# The writing system

The writing system comprises three scripts: 平仮名(ひらがな)、片仮名(カタカナ)、漢字(か んじ). For details of the former two scripts, refer to the supplementary PDF.

## G1.1 [Interlude] Morphemes, phonemes, phones

This entire section is courtesy of SL.

Phonemes are the smallest unit of mental representation of sound. They do not carry meaning by themselves, but they can alter the meaning pictured by the listener.

Morphemes are the smallest unit of meaning, and comprise two levels: a phonological level and a semantic level. The phonological level states how it is pronounced (a string of phonemes), and the semantic level states what meaning is attached to the phonology.

For instance,  $\stackrel{\circ}{\exists}\stackrel{\circ}{\not\sim}$  contains a repetition of the same phoneme because the sound and meaning of the two 漢字 are identical. In contrast, 首首 contains two different morphemes, because the sound (and meaning) of the two 漢字 are different!

When determining whether a morpheme is repeated or not, consider the sound and meaning first before looking at the orthography. "Orthography is truly an afterthought, in the design of languages]."

## G1.2 Iteration marks

Read main article on Wikipedia.

Only the (horizontal text) 漢字 iteration mark 々 is commonly used today. It is used to represent a duplicated character representing the same morpheme. For example,  $\stackrel{\circ}{\exists}\stackrel{\circ}{\not\sim}$  means "daily, day after day".

Writing 々 instead of repeating the 漢字 is preferred, provided that:

- 1. (tl;dr: morpheme is repeated) the reading of the repeated 漢字 must be the same, though certain changes are permitted such as rendaku (unvoiced consonant becomes voiced, i.e. the dakuten, e.g. in  $\bigwedge^{\circ} \mathcal{L}$ ,  $\mathcal{L} \to \mathcal{L}$ ) and gemination (consonant lengthening, i.e. the  $\supset$ , e.g. in
- 2. the repetition must be within a single word/phrase.

If the above aren't satisfied:

- If repetition isn't repetition of the same morpheme, for disambiguation the second 漢字 is spelt out in 平仮名 (e.g. 日にち).
- If repetition crosses word boundaries, then the 漢字 is repeated (e.g. 民主主義, democracy).

There are exceptions to this! 民主々義 is rarely used but exists. A notable exception is in the signages for neighbourhood associations 「~町内会」. Because the name of neighbourhoods often end in  $\sim$  町, suffixing with  $\sim$ 町内会 yields  $\sim$  町 町内会, which is then informally abbreviated to ~町々内会, despite the repetition crossing a word boundary.

Interpretations when ? is used:

- Reduplication (linguistics terminology) to indicate plurality ひとびと 人々 (people)、 日々 (daily/day after day)、 山々 (mountains)
- Various alterations in meaning

- $\stackrel{\circ}{\mathbb{B}}$  (piece)  $\rightarrow$   $\stackrel{\circ}{\mathbb{B}}\stackrel{\circ}{\check{\mathcal{L}}}$  (individually)
- ▶ 時 (time) → 時々 (sometimes)
- ・翌日 (next day, as in 隔天/隔一天 (CN)) → 翌々日 (next next day, as in 隔两天 (CN))

Note that 翌日 is not the same as 明日, just like how 隔天 and 明天 are used in different contexts in CN!

Repetition marks can be typed using commands in Table 1.

		Keyboard command	Purpose
7	>	$\mathtt{onaji} \to \mathrm{space}^*$	平仮名 previous character repeater (enforce without dakuten)
7,,	7,	$\mathtt{onaji} \to \mathrm{space}^*$	平仮名 previous character repeater (enforce with dakuten)
`	`	$\mathtt{onaji} \to \mathrm{space}^*$	片仮名 previous character repeater (enforce without dakuten)
Y.	Y"	$\mathtt{onaji} \to \mathrm{space}^*$	片仮名 previous character repeater (enforce with dakuten)
々	4	$noma \to \operatorname{space}^*$	漢字 previous character repeater $(/ + \forall)$

## G1.3 漢字

Some preliminary notes:

- There exists over 40000 漢字 but only about 2000 account for >95% of characters actually used in written text.
- There are no spaces in Japanese, so 漢字 is necessary for distinguishing separate words within a sentence, and discriminating between homophones.
- Words that mean practically the same thing can have different 漢字 to distinguish nuances.

Here's an example:

- ・ 訊く means to ask.
- ・聞く means to listen, or to ask.
- ・ 聴く means to listen attentively. Preferred when talking about listening to music.

Another example:

- ・ 見る means to see.
- ・ 観る means to watch a movie.

Another example:

- ・ 書く means to write.
- ▶ 描く means to draw.

When depicting/imagining an <u>abstract</u> image (e.g. a scene in a book ), we use  $\overset{\widehat{\pi}}{\text{iff}} \zeta$ .

Another example:

• The different pronuncations  $\stackrel{\sharp}{\rightarrow} \stackrel{;}{\Box}$ ,  $\stackrel{;}{\rightarrow} \stackrel{;}{\Box}$  and  $\stackrel{;}{\rightarrow} \stackrel{;}{\Box}$  are each preferred in different contexts.

# G1.3.1 カタカナと漢字で紛らわしいグリフ Confusing glyphs

Table 2: Potentially confusing glyphs between カタカナ and 漢字. In general, カタカナ glyphs are smaller than the 漢字 ones.

漢字	カタカナ
$\overset{z_{5}}{\perp}$	エ
ず	才
<sup>ちから</sup> 力	カ
<u>:</u>	Ξ
ゆう <b>夕</b>	タ
<u>き</u>	チ
八	<i>/</i> \
くち 口 	П

#### G1.4 Pronunciation

It is not practical to memorise or attempt to logically create rules for pitches, especially since it can change depending on the context or the dialect. Even the intonations provided in dictionaries are there for guidance; they morph when used in different contexts.

The only practical approach is to get the general sense of pitches is by mimicking native Japanese speakers with careful listening and practice.

Some special notes:

- Voiced consonants vibrate the vocal cords, while unvoiced consonants don't (see Tofugu article).
- In the modern 東京 dialect, ず and づ are pronounced exactly the same way: "zu", as expressed in their identical Hepburn romanisation (§G1.5).
- ・ When in the middle of words, がぎぐげご may be pronounced with a "ng-" start instead of a "g-" start. This is a regional variation (that's not too uncommon); both ways are acceptable (see Tofugu article).
- The native Japanese speaker will pronounce the "v" family (ヴ、ヴァ、ヴィ、ヴェ、ヴォ、 ヴュ) as /b/.
- The native Japanese speaker will close their mouth at the end of pronouncing a trailing 「ん」 (e.g. 日本).
- Vowel extensions (§G1.4.1) are pronounced as vowel extensions; do not pronounce the extender if it's a different vowel! For example, 先生 is pronounced sen-se with an elongated trailing "e" vowel. There is no "i" vowel sound!
- Almost every 漢字 character has two different readings (see §G1.7):
  - ・ 音読み: Chinese-derived. Used in compound 漢字 and idioms (both known as 熟語).
  - ・ 訓読み: native Japanese. Used in solo 漢字, solo 漢字 appended with 送り仮名, adjectives and verbs.

<sup>&</sup>lt;sup>1</sup>Conjugation: change of word form to fit a given context.

The purpose of trailing 送り仮名 is to preserve the pronunciation of the 漢字, even as the word is conjugated to different forms. It is also used to differentiate transitive and intransitive verbs ( $\S G2.7.1$ ).

Note that although sometimes you may see 音読み pronunciations written in 片仮名 and 訓 読み pronunciations written in 平仮名, this is only used in dictionaries for differentiation. In standard 振り仮名, only 平仮名 is used.

• The actual readings of 漢字 can change slightly in compound words to make them easier to say (e.g. 一本 is いっぽん instead of いっぽん).

When repeating 漢字 using 々, rendaku (see §G1.6; unvoiced consonant becomes voiced, i.e. the dakuten, e.g. in  $\lambda \neq 0$ ,  $\omega \rightarrow \omega$  and gemination (consonant lengthening, i.e. the  $\sigma$ , e.g. 刻々) may occur.

#### G1.4.1 Vowel extension

Vowel extensions follow the rules in Table 3. For notes on pronunciation, see §G1.4.

Table 3: Vowel extension rules. Exceptions are bracketed in blue. /a/ is the phoneme representation.

<b>3</b> 71 44 d	Extend by appending		E

/a/	あ		お <u>ばあ</u> さん、お <u>かあ</u> さん	
/i/	い			
$/\mathrm{u}/$	う	_		
/e/	い(え)		<sup>th,th</sup> が、が、た、(お <u>ねえ</u> さん)	
/o/	う (お)		き <u>ょう</u> 、おは <u>よう</u> 、( <u>おお</u> きい)、(遠回り)	

### G1.5 Hepburn romanisation

Read main article on Wikipedia.

The official (as of Jan 2024) romanisation system of Japan. There are only a few rules.

Vowel extension (§G1.4.1) When vowels "a", "e", "o", "u" are extended as part of the same morpheme, it is expressed with a macron (overbar), and the extender vowel is dropped. Extension of "i" and the "e+i" combination are exceptions: they remain repeated.

- お婆さん obaasan → obāsan
- 新潟 (city name) niigata
- 数学 suugaku → sūgaku
- お姉さん oneesan → onēsan
  - 先生 sensei
- ・ 遠回り toomawari → tōmawari 勉強 benkyou → benkyō

This does not apply when the repetition crosses word boundaries or morpheme boundaries.

- 郑蕙 jaaku
- 灰色 haiiro

Also for terminal adjectives (???): いい ii

- 湖 mizuumi
  - Also for terminal verbs (????): 食う kuu (eat)
- 濡れ縁 nureen ("open veranda (roofed hallway)")
- 小龍 り koodori (dance of joy) 子 koushi (calf)

Also for terminal verbs (???): 迷芝 mayou (to get lost)

片仮名 loanwords The macron is used iff 「一」 is used to extend a vowel.

Japanese words adopted into English Common place names like Tokyo, Kyoto and Osaka, while properly romanised as tōkyō, kyōto and ōsaka, are simply romanised as Tokyo, Kyoto and Osaka.

Particles When は、へ、を are used as particles, they are romanised as wa, e and o respectively.

Syllabic ん ん is romanised as n' (with the apostrophe) if followed immediately by any lone vowel or "y". This is to disambiguate んあ、んい、んう、んえ、んお、んや、んゆ、んよ (n'a, n'i, n'u, n'e, n'o, n'ya, n'yu, n'yo) from な、に、ぬ、ね、の、にゃ、にゅ、にょ (na, ni, nu, ne, no, nya, nyu, nyo) respectively.

Examples: 幣易 kan'i (simple), 信用 shin'yō (trust).

Geminated consonants ( $\circ$ ,  $\circ$ ) Double the next consonant, except if "ch" is repeated: in that case we use "tch" instead of "cch".

Examples: 抹茶 maccha  $\rightarrow$  matcha, こっち kocchi  $\rightarrow$  kotchi

## G1.6 Rendaku

Read the main articles on Tofugu.

Rendaku occurs when multiple words join together to form one **compound word**, and the initially unvoiced consonant of a second word becomes a voiced consonant. In written form, the second word's first syllable gains a dakuten/handakuten mark. All dakuten/handakuten-marked characters have voiced consonant beginnings (the "p" sound for handakuten-marked characters are considered to be "semi-voiced").

Compound words comprise words that can independently exist as words on their own.

Here are some general rendaku rules, though note that exceptions exist:

- Basic conditions:
  - 1. Two words come together to form a compound word.
  - 2. The leading consonant of the second word is unvoiced.
  - 3. The leading consonant of the second word is one of the four sets of characters that can change into a voiced consonant with dakuten or handakuten ("k", "s", "t", or "h").
  - 4. Surrounding the leading consonant of the second word are voiced vowels (or sometimes nasals like  $\lambda$ : those do not stop rendaku).
- If the first word ends in  $\supset$  or  $\lambda$ , the "h" leading consonant of the second word usually rendakus to "p", "b" otherwise by default.

• When the second word is of Japanese origin (和語), and the basic conditions above are met, then it undergoes rendaku. When the second word is of Chinese origin or a foreign loanword (漢語、外来語), rendaku is usually prevented (unless the 漢語 is vulgarised, meaning it's become so common that it's treated as a 和語 word, which doesn't prevent rendaku).

This is for avoidance of ambiguity in spoken language: 和語 words mostly start with unvoiced consonants, so rendaku makes it clear that a compound word is used instead of two independent words. 漢語 and 外来語 words can and often start with voiced consonants, so rendaku would cause confusion by morphing rendaku-ed words into another different word.

A vulgarised exception is 夫婦 + 喧嘩 = 夫婦喧嘩 (喧嘩 is vulgarised). Other vulgarised words: 会社、写真.

When the first word is a 漢語 (in 漢語 + 和語 compound words, where the first element uses the 音読み reading and the second element uses the 訓読み reading), rendaku can be blocked. A notable exmaple is 「关~」.

In  $^{\stackrel{\text{\tiny Lock}}{\cancel{N}}}$   $\overset{\stackrel{\text{\tiny Lock}}{\cancel{N}}}{\cancel{N}}$   $\overset{\text{\tiny Lock}}{\cancel{N}}$   $\overset{\text{\tiny Lock}}$ in the grand majority of cases.

• Lyman's Law: If the second word has a voiced consonant or handakuten anywhere in it, rendaku does not occur.

This may be explained by the observation that two voiced consonants don't appear together side by side in single 和語 words or phrases.

"Lyman's Law in reverse" says that sometimes, when the second word has a second voiced consonant, that can become unvoiced and the first consonant becomes voiced (rendaku). This is a rarity and won't be discussed further here.

- If voicing in the first word is too close to the second word, rendaku may (50/50) not occur. "Japanese doesn't really like having a bunch of dakuten and handakuten very close to each other."
- In words that come together to mean "X and Y," rendaku does not occur. In English, such words are rare but examples include "bittersweet", "stir-fry" and "sleepwalk".

E.g. 山川 can mean either "mountains and rivers" or "a mountain river". For the former, when both sides are "equal status", rendaku does not happen and it is read  $\coprod^{\tau_s}$ . For the latter. when the first word is a noun modifier for the second, rendaku happens and it is read  $\mathring{\text{H}}\mathring{\mathring{\text{J}}}\mathring{\mathring{\text{J}}}\mathring{\mathring{\text{J}}}$ .

E.g. 白黒 does not rendaku (white and black are equals), but 色白 and 色黒 do (colour is a descriptor of white/black).

Repeating onomatopoeia do not rendaku.

E.g. + ラ + ラ as the sound of something sparkling/glittering, does not rendaku.

• Certain prefixes block rendaku and certain suffixes resist rendaku.

Blocking prefixes:

- ▶ 半~ (half)
- ► 御~/御~ (honorific)

E.g. お手洗い、御心 ・毎~ (every)

- → (one)
- → <u>\*</u>\* (two)
- ▶ 片~ (one-sided)

E.g. 片仮名 (rendaku blocked) vs. 平仮名 (rendaku happens).

