 (I must go to school everyday.)

E.g. 宿題をしなくてはいけなかった。 (I had to do homework.)

2. <v negative>と{だめ/いけない/ならない}. This uses the expected consequence conditional (§G3.15.3). The literal meaning is: if you don't do something, the expected consequence is no good. This is the easiest form, and is used even outside of the expected consequence characterisation.

E.g. 毎日学校に行かないとなりません。 (I must go to school everyday.)

E.g. 宿題をしなといけなかった。 (I had to do homework.)

3. <v conditional-negative>{だめ/いけない/ならない}. This uses the conditional form (§G3.15.1). For requirement, because the verb is negated, the conditional-negative always contains ～なければ.

E.g. 毎日学校に行かなければなりません。 (I must go to school everyday.)

E.g. 宿題をしなければいけなかった。 (I had to do homework.)

In casual speech, however, people default to either the <v negative>と{だめ/いけない/ならない} or the contractions that follow. When used to express requirement, the expected consequence conditional と (§G3.15.3) loses the expected consequence nuance (it's used in more situations that what it was originally defined for).

The contractions for expressing requirement involve the following replacements. Note that the {だめ/いけない/ならない} is omitted for contracted requirement.

[first schema]	$\overbrace{\dots \text{なくては}\{\text{だめ/いけない/ならない}\}}^{\text{v te-negative}} \mapsto \overbrace{\dots \text{な}}^{\text{v negative fragment}} \quad \text{くちゃ}$
[second schema]	$\overbrace{\dots \text{ないと}\{\text{だめ/いけない/ならない}\}}^{\text{v negative}} \mapsto \overbrace{\dots \text{ないと}}^{\text{v negative}}$
[third schema]	$\overbrace{\dots \text{なければ}\{\text{だめ/いけない/ならない}\}}^{\text{v conditional-negative}} \mapsto \overbrace{\dots \text{な}}^{\text{v negative fragment}} \quad \text{きゃ}$

Equivalently,  $\text{なくては} \mapsto \text{なくちゃ}$ ,  $\text{なければ} \mapsto \text{なきゃ}$ .

For the first schema contraction,  $\text{なくちゃ}$  is the colloquial form of  $\text{なくては}$ , which is an abbreviation of  $\text{なくては}\text{はいけない}$ . For the third schema contraction,  $\text{なきゃ}$  is the colloquial form of  $\text{なければ}$ , which is the conditional-negative form of the verb ある. In a sense, every verb has two colloquial “requirement” forms:  $\dots\text{なくちゃ}$  and  $\dots\text{なきゃ}$ , based on their negative forms.

Note that these contractions cannot be conjugated into the past tense, i.e. “ $\sim\text{なくちゃった}$ ”, “ $\sim\text{なきゃった}$ ”, “ $\sim\text{なくちゃない}$ ”, “ $\sim\text{なきゃない}$ ” do not exist! [TNSJ] If you want to mean requirement in the past, use any of the three long form schemae above. If you want to mean prohibition, use the one contracted schema in §G3.16.1. If you want to mean not a requirement (i.e. okay to not do), use the one schema in §G3.16.3.

Here are the three contracted grammatical schemae for requirement.

1. <v negative fragment ending in な>くちゃ.

E.g. 毎日学校に行かなくちゃ。 (I must go to school everyday.)

E.g. 宿題をしなくちゃ。 (I have to do homework.)

2. <v negative>と.

E.g. 毎日学校に行かないと。 (I must go to school everyday.)

E.g. 宿題をしないと。 (I have to do homework.)

3. <v negative fragment ending in な>きゃ.

E.g. 毎日学校に行かなきゃ。 (I must go to school everyday.)

E.g. 宿題をしなきゃ。 (I have to do homework.)

(Notice that the homework example has been changed to present tense; the past tense has no contractions.)

Finally, the  $\text{なくちゃ}$  contraction here is slightly feminine.

### G3.16.3 Permission (things that are okay to do or not to do) $\sim\text{てもいい}$

The schema for permission is simply <allowed v te>も{いい/大丈夫/構<sup>かま</sup>わない}. Other permissive enders work too but these three are the most common. 構<sup>かま</sup>わない is the negative form of 構<sup>かま</sup>う, meaning to mind. For <v te>もいい, the も may be dropped in casual speech.

E.g. 全部食べて[も]いいよ。 (You can go ahead and eat it all.; “Even if you eat it all, it’s good, you know.”)

E.g. 全部食べなくて[も]いいよ。 (You don't have to eat it all.)

E.g. もう帰って[も]いい? (Can I go home already?)

E.g. これ、ちょっと見て[も]いい? (Can I take a quick look at this?)

E.g. 全部飲んでも大丈夫だよ。 (It's okay if you drink it all.)

E.g. 全部飲んでも構わないよ。 (You can drink it all, I don't mind.)

### G3.17 Desires, invitation and suggestions

This section concerns the expression of direct desires and discreet suggestions.

#### G3.17.1 Desiderative form ～たい

*Takoboto and most sources simply call this the たい form, but desiderative, meaning expressing a desire to, is more descriptive.*

The conjugation rule is simple: <stem>たい. This transforms the verb into an い-adjective (in terms of form), but still retaining the behaviour of verbs to use verb particles を、に、へ (§G2.9). Its form conjugate like い-adjectives: ～たい (present-positive desiderative), ～たくない (present-negative desiderative), ～たかった (past-positive desiderative), ～たくなかった (past-negative desiderative).

Note that ある does not have a desiderative form: inanimate objects cannot desire anything. いる's desiderative form is いたい.

The desiderative form can only be used from the first person, because you cannot read other people's mind and express what they want to do. To refer to other people's desires, use direct or indirect quotations (???). Questions about other people's desires are permitted because we are not making presumptions.

E.g. ずっと一緒にいたい。 (I want to be together forever.)

E.g. 何をしたいですか。 (What do you want to do?)

E.g. 犬と遊びたいですか。 (Do you want to play with dog?)

E.g. オン前に行きたい。 (I want to go to a hot spring.)

E.g. ケーキ、食べたくないの? (You don't want to eat cake?)

E.g. 食べなくなかったけど食べなくなった。 (I didn't want to eat, but I became wanting to eat.)

E.g. 食べなくなかった。 (I became not wanting to eat.; to parse this, split it as 食べた|くな|くなった: eat + negative desire + became.)

#### G3.17.2 Auxiliary adjective ほしい

The 「<nn>が欲しい」 construct means to want <nn>. To express that we want a verb <v> done, or that we want the listener to do <v>, we use the auxiliary adjective ほしい. This auxiliary usage is written in 仮名 alone.

The auxiliary adjective ほしい is actually rarely used in practice, since there are other more appropriate ways to make requests (???).

E.g. 大好きぬいぐるみが欲しい! (I want a big stuffed doll!; ぬいぐるみ: stuffed toy)

E.g. 全部食べてほしいんだけど…。 (I want it all eaten but...; This does not say “I want to eat it all”: that would be 全部食べたいんだ。)

E.g. 部屋をきれいにしてほしいのよ。 (I want the room cleaned up, you know.)

### G3.17.3 Volitional form: invitation 〜<sup>〜お</sup>う/〜よう/〜ましょう

“Volitional” means “relating to the use of one’s will”. The volitional form is used to express that the speaker is setting out to do something. In simpler terms, it expresses the idea of invitation, and translates to “Let’s/Shall we” in English. Refer to §GA.1 for a full table of conjugations. The volitional conjugations for the two exception verbs are best memorised, there’s no simple rule explanation (しよう、来よう).

Both casual and polite volitional forms exist, and the polite form must come at the end of the sentence.

Note that the volitional form only has one tense: starting from the present, looking into the future. It cannot be used with a past tense verb like “食べたよう”.

E.g. 今日は何をしようか。 (What shall we do today?)

E.g. 今日は何をしましょうか。 (What shall we do today? (polite))

E.g. テマパークに行こう！ (Let’s go to the theme park!)

E.g. テマパークに行きましょう！ (Let’s go to the theme park! (polite))

E.g. 明日は何を食べようか。カレーを食べよう！ (What shall we eat tomorrow? Let’s eat curry!)

E.g. 明日は何を食べましょうか。カレーを食べましょう！ (What shall we eat tomorrow? Let’s eat curry! (polite))

### G3.17.4 Suggestions {ば/たらどう}

Suggestions are expressed by suffixing 「どう」 to the conditional form (ば; §G3.15.1) or the past conditional たら (§G3.15.2). In English, the literal translation is “If you do <v>, how is it?” and the natural translation is “How about doing <v>?”

E.g. たまにご両親と話せばどう？ (How about talking with your parents once in a while?; たまに: occasionally; 話せば is the conditional form of 話す)

E.g. 銀行に行ったらどうですか。 (How about going to the bank?)

## G3.18 Quotation: performing actions on relative clauses

We first came across relative clauses in §G2.10.1, where they are used as noun modifiers using the schema <relative verb clause><nn>.

In order to perform an action (e.g. thinking, saying, hearing, variants of each, or even simply referring to it in a bigger complex sentence) on a relative clause, we use the concept of **quotation**, which encapsulates the relative clause into a unit, upon which we can perform actions. This is an important construct in Japanese as the Japanese seldom affirm definite statements, and prefer to express uncertainty or probability, which requires performing corresponding actions (e.g. thinking) on relative clauses.

### G3.18.1 Direct quotation 「...」 と

The と particle is the quote marker particle, as first seen in §G2.1. The syntax is 「<quote>」 と <v>. <v> can be anything like 言う、聞く、呼ぶ (to call)、叫ぶ (to scream)、呟く (to mutter), etc. The <v> doesn't need to immediately follow と; other adverbs and sentence parts-of-speech can come in between, so long as <v> appears in the clause somewhere after と.

E.g. アリスが、「寒い」と言った。(“Cold”, said Alice.)

E.g. 「寒い」とアイリスが田中に言った。(“Cold”, said Alice to Tanaka)

E.g. 「今日は授業がない」と先生から聞いたんだけど。(It is that I heard from the teacher “there is no class today”...)

### G3.18.2 Indirect quotation と、って

Also known as interpreted quotation, indirect quotation quotes *along the lines* of what the speaker actually said. Thoughts and considerations are often expressed as indirect quotes, with the verbs 思う and 考える respectively. The と particle is used here too, **except that unconjugated nouns and な-adjective state-of-being must be explicitly declared with な**.

In the following examples, the indirect quotation is underlined.

When 何 is used to mean “what”, it is read as なに; when it is used to mean “how many”, it is read as なん. [NHK]

E.g. 先生から今日は授業がないと聞いたんだけど。(I heard from the teacher that there is no class today.; Note the absence of direct quotation marks.)

E.g. カレーを食べようと思ったけど、食べる時間がなかった。(I thought about setting out to eating curry but didn't have time to eat.; **DO NOT confuse なかった and なった: the former is the past-negative of ある, and the latter is the past tense of なる.**)

E.g. 今、どこに行こうかと考えている。(Now, I'm considering where to set out to go.; this is an example of the question marker in indirect quotations, §G3.4.4)

E.g. 彼は、これは何だと言いましたか。(What did he say this is?; **Here, the explicit state-of-being assertion だ is compulsory!**)

E.g. 彼は、何と言いましたか。(What did he say?)

E.g. 彼は、これは何かと言いました。(He asked what this is.)

E.g. 彼は高校生だと聞いたけど、信じられない。(I heard that he is a high school student, but I can't believe it.)

The casual version of the と particle is って. Specifically, <quote>と<v> can be shortened to <quote>って. The verb is dropped and the speaker will hope that the listener can **understand everything from context! Usually, the omitted verb after って is 言った (“to say”), so if it's any other verb, don't drop it.**

E.g. 今、時間がないと聞いたんだけど、本当？ (I heard you don't have time now, is that true?)

E.g. 今、時間がないって聞いたんだけど、本当？ (I heard you don't have time now, is that true?)

The following are examples of contextual guessing in action. **The omitted verb is assumed to be 言った by default.**

E.g. 今、時間がないってけど、本当？ (You **said** you don't have time now, is that true?)

E.g. 智子<sup>ともこ</sup>は来年、海外に行くんだって。 (Tomoko **said** that she's going overseas next year.)

E.g. もうお金がないって。 (I already **told** you I have no money.)

E.g. え？何<sup>なん</sup>だって？ (Huh? What did you **say**?)

### G3.18.3 って as a replacement for topic particle は

って can be used to talk about practically anything, not just as the informal form of the quotation marker と. It is used everywhere in casual speech, usually to bring up a topic.

E.g. 明日<sup>あした</sup>って、雨が降るんだって。 (About tomorrow, I hear that it's going to rain.; first って is a replacement for は, second って contains the hidden verb “to hear”. [A bit weird. I wouldn't use the trailing って like this; I'll just omit it.](#))

E.g. アリスって、すごくいい人でしょう？ (Alice is a very good person, right?; でし<sup>で</sup>ょ[う] is the [formal] conjectural form of です.)

## G3.19 Definitions and descriptions with the abstract という/って (and slang つう)

言う means to say, and when used in the abstract way, is written as いう. It can be used with the と particle to define, describe and to refer to something itself.

### G3.19.1 Definition という

言う has a second meaning, “to call/name”. However, since nothing is actually said, it is common to write it in 仮名 only (also ok to write it in 漢字).

E.g. これは、日本語で何<sup>なん</sup>といいますか。 (What do you call this in Japanese?; 言う here means to call/name)

E.g. 私は、アリス<sup>アリス</sup>といいます。 (I am called Alice.; 言う here means to call/name)

In the following examples, the <called> という<thing> schema is used.

E.g. これは、何<sup>なん</sup>という魚ですか。この魚は、鯛<sup>たい</sup>といいます。 (What is this fish referred to as? It's known as Tai.)<sup>4</sup>

E.g. ルミネ<sup>ルミネ</sup>というデパートはどこにあるか、知っていますか。 (Do you know where the department store called “Lumine” is?)

E.g. 「友達」<sup>ともだち</sup>は、英語で「friend」という意味です。 (The meaning of “tomodachi” in English is “friend”).

### G3.19.2 Referring to relative clause という{の/こと} and {こう/そう/ああ/どう}いう{の/こと} and って

When a relative clause is encapsulated with 「と」, it must be followed by a verb. Sometimes, we want to simply refer to the relative clause in a bigger complex sentence, and in this case the いう verb serves as a generic verb (it can but in this usage it doesn't mean that you're saying the quote). The schema <quote>という{の/こと} is a very common construction.

<sup>4</sup>This example can also be written as 「この魚は何<sup>なん</sup>といいますか。」 HN, but could technically be misconstrued as “About this fish, what does it say?”. Prefer the <called> という<thing> schema.

E.g. 主人公が犯人だったという{の/こと}が一番面白かった。(The most interesting thing was that the main character was the criminal.)

E.g. 日本人はお避けに弱いという{の/こと}は本当？(It is true that Japanese people are weak to alcohol?)

E.g. 独身だという{の/こと}は、嘘だったの？(Was it a lie that you are single?)

E.g. リブートという{の/こと}は、パソコンを再起動するという{の/こと}です。(Reboot means to restart your computer.)

E.g. みきさんが洋介別れたということだ。ということは、みきさんは、今彼氏がいらないということ？そう。そういうこと。(I heard that Miki-chan broke up with Yousuke. Does that mean Miki-chan doesn't have a boyfriend now? That's right. That's what it means.; **ということだ specifically indicates hearsay or conjecture about others' feelings**)

If the relative clause can be inferred from context, it can be replaced with a generic way of doing something, using the pre-noun adjectivals こういう、そういう、ああいう、どういう (and the こんあ、そんあ、あんあ、どんあ forms too).

E.g. あんたは、いつもこういう時に来るんだから、困るんだよ。(It's because you always come at times like these that I'm trouble.)

E.g. そういう人と一緒に仕事をするのは、嫌だよね。(Doing work together with that type of person would be unpleasant, huh?)

E.g. ああいう人と結婚できたら、幸せになれるとお見ます。(I think if you can marry that type of person, you can become happy.)

E.g. 大学にいかないって、どういう意味なの？(What do you mean, "I'm not going to university"?)

Finally, って is not only a short form for と<v> after quotations. It is also a short form for the generic verb という and any following particles, so <quote>という<particles> can be shortened to <quote>って. Again, the speaker will hope that the listener can **understand everything from context**.

E.g. 来年留学するという{の/こと}は、智子のこと？(The studying abroad next year thing, is that Tomoko?)

E.g. 来年留学するって智子のこと？(The studying abroad next year thing, is that Tomoko?)

There's a further abbreviation of って to て (and replacement of と with て, which is slightly easier to say), **but this only works for the generic verb. For actually said things, this contraction is invalid! This is stepping into the territory of native lazy speak, I'd say don't worry about this too much.**

E.g. てことは、みきさんは、いま彼氏がいなくてこと？(both て replaced という; the second one could've also replaced the trailing こと)

E.g. ていうか、もう帰らないとだめですけど。(ていうか instead of というか for rephrasing and refining definitions, §G3.19.3)

E.g. みきさんが、明日来ないって。(Miki-chan says she isn't coming tomorrow.; **“みきさんが、明日来ないて。” is wrong!**)

### G3.19.3 Rephrasing and refining definitions with というか、connector

The definition expression いう (§G3.19.1) can be suffixed with the question marker か to add a questioning element, useful for rephrasing or redefining something. This is common in casual speech. As a connector, it tags to the thing that's being rephrased, as in <to rephrase> いうか、<rephrase>.

E.g. みきちゃんは、あんたの彼女でしょう？う～ん、彼女 いうか、友達 いうか、なん いうか...{} (Miki-chan is your girlfriend, right? Um, you might say girlfriend, or friend, or something...)

E.g. お酒は好き いうか、ないと生きていけない。(I like alcohol, or rather, I can't live on without it.; 生きていけない is the negative potential form of 生きていく (meaning to live on). This is tricky to parse. The presence of けない correctly hints to us that some negative potential form is in use, but it is not the negative potential form of 生きている (that would be 生きていられない). The presence of いけない might also wrongly lead us to think 生きる is prohibited (that would be 生きてはいけない). The correct way to parse is to recognise that け must be the え form of some く verb, which leads to 生きていく. To disassociate from the prohibition いけない, recognise that the は particle is missing, which is required by the prohibition schema てはいけない.)

E.g. 多分行かないと思う。 いうか、お金がないから、行けない。(Don't think I'll go. Or rather, I can't go because I have no money.)

E.g. いうか、もう帰らないとだめですけど。(Rather than that, I have to go home already.)

### G3.19.4 Referring to relative clause with annoyance つう (slang)

The generic verb いう can be shortened to つう. It is harder to say (violates core slang principle of making things easier to say, §G3.24), but it has a hard, hissing sound, so it is used to convey anger. It is masculine. It can sometimes be further shortened to just つ. つって is the て-from of つう.

E.g. つうか いうか、なんでお前がここにんいるんのよ！(Or rather, why are you here?!)

E.g. 宿題で時間がない つって 言ってるのに、みきちゃんとデートしに行ったらしい。(Although he's saying he doesn't have time because of homework, I hear he went on a date with Miki-chan.; デートする → デートし (stem); らしい: appearance, based on evidence/trustworthy hearsay)

E.g. 明日は試験だぞ。 つっても、勉強はしてないだろうな。(Yo, tomorrow's the test. Even if I say that, you probably didn't study anyway, huh?; してない is a contraction of していない (from している))

E.g. だから、違うんだ つうの！(Like I said, you're wrong!)

The annoyance can be further emphasised using つつう.

E.g. だから、違うんだ つつうの！(Like I said, you're wrong!)

### G3.19.5 Referring to relative clause with exasperation ってば/ったら (slang)

To take annoyance to the next level, the generic verb 「いう」's conditional form 「といえは」 (§G3.15.1) and past conditional form 「といったら」 (§G3.15.2) can be abbreviated to ってば or ったら respectively. The (abbreviated) conditionals of いう are used to express the exasperation of repeating yourself multiple times, or with someone not listening to you.

E.g. もう行 ってば！(I told you I'm going already!)

E.g. あなたったら、いつも忘れるんだから。 (Because you're always forgetting.)

### G3.19.6 Expressing disagreement or dissatisfaction (whiningly) with だって

だって is a conjunction used to express disagreement or dissatisfaction whiningly.

E.g. しないとだめだよ。だって、時間がないからできないよ。 (Have to do it, you know. But (even so), can't do it because there is no time.)

E.g. 行かなくなくてもいいよ。だって、みんな行くって。私もいかないと。 (Don't have to go, you know. But (even so), everybody said they're going. I have to go too.)

## G3.20 Trialling something out or attempting something

The "try" in English is heavily overloaded. In Japanese, there are separate grammatical expressions for each sense of "try". We've already seen one sense: <v>ようにする, meaning to try to make sure that <v>, as in *putting in effort* to make a habit of <v>.

This section concerns two other senses: *trialling* something out, and *attempting* to do something.

### G3.20.1 Trialling something out with the auxiliary verb してみる

This is expressed with <v te>みる, using the auxiliary verb みる (from 見る). Think of it as <v> and see (the outcome). Further conjugations follow rules of the 見る verb. The polite form is みます.

E.g. お好み焼きを初めて食べてみたけど、とてもおいしかった！ (I tried eating okonomiyaki for the first time and it was very tasty!)

E.g. お酒を飲んでみましたが、すごく眠くなりました。 (I tried drinking alcohol and I became extremely sleepy.; 眠く is the adverbial form of 眠い)

E.g. 新しいデパートに行ってみる。 (I'm going to check out the new department store.)

E.g. 広島のお好み焼きを食べてみたい！ (I want to try eating Hiroshima okonomiyaki!; みたい is the desiderative form of みる)

### G3.20.2 Attempting something with <v volitional> と{する/<v>}

This is expressed with <v volitional> とする. Attempting to do something requires exercising the will to set out to do something, hence the involvement of the volitional form. The volitional (and と) together convey the information that we're discussing attempting. Further conjugations follow the rules of the verb する.

E.g. 毎日、勉強を避けようとする。 (Everyday, she attempts to avoid study.; 避けよう is the volitional form of 避ける.)

E.g. 無やりに部屋に入ろうとしている。 (He is attempting to force his way into the room.)

E.g. 早くな寝ようとしたけど、結局は徹夜した。 (I attempted to sleep early but ended up staying up all night.)

E.g. お酒を飲もうとしたが、奥さんが止めた。 (he tried to drink alcohol but his wife stopped him.)

To describe the attempt itself with another verb <v> (e.g. to think to attempt, to decide to attempt), use <v volitional> と<v>.

E.g. 勉強をなるべく避けようと思った。(I thought I would attempt to avoid as much as possible studying.; なるべく: as much as possible)

E.g. 毎日事務に行こうと決めた。(I decided to attempt to go to the gym everyday.)

### G3.21 Giving and receiving objects and favours

Giving and receiving gifts is a big part of Japanese culture. There are four verbs of interest: あげる、やる、くれる、もらう。

The act of giving is associated with the imagery of the gift/favour “going up” to the recipient, and the act of receiving is associated with the imagery of the gift/favour “coming down” from the giver. This leads to the verbs for giving (first person) あげる (上げる), and giving (second person) くれる (whose honorific version of 下さる).

#### G3.21.1 Giving [as a favour] [て]あげる、[て]やる、[て]くれる

There are three verbs for the act of giving, each with their own use.

- あげる: to give (first person, or third person from giver's POV). The speaker must use あげる when the speaker is giving something, and the auxiliary verb <v te>あげる when the speaker is doing someone a **favour**.

E.g. 私が友達にプレゼントをあげた。(first person; I gave present to friend.; the sentence ordering can be mixed up, e.g. 「私がプレゼントを友達にあげた。」)

E.g. これは先生にあげる。(first person; I'll give this to teacher.)

E.g. 学生がこれを先生にあげる。(third person; The student give this to teacher (looking at it from the giver's POV).; changing POV to that of recipient warrants a change to くれる)

E.g. 車を買ってあげるよ。(first person; I'll give you the favour of buying the car./I'll buy the car for you.)

E.g. 代わりに行ってあげる。(first person; I'll give you the favour of going as your substitute.; かわりに: as a substitute for)

E.g. 友達が父にいいことを教えてあげた。(third person; Friend gave the favour of teaching something good to my dad (looking at it from giver's POV).; changing POV to that of recipient warrants a change to くれる)

- やる: to give (first person), when the receiver is a pet/animal. This is never used for people, but is included here to point out that やる here means “to give” and not “to do” (colloquial).  
E.g. 犬に餌をやった? (Did you give the dog food?; 餌: food for animals)

- くれる: to give (second person, or third person from recipient's POV). The speaker must use くれる when someone else is giving something to the speaker, or the auxiliary verb <v te> くれる when someone else is doing the speaker a favour.

As the recipient, the speaker uses くれる to emphasise the action of giving, and もらう to emphasise the action of receiving.

E.g. 友達が私にプレゼントをくれた。(second person; Friend gave present to me.)

E.g. これは、先生がくれた。(second person; Teacher gave this to me.)

E.g. 車を買ってくれるの? (second person; Will you give me the favour of buying a car?/  
Will you buy me a car?)

E.g. 代わりに行ってくれる? (second person; Will you give me the favour of going as my  
substitute?/Will you go as my substitute?)

E.g. 先生がこれを学生にくれる。 (third person; The teacher give this to student (looking at  
it from the recipient's POV).; changing POV to that of giver warrants a change to あげる)

E.g. 友達が父にいいことを教えてくれた。 (third person; Friend gave the favour of teaching  
something good to my dad (looking at it from recipient's POV).; changing POV to that of  
giver warrants a change to あげる)

To better illustrate the difference between first and second person (あげる、くれる), compare the  
following sentences.

E.g. 先生が教えてあげるんですか。 (Teacher, will you be giving the favour of teaching to (anybody  
*other* than the speaker)?)

E.g. 先生が教えてくれるんですか。 (Teacher, will you be giving the favour of teaching to (anybody  
*including* the speaker)?)

When speaking as the recipient of an action or favour, as a recipient the verb くれる must be used.