- ▶ 漕~ (Chinese)
- ► 首~ (white)
- ▶ 嵐~ (black)

## Resisting suffixes:

- ▶ ~ 先 (previous/tip)
- ► ~類 (string/cord)
- ~浜 (beach)
- · ~姫 (princess)
- ~煙 (smoke)
- ~± (dirt)
- ~潮 (tide)
- ▶ ~∭ (blood)
- $\sim \stackrel{\circ}{\Gamma}$  (below)

# G1.7 音読み and 訓読み and mixing the two

Read the main article on Tofugu1 and Tofugu2.

## G1.7.1 History and why 漢字 is the way it is

According to Tofugu, 漢字 was imported from China via religious texts (which the Japanese appreciated a lot). They merged the Chinese writing system into olden Japanese, but olden Japanese was already established and had its own set of pronunciations. The Japanese decided to adopt Chinese orthography, while co-opting both the Chinese-derived pronunciations (音読み) and the native Japanese pronunciations (訓読み).

While 漢字 words adopted in the above manner have both 音読み and 訓読み readings, some 漢 字 words used today only have one:

• Those that only have 音読み readings were imported from China wholesale, either because the concept didn't yet exist in Japanese vocabulary, or because there were multiple incompatible native terms for the concept which cannot be unified properly (back then, Japan wasn't one unified country, but comprised unrelated groups with unique systems of government, and presumably sub-languages).

E.g. 肉 (meat)、材 (lumber)、蔥 (feeling)、点 (point)、医 (doctor)、茶 (tea)、胃 (stomach)、酸 (work)、象 (elephant)、秒 (time second).

Those that only have 訓読み readings were invented in Japan for a concept that was native to Japan.

E.g. 畑 (field)、姫 (princess)、匂い (fragrant)、峠 (mountain pass)、枠 (frame)、籾 (unhulled rice)、鰯 (sardine)、栃 (horses' chestnut)、込む (to be crowded)、咲く (to bloom)

Furthermore, olden China was always in a state of infighting and changing of powers. As power in China changed, so did the "official" language. The introduction of 漢字 from China to Japan happaned over a long period of time, across many Chinese powers and thus many "then-official" versions of the olden Chinese language. This explains why some 漢字 have multiple 音読み readings: Japanese scholars decided to co-opt them as new readings came, without deprecating the "older" readings. ("There were three major reading adoption periods in the history of the Japanese language: 資音 (4-6th century; the Wu Dynasty's pronunciation), 漢音 (7-9th century; the Han Dynasty's pronunciation), and 唐音 (1185-1573 the "modern day Mandarin Chinese" pronunciation).)

The presence of multiple 訓読み has a different historical explanation. Spoken Japanese existed before written Japanese. Multiple similar "senses" of a concept (e.g. to raise, to rise, to climb) have different pronunciations in spoken language, but were gathered under the same orthography when the written language was developed (e.g. 「上 $\sim$ 」).

## G1.8 When to use 音読み and 訓読み

- (lone 訓読み 漢字: majority) These comprise majority of beginner words found in textbooks.
   Mostly nouns. 訓読み is used.
- (lone 音読み 漢字: minority) These are characters with significant meaning, and includes things like counters and single 漢字 numbers. 音読み is used.
- (音読み 漢字 compounds: majority; 製語) These are compound 漢字 words without any trailing 送り仮名. All the constituent 漢字 have Chinese origins and thus 音読み is used.
- (訓読み 漢字 compounds: minority) These are a special class of compound 漢字 and comprise nature concepts (especially the very Japanese ones) and cardinal directions. 訓読み is used for all the constituent 漢字.
- (訓読み 漢字 with trailing 送り仮名) Mostly adjectives and verbs, with the occasional nouns. When trailing 送り仮名 are present, 訓読み is used most of the time.
- (重箱読み 漢字 compounds) These compound 漢字 words take words with mixed origins: the first Chinese-derived and the second Japanese-derived. The first word takes 音読み, the second word takes 訓読み.
  - E.g. 金色 (gold colour).
- (湯桶読み 漢字 compounds) These compound 漢字 words take words with mixed origins: the first Japanese-derived and the second Chinese-derived. The first word takes 訓読み, the second word takes 音読み.
  - E.g. 場所 (place), 合気道 (martial arts Aikido).
- (当て学 I: borrow Chinese reading, <u>invent</u> meaning) Part of the precursor to modern-day 平仮名 and 片仮名: 方葉仮名. This archaic orthographic system used (multiple) Chinese characters to represent each Japanese sound.
  - E.g. 亜米利加 (America; today we use 米国 or アメリカ), 仏蘭西 (France; today we use 仏国 or フランス), 寿司 (sushi), 亜細亜 (Asia; today we use アジア), 珈琲 (coffee; today we use コーヒー), 流石 (as expected; today we use さすが), 沢山 (many; today we use たくさん).
- (当て字 II: borrow Chinese meaning, <u>invent</u> reading) These were adopted when a concept could not yet be expressed directly in the adopted Chinese orthography at the time, but when broken down into simpler concepts, can be expressed using Chinese orthography at the time. The pronunciation follows neither 音読み nor 訓読み of the borrowed Chinese orthography,

but instead how the concept would be pronounced in spoken Japanese at the time (that does not later fall into 訓読み).

E.g. 煙草 (Tobacco (smoke + grass); today we use タバコ), 台詞 (speech; today we use セリフ), 南瓜 (Japanese squash/pumpkin; today we use かぼちゃ), 海老 (shrimp; today we use エビ), 海苔 (Japanese seaweed; today we use のり).

• (当て学 III: borrow both Chinese meaning and the associated reading) Sometimes Japanese scholars were able to find Chinese orthography whose meaning and reading were both desired when representing a concept. These are happy coincidences, perhaps.

E.g. 合羽 (raincoat; today we use カッパ), 倶楽部 (club; today we use クラブ), 算盤 (abacus; today we use そろばん), 剃刀 (razor; today we use カミソリ), 田舎 (countryside).

Honestly, any time you see pronunciations that don't fall under 音読み or 訓読み, it's safe to assume they're under 当て字, where things are borrowed and crafted from somewhere else; it's a bit unclear and the concept is probably even more complicated than what Tofugu presents (which is an incomplete overview): some of the pronunciations in 当て字 III come from nowhere.

• (lone 外来語 漢字) These are foreign loanwords that attained their own 漢字. These are units of measure (e.g. metric system) and common words. These readings have been adopted into 訓読み.

E.g. \*\*\* (metres; today we use メートル or ホー), 質 (page; today we use ページ or ダ), 零 (zilch; today we use ゼロ).

Finally, there's the bizarre class of Japanese names (名乗り) which we best leave untouched here.

# G2 Basic grammar

This section will grant you an overview of basic grammatical structures. The vocabulary associated with this section is fragmented by nature and only present to illustrate the grammatical concepts; vocabulary required for day-to-day conversation is left to §G3.

Some preliminary notes:

- The articles "the" and "a" do not exist in Japanese.
- Japanese does not distinguish between a future action and a general statement (e.g. "I will go to the store" vs. "I go to the store").

## G2.1 Building clauses and sentences

Read the main article on Tofugu.

Essential clause elements are necessary parts of any clause. In 日本語, the only essential clause element is the **predicate**, which is the information about the subject (which is often omitted if clear from context). Concretely, the predicate is either a clause-trailing verb (e.g. 「食べる。」 is a complete sentence) or an [implied] state-of-being (e.g. 「学生[だ]。」 is a complete sentence). In contrast, in English, both subject and predicate are essential to every valid clause.

Non-essential clause elements add complexity to the conveyed meaning. There are multiple:

• An **object** is the element of a clause acted upon by a transitive verb (§G2.7.1). It is suffixed by  $\mathcal{E}$ , the object marker particle.

A direct object is the person or thing that directly receives the action or effect of the verb. It answers the question "what" or "whom". (CAUTION: Using the "The subject verbed what?" as a test for transitivity is not foolproof and doesn't always work! It's merely a crutch. This is because certain verbs that are purely transitive in English can be expressed intransitively in Japanese (and vice versa). An indirect object answers the question "for what", "of what", "to what", "for whom", "of whom", or "to whom" and accompanies a direct object. (Source) E.g. お寿司を作る。(Make sushi.)

• A subject is the entity that controls the verb in a clause. It is suffixed by  $\mathfrak{D}^{\sharp}$ , the subject marker particle.

E.g. お父さんがお寿司を作る。 (My father makes sushi.)

• A topic. This is NOT to be confused with a subject. In English. It is suffixed by \$\alpha\xi\$, the topic-binding particle. For further details, see \\$G2.2.

E.g. **毎週日曜日**はお父さんがお寿司を作る。(Every Sunday, my father makes sushi.; 日曜日: Sunday.)

• An adverbial provides information about the circumstances surrounding a sentence, such as the who, what, when, where, why and how. It is suffixed by the & and  $\checkmark$  particles.

E.g. 毎週日曜日はお父さんが**台所**でお寿司を作る。(Every Sunday, my father makes sushi in the kitchen.; 台所: kitchen.)

E.g. 毎週日曜日はお父さんが台所でお寿司を作るの。(Every Sunday, my father makes sushi in the kitchen.)

Japanese is primarily an SOV language, but this order is fluid and can be switched up to convey different emphases. We may bring parts-of-speech forwards to the beginning of sentences for emphasis. We may bring parts-of-speech backwards to the end of sentences to tuck away and deemphasise information. This is possible due to the case-marking particles.

Complex sentences can be formed by linking clauses using conjunctive particles (e.g. から (therefore), ので, けど, なら), which makes the connection (e.g. the therefore relationship) more explicit, or the **conjugation** of verbs and V-adjectives (e.g. the  $\mathcal{T}$  form), which de-emphasises the connection. Apart from linking clauses, embedding clauses is also possible, typically used via direct quotation (using optional 「」 marks, or ~と言いました (said)。), indirect quotation (using ~と覚う; the と particle acts like a spoken quotation mark) and **noun modification by** adjective-clauses.

## G2.2 Topics vs. subjects: は、が particles

(Read discussion on Reddit, and Tofugu pages for clauses and sentences, は, か, and their differences.)

#### G2.2.1 Subject as part-of-speech, topic as meta-concept

The subject and topic of a sentence is hard to distinguish from an English perspective, since in English, the subject is also the topic by default. However, in Japanese, they are not necessarily the same. Whereas the subject can change from clause to clause, the topic can remain the same across numerous clauses (spanning a phrase, sentence or even paragraph). Note that the topic is not a grammatical part-of-speech! The topic is the theme of discourse.

### G2.2.2 は particle: the topic marker

lt roughly translates to "as for" in English, but is used far more often than "as for".

は casts <u>focus</u>/spotlight on a topic, and implicitly conveys the idea that other potential topics are cast aside. This strength of this implicit contrast depends on context and usage, specifically how unusual it is to see 12 used in place of case-marking particles. Here is an illustration of the implicit contrast:

- コーヒーを飲みますか? The を particle singles out coffee as the object (which the verb 飲  $\mathcal{F}$  acts upon) of the question.
- コーヒーは飲みますか? The は particle shines the spotlight on coffee, but implies the existence of other drinks. The speaker may be talking about other drinks, then moved the conversation to coffee. The speaker may want to offer coffee but imply the availability of other options.

The topic is always something already in the listener's consciousness. Therefore, in clauses containing t, emphasis is placed on the new information following the particle t.

Here are its various purposes:

as a topic marker Suffixed to a noun-phrase which is the intended topic.

Examples (topic is bolded):

• 日本語は面首い。 (Japanese is interesting.)

- これは何ですか? (What's this?; なに is known from context; "this")
- 夏は日本へ行くつもりです。(I plan to go to Japan in the summer.; つもり: plan/intention; the speaker assumed that the listener doesn't know that they were planning to go to Japan.)

日本へ行くのはいつですか? (When is it that you're going to Japan?; の turns the verb into a noun-phrase; いつ: when)

it for contrasting two topics This happens when two (or more) topics are used in the same sentence.

Examples (topic is bolded):

- E.g. 東京は物価が高いけど、田舎は物価が安い。(Tokyo has a high cost of living, but the countryside has a low cost of living.; 物価: cost of living; 田舎: countryside; 安い: cheap).
- E.g. お肉は食べないけど、魚は食べるよ。 (I don't eat meat, but I do eat fish.)

If the effect of contrast isn't required, then  $\mathfrak{D}^{\sharp}$  is usually used instead:

- E.g. 東京が物価が高い。 (The cost of living of Tokyo is high.)
- E.g. お肉は食べない。 (I don't eat meat, (but...))
- in middle of negative V-adjectives to add implicit/explicit nuance/spotlight The added nuance is like that of "while"/"although"/"that's not the whole story", and the clause containing & X V is typically followed by a clause adding continuation (though not compulsory, if the nuance's content is implied).

E.g. 日本語は難しくない。 (Japanese is not difficult.)

E.g. 日本語は難しく**は**ない[けど、ただ時間がかかる]。(It's not (exactly) difficult, it's just time-consuming.; かかる: take a resource)

E.g. 日本語は難しく**は**ありませんか、時間がかかります。(It's not (exactly) difficult, it's just time-consuming.; formal language)

E.g. 日本語は難しく**は**あるけど、面白い。(It is difficult, but it's also fun.; ある: exist, opposite of ない)

は in middle of negative nouns and な-adjectives to add implicit/explicit nuance/spotlight Similar effect to the above.

E.g. 有名ではない[が、人気はある]。(They're not (exactly) famous, but they are popular.; 有名: famous; 人気: popularity; They're not exactly famous, but they are popular.)

E.g. 先生ではありませんが、説明が上手な人です。 (They're not (actually) a teacher, but they are really good at explaining things.)

人気 is a noun that is typically used as 人気がある or 人気がない. 人気じゃない is possible, means the same thing, but is colloquial.

These are examples of the **compound particle** では.

は incompatible with question words, but commonly used in answers は cannot be suffixed to question words like 誰,何 and どこ (except special circumstances). The topic is always something that is already in the listener's consciousness: it isn't unknown! Instead, question words are suffixed by が、を、etc. depending on their role in the sentence.

It is however common to answer such questions  $l \mathfrak{T}$  to establish the now known topic.

E.g. 誰がいましたか? (Who was there?)

E.g. 誰が山田さんですか?山田さんはあの人です。 (Who is Yamada-san? That's Yamada-

は suffix in compound particles to add implicit/explicit nuance/spotlight When forming compound particles, は cannot be suffixed to も, が or を.

countries, perhaps I've never been to those.) (It is more casual than IZIX.)

• は can either "replace" に or become には.

E.g. 日本に行ったことがある。(I've been to Japan; neutral statement.) E.g. 日本[に]は行ったことがある。(I've been to Japan; + implicit comparison with other

E.g. 台前で犬が吠えています。(The dog is barking in the kitchen; neutral statement.) E.g. 台所では犬が吠えています。 (The dog is barking in the kitchen; + implicit comparison with other locations.)

E.g. 弟と映画館に行きました。(I went to the movies with my younger brother; neutral statement.)

E.g. 弟とは映画館に行きました。(I went to the movies with my younger brother; with focus cast on brother, and implicit nuance that we don't know who else I did or didn't go with.)

は to convey hesitation Usually prefixed to ね to form the compound particle はね in such scenarios.

E.g. お寿司は[ね]... (Hmm, sushi...)

the for changing scenes The speaker can intentionally break the conversation's storyline or momentum to emphasise something. This is done by repeating and re-shining the spotlight on the topic, even though it's already obvious to the listener.

E.g. 昨日は**お兄ちゃんが**勉強を教えてくれた。まず、英語の勉強を教えてくれて、それから 国語の勉強だった。でも、算数の宿題をしている途中に、**お兄ちゃんは**ゲームを始めた。 (Yesterday, my big brother helped me study. To start with, he helped me with English, and then with Japanese. But he started playing a game while we were in the middle of doing my math homework; focus/topic shifted from brother teaching to brother playing game.)

Softening implicit comparison with comma, (in writing only) This is commonly done with time phrases such as 来週、先月、今年.

E.g. 今年、日本に行くんです。 (This year I'm going to Japan.)

E.g. 日本語、面白い。 (Japanese is interesting.)

E.g. 少し、食べました。(I ate a little.)

Note that  $\$  is NOT a case-marking particle, whose job is to mark the grammatical role an element plays in a sentence. Instead, it binds a sentence to some known context. "Vt tells us nothing about the grammatical role the item it marks plays in a sentence, it only establishes that item as the context under which the rest of the sentence holds true. So any word or phrase can become the topic, <u>regardless</u> of whatever grammatical role it plays otherwise. So the topic can be the subject, or the topic can be the direct object, or the topic can be the indirect object, or an adverb, etc. The topic can be anything."

Also note that \$\dagger{\pi}\$ cannot be used in adjective phrases if there is no contrast involved:

- ジェニー[の/が/は]落ちた学校に私は受かった。(I was accepted by the school that Jenny failed to get into.)
- ジェニー[の/が]落ちた学校にわたしも落ちた。(は is illegal here because there is no contrast!)

## G2.2.3 が particle

Read the main article on Tofugu.

が is simply the grammatical subject marker particle. か is suffixed to noun phrases. It "points a finger at" the subject of a sentence, and implicitly puts emphasis on that subject (making it clear nothing else is the subject).

E.g. あの犬[が]吠えた。(That dog barked.)

E.g. 誰か[が]いる。(Someone's here.)

E.g. この納豆がおいしい。(This natto is delicious.)

The subject is often omitted if clear. In fact, inclusion of the subject in cases where it's usually omitted brings about a kind of emphasis (e.g. "Did our dog do something to you? Your dog barked.").

Sometimes,  $\not \supset$  itself is omitted instead, especially in spoken context. There is no change to the level of emphasis. This is up to personal preference. However, if the clause carries the meaning of singling out a particular member from a crowd, then が cannot be omitted: ジェニーが犯人だ。

## G2.3 Prelude: Basic grammatical structures

Conjugation is the change in **verb** or **V-adjective** form to fit contexts.

- うん、ううん: informal yes/no
- でも: but

## G2.4 Expressing state-of-being

There is no "to be" (is, are, was, were, am) in Japanese.

- だ: declarative/assertive present state-of-being, suffixed to nouns and な-adjectives only.
  - An "assertive" marker. Using it without a communicative particle like \$\mathcal{L}\$ or \$\mathcal{L}\$ would sound standoff-ish and abrupt (i.e. rude) in spoken Japanese. A sentence ending with  $\tilde{z}$  wouldn't sound like something that's used in an actual conversation, and is only natural in select cases:
    - inside of indirect quotations (when paraphrasing what someone else said).
      - E.g. 人間は火星に住めないと思う。(I don't think that humans can live on Mars.)
      - E.g. 近所の人から桜が満開だと教えてもらった。(A neighbour told me that the cherry blossoms were in full bloom.)
    - when you find or notice something
      - E.g. あ、[雪/南/虹]だ! (Ah, it's snowing/a rainbow!)
      - E.g. あ、電話だ。 (Ah, it's my phone.)
    - when you feel strongly about something

E.g. 有名なアイドルのこと写真撮ったんだ! (I took a picture with a famous idol! 撮る: to take a picture, variant of 取る.)

E.g. 本当だ! (It's true!)

E.g. はあ、明日は漢字のテストだ。 (Ahh, there is a Kanji test tomorrow.)

- じゃない: negative present state-of-being, suffixed to nouns and な-adjectives only.
- だった: past state-of-being, suffixed to nouns and な-adjectives only.
- ・ じゃなかった: negative past state-of-being, suffixed to nouns and な-adjectives only.

E.g. 元気?元気[だ]。 (Greeting and response)

E.g. 元気じゃない / 元気だった / 元気じゃなかった。

# G2.5 Starter particles は、も、が

For は and が, see §G2.2.

• は: introductory topic marker "as for/about", suffixed to the topic you're introducing.

Unless you're making a comparison, you usually do not use more than one  $\mathsection \mathsection \mathsecti$ 

E.g. アリスは学生? うん、学生。 (Alice, are you a student? Yeah, I am.)

E.g. 今日は試験だ。ジョンは?ジョンは明日。 (Today is exam. What about John? His exam is tomorrow.)

• \$: inclusive topic marker ("also"), suffixed to the topic you're including.

E.g. アリスは学生? うん、トムも学生。 (Alice, are you a student? Yeah, and Tom is a student too.)

E.g. アリスは学生? うん、でもトムは学生じゃない。(Alice, are you a student? Yeah, but Tom is not a student.; it is incorrect to use も here, as it is not inclusive with the positive state-of-being!)

E.g. アリスは学生?ううん、トムも学生じゃない。 (Alice, are you a student? Nope, and Tom is also not a student.)

E.g. 誰が学生? 私が学生。(Who the one student? Me the one student.)

## G2.6 Adjectives

Adjectives (adjective phrases) modify a noun that comes after it.

• な-adjectives: act like nouns and use the same particle rules as in §G2.5. Use な to directly modify the noun that comes after な, only in the present-positive case.

E.g. 静かな人、きれいな人。 (Quiet person, pretty person.)

E.g. 友達は親切。(Friend is kind.) 友達は親切な人だ。(Friend is kind person).

E.g. ボブは何が好き[じゃない/だった/じゃなかった]?(What does/doesn't/did/didn't Bob like?) ボブは魚が好き[だ/じゃない/だった/じゃなかった]。(Bob likes/doesn't like/liked/didn't like fish.)

E.g. 魚が[好きな/好きじゃない/好きだった/好きじゃなかった]人。(Person that likes/does not like/liked/did not like fish.) The entire clause before 人 is an adjective.

E.g. 魚が好きじゃない人は、肉が好きだ。(Person who doesn't like fish likes meat.)\ E.g. 魚が好きな人は、野菜も好きだ。(Person who likes fish also likes wild vegetables.)

• い-adjectives: always end with 平仮名「い」that is <u>not</u> part of a 漢字 word's pronunciation: it must literally be a 平仮名「い」. As examples, 好き、きれい (綺麗)、きらい (嫌い) are all not い-adjectives; they are な-adjectives. 嫌い being a な-adjective has to do with 嫌い being derived from the verb 嫌う. REVISIT FUTURE

Do not attach the だ suffix to い-adjectives, just as you don't use だ with じゃない。な is not applicable for い-adjectives: there is no need for any attachments.

E.g. 値段が高いレストランは**あまり**好き**じゃない**。(I **don't really** like expensive restaurants.)<sup>2</sup>

Regarding conjugation, one い-adjective family is an exception: いい. Historically, the word for good changed over time from 良い to いい, but conjugations are still take 良い as the base. Same applies to 格好いい, which takes 格好良い as the base.

Table 4 shows the conjugations and usage syntax for  $\mathcal{L}$ - and  $\mathcal{V}$ - adjectives.

Table 4: Adjective conjugations. I purposely use よかった instead of 良かった (and their variants) here to show that you can use either; it's up to personal preference. I personally prefer the use of 漢字 (i.e. 良かった) because it can be more specific and it's easier to read (in that at a glance, it's easier to derive meaning from 漢字's widely varying word shapes, compared to a sea of 平仮名 characters). Note however that 良い is usually written in 仮名 alone when used as part of conjugations, as in this table.

	Positive	Negative

#### G2.7 Verbs

Read the main article regarding verb classes and conjugations on Tofugu.

<sup>2</sup>**あまり** is typically used as an intensifier modifier for *negative* adjectives: "don't really, 25-50%. It can also be used as a modifier for positive adjectives, "excessive", but in those cases it must be trailing: 食べるあまり、悲しさのあまり。(MT)

kung.jwe@gmail.com

Verbs always come at the end of clauses.

Verbs are categorised into three groups, as shown in Table 5. Be flexible: all these terms are used in different textbooks and dictionaries. Thankfully, they are easy to remember, along with the observation that there are way more Group I verbs than Group II verbs, and there are only two Group III verbs (or up to a dozen, depending on how you count them).<sup>3</sup>

Table 5: Verb classifications. \*There isn't a Japanese term for exception verbs; する and 来る are the only members of the 不規則動詞 subclass.

	Group 1	Group 2	Group 3
	Pentagrade verb 五段動詞	Monograde verb <sup>いちだんどう</sup> 一段動詞	Irregular verb ふ きゃくどう し 不規則動詞*
C	Godan verb	Ichidan verb	Special class
Synonyms	Group I verb	Group II verb	Group III verb
	う-verb	る-verb	Exception verb
	Consonant-root/stem verb	Vowel-root/stem verb	-

In a nutshell, **3-verbs is the class of** almost all <u>-iru/-eru</u> verbs. Exceptions include 帰る、切る、知る which are う-verbs.

Conjugations for verbs are the most complicated among all parts-of-speech, and are shown in Table 7.

The reason for the class names are as such:

- う-verbs all end with the  $\sim$ う sound. As う-verbs conjugate, the ending  $\sim$ う sound shifts through all five vowels  $\sim$ あ (negative)、 $\sim$ い (polite)、 $\sim$ う (dict)、 $\sim$ え (potential)、 $\sim$ お (volitional), thus the name 五段 (five-level).
  - Conjugation of verbs occurs at the phonological level (sounds of the language), which transcends the abilities of the orthography. The **root/stem** of verbs stops at the terminal consonant, thus the name consonant-root/stem. (E.g. the root of 聞く is /kik/ and this remains unchanged through conjugations!)
- る-verbs all end with the る character. As る-verbs conjugate, the る character is replaced for other endings. The **root/stem** (the part before the る ending) remains unchanged through conjugations and doesn't cycle through the five vowels, thus the name 一段 (one-level). The root/stem stops at the terminal vowel, thus the name vowel-root/stem. (E.g. the root of 食べる is /tabe/ and this remains unchanged through conjugations!)

Since there is no consensus on the definitions of root/stem, I'll use "root" to refer to /kik/, and "stem" to refer to the stem form 聞き.

#### G2.7.1 Transitive and intransitive verbs

Read the main article on Tofugu.

A transitive verb takes a direct object, while an intransitive verb does not take a direct object. A direct object is the person or thing that directly receives the action or effect of the

<sup>&</sup>lt;sup>3</sup>Mnemonic I'm using: Group I is the most superior; 五段 is superior to 一段; う comes before る in the 平仮名 alphabet chart.

verb. It answers the question "what" or "whom". (CAUTION: Using the "The subject verbed what?" as a test for transitivity is not foolproof and doesn't always work! It's merely a crutch. This is because certain verbs that are purely transitive in English can be expressed intransitively in Japanese (and vice versa). An indirect object answers the question "for what", "of what", "to what", "for whom", "of whom", or "to whom" and accompanies a direct object.] (Source)

Some verbs have two forms: transitive and intransitive. These two forms sometimes have different pronunciations. I guess it comes down to experience. Examples shown in Table 6.

There are no easy tricks to tell whether a verb is transitive or not. There are no simple rules that say a particular 送り仮名 implies a certain transitivity. Japanese verbs are a mess!

**DO NOT** confuse transitivity with passiveness. English dictionaries like to define verbs using the "to ..." construct, and this is carried over to English-Japanese dictionaries. Intransitive verbs are often defined using passive voice, but

 $passive \ voice \Rightarrow verb \ is \ intransitive$  verb is intransitive  $\Rightarrow \ passive \ voice$ 

A counterexample to the first implication is "The apple was eaten.". Here, "eat" is transitive (the direct object is the apple, and the subject, now oblique/non-obligatory, is omitted)! A counterexample to the second implication is "I slept". Here, "sleep" is intransitive, and active voice is used.

Thus we can't use the passive voice as a marker for intransitivity. In fact, in Japanese, the passive voice has a conjugation of its own, which applies for both transitive and intransitive verbs (yes, intransitive verbs in Japanese can take passive voice too, §G4.1.2). Take special care NOT to interpret the passive voice "to be …" (endemic to English definitions) in §GA.1.4 as equivalent to intransitivity. Transitivity and passiveness are intertwined (SL) but remain independent concepts.

In fact, in English only and not in Japanese, the converse of the two implications above are true, because intransitive verbs do not have a passive form, due to the lack of objects (and thus no object to promote to subject role, which is part of passivisation).

 $\label{eq:passive voice} \text{passive voice} \Rightarrow \text{verb is transitive}$  verb is intransitive  $\Rightarrow \text{active voice}$ 

(In fact these two are now contrapositives, i.e. they convey the same meaning.)

Table 6: Example transitive verbs and their intransitive counterparts.

Transitive	Meaning	Intransitive	Meaning
起こす	to pick up	起きる	to rise
落とす	to drop	落ちる	to fall

# G2.9 Verb particles を、に、へ、で

を: direct object marker, suffixed to the target object of transitive verbs.

E.g. 魚を食べる。(Eat fish.)

E.g. ジュースを飲んだ。(Drank juice.)

Direct objects can be **places** in Japanese too, since the motion verb is done to the place. This is the only exception where  $\mathcal{E}$  can be used for intransitive verbs. <location> $\mathcal{E}$ <motion verb> expresses the meaning that the motion verb is performed to traverse the location.

E.g. **街を**ぶらぶら歩く。(Aimlessly walk through town.; ぶらぶら: aimlessly, 歩く: walk (intransitive)).

E.g. 高速道路を走る。(Run through expressway.; 走る: run (intransitive))

Invisible  $\mathcal{E}$  in <noun> $\mathcal{E}$ 53(do) can be suffixed to nouns, and the  $\mathcal{E}$  while technically needed, is optional.