E.g. 私が全部食べてあげました。 (I gave the favour of eating it all.; **it's incorrect to use 食べて  
くれる here as "I" am not receiving the favour**)

E.g. 友達がプレゼントを私にくれた。 (Friend gave present to me.; **it's incorrect to use あげた  
here because "I" am not the giver**)

### G3.21.2 Receiving [as a favour] [て]もらう

There is only one verb for receiving, もらう. To indicate who the speaker is receiving something  
from, use the from-marker particler から. The past form もらった is much more commonly used,  
to indicate that the speaker received something. The auxiliary verb <v te> もらう is used when  
the speaker is receiving the favour of someone doing <v te> for their sake.

As the recipient, the speaker uses くれる to emphasise the action of giving, and もらう to emphasise  
the action of receiving.

Important: for もらう, に marks the **giver**! <receiver>が, <giver>{に/から}. The subject is  
performing the receiving, and the target of receiving is the giver.

E.g. 私が友達にプレゼントをもらった。 (I received present from friend.)

E.g. 友達からプレゼントをもらった。 (I received present from friend.)

E.g. これは友達に買ってもらった。 (About this, I received the favour from friend of buying this.)

E.g. 宿題をチェックしてもらいたかったけど、時間がなくて無理だった。 (I wanted to receive  
the favour of homework checking, but there was no time and it was impossible.; もらう → もら  
いたい → もらいたかった)

As a non-typical use case, もらう can be used by the giver speaker if they want to emphasise that  
they are the one from whom the receiver received something.

E.g. その時計は私からもらったのよ。 (He received that watch from me.)

### G3.21.3 Soliciting favours (≠ request) with auxiliary verbs てくれる、もらえる}

*Not to be confused with making requests (§G3.22)! Asking for favours is softer and less direct: “would you do X for me”, while making a request is more direct: “please do X”.*

The previous sections dealt with expressing the *actual event* of giving a gift or favour. The *solicitation* of a positive favour can be expressed as a question with <v te> てくれる? or <v te> てもらえる? (note the potential form of もらえる). Because the speaker is the recipient of the favour, あげる is not applicable.

～てくれる is used to ask for favours, but when its imperative form is used, it becomes a command  
～てくれ (§G3.22.4).

E.g. あなたが、私に千円を貸してくれる? (Will you give me the favour of lending 1000 yen?; 貸す: to lend)

E.g. 私が、あなたに千円を貸してもらえる? (Can I receive the favour of you lending 1000 yen?)

The examples include the explicit giver and receiver. They are usually omitted if obvious.

E.g. 千円を貸してくれる? (Will you give me the favour of lending 1000 yen?)

E.g. 千円を貸してもらえる? (Can I receive the favour of you lending 1000 yen?)

The request can be made softer by using the negative てくれない? てもらえない? (and their polite forms てくれませんか、てもらえませんか。).

E.g. ちょっと静かにしてくれない? (Won't you be a little quiet?)

E.g. 感じて書いてもらえませんか。 (Can you write this in kanji for me?)

The solicitation of a negative favour can be expressed as a question as <v te-negative> でくれる? or <v te-negative> てもらえる?. Basically negate the <v te> and attach で instead of て, then either くれる? or もらえる? as before.

E.g. 全部食べないでくれませんか。 (Can you not eat it all?)

E.g. 高いものを買わないでくれる? (Can you not buy expensive things?)

## G3.22 Making requests (≠ favours)

*Not to be confused with asking for favours (§G3.21.3)! Asking for favours is softer and less direct: “would you do X for me”, while making a request is more direct: “please do X”.*

The following sections discuss four ways to issue requests, in decreasing order of politeness:

ください > ちょうだい > なさい > imperative form.

### G3.22.1 Honorific requests with ～てください、～て

ください。 is the most common way of making requests. It is a special conjugation of くださる, the honorific form of くれる (§G3.21.1, §G3.21.3). ～てください must come at the end of the sentence or relative clause, just like です、ます.

On its own, くれる/ください can mean “please give me/hand me an object” as a transitive verb, using the schema <object>をください.

E.g. それをください。 (Please give me that.)

E.g. それをくれる？ (Can you give me that?)

E.g. 「それをください」とお父さんが言った。 (Father said, “Please give me that”).

ください can also mean “please do for me” as an auxiliary verb, with the schema <v te>ください. Negative requests are made the same way as with solicitation of favours (§G3.21.3), using <v te-negative>てください.

E.g. 漢字で書いてください。 (Please write it in kanji.)

E.g. ゆっくり話してください。 (Please speak slowly.)

E.g. 落書きを書かないでください。 (Please don’t draw graffiti.; 落書き: graffiti)

E.g. ここに来ないでください。 (Please don’t come here.)

In casual speech, the ください is commonly dropped, so the naked te-form (or naked te-negative form) is used for making requests. Potential confusions with って, which is a short form for the indirect quotation <quote>と<v> (§G3.18.2) or the generic verb <quote>という<particles> (§G3.19.2).

E.g. 日本語で話して。 (Please speak in Japanese.)

E.g. 消しゴムを貸して。 (Please lend me the eraser.; 消しゴム: eraser)

E.g. 遠いところに行かないで。 (Please don’t go to a far place.)

### G3.22.2 Casual requests with ～ちょうだい。

頂戴 is 謙譲語 (humble language) for the transitive verb “to receive” and the auxiliary verb “please give me/do for me” (as ～をちょうだい/～てちょうだい). It is usually written using 仮名 alone. When written in 漢字, it is used as part of very formal expressions like 頂戴致します (いたす: to do (humble)).

The grammatical rules for ちょうだい are exactly the same as ください, so it must come at the end of the sentence or relative clause. The same schemae apply: <object>をちょうだい and <v te>ちょうだい.

E.g. スプーンをちょうだい。 (Please give me the spoon.)

E.g. ここに名前を書いてちょうだい。 (Please write your name here.)

### G3.22.3 Polite firm requests with ～なさい/～な

なさい is a special honorific conjugation of する, and is a soft (polite) yet firm way of issuing a command. Common example usage situations include a mother scolding her child and a teacher wanting a delinquent student to pay attention. The schema is <v stem>なさい.

E.g. よく聞きなさい！ (Listen well!)

E.g. ここで座りなさい。 (Sit here.; 座る: to sit)

E.g. やめなさい！ (Stop!)

In casual speech, さい can be dropped, leaving <v stem>な. Do not confuse this (e.g. 返信しな) with the imperative-negative form (e.g. 返信するな, §G3.22.4), which is <v dict>な!

E.g. まだいっぱい合うから、たくさん食べな。 (There’s still a lot, so eat a lot.; 食べな is the contraction of 食べなさい)

E.g. それでいいと思うなら、そうしなよ。 (If you think that's fine, then go ahead and do it.; しな is the contraction of しなさい)

### G3.22.4 Imperative form

The imperative form is the most direct and is thus rarely used in everyday conversation. It is a coarse type of speech that's only really used in fictional works, or in places where a stern command must be given (e.g. traffic stop signs). Refer to §GA.1 for a full table of conjugations. Here, する, 来る and くれる are exceptions (しろ、こい、くれ).

～てくれる is used to ask for favours (§G3.21.3), but when its imperative form is used, it becomes a command ～てくれ.

E.g. 好きにしろ。 (Do as you please.)

E.g. あっち行け! (Go away!)

E.g. 頑張れ! (Keep at it!; imperative form of 頑張る)

E.g. 早く酒を持ってきてくれ。 (Hurry up and bring some alcohol.; 持つ → 持ってくる → 持ってきてくれ)

E.g. 日本語で話してくれ。 (Speak in Japanese.)

E.g. 消しゴムを貸してくれ。 (Lend me the eraser.; 消すゴム: eraser)

E.g. 遠いところに行かないでくれ。 (Don't go to a far place.)

E.g. 止まれ。 (Stop (road sign).)

E.g. やめろ! (Stop!)

E.g. 死ね! (Die!)

Do not confuse this (e.g. 返信するな) with the polite firm request contraction ～な (e.g. 返信しな, §G3.22.3), whose schema is <v stem>な!

E.g. それを食べるな! (Don't eat that!)

E.g. 変なことを言うな! (Don't say weird things!)

## G3.23 The number system

Read the supplementary article on Tofugu.

Finally we reach the point in the textbook that talks about the number systems in the Japanese language. There are three counting languages, based on the origins of the words: 和語 (Japanese language), 漢語 (Chinese origin/Sino-Japanese word), and 外来語 (loanword of Western origin).

The 漢語 counting method is the most common (いち、に、さん、し、よん、ご、ろく、しち、はち、く、じゅう). However, 4 is most often pronounced as よん (from 和語) to avoid the homophone with 死 (death), 7 is most often pronounced as なな (from 和語) to avoid confusion with いち, and 9 is most often pronounced as きゅう to avoid the homophone with 苦 (suffering). Above 10, the reading is almost always よん and なな.

The 和語 counting method (ひ、ふ、み、よ、い、む、な、や、こ、とお) is exclusively used for small numbers from 1 to 10 (and exceptions like 20 days/-th day, 20 years old, sometimes 30 and 40).

The exception is the reading for 4 (よん) and 7 (なな), which are almost always used regardless of how big or small the number is.

The 外来語 counting method follows English pronunciations (ワン、ツー、スリー、フォー、ファイブ、シックス、セブン、エイト、ナイン、テン) and is most notably used for the セット counter (for sets). It is rarely used for pure counting.

It is customary to write large numbers only in numbers as even 漢字 can become difficult to decipher. Even though Japanese uses a new word for every  $10^4$  (like Chinese, and instead of the  $10^3$  divide used by English and other languages), when written in numerals, the same  $10^3$  divide is used. E.g. 一萬<sup>いちまん</sup> is written 10,000 or 1 0 0 0 0.

### G3.23.1 Numbers smaller than 1

Zero in Japanese is 零<sup>れい</sup>, but more commonly pronounced as either ゼロ or マル. For reading decimals, we say 点<sup>てん</sup> for the dot, and read each individual number after the decimal point.

E.g. 0.0021 is ゼロ、点、ゼロ、ゼロ、二<sup>に</sup>、一<sup>いち</sup>.

For negative numbers, simply say 「マイナス」 before the number.

E.g. -29.0021 is マイナス、二十<sup>にじゅうきゅう</sup>九、text{点}{てん}、ゼロ、ゼロ、二<sup>に</sup>、一<sup>いち</sup>.

### G3.23.2 Dates

Read the main article on [Wikipedia](#).

A date is formally written as YYYY 年 MM 月 DD 日. For instance, at the time of writing, today's date is 2024 年 12 月 6 日.

The date can alternatively be written using the Japanese regnal (counting up from the monarch's ascension) calendar, using the format 元号<sup>げんごう</sup>  $n$  年 (元号: era name).  $n$  starts as 1 in the Gregorian year the era's emperor ascends to the throne (also known as the 元年<sup>げんねん</sup>, "origin year" of era), and counts up to 2 the following Gregorian year. For instance, at the time of writing, today's date is 令和 6 年 12 月 6 日. The year 令和 6 年 can be abbreviated to R6 as well. Because the final year in a previous era is the same as the first year in the following era, during years of transition there are two ways to refer to that year (e.g. 2019 is both 平成 31<sup>へいせい</sup> and 令和 1<sup>れいわ</sup>).

For the modern eras (starting from 1868), each emperor corresponds to one era. Each emperor inherits their era's 元号<sup>げんごう</sup> posthumously as <元号>天皇<sup>てんのう</sup>, so it is rude to refer to the emperor using the era name! The reigning emperor is to be referred to as 天皇陛下<sup>てんのうのうへい か</sup> ("His Majesty the Emperor") or 今上天皇<sup>きんじょうてんのう</sup> ("current emperor").

The eras are summarised in Table 11.

Table 11: Modern eras in the Japanese regnal calendar.

元号 <sup>げんごう</sup>	Emperor	元年 <sup>げんねん</sup>	Abbreviation range	Notable years
明治 <sup>めいじ</sup> Meiji	睦仁 <sup>むつひと</sup> Mutsuhito	1868・明治 1	M1–M45	
大正 <sup>たいしょう</sup> Taishō	嘉仁 <sup>よしひと</sup> Yoshihito	1912・明治 45・大正 1	T1–T15	
昭和 <sup>しやうわ</sup> Shōwa	裕仁 <sup>ひろひと</sup> Hirohito	1926・大正 15・昭和 1	S1–S64	1945 = 昭和 20
平成 <sup>へいせい</sup> Heisei	明仁 <sup>あきひと</sup> Akihito	1989・昭和 64・平成 1	H1–H31	
令和 <sup>れいわ</sup> Reiwa	徳仁 <sup>なるひと</sup> Naruhito	2019・平成 31・令和 1	R1–present (令和 7)	2020 = 令和 2 2025 = 令和 7

### G3.23.3 Systemic reading changes for counters

Once acquainted with the basic three numbering systems, the next thing is to gain exposure to the various counters (similar to the Chinese language). Pronunciations morph a little based on a largely deterministic set of rules, as shown in Table 12. Detailed examples are in the supplementary PDF.

The known counters 枚、台、秒、番、日、駅 do not encounter these reading changes.

Table 12: Systemic reading changes of numeric counters. The じゅう row always admits じつ, but that pronunciation is rare. <sup>†</sup>Informal pronunciation.

### G3.23.4 Ordinals counters ~目/第~

Read the discussion on [Reddit](#).