E.g. 毎日、日本語を勉強[を]する。(Study Japanese everyday.; 勉強[を]する)

# E.g. メールアドレスを登録[を]した。(Registered email address.; 登録[を]する)

• に: target marker, suffixed to the <u>target</u> (physical or abstract) of any verb (transitive or non-transitive). The target is <u>emphasised as the final destination</u>. The notion of a "target" is not restricted to motion verbs; the <u>location of objects</u> is the target of the verbs for existence (あ and いる); <u>time</u> (e.g. today, last week) is also a common target.

E.g. 家に帰らない。(Not go back home.) 家 means home, 家 means own home.)

E.g. 椅子が台所にあった。(Chair was in the kitchen.)

E.g. 猫は部屋にいる。(Cat is in room.)

E.g. いい友達に会った。(Met good friend; past tense of 会う.)

E.g. ジムは医者になる。(Jim will become doctor; なる: become)

E.g. 先週に図書館に行った。(Went to library last week.)

When suffixed to time,  $\ensuremath{\mathcal{C}}$  is not always required. Its presence emphasises a "promise" element to the target. To remove this emphasis, use  $\[ \]$ ,  $\]$  instead.

E.g. 友達は、来年[、/に]日本に行く。 (Friend go to Japan next year.)

To mean "from", use the 「から」 from-marker particle.

E.g. アリスは、アメリカ**から**薬た。(Alice came from America.; past tense of 来る)

The start and end can be specified with  $\lceil < \text{from} > \text{$\hbar$} \cdot \text{$b} < \text{to} > \text{$\sharp$} \cdot \text{$c} \rfloor$ .

E.g. 宿題を今日から明日までする。(Will do homework from today to tomorrow.)

• へ: direction marker, suffixed to direction of verbs (transitive or non-transitive). Pronounced え. Unlike に, which specifies target/destination, へ specifies the general direction we're heading towards, from the starting point. Also, unlike に, it does not guarantee that the target is the final destination. へ is restricted to verbs with a physical direction (in the physical or abstract sense) like 行く、来る、向かう; verbs like なる (become) have no direction associated with it and so clauses containing なる as the trailing verb cannot use へ!

E.g. 部屋{に/\*へ\*}来る。(Come {towards/to} room.)

E.g. 勝ちへ向かう。(Go towards victory.)

• C: context marker; "by way of". It provides supplementary context: where, what, how.

Concretely, context of four kinds:

- ► at/in place (location of action)
- ▶ by/with (means of action)
- ► in/during time (limits of action)
- within place (limits of action)

E.g. 映画館で見た。(Saw at movie theatre.)

E.g. バスで帰る。(Go home by bus.)

E.g. レストランで昼ご飯を食べった。(Ate lunch at restaurant.)

Note that  $\mathcal{E}$  can only be used with transitive verbs, unless the direct object is the **location** of an intransitive motion verb, as mentioned above when introducing  $\lceil \mathcal{E} \rfloor$ .

E.g. 私が電気をつけた。(I turned on the lights; past tense of つける)

E.g. 電気を消す。(Turn off the lights.)

E.g. 電気がついた。(The lights turned on; incorrect to use を here as つく is intransitive and doesn't have any active agent)

E.g. 電気が消えた。(The lights turned off; past tense of 消える; incorrect to use を here as 消える is intransitive and doesn't have any active agent)

E.g. 誰が窓を開けた? (Who opened the window?; 窓: window)

E.g. 窓がどうして開いた? (Why did the window open?; past tense of 開く; incorrect to use を here as 開く is intransitive and doesn't have any active agent)

E.g. 部屋**を**出た。(past tense of 出る)

# G2.9.1 何で and 何で in questions

"What" is expressed as 何. "Why" is expressed as どうして (proper)、なぜ (forceful/formal)、何で (colloquial). Note that 何で has nothing to do with the で particle; it is a completely separate word.

When asking a question as a speaker, use the correct one: なにで for "what", and なんで for "why". When reading written text, obtain context from the answer. As a general rule of thumb, asking why (なんで) is much more common.

E.g. 何で来た?バスで来た。(Came by way of what? Came by way of bus.) (So in this case, the question is read なにできた?)

E.g. 何で来た?暇<u>だから</u>。(Why did you come? Because I am free.) (So in this case, the question is read なんできた?)

Note that  $\not\succeq b \not\vdash b$  here has got nothing to do with  $\not\supset b$  as in "from", we'll see this later in compound sentences (§G3.6.3).

## G2.9.2 Compound particles には、にも、へは、へも、では、でも to set location topic

 $\mathcal{C}$ ,  $\sim$  can be suffixed with  $\mathcal{C}/\mathfrak{G}$  to set the topic/inclusive topic when the <u>location</u> becomes a topic.

E.g. 学校に行った?行かなかった。図書館には?図書館にも行かなかった。 (Did you go to school? Didn't go. What about library? Also didn't go to library.)

E.g. どこで食べる?イタリアレストラン**では**思う? (Eat where? How about Italian restaurant?; 思う: think)

## G2.9.3 Particle は to set direct object topic

 $\mathcal{E}$  cannot form compound particles. To set direct object as topic, simply use  $\mathcal{U}$ .

E.g. 日本語{を/は}習う。(Learn Japanese.; It is incorrect to use をは; that compound particle doesn't exist.)

## G2.10 Noun modification

な-adjectives and  $\vee$ -adjectives can be used to modify a following noun, using "connectors" like  $\{$ な、じゃない、だった、じゃなかった $\}$  and  $\{$ 0、くない、かった、くなかった $\}$  respectively.

Verbs and nouns too can be used to modify a following noun.

#### G2.10.1 Relative verb clauses as adjectives: verbs modifying following nouns

Relative verb clauses (verb phrases) can be directly used to modify nouns.

- (present-positive) ボブは、いつも勉強する人だ。 (Bob is a person who always studies.)
- (present-negative) **赤いズボンを買った友達**はボブだ。 (Friend who buy red pants is Bob.; ズボン: pants)
- (past-positive) 先週に映画を見た人は誰? (Who is person who watched movie last week?)
- (past-negative) 晩ご飯を食べなかった人は、映画で見た銀行に行った。(Person who did not eat dinner went to the bank she saw at the movie.)

#### G2.10.2 Noun chain

A string of present-positive nouns is grammatically correct only if they are not meant to modify each other.

E.g. 国際教育センタ (International Education Centre)、登場人物 (stage character)、立人禁止 (no entry/trespassing)、通勤手当 (travel allowance).

## G2.10.3 Noun phrases as adjectives: nouns modifying following nouns

Present-positive modifiers require noun-related particles ( $\mathcal{E}$ ,  $\mathcal{E}$ ),  $\mathcal{O}$ , see §G2.10.4). The other three tenses (present-negative, past-positive, past-negative) can directly modify nouns without any additional particle.

- (present-negative) **学生じゃない人**は、学校に行かない。(Person who is not a student do not go to school.)
- (past-positive) **先週医者だったボブ**は、仕事を辞めた。(Bob who was a doctor last week quit his job.)
- (past-negative) **友達じゃなかったアリス**は、いい友達なった。(Alice who was not a friend, became a good friend.)

#### G2.10.4 Noun-related particles と、や、とか、の

Noun-related particles are used to connect nouns together.

E.g. 本と雑誌と葉書を買った。(Bought book, magazine and postcard.)

E.g. 友達と話した。(Talked with friend.)

E.g. 先生**と**会った。(Met with teacher.)

•  $\mbox{\%}$ : noun vague listing connector. Similar to  $\mbox{$\mathcal{E}$}$ , it is used between nouns in a list, not as a marker at the end of each noun, with the implied meaning that the list is non-exhaustive, and some items on the list may not apply. In English, this is like the "and/or, etc." constructs.

E.g. 飲み物やカップやナプキンは、いらない? (You don't need (things like) drink, cup, or napkin, etc.?; present-negative of いる as in 要る)

E.g. 靴やシャツを買う。(Buy shoes and shirt, etc.)

•  $\not\succeq \not D$ : vague listing particle (colloquial). Used exactly like  $\not\trianglerighteq$  but in informal settings. It is used *between* nouns in a list, not as a marker at the end of each noun.

E.g. 飲み物とかカップとかナプキンは、いらない? (You don't need (things like) drink, cup, or napkin, etc.?; present-negative of いる as in 要る)

E.g. 靴とかシャツを買う。(Buy shoes and shirt, etc.)

•  $\mathcal{O}$ : possession marker, generic noun, or explanatory particle. The  $\mathcal{O}$  particle has three uses:

**Possession marker** <Owner $>\mathcal{O}$ <ownee>. Can refer to hierarchical classifications too.

E.g. ボブの本。(Book of Bob).

E.g. 本のボブ。(Bob of book; probably a mistake.)

E.g. ボブは、アメリカの大学の学生だ。 (Bob is student of college of America.)

The ownee (noun that is modified) may be omitted if clear from context.

E.g. そのシャツは誰の[シャヴ]?ボブの[シャヴ]だ。 (Whose shirt is that shirt? It is the shirt of Bob.)

Note that **この、その、あの** are abbreviations of これの、それの、あれの respectively.

Generic noun (nominaliser) The O particle can be suffixed to relative clauses (adjectivephrases and verb-phrases) to represent a generic noun, taking the place of an actual noun. This usage allows us to treat adjectives, adjective-phrases, verbs and verb-phrases as nouns using a  $\underline{\mathcal{O}}$  suffix. Then, particles applicable to nouns can be used as a suffix to the noun-phrase: は、も、が、を. Detailed uses are in §G2.10.6.

E.g. (な-adjectives) **静かなの**が、アリスの部屋だ。(Quiet one is room of Alice.) (Note that the な cannot be dropped! All previous rules still apply.) 「静かな部屋が、アリス のだ。」 ("The quiet room is Alice's.") is also ok.

E.g. (い-adjectives) 白いのは、かわいい。(Thing that is white is cute.)

E.g. (verbs) 毎日勉強するのは大変。(Studying every day is tough.)

E.g. (verbs) 授業に行くのを忘れた。(Forgot the event of going to class.)

E.g. (relative clause) 毎日同じ物を食べるのは、面白くない。(It's not interesting to eat the same thing every day.)

Alternatively, 物 and こと can be used for generic objects and events respectively, instead

E.g. **白い物**は、かわいい。 (Thing that is white is cute.)

E.g. 授業に行くことを忘れた。 (Forgot the thing of going to class.)

Note that in the case of verbs/relative verb clauses (verb phrases), the plain form must be used; the polite ~\$\frac{1}{2}\$ form is wrong.

E.g. お父さんが買ったのは、バナナです。(The thing that dad bought, is a banana.; It is incorrect to use 買いました in place of 買った.)

The nominaliser  $\mathcal{O}$  can be modified by prefixing the  $\mathbb{Z}\mathcal{F}\mathcal{B}\mathcal{E}$  words (Japanese demonstratives). These are こんな、そんな、あんな、どんな and こういう、そういう、ああ いう、どういう (this kind/that kind/that kind/what kind, respectively for both; we use the former set in more emphatic settings and the latter in more literal settings, see

discussion on StackOverflow). These correspond to the pronouns これ、それ、あれ、どれ (this, that, that (far), which (between 3 or more))。

E.g. こんなの要らないよ。(I don't need things like this.)

E.g. **そういうの**は、前もって教えてください。(Please let me know things like that in advance.)

Abstract noun/explanatory の as a sentence-ending particle conveys an explanatory tone in responses, and explanation-seeking tone in questions. It represents the abstract noun "the thing is...", and is believed to be an abbreviation of 「~のです」. の can also be used as a suffix to な-adjectives or state-of-being noun-phrases, though in those cases なの must be used in order to differentiate it from the possession marker or generic noun purposes of の. One exception to this disambiguating function is な-adjectives: both generic noun and explanatory purposes use ~なの. Prefer ~なん{だ/です} for explanatory.

E.g. 今は忙しいの?今は忙しいの[だ]。(Is it that you are busy now? The thing is that I'm busy now.; 忙しい: busy; the absence of the trailing だ in the response is feminine; adult males add the だ in the response; だ cannot be used in the question)

E.g. ジムのだ。(It belongs to Jim.)

E.g. ジムなのだ。(It is Jim; with explanatory tone.)

This explanatory tone results in  $\mathcal{O}$  being used in strong commands, explaining things you should or shouldn't do, or explaining parts of a procedure.

E.g. 授業中は、おしゃべりしない**の**! (Don't chat during class!; しゃべる: chat)

E.g. まずは、洗うの? (Do you clean first?) まずは、あらうの[です]。それで、きれいになったら、こうやって切るの[です]。(First, clean it. Then, once it is clean, cut it like this; the 「です」, if dropped, causes the reply to become informal/childish/feminine.)

The  $\mathcal{O}$  in sentence-end expressions are typically substituted by  $\lambda$  as it's easier to say (e.g.  $\mathcal{OTE} \to \mathcal{LTE}$ ).  $\mathcal{LTE}$  is however also used with all forms of nouns, adjectives, and verbs, and has its own set of conjugation rules, as shown in Table 8.

E.g. ジムなんだ。(It is Jim; with explanatory tone.)

Further examples with polite speech:

E.g. どうして遅れた $\{O/\hbar\}$ ですか? (Why were you late?)

E.g. どうしてパーチィーに行きませんでしたか?時間がなかった $\{O/\Lambda\}$ です。 (Why didn't you go to the party? Because I didn't have time.; polite)

E.g. パーチィーに行かなかったの?うん、時間がなかった**{の/のだ/んだ}**。(You didn't go to the party? Yeah, because I didn't have time.; casual)

E.g. 私は学生な $\{O/\Lambda\}$ で、お金がない $\Lambda$ です。 (I am a student, therefore I have no money.)

E.g. ここは静か ${\color{blue}c}{\color{blue}c}\{{\color{blue}o}/{\color{blue}k}\}$ で、とても穏やかです。 (It is quiet here, therefore it is very calm here.)

E.g. な{の/ん}で、友達に会う時間がない。(Therefore, there is no time to meet friend.; this omits the reason and thus the な is compulsory, see §G3.6.3)

For verbs, any form is usable (beyond {positive, negative} × {present, past}), except forms like the command form or the volitional form, which do not make sense for explanations. Also, the polite verb form  $\lceil \sim \sharp \, \dagger \rfloor$  and polite  $\vee$ -adjective form  $\lceil \sim \tau \, \dagger \rfloor$  cannot be used with  $\lceil \sim \lambda$ だ」; use the plain form. If you want to be polite, use 「~んです」.

の is used in formal settings and ん in informal settings. The first casual form attaches んだ to any tense of a noun/adjective/verb; the second casual form attaches んだ to the dictionary-form, then conjugating the だ. Both casual forms have slightly different nuances.

- の/のだ/のです/んだ/んです: these are simply the sentence-ending explanatory の particle.
- んだった: used to express that you just remembered to do something, typically used with そ ういえば.

E.g. あ、そういえば出かけるんだった。 (Ah, that reminds me, I am going out.)

• んじゃない/んじゃありません: mildly slang, to prohibit or request that something not be done: "don't, mustn't". The latter from is more formal, and used when the speaker wants to forbid something but not sound angry (e.g. adult talking to a child).

E.g. 馬鹿にするんじゃない! (Don't make fun of me!)

E.g. 嘘をつくんじゃありません。 (You shouldn't lie.; 嘘をつく: to lie)

• んじゃなかった: mildly slang, to express nuance of regret/disappointment: "shouldn't have".

E.g. こんな安い車を買うんじゃなかった。(I shouldn't have bought a cheap car like this one.)

E.g. 食べるんじゃなかった。 (Shouldn't have eaten it.)

Read more about these nuances at Sources 1, 2, 3.

## G2.10.5 O particle I: the noun modifier (label maker)

Read the main article on Tofugu.

Applicable schemae:

• <noun label> $\mathcal{O}[$ <noun labelled>]. The labelled can be omitted if clear from context. The label can be stacked.

- <particle $> \mathcal{O} <$ noun labelled>.
  - ・への: "to" label. E.g. アメリカへの飛行機。(Airplane bound for America.)
  - からの: "from" label. E.g. アメリカ**からの**飛行機。(Airplane from America.)
  - ▶ だけの: "only" label. E.g. 寝るだけの人生。 (A life of only sleeping.)
  - との: "quote" label. E.g. 「草く帰ってきてね!」とのメッセージ。(A message saying "Come back soon!".)

Here are its various purposes. Note that possession isn't the only one!

 $\mathcal{O}$  as possession marker <owner> $\mathcal{O}$ <ownee>.

 $\mathcal{O}$  as affiliation marker <affiliation> $\mathcal{O}$ <affiliated/position>. Typically used in business settings to show which organisation someone belongs to.

 $\mathcal{O}$  as "about" marker <about> $\mathcal{O}$ <abelled>.

E.g. **バナナ**[**について**]の{知識/研究}。(**について**: regarding; used for disambiguation because バナナの研究 could mean research of someone named バナナ.)

 $\mathcal{O}$  as location/time label Whereas with the  $\mathcal{V}$  particle we needed to specify a verb after  $\mathcal{V}$ , with the  $\mathcal{O}$  particle the location/time is treated as a label for the main noun.

20 as "degree" marker This refers to labels indicating amount, quantity, price, size, etc.

O as order/rank marker Things like first, second, third, etc.

O for apposition Apposition: the relationship between different words that mean the same thing.

O as materials/ingredients marker Typically used in menus to indicate ingredients used in dishes.

- の as a replacement for な for の-adjectives (compared to な-adjectives) Adjective-like nouns like 普通 and 久しぶり take の when modifying nouns.
  - E.g. 普通の車。 (Normal car.)
  - E.g. 久しぶりの再会。(long-awaited reunion)
- の as a replacement for が in relative clauses Relative clauses are clauses that precede and modify nouns.

For further elaboration on  $\mathcal{O}$ -adjectives, see §G2.10.7.

E.g. カナエ{が、の}作ったネックレス。(The necklace Kanae made.)

## G2.10.6 O particle II: the nominaliser

Read the main article on Tofugu.

Basic usage is as in the initial description of  $\mathcal{O}$  earlier, under "generic noun" and "explanatory". This section covers the various contexts in which we use  $\mathcal{O}$  to nominalise other parts-of-speech:

Non-physical things  $\mathcal{O}$  can turn immaterial things like events, ideas, facts, and thoughts (expressed as embedded clauses ending with verbs) into nouns. These are covered under the nominaliser  $\subset \mathcal{E}$ .

E.g. 一人でトイレに行った{こと/の}が、よく思い声せない。(I can't really remember having gone to the bathroom by myself; 思い出す: to recall.)

E.g. **バク転できない{こと/の}**が、悔しい。(I'm frustrated about not being able to backflip; できる: to be able to do.)

Material things  $\mathcal{O}$  can turn adjective-phrases describing material things into nouns.

E.g. **甘いの**が食べたい。(I want to eat sweet things.)

E.g. **昔飼っていたの**は、犬です。(What I used to have as a pet was a dog; 昔: olden days; 飼う: to keep a pet)

E.g. そこにいるのは、誰ですか? (Who's there?)

Time and location  $\mathcal{O}$  can turn clauses describing time or location of events (expressed as embedded clauses ending with verbs) into nouns. The resultant outer clause often contains elements indicating a particular time or location.

E.g. **スーツケースが届くの**は明日です。(The suitcase will be delivered tomorrow; 届く: to be delivered/arrive)

E.g. この町が美しかったのは、五十年前です。(This city was beautiful fifty years ago.)

E.g. 次のオリンピックが開催されるのは東京です。(The next olympics will be held in Tokyo; 開催する: to host an event)

E.g. **生まれたの**はニューヨークです。(I was born in New York; 生まれる: to be born)

**Reason**  $\mathcal{O}$  can be a placeholder for an explanation, similar to its sentence-ending explanatory usage.

E.g. アメリカに住みたい**の**は、英語の勉強がしたいからです。(The reason why I want to live in the U.S. is because I want to study English; したい: want to do; から: because (also means from))

E.g. そう思った**の**は、なぜですか? (Why did you think so?)

**Listing**  $\mathcal{O}$  can be used to *complainingly* list things (similar to the inclusive noun particle  $\succeq$  and vague listing particle  $\Lsh$ , with the added complaining tone). When listing verbs, use  $\sim$   $\sim$   $\sim$  0. When listing nouns or  $\sim$ -adjectives, use  $\sim$  $\sim$  $\sim$  $\sim$ 0 (not  $\sim$ 0! That is for the explanatory usage.). while emphasising the similarity or contrast between items in a list.

E.g. レストランに行く**の**行かない**の**でもめた。(We argued over whether to go to a restaurant or not; もめる: to dispute)

E.g. テスト勉強**だの**部活**だの**で忙しいよ。(I'm busy with things like studying for exams and club activities.)

There is a special idiomatic pattern used to enthusiastically say that something is extraordinary. Take the same adjective and repeat it twice, once in the positive and once in the negative, using the  $\sim \mathcal{O}$  suffix.

E.g. ポートランのピール、そりゃおいしいの、おいしくないのって! (Beer in Portland is beyond delicious!; そりゃ is a variant of それは and both are adverbs meaning very/extremely) (Literally: Beer in Portland is not even a matter of delicious or not delicious.)

This can often also be expressed with another idiomatic expression  $\sim 0$  theorem (supplementary reading here).

E.g. ポートランのピール、美味しい**のなんのって**! (Beer in Portland is beyond delicious!)

### G2.10.7 The adjective-noun spectrum: $\mathcal{L}$ -adjectives and $\mathcal{O}$ -adjectives

Read the main article on Tofugu.

In short, is used when you want to describe nouns, and is used when you want to label nouns (e.g. きれいな人 vs. きれいの人 respectively).

Many  $\mathcal{Z}$ -adjectives exhibit this flexibility of converting between adjectives and nouns, based on whether they are suffixed by  $\mathcal{Z}$  or  $\mathcal{O}$ . Linguists refer to  $\mathcal{Z}$ -adjectives as "adjectival nouns" or "nominal adjectives".

There exists a adjective-noun spectrum for adjectives: some are suffixed with  $\mathcal{L}$  more often, and others  $\mathcal{O}$  more often. Table 9 provides examples.

	- / /					117		
な》の	Meaning	な>の	Meaning	の>な	Meaning	の≫な	Meaning	
好き	like	元気	well/fine	<b> </b>	large amount	莎し	a little	
簡単	simple	健康	health(y)	病気	illness/desease	本当	true/truth	
大切	important	安全	safe(ty)	最高	best/highest	永遠	eternity	
だめ	no good/not allowed	美人	beautiful woman	普通	normal/ordinary	最大	largest/maximum	
静か	quiet	不思議	wonderful/miraculous	<b>未</b> 定	to be decided/pending	最小	${\rm smallest/minimum}$	
大変	very	~~~~	peace/harmony	独首	unique/original	たくさん	a lot	
素敵	splendid	しあわせ 幸せ	happiness	最速	fastest	真実	truth/reality	
勝手	selfish(ness)	<b></b>	misfortune/disaster	一流	first-class/top-ranking	一杯	one cup	
複雑	complicated/complex	<b></b>	anxiety/worry/fear	個別	individual/separate			
妙	strange	高級	premium/luxury	直着	characteristic/native			
正解	correct	平等	equality/impartiality	莂	another/difference			

Table 9:  $\mathcal{L}/\mathcal{O}$ -adjectives on the adjective-noun spectrum.  $\mathcal{V}$ -adjectives do not apply.

な》の	Meaning	な>の	Meaning	の > な	Meaning	の≫な	Meaning
変	strange			無名	anonymous/nameless		
必要	necessary/needed			条如	unknown		
深刻	serious			少量	small amount		
困難	difficulty/hardship						
苦手	weak at/bad at						
危険	danger						
嫌い	disliked						
無理	impossible						
異常	${\rm strange/abnormal}$						
正置	honest(ly)						
親切	kind/generous						
残酷	cruel						
ゅうのう 有能	competent						
冷静	calm						
真剣	serious						
慎重	cautious						

The different parts of the spectrum are described as follows:

- "\(\alpha\)-adjectives": the adjective side of the spectrum. These are frequently used to describe nouns, and are tagged as な-adjectives in many Japanese-English dictionaries.
- " $\mathcal{O}$ -adjectives": the noun side of the spectrum. These are frequently used with the  $\mathcal{O}$  suffix to form labels for nouns, and are tagged as  $\mathcal{O}$ -adjectives in many Japanese-English dictionaries.

Words in this category are broadly divided into two groups: those that express absolutes (e.g. 本当、最大、最小) and those that express quantities (e.g. 少し、たくさん、少量、大量).

Those that express absolutes usually cannot take adverbs (there is no "little" absolute or "big" absolute; an absolute is a binary thing, either it's absolute or not). Those that express quantities can.

E.g. 昨日すごくたくさんの魚が釣れました。(I was able to catch incredibly many fish vesterday.)

E.g. 電源が切れた途端に、**かなり大量の**データが消されてしまいました。(Right when the power ran out, quite a large amount of data was erased.)

• Words in the middle of the spectrum: these have subtle shifts when suffixed with な vs. の. but one is typically used more frequently than the other. Typically,  $\mathcal{O}$  is used with a slight bias towards the act of objective labelling, while  $\ddot{\alpha}$  is used with a slight bias towards the act of subjective describing/judging. As a result, using  $\ddot{\alpha}$  for some of the adjectives can seem negative or even rude. It's safer to use O, if unsure.

E.g. 新しい彼氏、有名人なの? (Is your new boyfriend a famous person?; 氏: Mr./Mrs./ Ms. polite suffix) ううん、普通の人だよ。(No, he's a normal (objectively ordinary) person.)

E.g. 新しいの彼氏、変な人なの? (Is your new boyfriend a weirdo?) ううん、普通な人だよ。 (No, he's a normal (not weird) person.)

E.g. その施設には、病気の人が多い。 (There are many sick (objective) people at that institution; 施設: facility)

E.g. その施設には、病気な人が多い。 (There are many sick (judgmental) people at that institution; 施設: facility)

Lastly, there is the 「~な気分」 construct. Although 気分 is typically used as 気分がいい or 気分が悪い, we can suffix nouns with ~な気分 to convey the "mood" associated with the noun. Examples include ワインな気分 ("I'm feeling like wine tonight/It's a wine kinda evening."), 90 年代な気分 ("I'm feeling really 90's today"), 海な気分 ("feeling those beachy vibes") and 終わりな気分 ("feeling like it's over").

# G2.11 Adverbs

Just as adjectives describe nouns, adverbs describe adjectives, verbs, other adverbs, or whole sentences. They come before the thing they describe, and the common ones are:

- それは/そりゃ: very/extremely
- めっちゃ: very/extremely/excessively
- 大変: very/greatly/terribly
- すごく: super
- とても: very
- たくさん: many/a lot
- 結構/かなり: fairly
- ちょっと: a little
- 夢し: a little
- あまり<negative conj>: not very
- 全然: (not) at all

To turn adjectives into adverbs:

E.g. アリスは自分の部屋を**きれいに**した。(Alice did her own room toward clean / Alice did her room cleanly / Alice cleaned her room; した is the past tense of する)

E.g. 図書館の中では、**静かに**する。(Inside the library, do things quietly.)

• V-adjectives:  $\lceil \rfloor V \rightarrow \lceil \rfloor \langle$ 

E.g. ボブは朝ごはんを**早く**食べた。(Bob ate breakfast quickly/early (depending on context); 早い  $\rightarrow$  早く)

E.g. この町は、最近**大きく**変わった。(This town changed greatly lately; 大きい  $\rightarrow$  おおきく)

Note that not all adverbs are derived from adjectives.

E.g. 映画を**たくさん**見た。 (Saw a lot of movies.)

E.g. 最近、全然食べない。(Lately, don't eat at all.)

# G2.12 Sentence ending particles ね、よ、よね

- $\mathcal{O}$ : explanatory tone. Explained above in §G2.10.4.
- ね: to express seeking and expectation of agreement, like "right?/isn't it?" in English. In the reply 「そう[だ]ね」, the optional だ is often used in masculine contexts.

E.g. いい天気だ**ね**?そう[だ]**ね**。 (Good weather, huh? Sure is; そう: in that way, as such; そう[だ]ね: it is indeed that way/as such.)

Table of Contents, §GA.1

E.g. 面白い映画だったね。え?全然面白くなかった。 (That was an interesting movie, wasn't it? Huh? No, it wasn't interesting at all)

• \$\mathcal{L}\$: to express that you're informing something new, like "you know..." in English.

E.g. 時間がないよ。大丈夫だよ。

E.g. 今日はいい天気だね。うん。でも、明日う雨が降るよ。(Good weather today, huh? Yeah. But it will rain tomorrow, you know.)

よ and ね can be combined to both inform about something new and expect agreement at the

E.g. ボブは、魚が好きなんだよね。 そうだね。 (You know, you like fish, don't you? It is indeed the case, huh?)

# G3 Essential grammar

Now that we have an understanding of the basics, fundamentals, and foundations of Japanese grammar, this section provides specific grammar for practical situations.

# G3.1 Verb stems

It seems that "stem" and "root" are used interchangeably; there is no consensus on their definitions, and different sources use either term to refer to the same concept...

Since there is no consensus on the definitions of root/stem, I'll use "root" to refer to /kik/, and "stem" to refer to the stem form 聞き.

Also known as the ます-stem in other texts (we refrain from that term as the stem is used in many more conjugations, not just in ます), stems can be obtained from verbs via the rules in Table 18.

Verb stems are sometimes (not always!) the noun forms of the verbs, e.g. 茶み is the noun form of 休む.