The 目 suffix or 第 prefix can be attached to any of the counting numerals to indicate ordinal position. Note that 第 forces 漢語 readings of certain counters (notably 日 → 日), as shown by example in §SB.24.

Use of the 目 suffix is preferred when:

- in slightly casual settings
- order is not predetermined or fixed (e.g. rankings)
- order is not significant (e.g. rankings)

Use of the 第 prefix is preferred when:

- in slightly formal settings
- the order is predetermined and fixed (e.g. chapters in a book, episodes of a show, questions in a test)
- the order is significant (e.g. first impression, first bank)

## G3.24 Casual and slang speech

Just like how English slang is designed for communication efficiency (or style), and is pretty wack when compared to proper standard English, Japanese slang is the same. Slang vocabulary is growing with each new generation. Japanese slang is also heavily influenced by local dialects, though most of the content here is suited for the greater 東京 area.

In Japanese slang, anything goes and rules that apply to written Japanese are often broken, but you have to break them correctly. This is something that requires real practice with real people in real-world situations. Generally, the fundamental goal of slang is to make things easier to say by reducing mouth movement: many sounds are shortened or slurred together for that purpose.

E.g. ここはつまんないつまらないから、私<sup>うち</sup>んちの家<sup>うち</sup>に行こう。(It's boring here, let's go to my place.; つまらない: boring)

E.g. ったくまったく、いつまでこんなところで、グズグズすんだ<sup>するんだ</sup>よ。(Good grief, when are you going to linger in this kind of place until?; グズグズする: to linger/hesitate)

### G3.24.1 Slang sentence ordering

A complete grammatically correct sentence typically ends with a verb. In Japanese slang, this is often bent. In conversations, it's typical to say the first thing that comes up in our thoughts, without thinking about how to structure the whole sentence properly. Often, this first thought is the verb. Once the verb has already out of your mouth, you'd then follow up with an explanation of what you mean: the surrounding context and such.

E.g. それは何? (proper; What is that?)

E.g. 何それ? (slang; What is that?; a contraction of 何? それ。)

E.g. 見た? あの人? (Did you see? That guy?)

E.g. もう食べた? 昨日買ったアイス。(Have you eaten it? The ice cream I bought yesterday.)

### G3.24.2 Seeking positive confirmation with じゃない and じゃん

じゃない is an い-adjective that can be used as a question to weakly assert the positive (with a seeking confirmation tone, like the ね particle). It expresses the nuance that you're relatively sure but it's still a question. じゃん is its slang contraction, and can be attached to the end of any sentence and any part-of-speech. regardless じゃない is slightly feminine, while じゃん is neutral.

E.g. サラリーマンだから、残業はたくさんするんじゃない? (Because he's a salaryman, he probably does a lot of overtime (don't you think?).)

E.g. まあ、いいじゃない。(Well, it's probably fine (don't you think?).)

E.g. まあ、いいじゃん。(Well, it's probably fine (don't you think?).)

E.g. ほら、やっぱりレポートを書かないとだめじゃん。(See, as I thought, you have to write the report.)

E.g. 誰もいないからここで着替えてもいいじゃん。(Since there's nobody, it's probably fine to change here.)

E.g. たかし君は、ここにいる? 知らない。あっ! やっぱ<sup>やっぱり</sup>、いるじゃん! (Is Takashi-kun here? Dunno. Ah! See, he's here!)

The questioning, seeking confirmation tone can be strengthened by adding the question particle か (じゃんか), even in informal settings.

E.g. 駅の近くにカラオケがあるじゃんか。うん、あそこのすぐ隣<sup>となり</sup>。(There's a karaoke place near the station, right? Yes, it's right next to it.; すぐ: immediately/directly, 隣<sup>となり</sup>: next to/adjacent)

### G3.24.3 Showing contempt for an action with auxiliary verb やがる

The auxiliary verb やがる (used as <stem>やがる) indicates hatred, contempt or disdain for another's action. This is derogatory and is only used inside of movies, comic books and games.

E.g. あんなやつに負けやがって。じゃ、どうすんだよ？ (Losing to a guy like that. Well, what are you going to do?)

E.g. やる気か？だったらさっさと来やがれ！ (You want to fight? If so, then hurry up and come on!; ~やがれ is the imperative form of ~やがる)

### G3.24.4 The ruby{何{なに} mispronunciation and filler word なんか}

% When used to mean “what”, 何 can be read as either なに or なん depending on the word that comes after (e.g. 何色 (what colour), 何人 (how many people)).

何か means “something” and its correct reading is なにか, but in slang it is often contracted to なんか.

E.g. なんか何か食べる？

Also, なんか is a filler word like “like...” in English. It has no special meaning, though it may express slight uncertainty about the word that comes immediately after. This filler word is written in 仮名 only and has got nothing to do with the word 何か for “something”.

E.g. 今日は、なんか忙しいみたいよ。 (I guess he's like busy today.)

E.g. なんかね。お風呂って超気持ちいいよね！ (Like, baths feel really good, huh?)

E.g. お母さんが、なんか明日まで戻らないんだってよ。 (Mom said she's not coming back until like tomorrow.)

E.g. なんかさ。ボブは、私のことなんか本当に好きかな？ (Hey like, does Bob like really like somebody like me?; さ particle §G3.25, かな question particle §G3.25.1).

## G3.25 More sentence ending particles な、さ and gender-specific ones わ、ぞ、ぜ

な、さ are casual forms of the ね、よ particles respectively, which were introduced in §G2.12.

- な: a rough casual form of ね (to express seeking and expectation of agreement, like “right?/ isn't it?” in English), and is preferred when ね sounds too soft or reserved for what you're trying to say.

E.g. 今、図書館に行くんだよな。うん、なんで？ (You are going to the library now huh? (seeking explanation) Yeah, why?)

E.g. 日本語は、たくさん勉強したけどな。まだ全然わからない。大丈夫よ、きっとわかるようになるからさ。ならいいけどな。 (I studied Japanese a lot, right? But I still don't get it at all. No problem, you know? Because you'll become able to understand for sure. If so, it would be good.)

- さ: a very casual form of よ (to express that you're informing something new, like “you know...” in English), and is used like the English filler “like...”. It's not a very sophisticated manner of speech, but it's over-used and an easy habit to fall into, just like how “like” is over-used in English.

あのさ... うん。この間<sup>あいだ</sup>さ... うん。ディズニーランドに行ったんだけどさ、なんかさ、すごい込んで... うん。何もできなくてさ... (Hey...{} Yeah. This one time...{} Yeah. I went to Disney Land and it was really crowded...{} Uh huh. Couldn't do anything...{}; 間<sup>あいだ</sup>: period of time during, 込む: to be crowded)

The following three are sentence-ending particles used purely for emphasis and have no further special meaning. They make your statements sound much stronger and gender-specific.

- わ: feminine emphasis version of よ (to express that you're informing something new, like "you know..." in English).

E.g. もう時間がないわ。 (There is no more time.)

- ぞ、ぜ: masculine/"cool" emphasis versions of よ (to express that you're informing something new, like "you know..." in English).

E.g. おい、行くぞ! (Hey, we're going!)

E.g. これで、もう終わりだぜ。 (With this, it's over already.)

Note that females can use ぞ/ぜ, and males can use わ too, for coolness or softness respectively.

### G3.25.1 Question particle かな and gender-specific ones かしら、かい、だい

The な (casual ね) particle can be combined with the question particle か to form かな, typically used when the speaker is considering something. かしら is the feminine version of かな.

E.g. 今日は雨が降るかな? (I wonder if it'll rain today.)

E.g. いい大学に行けるかな? (I wonder if I can go to a good university.)

E.g. いい大学に行けるかしら? (I wonder if I can go to a good university.)

かい (only for yes/no question) and だい (only for open-ended question) are masculine question particles.

E.g. おい、どこに行くんだい? (Hey, where are you going?)

E.g. さきちゃんって呼んでもいいかい? (Can I call you Saki-chan?)

E.g. 一体いつに帰ってくるつもりだったんだい? (What time were you planning on coming home exactly?)

E.g. 俺は土曜日、映画を見に行くけど、一緒に行くかい? (I'm going to see a movie on Saturday, want to go together?)

### G3.26 Example conversations

Here are two example conversations to apply what we've learnt in this entire "essential grammar" section.

- アイス: 加賀先生、ちょっと質問を聞いてもいいですか。 (Kaga-sensei, is it ok to ask you a question?)

加賀先生: はい、いいですよ。 (Sure.)

アリス: 「Hello」を日本語で何と言えいいですか。 (How do you say "Hello" in Japanese?; quotation + conditional form of 言う)

加賀先生: そうね。だいたい、「こんにちは」と言うと思いますよ。ただし、書く時は「こ

んにちわ」じゃなくて、「こんいちわ」と書かなくてはなりません。(Well, mostly, I think people say “konnichiwa”. However, when you write it, it is not “konnichiwa”; you must write “konnichiha”.; nested quotation + quotation; negative sequence of states)

アリス：そうですか。他に何かいい表現<sup>ひょうげん</sup>はありますか。(Is that so? Are there any other good expressions?; 他<sup>ほか</sup>: other (Do not confuse with 彼<sup>かれ</sup>!) “Other something good expression, exist?”)  
加賀先生：これも覚え<sup>おぼえ</sup>といてね。朝は、「おはよう」と言うの。でも、上の人には「おはようございます」と言ってください。(Do remember this too (in preparation for the future). In the morning, everybody says “ohayou”. But, to a higher person, please say “ohayou-gozzaimasu”.; 覚える → 覚えておく → 覚えとく → 覚えといてください (te-form request of casual form of 覚えておく))

アリス：はい、わかりました。間違<sup>まちが</sup>えないようにします。いい勉強になりました！(Ok, I got it. I'll try not to make that mistake. That was very informative (“it became good study”))

- 洋介<sup>ようすけ</sup>：お！アリスだ。あのね、質問を聞いてもいい？(Oh! It's Alice. Hey, can I ask you a question?)

アリス：何？(What's up?)

洋介：ちょっと英語を教<sup>おし</sup>えてもらいたいんだけどさ、もし時間があれば、教えてくれない？  
(I want to learn English, so if you have time, can you teach me? 教<sup>おし</sup>えてもらいたい is the desiderative form of 教<sup>おし</sup>えてもらう.)

アリス：え？英語を勉強するの？(Huh? You're going to study English?)

洋介：うん、アメリカで留学<sup>りゅうがく</sup>してみたいなと思ってね。去年も行<sup>い</sup>こうとしたけど、お金がなくて…  
(Yeah, I was thinking about trying out studying abroad in America. I attempted going last year too, but I didn't have money.; 留学<sup>りゅうがく</sup>してみたい + な sentence ending particle + quotation + 思って; 行<sup>い</sup>こうとする: to attempt to go)

アリス：そうなの？いいよ。いつ教<sup>おし</sup>えてほしいの？(Really? No problem. When do you want me to teach you?)

洋介：いつでもいいよ。(Anytime is good.)

アリス：じゃ、来週の木曜日からはどう？(Then, how about from next Thursday?)

洋介：うん、いいよ。ありがとう！(Yeah, that's good. Thank you!)

ありす：勉強<sup>なま</sup>を怠<sup>なま</sup>けたり、来<sup>き</sup>なかつたりしないでね。(Don't shirk on your studies or not come, ok?; 怠<sup>なま</sup>ける: to laze)

洋介：そんなことしないよ！(I won't do anything like that!)

## G4 Special expressions

This section is named “special expressions” because except the first few subsections, most of the grammar here applies to more specific use-cases. However, this “special expressions” section as whole is necessary for everyday conversations.

### G4.1 Causative, passive and causative-passive forms

We finally learn the last three major verb conjugations.

#### G4.1.1 Causative form $\sim\overset{\sim}{\text{○}}\{\text{せる/す}\}$

The causative form of verbs indicate that someone *was made to* perform the verb. It has two senses: making somebody do something, and letting someone to do something. **Disambiguation between the two senses is based on context!**

When the causative form is used with あげる/くれる, it almost always means to “let someone do”. Otherwise, it usually means “make someone do”.

For detailed conjugation rules, refer to §GA.1. All causative form verbs are る-verbs. Further conjugations follow る-verb rules.

When listening,  $\sim\overset{\sim}{\text{○}}\text{せ}$  is the signal for passive voice, though for る-verbs there is potential conflict with the potential form.

E.g. 全部食べさせた。 (Made/let someone eat it all.)

E.g. 全部食べさせてくれた。 (Let someone eat it all.)

E.g. 先生が学生に宿題をたくさんさせた。 (Teacher made students do lots of homework.)

E.g. 先生が質問をたくさん聞かせてくれた。 (Teacher let someone ask lots of questions.; 聞く → 聞かせる (causative) → 聞かせてくれる (to give the favour))

E.g. 今日は仕事を休ませてください。 (Please let me rest from work today.; 休む → 休ませる (causative) → 休ませてください (desiderative of causative, “let-do” sense))

E.g. その部長は、よく長時間働かせる。 (That manager often makes people work long hours.; 働く (to work) → 働かせる (causative))

When *asking* for permission to let someone do something (including letting yourself do something), it's more common to use the 「～でもいい」 grammar §G3.16.3).

E.g. お手洗いに行かせてくれませんか。 (Can you let me go to the toilet? (sounds like a prisoner, even in English))

E.g. お手洗いに行ってもいいですか。 (Is it ok to go to the toilet?)