We can suffix the stem with target particle に or directional particle へ, then follow with a motion verb (almost always 行く or 来る). This <stem> $\{$ に/ $\land$  $\}$ {行く/来る/...} construct means "to go/come do <stem>". Use に to mean going/coming for the purpose of doing <stem>; use  $\land$  to put emphasis on the literal act of going/coming.

E.g. 明日、映画を見に行く。(Tomorrow, go to see movie.)

E.g. 昨日、友達が遊びへ来た。(Yesterday, friend came towards a playing activity.; sounds weird)

E.g. 昨日、友達が遊びに来た。 (Yesterday, friend came to play.)

The expression 「楽しみにする」 (looking forward to) is formed from a similar grammar rule (though it's a special case and should be considered a set expression).

Compound verbs can be formed by appending verbs to stems. However, there aren't formulaic rules for these; memorise them as separate verbs in their own right.

E.g. 走り出す (break into a run)、切り替える (switch to something else)、 付け加える (to add something by attaching it)、言い出す (to start talking)、言いさす (to stop talking)、読み出す (read out data/retrieve)、読みさす (to leave half-read).

# G3.2 Polite forms ます、です

The Japanese covered thus far in §G2 is fine for five-year-olds, but adults are expected to use 丁寧語 (polite language), 尊敬語 (honorific language) and 謙 譲語 (humble language) where appropriate.

丁寧語 is used when speaking to people of higher social rank or people you're unfamiliar with. 尊敬語 and 謙譲語 are used in professional settings, and builds upon 丁寧語.

The only indicator of which language style is in use is sentence endings. It's not possible to tell whether someone is speaking in casual or polite speech until the sentence is finished.

In 丁寧語, use 「~ます」 and its conjugations to make verbs polite, and use 「~です」 for nouns and adjectives (note that the polite です is incompatible with the assertive だ). Detailed rules are in Table 18. Note that ます and です must come at the end of a complete sentence, and never inside any embedded/relative clauses. Refer to §GA.1 for a full table of 丁寧語 conjugations.

Polite verb examples:

- (present-positive) 明日、大学に行きます。 (Tomorrow, I go to university.)
- (present-negative) 面白くない映画は見ません。(I did not see uninteresting movies.)
- (past-positive) 先週、ボブに会いましたよ。 (Last week, I met Bob, you know.)
- (past-negative) 昼ご飯を食べませんでしたね。(Didn't eat lunch, right?)

Polite adjective examples:

- (present-positive) 子犬はとても**好きです**。(I like puppies very much/puppies like something very much.)
- (present-negative) その部屋はあまり**静かじゃないです**。(The room is not very/really quiet.)
- (past-positive) 先週に見た映画は、とても**面白かったです**。(The movie I saw last week was very interesting.)
- (past-negative) 昨日、時間が**なかったんです**。 (Yesterday, there was no time.; ある → <u>な</u>かった (past negative) → なかった<u>んだ</u> (explanatory) → なかったん<u>です</u> (polite))

# G3.2.1 です is NOT the polite form of だ, they are completely separate constructs

This is a common misconception!  $\tau$  and  $\tau$  are two fundamentally different concepts:

• だ is declarative, whereas です is polite.

E.g. 「そうだ」 is the declarative form of 「そう」. 「そうです」 is the polite form of 「そう」 (see Table 18), but not the polite form of 「そうだ」!

• だ can be used both at the end of both complete sentences and relative clauses, whereas で す can only be used at the end of complete sentences.

E.g. そうだと思います。 (In an indirect quote, it is wrong to quote です: it must be changed to だ.)

E.g. 「はい、そうです」と答える。 (The only place where です can be in an embedded clause is in direct quotes.)

#### G3.3 Addressing people

Take care to use the correct level of politeness.

#### G3.3.1 Referring to yourself

To refer to yourself, use one of the following (in descending order of politeness):

- 私: used by both males and females, formal
- $\cancel{\mathbb{H}}$ : used by both males and females, normal polite (you should use this most of the time)
- 僕: used by males, semi-polite to semi-casual
- 俺: used only by males, very casual, very rough
- あたし: used by females, cutesy and girly (most girls today use 私 instead)
- your own name: used by children, feminine
- わし: used by elderly (males)

E.g. 私の名前はジャッキーです。

### G3.3.2 Referring to the listener (second-person)

Even when directly addressing other people, you rarely use variants of "you", as constantly hammering the listener with "you" that comes across as accusatory and confrontational.

Table of Contents, §GA.1

Instead, we use one of the following (in descending order of politeness):

- <title>: common polite (e.g. 社長 president/director, 課長 section manager, 先生 teacher/anyone with significant expertise including doctors)
- <last name><title>: common polite
- <last name>さん: common polite, in case no suitable title exists
- <first name>さん: common semi-polite
- < last name > < \Lambda: for males, casual/endearing, of equal or lower social position
- <last name> $\flat$   $\flat$  $\lambda$ : for females, casual/endearing, of equal or lower social position
- <last name>: common
- <first name>[{くん, ちゃん}]: only for people you're on first-name basis with
- <nothing>: common. In normal Japanese conversations, the topic/subject is commonly
  implied to be the listener. It's completely normal not to use anything at all, since you're
  directly addressing the listener!
- そちら: you, polite
- 君: casual, assuming/very close, used by males to address females, potentially rude
- あなた: rude if spoken, use only in contexts where you must refer to the audience (e.g. on a physical questionnaire)
- THOU SHALT NOT CROSS THIS LINE
- あんた: rude, assuming/familiar, expresses annoyance
- お前/おめえ: rude, rough and coarse, used by males
- てめえ: very rude, sounds like you want to beat someone up (used exclusively in movies and comics)
- 貴様: extremely rude, sounds like you want to take someone out (used exclusively in movies and comics)

數本 貴方 is an old-fashioned way for women to refer to their lover or husband, nowadays only used by married middle-aged women.

## G3.3.3 Referring to the third person

For people outside of your family, use one of these:

- 彼: he
- 彼女: she
- 彼/ボーイフレンド: boyfriend (prefer former)
- 彼女/ガールフレンド: girlfriend (prefer former)

When referring to family members, there are two levels of politeness: polite and casual. We only use the casual form when we are talking about our own family members to other people. When talking about the listener's family members or when talking directly to your family members, use the polite form.

The polite form comes before the casual form:

- Parents: ご 両親 / 両親
- Mother: お母さん / 母
- Father: お父さん / 🎗
- Wife: 奥さん / 姜
- Husband: ご主人 / 夫 (don't drag the trailing お vowel)
- Older sister: お姉さん / 姉
- Older brother: お兄さん / 兄

• Younger sister: "妹さと / "妹 • Younger brother: 弟さん/

Son: 息子さん / 息子 かまます。
 Daughter: 娘さん / 娘

Yes, ご主人様 (master/husband) is an extension of ご主人 (husband).

# G3.4 The question marker $\mathcal{D}$ particle

These are common question words (see Table 76 for a more complete list):

- 誰: who
- 何: what
- いつ: when
- ・ どこ: where
- なぜ/どうして/なんで: whv

なぜ is formal and forceful

どうして is softer

なんで is informal (Source)

どう/どうやって: how

どう is more general (Source)

• どれ/どちら/どっち: which

どれ: three or more

どちら: two

どっち: two (informal; Source)

# G3.4.1 \$\mathcal{D}\$ in polite questions

The purpose of  $\mathcal{D}$  is to clearly mark a question in polite sentences. It's not strictly necessary, since polite sentences without a trailing  $\mathcal{D}$  can be interpreted as a question using a rising trailing intonation during speech. However, it's commonly attached.

There is no need to use a question mark when  $\mathcal{D}$  is used; the full-stop is used instead. Because  $\mathcal{D}$ is polite, it is incompatible with the declarative だ.

E.g. お母さんはどこです**か**。母は買い物に行きました。(Where is your mother? My mother went shopping.; 買い物 can refer to both purchased goods and the act of shopping)

E.g. イタリア料理を食べに行きません**か**。すみません。ちょっと、お腹がいっぱいです。(Shall we eat Italian food? Sorry, my stomach is a little full.; いっぱい: full; Note that the question is phrased in the negative, see §G3.4.2)

#### G3.4.2 Positive and negative polite questions

See discussion at HiNative.

Positive polite questions are plain questions; negative questions have a nuance of suggestion/ invitation.

• 食べに行きますか?: Are you going to eat?

• 食べに行きませんか?: Shall we go eat?

#### G3.4.3 \$\mathcal{D}\$ in casual questions: binary and sarcasm

 $\mathcal{D}$  has a slightly different purpose in casual speech. Casual questions usually either use explanatory or nothing at all, so  $\mathcal{D}$  is not used here to craft questions. Instead, it is used specifically to:

• question whether something is true or not

E.g. こんなのを本当に食べる**か**? (This kind of thing, will they really eat?; こんなの is こんな +  $\mathcal{O}$  (possession), where こんな means this type of)

• make rhetorical questions/express sarcasm

E.g. そんなのは、あるかよ! (That kind of thing, do I look like I would have something like that!?; そんなの is そんな + の (possession), where そんな means that type of)

Most actual questions use explanatory  $\mathcal O$  or nothing at all apart from a rise in intonation.

E.g. こんなのを本当に食べる? (Something like this, are you really going to eat?)

E.g. そんなのは、あるの? (Do you have something like that?)

# G3.4.4 $\not\!\! D$ in embedded clauses: referring to embedded questions

This functions similar to direct quoting, and marks the questions in an embedded clause. The outer clause can then talk about the embedded question.

E.g. **昨日何を食べたか**忘れた。 (What I ate yesterday, I forgot.)

E.g. 彼は何を言ったか分からない。 (What he said, I don't understand.)

E.g. **先生が学校に行ったか**教えない? (Whether the teacher went to school (binary question), would you please inform me (invitation)?)

To ask "whether or not" (binary question), we can use either <positive>からnegative>からneg

E.g. 先生が学校に**行ったか行かなかった**か知らない。(Whether the teacher went to school or not, I don't know.)

E.g. 先生が学校に**行ったか<u>どうか</u>**か知らない。(Whether the teacher went to school or not, I don't know.)

See more detail in §G3.18.2.

#### G3.4.5 Modifying question words with suffixes か、も、でも

 $\lceil \rfloor \not \supset$  refers to a particular existence (some  $\sim$ ),  $\lceil \rfloor \not \hookrightarrow$  refers to the universal (every  $\sim$ ), and  $\lceil \rfloor \not \hookrightarrow$  refers to a non-particular existence (any  $\sim$ ) (not to be confused with  $\mathcal C \not \hookrightarrow$  for "but"). Question words and their variants are showed in Table 10.

Table 10: Question words and their modified variants. Treat these all as normal nouns. †: 誰も is usually used in negative sentences to mean nobody can do the verb, and to express the positive universal everybody we typically use 皆[さん]; ‡: 何も is used exclusively in negative sentences.

Гј	Meaning	「」 <b>か</b>	Meaning	[] <b>\$</b>	Meaning	「」でも	Meaning
誰	who	誰か	someone	誰も	$nobody^{\dagger}$	誰でも	anybody
何	what	行か	something	何も	$\mathrm{nothing}^{\ddagger}$	荷でも	anything
いつ	when	いつか	sometime	いつも	always/never	いつでも	anytime

[]	Meaning	[] <b>ው</b>	Meaning	[] <b>\$</b>	Meaning	「」でも	Meaning
どこ	where	どこか	somewhere	どこ[に]も	everywhere/ nowhere	どこでも	anywhere
なぜ	why	なぜか	some reason				
どう	how	どうか	somehow	どれも	somehow	どうでも	anyhow
どれ	which (3 or more)	どれか	one from many	どれも	all/none	どれでも	any of many
どちら	which $(2)$	どちらか	one of two	どちらも	both/neither	どちらでも	any of two

To mean "For some reason..." you can say 「どういうわけか...」.

#### 「」 か examples:

- **誰か**がおいしいクッキーを全部食べた。 (Someone ate all the delicious cookies.)
- **誰が**盗んだのか、誰か知りませんか。 (Who stole it, doesn't anyone know?; 盗む: steal)
- 犯人をどこかで見ましたか。 (Did you see the criminal somewhere?)
- この中からどれかを選ぶの。 (You are to select a certain one from inside this.; から: from, 選ぶ: choose)

### 

- この質問の答えは、誰も知らない。(The answer to this question, nobody knows.)
- 友達は**いつも**遅れる。 (Friend is always late.)
- ここにあるレストランは**どれも**おいしくない。(All restaurants that are here are not tasty.)
- 今週末は、どこにも行かなかった。(This weekend, went nowhere.; どこにも means "target is nowhere", も is grammatically the topic particle and should come after the target particle に, so どこもに is incorrect. Treat this as an exception.)

# 「」でも examples:

- この質問の答えは、**誰でも**分かる。(The answer to this question, anyone understands.)
- 昼ご飯は、どこでもいいです。 (For lunch, anywhere is good.)
- あの人は、本当に何でも食べる。 (That person really eats anything.)

#### G3.5 Apologising

Read a full article here.

Use one of the following (in descending order of politeness):

- すみません: formal
- ごめんなさい: semi-formal
- ごめん[ね]: causal
- ・ 悪い: very casual, only for non-serious matters

Can be used for past offence: 悪かった。

#### G3.6 Compound sentences

This section concerns combining multiple sentences into one complex sentences, such as combining "I ran." and "I ate." into "I ran and ate.".

#### G3.6.1 7 form

The  $\mathcal{T}$ -form of nouns, adjectives and verbs are used to form sequences of states (nouns/adjectives) or actions. The conjugation rules are in §GA.1.

て-form conjugations for で $\tau$ /ません exist but they are part of 尊敬語 and are outside the scope of 丁寧語. In a chain of nouns/adjectives/verbs, only the last one takes the polite form で $\tau$ /ません; everything before takes the plain form. Since  $\tau$  is used when connecting sentences, there is no need for で $\tau$ /ません to have a  $\tau$ -form in 丁寧語.

# G3.6.2 Compound sentences (chain of descriptors/actions) using $\mathcal{T}/\mathcal{T}$ and $\mathcal{T}$ -form

Similarly to how we can join "My room is clean. It is quiet. I like it a lot." into "My room is clean, quiet, and I like it a lot." in English using the "and" connector, we can do the same using " $\mathcal{T}/\mathcal{T}$ " as a connector. Just as  $\mathcal{E}$  is the noun connector (in exclusive listings),  $\mathcal{T}/\mathcal{T}$  is the connector for nouns, adjectives and verbs.

The syntax is  $[\langle v | te \rangle]^*[\langle plain/polite | form \rangle]$ .  $\mathcal{T}/\mathcal{T}$  functions like a connector (between two nouns/adjectives/verbs). The entity that comes before is turned into the  $\mathcal{T}$ -form. The final one in the list does NOT use  $\mathcal{T}$ -form (use either plain or polite), and determines the tense (present/past) of the entire chain.