In very rough/casual slang, the causative form may be expressed with the う-verb ending  $\sim\text{す}$ . For detailed conjugation rules, refer to §GA.1. All causative form verbs are う-verbs. Further conjugations follow う-verb rules (with す ending).

E.g. 同じことを何回も言わす言わせるな! (Don't make me say the same thing again and again!)

E.g. お腹空いているんだから、なんか食べさしてくれ食べさせてくれよ。 (I'm hungry, so let me eat something.; 食べる → 食べさす → 食べさしてくれる → 食べさしてくれ (imperative))

#### G4.1.2 Interlude I: passivisation, direct and indirect/adversative passives

Read the supplementary materials on [TFG1] and [TFG2].

There is no such thing as a “suffering passive”: there is nothing in the language that indicates that someone is suffering from a passive verb. The “suffering” connotation comes the passive verb indicating that the experiencer has no control over the performed action. [TK]

Note that parts-of-speech (e.g. object, subject) are purely grammatical (syntactic) roles. An entity being the performer of the action or the receiver of the action’s effects are semantic roles. Semantic roles do not change under passivisation (otherwise the sentence’s meaning changes), whereas grammatical roles may change.

(SL) In English, passivisation can only be applied to a sentence containing a transitive verb. When it occurs, the object is promoted to the subject position, and the subject is demoted to an oblique (a non-required argument).

In Japanese, passivisation is a bit more flexible: intransitive verbs can be passivised too.

We now distinguish between the direct and indirect/adversative passives *in Japanese*.

- **Direct passive (transitive only):** used to express that the transitive verb was done to someone/something (subject experiencer; marked by が), by someone (origin oblique/optional performer; marked by に). The effect that the action has on the experiencer is very obvious, since the verb is done directly to them (promoted to subject grammatical role). The subject (demoted to an oblique) is often omitted as it’s not important. The Japanese direct passive is equivalent to the English passive.

The semantic performer is the syntactic origin after passivisation and marked by に. This usage of に as *origin* rather than *desstination* is very similar to もらう’s usage (§G3.21.2, [TFG]), since the passive subject is the receiver (experiencer) in the transaction (action).

E.g. ピカソにキスされた。 (I was kissed by Picasso.)

E.g. タバコが吸われた。 (A cigarette was smoked.)

- **Indirect passive (both transitive and intransitive):** used to express that someone (origin performer; marked by に) did a transitive/intransitive verb, involving an optional direct object (only for transitive verbs; marked by を), and it had an effect on someone (experiencer; marked by は/が; [TK]). There is no equivalent in English. The adversative nuance is not guaranteed, though very likely present in indirect passive sentences.

E.g. (私は) (あのおじさんに) タバコを吸われた。 (I got smoked on (by that man).; [TFG1])

In the above example, the passive verb is 吸われた, the experiencer is me, and the performer is あのおじさん (marked by origin particle に). The indirect passive emphasises that this act of smoking was done to me, and that I did not have control over it, creating the nuance that the act was a nuisance.

E.g. ブラット・ピットに目の前でタバコを吸われて、<sup>きぜつ</sup>気絶するかと思った。 (I got smoked on by Brad Pitt right in front of me, and I thought I was going to faint.; <sup>きぜつ</sup>気絶: loss of consciousness; more natural translation would be “Brad Pitt smoked right in front of me, and I thought I was going to faint.”; [TFG1])

In the above example, the indirect passive is used, but the effect may not be adversative depending on the context: I could be fainting from the smoke, or from the fact that it's Brad Pitt.

Except for a few cases, the indirect passive is always formed with verbs that were intentionally performed by *someone*. The performer of the verb (marked by に) is therefore usually a person. Only (some) weather-related verbs are acceptable exceptions to this rule, where the performer is a weather-related object. More details in §G4.2.3.

E.g. 私は本に頭に落ちられた。 (My head was fallen on by a book.; [TFG1]) ~~Unnatural sentence: the performer should not be an object.~~

E.g. 突然雨に降られた。 (All of a sudden, I was rained on.; 降る is intransitive; [TFG1])

E.g. 花子が隣の学生にピアノを朝まで弾かれた。 (Hanako had the student next to her play the piano on her until morning.; a more natural translation is “Hanako was adversely affected by the student next to her playing the piano until morning.”; [Wiki])

For a deeper treatment of the passive voice, refer to the postlude §G4.2.

#### G4.1.3 Passive form ～られる

The passive voice in Japanese is often used in written essays and articles. Read more about passivisation in §G4.1.2.

For detailed conjugation rules, refer to §GA.1. All passive form verbs are る-verbs. Further conjugations follow る-verb rules. Note that for る-verbs and 来る, the passive form is identical to the potential form (～られる); disambiguation requires context and is otherwise impossible.

When listening, ～られる is the signal for passive voice, though for る-verbs there is potential conflict with the potential form.

In Japanese, the standard SOV sentence schema is <subject>が<object>を<transitive v>, or <performer>が<experiencer>を<transitive v> in semantic terms. After passivisation into the **direct passive**, it becomes <performer>に<experiencer>が<transitive v passive form>. Notice that the semantic performer is now the syntactic origin (marked by に), and the semantic experiencer is now the syntactic subject (marked by が/は). This is very similar to もらう's usage of に as a origin particle (§G3.21.2, [TFG]), since the passive subject is the receiver (experiencer) in the transaction (action).

E.g. ポリッジが誰かに食べられた! (The porridge was eaten by somebody!)

E.g. みんなに変だと言われます。 (I am told by everybody that (I'm/it's) strange.)

E.g. 光の速さを超えるのは、不可能だと思われる。 (Exceeding the speed of light is thought to be impossible.)

E.g. この教科書は多くの人に読まれている。 (This textbook is being read by a large number of people.)

E.g. 外国人に質問を聞かれたが、答えられなかった。 (I was asked a question by a foreigner, but I couldn't answer.)

E.g. このパッケージには、あらゆる物が含まれている。 (Everything is included in this package.; あらゆる: all, 含む: to contain)

% Because an indirect sentence is more polite in Japanese, the passive voice is used to show a level of politeness above the normal **ます** form. In a similar sense to how it's more polite to address someone indirectly, and how it's more polite to ask negative questions than positive ones (§G3.4.2), the passive form makes the sentence less direct because the subject (now the experiencer) does not directly perform the action. In increasing levels of politeness of expressing "what will you do?":

1. (active voice) どうする？
2. (active voice, polite) どうしますか。
3. (passive voice, polite) どうされますか。
4. (??? voice, honorific, S???) どうなさいますか。
5. (??? voice, honorific, less certainty, S???) どうなさいますでしょうか。

With increasing indirection and politeness, the sentence grows longer and longer.

E.g. 領収証<sup>りょうしゅうしょう</sup>はどうされますか。(What about your receipt?)

E.g. 明日の会議<sup>かいぎ</sup>に行かれるんですか。(Are you going to tomorrow's meeting?; passive voice deliberately used for politeness)

#### G4.1.4 Causative-passive form ～<sup>あ</sup>せられる

The causative-passive form is used to express the idea that the action of "making someone do something" was performed to that person, or in short, the idea that someone was made to do something. The verb is first conjugated to the causative then the passive, never the other way round.

For detailed conjugation rules, refer to §GA.1. All passive form verbs are る-verbs. Further conjugations follow る-verb rules.

The causative-passive form is a variant of the passive voice, so the に particle marks the *origin*, i.e. the performer of the action.

When listening, ～<sup>あ</sup>せられ is the signal for causative-passive voice.

E.g. 朝ごはんは食べたくなかったのに、食べさせられた。(Despite not wanting to eat breakfast, I was made to eat it.)

E.g. 日本では、お酒を飲ませられることが多い。(In Japan, the event of being made to drink is numerous.)

E.g. あいつに二時間も待たせられた。(I was made to wait 2 hours by that guy.)

E.g. 親<sup>おや</sup>に毎日宿題をさせられる。(I was made to do homework everyday by my parents.; 親<sup>おや</sup>: parents)

The following shortened causative-passive form only exists for う-verbs with \* \{す\}-ending.

In very rough/casual slang, the shortened causative-passive form (derived from the shortened causative form, §G4.1.1) may be used. This form only exists for う-verbs with the exception of those with a す-ending in dictionary form, because wherever the shortened causative form ends with ～さす, the shortened causative-passive form would have 「...さされる」 in it, which is not allowed.

E.g. 学生が廊下<sup>ろうか</sup>に立た<sup>た</sup>された<sup>立たせられた</sup>。(The student was made to stand in the hall.; 立<sup>た</sup>つ: to stand)

E.g. 日本では、お酒を飲まされる<sup>飲ませられる</sup>ことが多い。(In Japan, the event of being made to drink is numerous.)

E.g. あいつに二時間も待たされた<sup>待たせられた</sup>。(I was made to wait 2 hours by that guy.)

## G4.2 Postlude: a deep dive into passivisation in Japanese

Read the article chain starting from [TMJK1].

*This website is a teachers' reference, and I obtained it from a Quora answer. For the interest of time and for the sake of not losing focus on the main task at hand (learning how passivisation works in Japanese), I'll be taking notes after translating the website. I hope that one day I'll be able to read such websites directly without the help of translation. What's holding me back at the moment is lacking a fair bit of grammar knowledge and a lot of vocabulary knowledge...*

### G4.2.1 Introduction into the passive voice ruby{受動態{じゅどうたい}}

Read the main article on [TMJK1].

The passive voice (受身、受動態<sup>うけみ じゅどうたい</sup>) has multiple interpretations. There are distinct subsets of passive voice (expressions *A* and *B* on TMJK's Venn diagram) that are highly similar. At the beginner level, where the students' grammar and vocabulary knowledge are very limited, it is not possible to cover the nuances between similar usages. Instead, we'll first study parts of *A* and *B* that are as far away as possible from where they may overlap, such that their differences are more perceivable and gentler to learn. Some beginner-level grammar will be used; such grammar is not meant for natives but is useful for non-native learners.

There are over ten types of passive voice, if we want to pedantically differentiate them all.

### G4.2.2 Classifications of the passive voice

Read the main article on [TMJK2].

The reason passive voices are difficult for students is that they have to learn so many forms in one day, at one go.

From the みんなの日本語 textbook, there are six:

1. 私は部長に褒められました。(I was praised by my boss.; 褒める: to praise (transitive))  
私は部長に仕事を頼まれました。(I was requested by my boss to do work.; 頼む: to request/entrust to (transitive))
2. 私は誰かに足を踏まれました。(My foot was stepped on by someone. 踏む: to step on (transitive))  
私は母に漫画の本を捨てられました。(My manga books were thrown away by my mom.; 捨てる: to throw away (transitive))
3. 大阪で展覧会が開かれます。(The exhibition will be held in Osaka.; 開く: to open (business) (intransitive))  
大阪で国際会議が行われます。(An international conference will be held in Osaka.; 行う: to perform/carry out (transitive))
4. この美術館は来月壊されます。(This art museum will be demolished next month.; 壊す: to break/demolish (transitive))

この美術館は200年前に建てられました。(建てる: to construct (transitive))

5. 日本の車はいろいろな国へ輸出されています。(Japanese cars are exported to many countries.; 輸出する: to export (transitive))

洗濯機はこの工場で組み立てられています。(Washing machines are assembled in this factory.; 組み立てる: to assemble (transitive))

6. 「源氏物語」は紫式部によって書かれました。(The Tale of Genji (Heian-period classic) was written by Murasaki Shikibu.; 書く: to write (transitive))

電話はグラハム・ベルによって発明されました。(The telephone was invented by Graham Bell.; 発明する: to invent (transitive))

There are two particles 「に」 and 「より」 associated with the passive voice. To learn them both in one day is asking too much from learners. みんなの日本語 also misses out passive intransitive verbs such as 「雨に降られた。」.

From the 大地 textbook, there are four:

1. 私は先生に呼ばれました。(I was called by my teacher.; 呼ぶ: to call out to (transitive))

私は先生に注意されました。(I was reprimanded by my teacher.; 注意する: to reprimand)

2. (†) 私は子どもにカメラを壊されました。(I had my camera broken on by my child.; 壊す: to break/demolish (transitive))

(†) 私は雨に降られました。(I was rained on.; 降る: (of precipitation/ash) to fall (intransitive))

3. 大阪で会議が開かれます。(The meeting is held in Osaka.; 開く: to open (business) (intransitive))

金沢は小京都と言われています。(Kanazawa is said to be a Little Kyoto (small town with historical features reminiscent of Kyoto).; 言う: to be called/defined (transitive))

4. 源氏物語は紫式部によって書かれました。(The Tale of Genji (Heian-period classic) was written by Murasaki Shikibu.; 書く: to write (transitive))

Here, (†) are examples of the intransitive passive. The 「～と言われています」 construct (言う → 言われる (passive) → 言われている (progressive passive) → 言われています (polite progressive passive)) is very often used in the passive voice (“it is said that…”).

The burden on learners can be significantly reduced by dividing the teaching up into parts. For the six forms in みんなの日本語, we can group them into two groups: {1, 2} and {3, 4, 5, 6}. The first two kinds involve emotion, while the last four don't.

Furthermore, a distinct feature of the Japanese passive voice is the adversative passive interpretation (迷惑の受身). However, whether an action is adversative depends less on the sentence structure, and much more on the meaning of the verb used. [There is therefore nothing inherently in the grammatical rules and syntax that suggest adversativity.](#) The passive voice can be used for *both* positive and negative emotions, even if the passive voice always conveys the idea that the experiencer has no control over the action and its performer.

E.g. 私は先生に褒められました。(non-adversative; I was praised by my teacher.; 褒める: to praise (transitive))

E.g. 私は先生にしかられました。 (adversative; I was scolded by my teacher.; しかる: to scold (transitive))

To start off, fix the experiencer to always be “me”, and fix the sentence structure to be 「私は<performer>に<verb passive>」. The experiencer will change later as we progress further (§G4.2.4).

### G4.2.3 The grammar rules of passives

Read the main articles on [TMJK3] and [TMJK4].

For the sake of ease of understanding, we categorise the passive voice into two broad groups:

- ちよくせつうけみ 直接受身のグループ (direct passive group). Broadly speaking, in this group, the subject (suffixed by は/が) has something done to them directly by someone (suffixed by に).

Members include:

- ▶ 直接受身 (direct passive), a.k.a. 直接対象たいしやうの受身 (direct target passive)、相手あいての受身 (other party passive)

<experiencer>{が/は}<performer>に<v transitive passive>, where <experiencer> IS the promoted object of the corresponding active voice sentence.

- ▶ ちゅうりつ 中立の受身 (neutral passive)

- かんせつうけみ 間接受身のグループ (indirect passive group). Broadly speaking, in this group, the subject (suffixed by は/が) has something done to them indirectly by someone (suffixed by に).

Members include:

- ▶ 間接受身 (indirect passive)

<experiencer>{が/は}<performer>に<v transitive passive>, where <experiencer> is NOT the promoted object of any active voice sentence.

- ▶ 迷惑めいわくの受身 (adversative passive)
- ▶ 持ち主ぬしの受身 (possessive passive)

<experiencer-owner>{が/は}<performer>に<ownee>を<v transitive passive>, where <experiencer> is NOT the promoted object of any active voice sentence.

- ▶ 自動詞じどうしの受身 (intransitive passive)

<experiencer>{が/は}<performer>に<v intransitive passive>.

At the end of the day, from this landscape, the syntax is mostly the same.

We now look at the direct, indirect, possessive and indirect passives more closely. Here are their definitions (定義).

1. ちよくせつうけみ 直接受身 (direct passive).

<experiencer>{が/は}<performer>に<v transitive passive>, where <experiencer> IS the promoted object of the corresponding active voice sentence.

- There is a corresponding active voice sentence.

[能動文] 太郎たろうはジョンなぐを殴なぐった。 (Taro punched John.; 殴なぐる: to punch (transitive))

<sup>じゅどうぶん</sup>  
[受動文] ジョンは太郎に殴られた。 (John was punched by Taro.; <sup>なぐ</sup>殴る: to punch (transitive))

- *Adversative nuance is not guaranteed (depends on the passivised verb).*

[迷惑の意味がない] 私は先生に褒められた。 (I was praised by my teacher.; <sup>ほめる</sup>褒める: to praise (transitive))

[迷惑の意味がある] 私は先生にしかられた。 (I was scolded by my teacher.; <sup>しかる</sup>しかる: to scold (transitive))

- *Exists in English.*

Because the direct passive is equivalent to the English passive, the direct passive is easy for English speakers to understand.

## 2. <sup>かんせつうけみ</sup>間接受身 (indirect passive).

When translating indirect passives into English, purposely place the origin at the end of the sentence as “by <origin>”, then the rest of the sentence is usually expressed as “<experiencer> got <v passive> on by <origin>”.

<experiencer>{が/は}<performer>に<v transitive passive>, where <experiencer> is NOT the promoted object of any active voice sentence.

- *There is no corresponding active voice sentence.*

<sup>のうどうぶん</sup> <sup>となり</sup> <sup>せき</sup> <sup>おおごえ</sup>  
[能動文] 隣の席の人が大声で話した。 (The person in sitting next to me spoke loudly.; 話す: to speak (transitive))

<sup>じゅどうぶん</sup> <sup>となり</sup> <sup>せき</sup> <sup>おおごえ</sup>  
[受動文] 私は隣の席の人に大声で話された。 (I was spoken to loudly by the person sitting next to me.; 話す: to speak (transitive))

The passive sentence contains the experiencer semantic role 「私」 (syntactic subject). In the closest equivalent active sentence, this subject does not take on the semantic experiencer role (of the verb 話す). Another way to think about this: the semantic experiencer (syntactic subject) in the passive sentence was not promoted from a grammatical object of any active sentence. Therefore, there is no corresponding active sentence.

The *indirect* passive is named as such because 「私」 was not directly affected by verb 「話す」, only *indirectly* so.

- *Adversative nuance is guaranteed.*

See above point.

- *It is difficult to translate to English.*

The indirectness of the indirect passive has no equivalent in English.

## 3. <sup>もちぬしうけみ</sup>持ち主受身 (possessive passive). The possessive passive is sometimes grouped together with 間接受身のグループ, and sometimes considered to be in a category of its own.

<experiencer-owner>{が/は}<performer>に<ownee>を<v transitive passive>, where <experiencer> is NOT the promoted object of any active voice sentence.

E.g. (私は) スリに財布を取られた。 (My wallet was stolen by a pickpocket.; スリ: pickpocket, 取る: to steal (transitive))

The *possessive* passive is named as such because the direct object (suffixed by を) of the passive verb belongs to the subject (suffixed by は/が).

- *There is no corresponding active voice sentence.*

[能動文] 弟が私の携帯を壊した。(My younger brother destroyed my cell phone.; 携帯: mobile phone; 壊す: to break/destroy (transitive))

[受動文] 私は弟に携帯を壊された。(I got my cell phone destroyed by my brother.; 壊す: to break/destroy (transitive))

In the possessive passive sentence, the experiencer semantic role is 「私」 (syntactic subject). In the closest equivalent active sentence, 「私」 is merely a label to 財布 and does not take on the experiencer semantic role. Therefore, there is no corresponding active sentence.

- *Adversative nuance is not guaranteed (depends on the passivised verb).*

[迷惑の意味がある] (私は) 田中さんに日本語をけなされた。(adversative; I got my Japanese disparaged by Tanaka-san.; けなす: to speak ill of/disparage (transitive))

[迷惑の意味がない] (私は) 田中さんに日本語を褒められた。(non-adversative; I got my Japanese praised by Tanaka-san.; 褒める: to praise (transitive))

Some usage pointers.

- When the passive sentence involves body parts of the owner, the direct passive is unnatural.

[自動詞の受身、自然] (私は) 隣の人に満員電車で足を踏まれた。(I got my foot stepped on on me by someone next to me on a fully-booked train.; more natural translation is “My foot was stepped on by someone next to me on a fully-booked train.” 踏む: to step on (transitive))

[直接受身、不自然] 私の足が踏まれた。

- When the passive sentence involves possessions of the owner, the direct passive is also possible.

[自動詞の受身、自然] (私は) 田中さんにパソコンを壊された。(I got my computer broken on me by Tanaka-san.; 壊す: to break/destroy (transitive))

[直接受身、自然] 私のパソコンが田中さんに壊された。(My computer was broken by Tanaka-san.)

- When the passive sentence involves parties related to the owner, the direct passive is also possible.

[自動詞の受身、自然] (私は) 先生に息子をけなされた。(I got my child disparaged on me by his teacher.; けなす: to speak ill of/disparage (transitive))

[直接受身、自然] 私の息子は先生にけなされた。(My child was disparaged by his teacher.)

#### 4. 自動詞の受身 (intransitive passive).

<experiencer>{が/は}<performer>に<v intransitive passive>.

- *There is no corresponding active voice sentence.*

Similar explanation to the other members of the indirect passive group. The experiencer semantic role is present in the intransitive passive (suffixed by は/が), but completely absent in the closest equivalent active sentences: active intransitive verbs only involve a subject (which would be the origin of the passivised intransitive verb, not the experiencer). Therefore, there is no corresponding active sentence.

- *Adversative nuance is not guaranteed.*

[迷惑の意味がある] 恋人に逃げられた。 (adversative; I had my lover run away on me.; 逃げる: to run away (intransitive))

[迷惑の意味がある] 子どもに泣かれた。 (adversative; I had my child cry on me.; 泣く: to cry (intransitive))

[迷惑の意味がある] 雨に降られた。 (adversative; I had the rain fall on me.; 降る: (of precipitation/ash) to fall)

[迷惑の意味がない] 綺麗な女性に微笑まれて、ドキドキした。 (non-adversative; I got smiled on by a pretty lady, and my heart pounded.; 微笑む: to smile (intransitive))

[迷惑の意味がない] 私は風に吹かれていた。 (non-adversative; I got blown on by the wind.; 吹く: (of the wind) to blow (intransitive))

[迷惑の意味がない] 彼女に甘えられると、結構嬉しい。 (non-adversative; If I get fawned on by her, I will be fairly happy.; 甘える: to fawn on/give lots of attention and praise (intransitive verb))

[迷惑の意味がない] 先生に喜ばれた。 (non-adversative; I got being pleased on by the teacher.; 喜ぶ: to be delighted (intransitive))

Some usage pointers.

- Among intransitive verbs, non-volitional ones (非意志) are harder and less natural to passivise. A notable exception is 降る for precipitation/ash.

[非意志、自然] 雨に降られた。 (I had the rain fall on me.; 降る: (of precipitation/ash) to fall (intransitive))

[非意志、不自然] 雨に止まれた。—(止む: to cease/stop/be over (intransitive))

[非意志、不自然] ドアに急に開かれました。

[非意志、不自然] 石に突然、落ちられました。

[非意志、不自然] 電気に消えられて、困りました。

[非意志、不自然] 涙に不意に出られて、恥ずかしかった。

Even though all these attempted intransitive passive verbs have the adversative nuance, they are nonetheless considered unnatural. (Perhaps for a reason only accessible to higher level learners...)

#### G4.2.4 Indirect passives to convey adversative emotions, and involving a third person subject 間接受身のグループ

Read the main article on [TMJK5].

Indirect passives can be purposefully used to convey negative feelings evoked from an indirect action.

- If the speaker has only a general relationship with 田中さん or アンさん, the speaker state say the following objectively (客観的事実を述べます):

[A1、能動文] アンさんは海外へ引っ越した。(Ann-san moved abroad.; 引っ越す: to change residence (intransitive))

[B1、能動文] 田中さんはアンさんに花束を贈った。(Tanaka-san gifted Ann-san a bouquet.; 贈る: to gift (transitive))

- However, if the speaker likes アンさん and sees 田中さん as a love rival, then the actions of アンさん and 田中さん in A1 and B1 would be unpleasant, even if their actions did not *directly* affect the speaker. The speaker would therefore use the *indirect* passive voice to express their feelings.

[A2、受動文] (私は) あんさんに海外へ引っ越されて、寂しくてたまらない。(I got Ann-San moved abroad on me, and I feel unbearably lonely.; たまらない: intolerable/unbearable)

[B2、受動文] (アンさんに花束を贈ろうと思っていたのに、) (私は) 田中さんに先に贈られてしまった。(Despite me thinking of gifting a bouquet to Ann-sann, I got Tanaka-san gifting before me on me.; しまう: to do/happen unintentionally (AUX))

The subject/experiencer in passive sentences is a person, and is most commonly 「私」. If so, it is often omitted (省略されます). If the subject/experiencer is not a human, then it would be something similar to a person, such as an organisation a person belongs to.

In §G4.2.2, we fixed the subject/experiencer to 「私」. We now vary this. The subject/experiencer can be a third person/party (第三者) that is neither the speaker nor the origin/performer of the passivised action. To do this, simply state the third party subject explicitly, suffixed with は/が.

- [C1#、受動文] 田中さんはアルバイトに休まれました。(Tanaka-san had a day off taken on him by the part-timer.; 休む: to take a day off (intransitive))

[D1#、受動文] E.g. 川口さんは友達に手紙を読まれました。(Kawaguchi-san got his letter read on him by his friend.; 読む: to read (transitive))

However, the above sentences would sound incomplete to the native ear. They are missing the *feelings* of the third party.

(The # here mean “may be acceptable to some readers”; courtesy of SL.)

- [C2、受動文] 田中さんはアルバイトに休まれて、とても困りました。(Tanaka-san had a day off taken on him by the part-timer, and was very troubled.; 休む: to take a day off (intransitive))

[D2、受動文] 川口さんは友達に手紙を読まれて、恥ずかしい思いをしました。(Kawaguchi-san got his letter read on him by his friend, and he felt embarrassed unintentionally.; 読む: to read (transitive), しまう: to do/happen unintentionally (AUX))

When the feelings of the aggrieved party is made explicit, the indirect passive flows more naturally.

#### G4.2.5 The three passive voice particles に、から、によって

Read the main articles on [\[TMJK5\]](#), [\[TMJK6\]](#), [\[TMJK7\]](#).

The に particle marks the origin/performer of the passive voice. The origin/performer in the indirect passive group can only be suffixed by に.