E.g. 食堂に行って、昼ご飯を食べて、昼寝をする。 (I will go to canteen, eat lunch, and take a nap.)

E.g. 食堂に**行って**、昼ご飯を**食べて**、昼寝を**した**。(I went to canteen, ate lunch, and took a nap.)
E.g. 時間があって、映画を見ました。 (There was time, and I watched a movie.)

### G3.6.3 Causation and reasoning particles から、ので

To express the direct causation (because) and reasoning (therefore) relationships, use bb and bb and bb particles:

- から: direct cause marker particle (also from-marker: §G2.9; see also Table 142). The possible syntaxes are: begin{itemize}
  - ・ <direct cause>[だ]から<result>

If the cause is a non-conjugated noun or  $\mathcal{Z}$ -adjective, you must add  $\mathcal{Z}$  to differentiate it from the from-marker usage of  $\mathcal{D}$ .

E.g. 時間がなかった**から**パーチィーに行きませんでした。(There was no time, so didn't go to party.)

E.g. 友達**から**プレゼントが来た。 (Present came from friend.; from-marker usage)

E.g. 友達**だから**プレゼントが来た。 (Present came because of friend.; cause marker usage; this sentence sounds a bit odd)

▶ だから<result>

The cause can be omitted if clear from context. Here,  $\aleph$  is compulsory.

E.g. 時間がなかった。**だから**パーチィーに行かなかったの? (I didn't have time. Is that why you didn't go to the party?)

→ <direct cause>[だ]から[です]

The result can be omitted if clear from context.  $\mathfrak{DS}$  can be treated as a regular noun, so in polite speech, add the  $\mathfrak{CF}$  suffix.

E.g. どうしてパーチィーに行きませんでしたか ?時間がなかった**から**です。(Why didn't you go to the party? Because I didn't have time.; polite)

E.g. パーチィーに行かなかったの? うん、時間がなかった**から**。(You didn't go to the party? Yeah, because I didn't have time.; casual)

• ので: non-causal explanation/reason marker, carries flavour of explanatory-の. Similar usage patterns as から (almost interchangeable), but less binding than から in that <u>ので doesn't assert that the marked reason is the direct cause of the result</u>. ので is thus softer and more polite, and preferred when explaining a reason for doing something considered discourteous.

Because  $\mathcal{C}$  is involved,  $\mathcal{O}\mathcal{C}$  is a connector that must exist between two sentences (if dangling, the sentence is implied to be a dangling sentence).

・ <reason>[な]ので<result>.

If the cause is a non-conjugated noun or  $\mathcal{Z}$ -adjective, you must add  $\mathcal{Z}$  to differentiate it from the possession marker usage of  $\mathcal{O}$ .

E.g. 時間がなかった**ので**パーチィーに行きませんでした。(There was no time, therefore didn't go to party.)

E.g. ちょっと忙し**ので**、そろそろ失礼します。(I'm a little busy, therefore I'll be making my leave soon.; 失礼します literally means "I'm doing a discourtesy" and is used to politely mean you're make your leave or disturbing someone's time.)

E.g. 私は学生な $\{o/\lambda\}$ で、お金がないんです。 (I am a student, therefore I have no money.)

E.g. ここは静かな $\{\mathcal{O}/\mathcal{K}\}$ で、とても穏やかです。 (It is quiet here, therefore it is very calm here.)

If omitting the reason or result (which is clear from context), use the explanatory- $\mathcal{O}$  particle instead ( $\mathcal{O}[\mathcal{E}]/\mathcal{O}\mathcal{C}\mathcal{T}/\mathcal{L}\mathcal{E}/\mathcal{L}\mathcal{C}\mathcal{T}$  see §G2.10.4).

な{の/ん}で<result>

Here, な is compuslory.

E.g. な{の/ん}で、友達に会う時間がない。(Therefore, there is no time to meet friend.)

→ <reason>{の/のだ/のです/んだ/んです}

E.g. どうして遅れた{**のです**/**んです**}か? (Why were you late?)

E.g. パーチィーに行かなかったの?うん、時間がなかった**{の/のだ/んだ**}。(You didn't go to the party? Yeah, because I didn't have time.; casual)

E.g. どうしてパーチィーに行きませんでしたか?時間がなかった**{のです/んです}**。 (Why didn't you go to the party? Because I didn't have time.; polite)

#### G3.6.4 Despite marker particle のに

To express the idea of "despite", the  $\mathcal{O}$   $\mathcal{C}$  marker is used. The schema is <despite $>\mathcal{O}$   $\mathcal{C}$ , <sentence>.

E.g. 毎日運動した**のに**、全然痩せなかった。 (Despite exercising every day, I didn't get thinner.; 痩せる: to slim)

Note that non-conjucated state-of-being nouns and na-adjectives must be tagged with the  $\alpha$  particle, similar to rules for explanatory  $\alpha$ .

E.g. 学生なのに、彼女は勉強しない。 (Despite being a student, she does not study.)

# G3.6.5 General and contradiction connector particles けど(、けれど、けれども)、が

 $\mathcal{H}\mathcal{E}$  and  $\mathcal{D}$  are used as general connectors of any two sentences, like how we construct running sentences in English using "and". They are also used to provide context.

E.g. マトリックスを見た**けど**、面白かった。 (general connector; I watched "The Matrix" and it was interesting.)

E.g. デパートに行きました**が**、いい物がたくさんありました。 (general connector; I went to the department store and there was a lot of good stuff.)

E.g. デパートに行きました**が**、何も欲しくなかったです。 (contradictory connector; I went to the department store but there was nothing I wanted.)

Note that non-conjucated state-of-being nouns and na-adjectives must be tagged with the  $\mathcal{E}$  state-of-being assertion.

E.g. 今日は暇だけど、明日は忙しい。 (I'm free today but I will be busy tomorrow.)

E.g. だけど、彼がまだ好きなの。 (That may be so, but I still like him.)

#### G3.7 Reason vague listing connector U

E.g. どうして彼が好きなの?優しい**し**、かっこいい**し**、面白いから。(Why do you like him? Because he's kind, attractive, and interesting (among other things).; から means because here.)

Note that non-conjucated state-of-being nouns and na-adjectives must be tagged with the  $\mathcal{E}$  state-of-being assertion.

E.g. どうして友達じゃないんですか?先生だし、 年上だし...

(Why aren't they your friend (seeking explanation)? Well, they are the teacher, and older...)

For a less vague, more closed listing, use the  $\tau$ -form instead.

E.g. どうして彼が好きなの?優しくて、かっこよくて、面白いから。

(Why do you like him? Because he's kind, attractive, and interesting (among other things).)

# G3.8 Adjective and verb vague listing construct ~たり[です]

This is the verb/adjective version of the  $\mathfrak{P}$  particle (§G2.10.4). For each verb/adjective in the sequence, conjugate to past tense and add  $\lceil \mathfrak{h} \rfloor$ . Additionally, for the final one, tag on a  $\lceil \mathfrak{F} \mathfrak{h} \rceil$ ,

which will control the tense ({positive, negative} times {present, past}) of the entire sentence. The schema is ( $\langle past adj/v \rangle b$ , )\* $\langle past adj/v \rangle b$  \$\( \delta \).

E.g. 映画を見たり、本を読んだり、昼寝したりする。(I do things like watch movies, read books, and take naps (among other things).)

E.g. この大学の授業は簡単だったり、難しかったりする。(Classes in this university are sometimes easy, sometimes difficult (and sometimes other descriptors).)

The tense of the entire sentence can be changed by conjugating the trailing \$\forall \delta\$.

E.g. 映画を見たり、本を読んだり、昼寝したりしない。(I don't do things like watch movies, read books, and take naps (among other things).)

E.g. 映画を見たり、本を読んだり、昼寝したりした。(I did things like watch movies, read books, and take naps (among other things).)

E.g. 映画を見たり、本を読んだり、昼寝したりしなかった。(I didn't do things like watch movies, read books, and take naps (among other things).)

# G3.9 Progressive form ~ている (enduring state of action, enduring state-of-being)

To express an enduring state of action (-ing in English), conjugate the verb to the  $\tau$ -form (§G3.6.1, then append  $\sim \tau$  \subseteq 3. This form can be used regardless of whether the verb subject is animate or inanimate. Further conjugations of the progressive form follow rules of the \subseteq 3 verb.

Interestingly, \$\mathcal{B}\$ does not have a progressive form. See discussion in \$G3.13.

E.g. 友達は何を**している**の?昼ご飯を**食べている**。 (What is friend doing? Eat<u>ing</u> lunch.; している is the progressive form of する.)

E.g. 何を読んでいますか。教科書を読んでいます。 (What are you reading? I am reading textbook.; います is the polite form of いる.)

E.g. 話を聞いていますか。ううん、聞いていません。 (Are you listening to me? No, I'm not listening.; いません is the polite form of いない.)

In casual speech (not applicable in writing!),  $\sim \tau v \delta$  can be shortened to  $\sim \tau \delta$ . However, the v is not dropped in the polite progressive form  $\sim \tau v \sharp \tau$ . Try not to let this casual speak become a habit too early on! Learn the correct form first.

E.g. 友達は何を**してる**の?昼ご飯を**食べてる**の。 (What is friend doing? Eating lunch.; 食べてる = eating (casual); 食べる = eat (dict))

In fact, laziness can go further: 何をしているの can be shortened by dropping particles and unnecessary vowels to become 何してんの? A related lazy casual expression is 「何やってんの」, which is a contraction of 「何をやっているの」.

The same form can also be used to convey **enduring state-of-being**, after a verb is performed. **This is decided by context.** E.g. 結婚している can either mean someone is currently getting married, or that someone is married and is currently in the married state. **This becomes less context-based and more of a rule for the verbs 知る、分かる、and motion verbs.** 

- 知っている means to be/have been in the enduring state of knowing. 知る refers to the change of state from not knowing to knowing, it's different and rarely used in its unconjugated form!
   ([HN1], [HN2])
  - E.g. **道は知っています**か? はい、今日に知りました。 (Do you know the way? Yes, I found out about it today.)
  - E.g. この歌を**知っています**か。はい、1年前から**知っています**よ。 (Do you know this song? Yes, I've known it for a year now.)
- わかっている means to be/have been in the enduring *state* of understanding. わかる refers to the *change* from not understanding to understanding, it's different! ([HN])
  - E.g. 前方は危ない、わかりますか。はい、はい、**わかりました**。(The area in front is dangerous, do you understand? Yes, yes, I am aware of that.)
  - E.g. 前方は危ない、わかりますか。はい、はい、**わかっています**。 (The area in front is dangerous, do you understand? Yes, yes, I am already aware of that, you don't have to tell me.)
  - わかっている, in certain contexts, can make you sound proud or dismissive. Be careful!
- **<motion verb て-form>ている** means to **<motion verb>** and exist (**<v>** + いる), and refers to the state-of-being after performing the verb.
  - E.g. 鈴木さんはどこですか。もう、家に**帰っている**。 (Where is Suzuki-san? He is already at home.)
  - E.g. 美恵ちゃんはどこですか。もう**来ている**よ。(Mie-chan is already here, you know.; 行って is the て-form of 行く: 来て is the て-form of 来る、"来って" is wrong!)

# G3.10 Resultant state ~てある

To express that an action is completed, with the implicit nuance that the action was completed in preparation for something else, we use  $\sim \tau \, \delta \, \delta$ .

E.g. 準備どうですか?準備は、もう**してある**よ。 (How are the preparations? The preparations are already done.)

E.g. 旅行の計画は終わった?うん、切符を買ったし、ホテルの予約もしてある。(Are the plans for the trip complete? Uh huh, not only did I buy the ticket, I also took care of the hotel reservations.)

# G3.11 The auxiliary verb 置く in ~ておく、~とく

To express that an action is completed (or will be completed), with the explicit nuance that the action was completed in preparation for something else, we use the auxiliary verb  $\sim \tau$  おく. 置  $\lt$  when used directly (meaning "to put/place") is written in 漢字, but when used as an auxiliary verb it is written in 仮名 alone. Further conjugations of the compound verb follow rules of the 置  $\lt$  verb.

E.g. 晩ごはんを作っておく。 (Make dinner (in advance for the future).

E.g. 電池を買っておきます。 (I'll buy batteries (in advance for the future).)

 $\lceil \sim \uparrow \gtrsim \zeta \rfloor$  can be contracted to  $\lceil \sim \gtrsim \zeta \rfloor$ . Further conjugations follow rules of the  $\gtrsim \zeta$  auxiliary verb (which means to do something in readiness for).

E.g. 晩ごはんを**作っとく**。 (Make dinner (in advance for the future).)

E.g. 電池を買っときます。 (I'll buy batteries (in advance for the future).)

# G3.12 Spatial and temporal directional auxiliary verbs $\sim$ ていく、 $\sim$ て くる

To express that an action is spatially oriented towards or from some place, we use the  $\sim \tau v$   $\langle$  and  $\sim \tau \langle$   $\delta$  auxiliary verbs respectively. Think of them as " $\langle v \rangle + go$ " and " $\langle v \rangle + come$ " respectively. Further conjugations of the compound verb follow the rules of the trailing  $v \langle v \rangle = v \langle v \rangle$  verb.

E.g. 鉛筆を学校へ持っていく? (spatial; Are you taking pencil to school?)

E.g. 鉛筆を家に**持ってくる**? (spatial; Are you bringing pencil back home?)

E.g. お父さんは、早く**帰ってきました**。 (spatial; きました is the polite past-tense of くる)

E.g. <sup>\*\*</sup>駅の方へ**走っていった**。 (spatial; いった is the past tense of いく; <sup>\*\*</sup>駅 is train station; <sup>\*\*</sup>方 is direction)

The same auxiliary verbs have a temporal usage.  $\sim \tau \lor \zeta$  can be used to mean "<v> continuously/progressively into the future".  $\sim \tau \zeta \zeta$  can be used to mean "<v> performed up to the present".

E.g. 冬に入って、コートを着ている人が**増えていきます**。 (temporal; Entering winter, people wearing coat will gradually increase.; The 入 in 入る is only read as い when used in compound verbs where the meaning of "entering" is faded.)

E.g. 一生懸命、頑張っていく! (temporal; With all my might, I will try my hardest moving into the future!)

E.g. 色々な人**付き合ってきた**けど、いい人はまだ見つからない。(temporal; Went out with various types of people up till the present, but a good person hasn't been found yet.; 付き合ってきた is the past-tense of 付き合ってくる.)

E.g. 日本語をずっと前から**勉強してきて**、結 局 やめた。 (temporal; Studied Japanese from way back before, and eventually quit.; 勉強してきて is the て-form of 勉強してくる.)

# G3.13 Potential form ~ Ö る/~られる/~できる/束られる

To express the ability to perform a verb, the verb is conjugated. できる is actually the potential form of する! For detailed conjugation rules, refer to §GA.1. All potential form verbs are る-verbs. Further conjugations follow る-verb rules.