[間接受身] 私は友達に夜遅く遊びに来られました。(I got visited for playing late at night on by my friend.; 来る: to come (intransitive))

In direct passive sentences, three particles are possible: に、から、によって. The default particle is still に, and there are some cases where に can't be used, or another particle is more suitable.

Some rules of thumb:

- For passivised verbs that act on people, express the origin's emotion, or have a sense of mobility or direction, both に、から can be used to mark the origin/performer.

Examples of verbs expressing emotion: 愛する、憎む<sup>にく</sup> (to hate)、好む<sup>この</sup> (to like)、嫌う、恐れる<sup>おそ</sup> (to fear)、惜しむ<sup>お</sup> (to regret/be stingy)、尊敬する、軽蔑する<sup>けいべつ</sup> (to scorn)、怪しむ<sup>あや</sup> (to suspect).

Examples of verbs with a sense of mobility or direction: 招待する<sup>しょうたい</sup> (to invite)、呼ぶ、誘う<sup>さそ</sup> (to invite/tempt)、振り向く<sup>むか</sup> (to turn around)、迎える<sup>むか</sup> (to go out and greet).

[直接受身] 私は先生{に/から}褒められた。(act on people; I was praised by my teacher.; 褒める<sup>ほめる</sup>: to praise (transitive); Both に、から are possible, によって is more formal and not used here.)

[直接受身] ジュリエットはロミオ{に/から}愛されました。(emotion; Juliet was loved by Romeo.; 愛する: to love (transitive))

[直接受身] 周恩来は今も中国の人々{に/から}尊敬されている。(emotion; Zhou Enlai is still respected by the Chinese people today.; 尊敬する: to respect (transitive))

[直接受身] たなかさんは、刑事{に/から}怪しまれた。(emotion; Tanaka-san is suspected by the detective.; 怪しむ: to suspect (transitive))

[直接受身] 私は先生{に/から}声をかけられた。(mobility/direction; I was called out to by my teacher.; 声をかける: to call out to (expression/intransitive))

[直接受身] 突然、友達{に/から}呼び止められた。(mobility/direction; Suddenly, I was stopped by my friend.; 呼び止める: to call and stop sb/sth (transitive))

[直接受身] あまりにひどい恰好だったので、みんな{に/から}振り向かれた。(mobility/direction; Because I looked very bad, I was turned around to by everyone.; 恰好/格好<sup>かっこう</sup>: appearance, 振り向く<sup>むか</sup>: to turn around (expression/transitive))

[直接受身] 田中選手はチームメイト{に/から}温かく迎えられた。(emotion; The contestant Tanaka was warmly welcomed by his teammates.; 迎える<sup>むか</sup>: to go out and greet (transitive))

- For passivised verbs that refer to a give-receive transaction, because に already marks the receiver, it cannot be used again in the same sentence to mark the origin (giver) in the same transaction. から must be used to mark the origin.

Examples of verbs related to give-receiving: 授与する<sup>じゅうよ</sup> (to award)、渡す<sup>わた</sup> (to hand over)、送る<sup>おく</sup> (to send)、贈る<sup>おく</sup> (to gift)、与える<sup>あた</sup> (to bestow/give to someone of lower status).

[直接受身] 本は先生{から}学生に渡された。(give-receive; The book was passed to the student by the teacher.; 渡す: to hand over (transitive))

[直接受身] 花束は部長{から}田中さんに贈られた。(give-receive; The bouquet was given to Tanaka-san from boss.; 贈る: to gift (transitive))

[直接受身] 卒業証書は校長先生先生{から/によって}学生に授与されました。(give-receive; The graduation certificates were awarded to the students by the principal.; 授与する: to award (transitive))

[直接受身] 金メダルは総理大臣{から/によって}優勝者に授与された。(give-receive; The gold medal was awarded to the champion by the Prime Minister.; 授与する: to award (transitive))

If the sentence contains に to mark the *location* destination of the verb, then に can still be used (because it's a different sense in the same sentence) to mark the origin.

[直接受身] 私は先生{に/から}お寿司屋さんに誘われた。(I was invited to the Sushi restaurant by teacher.; 誘う: to invite (transitive))

- For *formal* passivised verbs that refer to a give-receive transaction (same as previous point but formal), and for verbs that involve creation of a work, によって is used. As an exception, the 罰する verb (to punish (transitive)) must use によって.

Example verbs related to creation: 描く (to draw)、作曲する (to compose (music))、発明する (to invent)、発見する (to discover)、作る、書く (to write).

[直接受身] 卒業証書は校長先生先生{から/によって}学生に授与されました。(give-receive; The graduation certificates were awarded to the students by the principal.; 授与する: to award (transitive))

[直接受身] 金メダルは総理大臣{から/によって}優勝者に授与された。(give-receive; The gold medal was awarded to the champion by the Prime Minister.; 授与する: to award (transitive))

[直接受身] 運命はベートーベン{によって}作曲された。(creation; "Fate" was composed by Beethoven.; 作曲する: to compose (music) (transitive/intransitive))

[直接受身] 東京都庁は丹下健三氏{によって}設計された。(creation; The Tokyo Metropolitan Government Building was designed by Mr. Kenzo Tange.; 設計する: to design (transitive))

[直接受身] アメリカ大陸はコロンブス{によって}発見された。(creation; The American continent was discovered by Columbus.; 発見する: to discover (transitive))

[直接受身] 田中氏は法律{によって}罰せられた。(punish; Mr. Tanaka was punished by the law.; 罰する: to punish (transitive))

Further exploration of the passive voice will be left to a future date.

Basic rules/observations better expressed via prose:

- All present-negative forms end with 「～ない」.
- The conditional form for all verbs is the same: change the last sound to <sup>え</sup> and attach ば.
- The conditional-negative forms all end in 「～なければ」, which is obtained from replacing い in 「～ない」 with ければ. This replacement rule also applies for い-adjectives, replacing the trailing 「～い」 for 「～ければ」.
- The volitional form for exception verbs kind of follow the rules of る verbs: drop る and replace with よう, but additionally there's also a “hint of past tense” in there, explaining the こ sound in 来<sup>こ</sup>よう.
- The imperative-negative form for all verbs is the same, just attach な to the dictionary form.

Exceptions:

- 行く's past-positive form is 行った, not “行いた”. Only 行く uses った; all other ～く verbs still use いた.
- ある's present-negative form is ない, not “あらない”.
- くれる's imperative form is くれ, not “くれろ”.

The following table is a condensed version, showing where the rules come from.

Table 17: Condensed verb conjugation rules. <v negative fragment>/<vnf> refers to <v negative> but dropping the trailing 「い」 character; <v past fragment>/<vpf> refers to <v past> but dropping the trailing 「た/だ」 character.

### GB.3.1 チュートリアル動画 胡桃「雪晴梅香」 Collected Miscellany - "Hu Tao: Fragrance in Thaw" JP/EN

璃月人は生活に根づく伝統重んじる。その中でも特に重視されるのが、命の終わりを告げる葬儀だ。葬儀のしきたりは実に煩雑だが、それを一手に引き受けるのが大常道である。(The

people of Liyue value tradition, and their traditions are embodied in all manner of rites. Of these, the rites that mark life's end are of utmost importance. Liyue's funeral rites are complex, and only Wangsheng Funeral Parlor can conduct them to the satisfaction of all.)

大杖道は77代続く老舗だ。ここ数年、大杖道の面性は高まりつつある。それもすべて道主胡桃の尽力植える。(Wangsheng has stood for 77 generations and has gained still greater fame in recent years, thanks to their eccentric young director, Hu Tao.)

お日様が出たら日光浴、お月様が出たら月光浴～ (When the sun's out, bathe in sunlight. But when the moon's out, bathe in moonlight.)

胡桃は炎元素を操り、燃え盛る炎によって世の不浄を祓う。HPを消耗することで胡桃はダメージを上げることが可能だ。(Hu Tao manipulates Pyro with ease, and can sacrifice her HP to increase her damage output, cleansing the world of impurities with an unrelenting flame.)

胡桃が料理を完璧調理した時、確率で微妙な品質の料理を追加獲得できる。(When Hu Tao cooks a dish perfectly, she has a chance to obtain a Suspicious dish of the same kind.)

胡桃の通常攻撃は、最大6段の連続攻撃で物理ダメージを与える。重撃は、スタミナを消費し、前方へと突進にお見舞い、経路上の敵にダメージを与えられる。また、ダッシュ時には短時間姿を消し、小柄な敵をすり抜けることが可能だ。(Hu Tao's Normal Attack can combo up to six strikes, dealing Physical DMG to enemies. Hu Tao's Charged Attack consumes a set amount of stamina to lunge forward, dealing Physical DMG to enemies in her path. Hu Tao also has a unique effect when sprinting, allowing her to briefly disappear and pass through certain small foes.)

元素スキルでは、一定のHPを消費し、周囲の敵をノックバックさせ、冥蝶の舞状態に入る。この時、胡桃の攻撃は炎元素に変化する。この変化は、元素付与の影響を受けない。後に、中断耐性の上昇し、HP上限を基準に、攻撃力がアップする。(Hu Tao consumes part of her HP to cast her Elemental Skill, knocking nearby enemies back and entering the Paramita Papilio state. This converts her attack DMG to Pyro DMG, which cannot be overridden by another elemental infusion. Her resistance to interruption is also increased, and she receives an ATK increase based on her Max HP when entering this state.)

冥蝶の舞状態は持続時間の終了、または胡桃の退場により解除される。(Paramita Papilio ends after a set duration or when Hu Tao leaves the field.)

天賦「蝶隠の時」解放後は、冥蝶の舞状態終了時に、胡桃を除いた、チーム全員の会心率は一定時間上がる。(After unlocking the Talent "Flutter By," ending Paramita Papilio increases the CRIT Rate of all of Hu Tao's party members other than herself for a set duration.)

また、冥蝶の舞状態時、胡桃の重撃は、敵に血梅香効果を与える。血梅香効果の敵は、一定時間ごとに、炎ダメージを受ける。同一ターゲットの付与できる血梅香効果は、同時に最大一つまでだ。持続時間は胡桃だけが更新できる。(Moreover, while Paramita Papilio is in effect, Hu Tao's Charged Attacks apply the Blood Blossom effect to enemies it hits. Enemies affected by Blood Blossom will take Pyro DMG at set intervals. This effect automatically expires after a while. Only one Blood Blossom can exist on any one target at a time, and only Hu Tao can refresh its duration.)

大杖道には、生と死の境を渡り歩く秘術が伝わっている。この秘術によって、術者は死を恐れず膨大な力を得る。天賦「血のかまど」を解放すると、胡桃のHPが低い時、炎ダメージが上昇する。(Wangsheng has a long heritage. It's said that their directors pass down a secret technique to traverse between life and death. Unafraid in the face of death, they instead unleash yet greater power. Once the Talent "Sanguine Rouge" is unlocked, Hu Tao gains a Pyro DMG Bonus when her HP is low.)

りょうげん ちょう  
療原の蝶！ (Pyre, pyre, pants on fire!)

灼熱の魂をフリー広範囲炎ダメージを与える 敵に命中すると颯太をの hp 上限をもとに hp が回復する これは最大で5体分発の可能だ また命中時にフータウの hp が低ければより高いダメージと回復効果が発生する プー太をの戦いは自らを危険にさらすそのため連携係となった hp 道を配りつつ元素スキルと元素爆発を発動するといった 戦闘が始まったら元素スキルで 名超の前状態にはい 通常攻撃と 11 を織り交ぜこのダメージと千葉以降効果を敵に与えよ 胡桃の大上戸は添付調印の時によりチームメンバーの会心率が上がる [音楽] hp が低下したら敵の密集地帯る 元素爆発発動させるこのダメージを与えつつ自身の hp を回復するという 大杖道の葬儀は厳かでもうもしくは 人々は自然と口を注ぐ しかし同株であるふーたんはそんな雰囲気と程遠い性格の持ち主た 大杖道の年長者はこのわんぱくな動詞に不満を抱いたが 葬儀を執り行う姿を見て感嘆の声を漏らしたと言う 成都市は返還であり市は申請をもたらず 市は忌避すべきことなのだろう フータオは重々承知している 理解していないのは 一部の年長者の海だ

Hu Tao commands a blazing spirit to deal Pyro DMG in a large AoE When her Elemental Burst hits enemies Hu Tao regenerates a certain percentage of her Max HP A maximum of five enemies can affect this percentage Additionally, using this skill when Hu Tao's HP is low Deals greater DMG and regenerates more HP Hu Tao's unique fighting style often imperils her As such, she must coordinate with her teammates And choose the right moment to use her skills and manage her HP Hu Tao often begins by using her Elemental Skill to enter the Paramita Papilio state Then she alternates between Normal and Charged Attacks to deal Pyro DMG Applying Blood Blossoms onto enemies She then leaves the field, using the CRIT Rate increase from "Flutter By" To increase her teammates' damage output When Hu Tao's HP is low She can choose a group of enemies upon which to unleash her Elemental Burst Dealing Pyro DMG and regenerating her HP Wangsheng Funeral Parlor conducts rites of utmost solemnity, and its staff are used to speaking little Making Hu Tao's liveliness seem an ill fit Her elders once criticized her mischief-making But having seen her immaculate conduct of the parlor's affairs They could do naught but admit their error Life and death are but two halves of an endless cycle Life leads unto death, and death unto new life — why, then, should death be taboo? Hu Tao has had the wisdom to see this, though some of her elders have yet to do so

GB.3.7 チュートリアル動画 ヴァレサ「ヒーロー見参!!」 Collected Miscellany - “Varesa: Hero Incoming!” (Source JP/EN)

果樹園を手伝うヴァレサからは、おっとりとした、些か内気な印象を受ける。(Tending her orchard by day, Varesa is just a mild-mannered fruit farmer, maybe even a little shy.)

「頭突き〜！」 (“Headbutt!”)

だが、仮面をつけると、雰囲気が一変するようだ。(But when she dons her mask, she completely transforms.)

「ジャスティス!!」 (“It’s justice o’clock!”)

「お出かけ? それとも...試合?」 (“Are we going on a trip? Or... to a competition?”)

ヴァレサは落下攻撃を軸に戦い、高速ダッシュが可能な雷元素アタッカーだ。(Varesa is an Electro damage dealer who specialises in Plunging Attacks and has a rapid Sprint.)

仮面をつけると、「猛烈パッション」状態に入り、あらゆる攻撃が強化され、より高いダメージを与えられる。この状態に入る方法は、主に落下攻撃となる。(After donning her mask, Varesa enters the Fiery Passion state. In this state, each of her attacks gains a unique buff and deals increased DMG. Typically, Varesa uses a Plunging Attack to enter the Fiery Passion state.)

元素スキルを発動すると、前方に一定距離突進し、経路上の敵に雷ダメージを与え、一定の夜魂値を獲得する。その後、通常攻撃ボタンを押すと、重撃を放ち、跳び上がる。再び通常攻撃ボタンを押すと、落下攻撃で雷範囲ダメージを与え、同時に一定の夜魂値を獲得する。この方法で夜魂値がマックスになると、猛烈パッション状態となり、元素スキルを1回追加で利用できる。(With her Elemental Skill, Varesa charges forward, dealing Electro DMG to enemies in her path and recovering a set amount of Nightsoul points. By subsequently tapping Normal Attack, Varesa will quickly execute a Charged Attack then leap into the air. By tapping Normal Attack again, she will plunge down at the enemy, dealing AoE Electro DMG, and recovering a set amount of Nightsoul points. After reaching maximum Nightsoul Points with this method, Varesa will enter the Fiery Passion state and gain 1 extra charge of her Elemental Skill.)

「くられ、渾身の一撃！」 (“One fell swoop!”)

元素エネルギーが最大時の元素爆発では、強力な飛び蹴りで雷範囲ダメージを与える。元素爆発発動後、夜魂値が上限まで回復し、猛烈パッション状態となる。(When Energy is full, Varesa can use her Elemental Burst to deliver a powerful flying kick that deals AoE Electro

DMG. This will also restore Varesa's Nightsoul points to maximum, and send her into the Fiery Passion state.)

また、この状態で落下攻撃を放ってから短時間クールタイムを無視して、より少ない元素エネルギーで特殊な元素爆発を1回発動できる、これは落下攻撃ダメージとみなされる。(After performing a Plunging Attack in the Fiery Passion state, the cooldown of Varesa's Elemental Burst is ignored for a short period, during which she can execute a single special Elemental Burst that costs less Energy, and deals Plunging Attack DMG.)

戦闘中、ヴァレサは元素スキルで敵陣に突撃し、通常攻撃ボタンで高く跳び上がった後、落下攻撃を繰り返して夜魂値を溜め、猛烈パッション状態に入る。この状態中、先ほどの手順を繰り返して大ダメージを与え、機を見計らい、少ない元素エネルギーの、または通常の元素爆発を発動するといいたいだろう。(In battle, Varesa strikes at the enemy with her Elemental Skill, then leaps up into the air with a tap of her Normal Attack. Tapping Normal Attack again, she plunges down, gains full Nightsoul points, and enters the Fiery Passion State. Now, Varesa can continue with this same attack routine to deal increased DMG, peppering in high- or low-Energy-cost Elemental Bursts at opportune moments as needed.)

全力疾走するヴァレサを止められる自信があるならいいが、勧めはしない。元素スキル長押しで夜魂の加護状態に入ると、継続的に夜魂値を消費する。移動速度と中断耐性がアップし、地形を利用して遠くへ跳んだり、夜魂値を追加消費して水面と液体燃素の上を移動したりできる。この時、液体燃素のダメージを受けない。(Maybe you think you could stop Varesa on a rampage. While I don't doubt your judgment, I'd advise against it. Hold Varesa's Elemental Skill to enter the Nightsoul's Blessing state and steadily consume Nightsoul points. In this state, she will gain increased movement SPD, resistance to interruption, and sprinting SPD. In addition, she can make flying leaps off the terrain, or consume additional Nightsoul points to move on water, and even on liquid Phlogiston without taking damage.)

燃素を利用できるナタのエリアにいる時、チームにヴァレサがいる状態で料理を使用すると、燃素を一定値回復する。(In areas with Natlan's Phlogiston mechanics, if Varesa is in the party, your own characters can eat food to replenish phlogiston.)

また、特定の移動状態にあるキャラから切り替えると、ヴァレサは夜魂の加護状態で登場する。(Furthermore, if the active character is in a specific movement state, Varesa can take the field already in the Nightsoul's Blessing state.)

同じことでも、それをやる理由は人それぞれだ。例えば威嚇のためによく使われる仮面だが、ヴァレサの場合、勇気を与える道具となっている。(People often do the same thing for very different reasons. Take masks, for instance: Some wear them to intimidate other people, while Varesa wears hers to gain courage.)

いつか仮面を被らず戦えたら、と願っているようだが、仮面を被ること自体、勇気のいる行為だとは気づいていないらしい。(She longs for the day when she no longer needs her mask to feel confident, not realizing that sometimes, it takes more courage to don one's mask than not to.)

無論、仮面には他の役割もある... 以前チュエンマーケットを訪れた際、精巧かつ創意溢れる仮面が並んでいた... 残念ながら、俺には似合わなそうだったが。(Of course, there are masks for all kinds of occasions... Chuwen Fair sells quite a range, actually. I've browsed them before. Outstanding works of art and meticulously made, though, sadly... they don't really suit me.)

GB.3.8 チュートリアル動画 エスコフィエ「包丁の円舞」 Collected Miscellany -

“Escoffier: A Waltz of Scoring Cuts” (Source JP/EN)

「科学料理のシェフ「カーネル・デセル」エスコフィエよ。カトラリーの準備も完了！」 (“Well met. I am Escoffier, Patissiere Supreme and master of precision gastronomy. Utensils at the ready!”)

エスコフィエは味方全体を治療できる氷元素のサブアタッカーだ。敵の氷耐性と水耐性を下げ、チームメンバーの攻撃をサポートする。(Escoffier is an off-field Cryo Damage dealer with group healing abilities. She can also decrease enemies' Cryo and Hydro resistance, boosting the DMG dealt by her teammates.)

元素スキル一回押しでは、敵に氷範囲ダメージを与え、マルチスペクトル調理マシナリーを起動する。これはフィールド上のキャラクターを追尾し、一定時間ごとに周囲の敵に氷ダメージを与える。長押しでは、フィールド上に調理マシナリーを設置する、マシナリーは元素攻撃を吸収し、吸収した元素エネルギーが一定量に達すると、美味しい料理を生成する。(Tap Escoffier's Elemental Skill to deal AoE Cryo DMG to surrounding enemies, and activate her All-Spectrum Multi-Use Cooking Mek. The Cooking Mek will follow the active character, and periodically deal Cryo DMG to surrounding enemies. Hold Escoffier's Elemental Skill to place the Cooking Mek on the field. The Cooking Mek can absorb Elemental Attacks. When the amount of Elemental Energy absorbed reaches a threshold, delicious dishes will be produced.)

「最高の一品よ！」 (“The pinnacle of excellence!”)

元素爆発では、卓越した包丁さばきを披露して、氷範囲ダメージを与え、チーム全員のHPを回復する。その後しばらく、定期的にフィールド上キャラのHPを回復する。回復量はエスコフィエの攻撃力に依存する。(With her Elemental Burst, Escoffier displays her exceptional knife skills, dealing AoE Cryo DMG and restoring HP to all party members. Additionally, for a period of time, the active character will periodically regain HP based on Escoffier's ATK.)

低温保存で鮮度を保持する食材を急速冷凍できれば、非常に便利だ。(Keeping ingredients fresh means keeping them cool, a skill which is second nature to Escoffier.)

エスコフィエの元素スキルや元素爆発が敵に命中すると、チーム内の水・氷キャラの数に応じて、敵の水耐性・氷耐性が下がる。エスコフィエは水・氷キャラと組み合わせると、耐性デバフを最大限に活かし、フィールド上キャラの火力をアップできる。(After Escoffier's Elemental Skill or Burst hits an enemy, their Hydro and Cryo Resistance will be decreased based on the number of Hydro and Cryo characters in the party. By teaming up with Hydro and Cryo characters, Escoffier can maximize her Resistance Reduction and boost her team's damage output.)

戦闘中、エスコフィエは元素スキルで調理マシナリーを出し、敵を倒すのを手伝ってくれる。元素エネルギーが溜まったら、元素爆発でチームのHPを回復し、優雅に戦闘を終わらせるのだ。(In combat, Escoffier summons her Cooking Mek with her Elemental Skill, providing off-field support for her team. When Energy is full, Escoffier unleashes her Elemental Burst, restoring HP for the entire party and bringing the fight to a graceful close.)

俺も刀剣はよく扱うが、エスコフィエの繊細な技術には敵わない。だが俺の経験から言えば、高い技術が幸福をもたらすとは限らない——。技術には危険が伴うのだ。しかし、いくら警告したところで、真理の探求を止めることはできないし、純粋な情熱を否定はできない。幸い、彼女は料理に関心があるだけだ、それだけならば... 杞憂というものだろう。(Though I too possess skill with a blade, I cannot hope to match Escoffier's technical finesse. In my experience, however, cutting-edge technology doesn't always spell happiness — The more intricate it is, the more perilous it tends to be. Of course, warnings like these can do little to curb humanity's quest

for excellence, and I cannot deny the sincerity of such enthusiasm. Thankfully, Escoffier's passion lies exclusively in culinary techniques. It's just cooking, after all — what could possibly go wrong?)

SB.23 Days of the month: 日/日/日

Read the main article on [Tofugu](#). Also see [Instagram reel](#).

For calendar days, the 和語 counting system (日) is used for {2nd–10th, 14th, 20th, 24th}. All other numbers use standard 漢語 counting system (日). Furthermore, {17th, 27th} use 七, and {19th, 29th} use 九.

For ordinal days (§SB.24), there are two rules. The ~{日/日}日 schema follows the rules of day intervals (§SB.25), so 和語 counting system (日) is used for {2nd–10th, 20th} only. Furthermore, {1st–31st, 49th} use the formal readings: {17th, 27th} use 七 (七 OK for disambiguation) and {19th, 29th, 49th} use 九. On the other hand, the 第~日 schema follows these simplified rules: the standard 漢語 counting system is used for all numbers, and {9th, 19th, 29th, 49th} use 九.

For day intervals (§SB.25), the 和語 counting system (日) is used for {2nd–10th, 20th} only. All other numbers use the standard 漢語 counting system (日). Furthermore, days intervals in {1–31, 49} days use the formal readings: {17, 27} days use 七 (七 OK for disambiguation) and {19, 29, 49} days use 九.

For o’clocks and hour intervals (§SB.26), if the ones place is 4, 7 or 9, then 四、七、九 are used, ad infinitum.

SB.25 Counting days: {日/日}間

Read the main article on Tofugu.

The 「〜間」 suffix here means “interval”. While typically dropped in the absence of ambiguity, it is necessary here to distinguish day intervals from days of the month (§SB.23; [WB]).

For formal settings and specifically **days and hours** (with the exception of day of month <sup>なの</sup>七日), <sup>しち</sup>七 is preferred over <sup>なな</sup>七, though the latter may be used for disambiguation with <sup>いち</sup>一.

## VB.4 Directions

Read the main articles on [JWA](#) and [KH](#).

For the four cardinal directions, the 訓読み readings are 東・西・南・北. The corresponding 音読み readings are 東・西・南・北.

日本では「東西南北」の順です。Japan uses EWSN (hence the 東西南北).

西洋では「北南東西」の順です。The Western world uses NSEW order.

中国では「<sup>とうなんせいほく</sup>東南西北」の<sup>じゅん</sup>順です。 China uses ESWN.

When forming the four intercardinal directions and eight secondary intercardinal directions, there is ambiguity in the ordering of constituent cardinals. All permutations are possible, but there are some rules for when to use which:

- When describing something native to Japan, use Japanese ordering.
- When forming international and Western concepts, such as compass directions, use Western ordering (this is standardised by the World Meteorological Organisation). Note that secondary intercardinal directions take the form <cardinal>-<secondary cardinal>.

The readings of the intercardinal and secondary intercardinals are simply the concatenation of the unmodified constituent 音読み readings. The only exception is when cardinals describing direction spans come together, in which case *rendaku* occurs, so we have <sup>とうざい</sup>東西 and <sup>なんぼく</sup>南北.