Interestingly, 55 does not have a potential form. See more in §G3.13.2.

In casual/slang speech, ~られる (for originally る-verbs and 来る) can be shortened to ~れる, so 食べられる can be shortened to 食べれる. Try not to let this casual speak become a habit too early on! Learn the correct form first.

E.g. 漢字は書けますか? (Can you write Kanji?; 書けます is the polite potential form of 書く.)

E.g. 残念だが、今週末は**行けない**。 (行けない is the negative potential form of 行く.)

E.g. もう**信じられない**。 (信じられない is the negative potential form of 信じる.)

Importantly, potential forms do not have direct objects, since no actual action is taken, so  $\mathcal{E}$  cannot be used. Whenever  $\mathcal{E}$  is to be used, use  $\mathcal{D}$  or the topic particles  $\mathcal{U}_{\lambda}$ ,  $\mathcal{E}_{\lambda}$ , etc. instead.

E.g. 富士山が**登れた**。 (I could climb Mt. Fuji.; 富士山を登れた is wrong!)

E.g. 重い荷物は**持てます**。 (I am able to hold heavy luggage.; 持てます is the polite potential form of 持つ: the potential form is 持てる.)

# G3.13.1 The special cases 見られる、聞ける and the alternatives 見ることができる、聞くことができる (vs. 見える、聞こえる)

The transitive verbs 見る and 聞く are paired with their intransitive counterparts 見える and 聞こえる. However, the potential forms of 見る and 聞く, 見られる and 聞ける, exist. For these two case, expression of the "ability to perform a verb" meaning is left to the intransitive counterparts. The potential forms take on a special, additional layer of meaning: to be given the opportunity to see or hear something.

E.g. 今日は晴れて、富士山が見える。 (It cleared up today and Mt. Fuji is visible.; 晴れる: (of sky) to clear up)

E.g. 友達のおかげで、映画はタダで**見られた**。 (Thanks to my friend, I was able to watch the movie for free.; タダ: free-of-charge)

E.g. <sup>素わ</sup>りがうるさくて、彼が言っていたことがあんまり聞こえなかった。(The surroundings were noisy and I couldn't really hear what he was saying.; 周り: surroundings)

E.g. 久しぶりに彼の声が聞けた。 (For the first time in a long time, I was able to hear his voice.)

That said, it is actually more common to express "given the opportunity" as "the seeing/hearing thing is doable ( $\sim$ {こと/の}ができる) ", as in the following examples.

E.g. 友達のおかげで、映画はタダで**見る{こと/の}ができた**。 (Thanks to my friend, I was able to watch the movie for free.; タダ: free-of-charge)

E.g. 久しぶりに彼の声が聞く{こと/の}ができた。 (For the first time in a long time, I was able to hear his voice.)

# G3.13.2 Potential to exist: あり得る

Interestingly, ある doesn't have a potential form. The round-about way of saying "possible to exist" is 「あることができる」, but this is almost never used. Instead, we use あり得る, which is actually a compound verb made from ある and the auxiliary verb 得る (meaning to be able to), and not considered to be a potential form of ある by natives (see discussion on Reddit).

For 得, the unconjugated form can be read as  $\mathfrak{Z}$  (slightly more formal and traditional), but all conjugated forms use  $\mathfrak{Z}$ . I'd stick to  $\mathfrak{Z}$  always, the modern pronunciation (see discussion on [HN]).

E.g. そんなことはあり得る。 (That kind of situation/event is possible.)

E.g. そんなことは**あり得ない**。 (That kind of situation/event is possible.)

E.g. 彼が寝坊したこともう**あり得る**ね。(It is possible that he overslept.; 寝坊する: to oversleep)

E.g. 其れは、あり得ない話だよ。 (That's an impossible story/scenario.)

# G3.14 ~にする、~になる auxiliary verbs

All forms in this section allow further conjugations based on the rules of  $\sim 73$  and  $\sim 23$ .

For adjectives, both <adj>にする and <adj>になる have the standard interpretation of causing something to become the adjective, or to become the adjective itself respectively:

• (revision and extension of §G2.11) <na-adj>にする/<i-adj root>くする means to make something become <adj>.

E.g. 静かにする (be/make quiet)、きれいにする (make clean).

E.g. 強くする (make stronger)、小さくする (make smaller).

• <na-adj>になる/<i-adj root>くなる means to become <adj>.

E.g. 去年から背が**高くなった**ね。 (Your height has gotten taller from last year, huh?; 背: height)

E.g. 運動しているから、強くなる。 (Because I am exercising, I'll become stronger.)

E.g. 勉強をたくさんしたから、頭が**よくなった**。(Because I studied a lot, I became smarter.)

For nouns, <nn>& $\forall$  $\delta$  has a special meaning, though <nn>&& $\delta$  preserves the standard interpretation:

• (new!) <nn>にする means to decide on <nn> ("do with <nn> as destination"), and is commonly used when ordering things from a menu.

E.g. 私は、ハンバーガーとサラド**にします**。 (I'll go with the hamburger and salad.; にします is the polite form of にする.)

E.g. 他にいいものがたくさんあるけど、やっぱりこれ**にする**。 (There are many other good things, but as I thought, I'll go with this one.; 他に: besides/in addition to)

• <nn>になる means to become <nn>.

E.g. 医者になる。 (Become a doctor.)

For verbs, while we recognise that adverbs can modify verbs, we do not have a way to convert verbs into a modifying adverb, unlike what we can do with adjectives. Instead, we refer to the verb using こと (event/thing) or 様 (manner), then tag on ~にする or ~になる. In fact, ~ことにする、~ことになる、~ようにする、~ようになる have special meanings (the last two are usually written in 仮名 alone).

<v>ことに{する/なる} have an nuance of *deciding* to <v>. <v>ようにする specifically means to *try* to do <v>. <v>ようになる specifically indicates a change towards <v> which has/will take place.

• <v>ことにする means to decide to <v>. A related form, <v>ことにしている, means to decide to make it a rule/practice to <v> ("to continuously decide to <v>").

E.g. 海外に行くことにした。(I decided that I will go abroad.)

E.g. 私は6時に起床することにしている。 (I make a practice of getting up at six.)

•  $\langle v \rangle$  ことになる means to have been arranged/decided so that  $\langle v \rangle$ .

E.g. 海外に行くことになった。 (It's been arranged/decided that I will go abroad.)

Table of Contents, §GA.1

•  $\langle v \rangle$  \$\mathcal{L}\$ j\$\mathcal{L}\$ means to try to make sure that  $\langle v \rangle$ .

E.g. 肉を毎日食べないようにする。 (I will try not to eat meat everyday.)

To express something like "I'm trying to study", use「勉強するように<u>している</u>」. My previous attempt "勉強<u>している</u>ようにする" is unnatural, because ようにする refers to you trying to do something *in the future*, and 勉強している is already happening. Furthermore, this incorrect form may be misconstrued as "I'm acting like I'm studying". [GMN]

• <v>ようになる means to come to be that/start to <v>. The implicit nuance is on a change of state from not <v> to <v>.

E.g. 肉を毎日食べないようになった。 (I started to not eat meat everyday.)

Furthermore, because potential verbs describe a state of possibility rather than an actual action,  $\langle v | potential \rangle \& 5 \& 5 \& 5$  is often used to describe a change (from a state of infeasibility) to a state of feasibility.

E.g. 日本に来て、スシが**食べられるようになった**。 (After coming to Japan, I became able to eat sushi.)

E.g. 1年間練習したから、ピアノが**弾けるようになった**。(Because I practised for a year, I became able to play the piano.; 弾く: to play a stringed/keyboard instrument)

E.g. 地下に入って、富士山が**見えなくなった**。 (After going underground, Mt. Fuji became not visible.; 見える  $\rightarrow$  見えない  $\rightarrow$  見えなくなる  $\rightarrow$  見えなくなった)

## G3.14.1 ~なくなる versus ~ないようになる

In the final example in the previous section, 見えないようになった is also acceptable. Both mean the same, though 見え<u>ないようになった focuses on the change</u>. 見え<u>なくなった focuses on the result</u>, and is more commonly used. ([HN]), [GMN]

E.g. 地下に入って、富士山が**見えなくなった**。 (After going underground, Mt. Fuji became <u>not visible</u>.; 見える  $\rightarrow$  見えない  $\rightarrow$  見えなくなる  $\rightarrow$  見えなくなった)

E.g. 地下に入って、富士山が**見えないようになった**。(After going underground, Mt. Fuji <u>became</u> not visible.)

#### G3.14.2 Decoupling form and function in Japanese grammar

Read the main discussion on SOF, courtesy of MT.

The phrase 「見えなくなった」 is gramatically correct, but explaining how it came to is not straightforward.

One important takeaway is that "Japanese is not like Indo-European languages, and so at some point, clinging to Indo-European grammatical categories can get in the way".

It is a misconception to parse 見えなくなった as "見えなく (adverb form of adjective 見えない) + なった (past tense of なる)".

An adverb refers to a grammatical function, specifically the function of describing the manner something is or some action is done. Since 見えなく does <u>not</u> mean "in a manner that is not visible", it is <u>not</u> serving the function of the adverb. "In English, you can say adverbs end in 'ly'. Does that mean that bully is an adverb or that silly is an adverb?"

見えなく merely takes on the same grammatical *form* as adverbs. 見えない is in the *form* of an い-adjectives, and so it conjugates like い-adjectives: <u>conjugation rules are based on form, not function</u>. In Japanese, 見えなく is the 連用形 (conjunctive form) of 見えない, the form used during conjugation with other grammatical units. No native will understand 見えなく as "in a manner that is not visible"; "it's just part of the form into which the word must *inflect* to function properly in the sentence".

Specifically, 見えなくなった is made of 見える + ない + なる. To link these into a phrase, each component must be converted into the 連用形 (actually ない comes after the 未然形 (nai stem of a verb) of 見える, which is 見え). Thus the required forms are 見え (未然形)、なく (連用形)、なった (past), resulting in 見えなくなった.

#### G3.15 Conditionals

There are four ways to say "if" in Japanese.

#### G3.15.1 Conditional form ~ば

The Takoboto dictionary refers to this as the "provisional form", for some reason.

This is the simplest, most general conditional, and is a conjugation of nouns, adjectives and verbs. Refer to §GA.1 for detailed conjugation rules. It means "if <future ...>l $\sharp$ , then <...>". The focus is on the conditional predicate, i.e. the part before the l $\sharp$ , not on the statement that follows.

The conjugation rule for nouns and な-adjectives is suffixing 「~であれば」, which is actually using the conditional form あれば of the verb ある. 「である」 is a formal expression we will see much later (???).

In the examples that follow, the <u>focus</u> is underlined.

E.g. 友達に**会えれば**、買い物に行きます。 (<u>If I can meet my friend</u>, we will go shopping.; 会えれば is the conditional form of the potential verb 会える)

E.g. <u>お金が**あれば**</u>いいね。 (<u>If I had money</u>, it would be good, huh?)

E.g. 楽しければ、私も行く。 (<u>If it's fun</u>, I'll go too.)

E.g. <u>楽しくなければ</u>、私もう行かない。 (<u>If it's not fun</u>, I'll also not go.)

E.g. **食べなければ**病気になるよ。 (<u>If you don't eat</u>, you will become sick.)

#### G3.15.2 Past conditional form ~たら[ば]

The past conditional form conveys the same idea as the basic conditional form [§G3.15.1], but with a difference in focus: the focus is on the statement that follows the conditional predicate, i.e. the part after the  $\not\sim [i t]$ , not on the predicate itself. The optional [i t] is used for formality; in causal speech it is omitted.

The predicate always takes on the past tense, though this doesn't necessarily mean the predicate must have happened in the past. It can be a future, not-yet-happened event too, just like English's "if ... were to happen/if I were ..., then ...".

In the examples that follow, the <u>focus</u> is underlined.

E.g. **暇だったら**[ば]、<u>遊びに行くよ</u>。 (If I am free, <u>I'll go to play</u>.)

E.g. **学生だったら**[ば]、<u>学生割引で買えます</u>。 (If you're a student, <u>you can buy with a student</u> discount.)

E.g. 友達に会えたら[ば]、買い物に行きます。 (If I can meet my friend, we will go shopping.)

E.g. お金があったら ばいいね。 (If I had money, it would be good, huh?)

There is also a second usage, to express surprise at an unexpected **past** outcome, via the schema <past predicate/prior event> \$\mathcal{t} \beta | \mathcal{t}| \tag{unexpected past outcome} > \tag{nonlinear to the past outcome}.

E.g. 家に**帰ったら**[ば]、誰もいなかった。 (When I went home, there was (unexpectedly) no one there.)

E.g. アメリカに**行ったら**ば、たくさん荒りました。 (As a result of going to America, I (unexpectedly) got really fat.; 太りました is the past polite form of 式る)

The way to disambiguate between the two usages is to first recognise that in either case, when we see/hear  $\not\sim \beta[it]$ , we focus on what comes next. Then, if what comes next is in present tense, there's no surprise nuance; if what comes next is in past tense, then there is a surprise nuance.

### G3.15.3 Expected consequence conditionals with $\stackrel{>}{\sim}$

This is similar in nuance to the Cだたら E construct (see Table 142), with the added element of expectedness.

A  $\succeq$  B means that if A happens, then as a natural consequence B is *expected* to happen. The schema is  $C[\mathcal{E}] \succeq E$ . Note that the state-of-being  $\mathcal{E}$  must be made explicit for nouns and  $\mathcal{E}$ -adjectives, for disambiguation with other usages of  $\succeq$ !

E.g. 先生**だと**、きっと年上なんじゃないですか。 (If he's a teacher, surely he is senior, right?; きっと: surely; なん is the contraction of なの (noun explanatory ender), じゃないですか is a polite form of asking)

E.g. ボールを落とすと落ちる。 (If you drop the ball, it will fall.)

E.g. 電気を消すと暗くなる。 (If you turn off the lights, it will become dark.; 暗い: dark)

E.g. 学校に行かないと友達と会えないよ。(If you don't go to school, you can't meet your friends.)

E.g. たくさん食べると太るよ。 (If you eat a lot, you will get fat.)

# G3.15.4 Contextual conditionals with なら[ば]

Contextual conditionals express the nuance that the statement will occur given that the contextual predicate holds. It's translated as "If given cpredicate, then <statement>". The schema is <context> $\mbox{$\mbox{$\mbox{$\mathcal{C}$}$}[l\mbox{$\mbox{$\mathcal{C}$}$}]$, <statement>. The optional [l\mbox{$\mbox{$\mathcal{C}$}$}] is used for formality; in casual speech it is omitted.$ 

E.g. みんなが行くなら は 私も行く。 (If given that everyone is going, then I'll go too.)

E.g. アリスさんが言うなら ば 問題ないよ。(If given that Alice says so, then there's no problem.)

E.g. 図書館はどこですか。図書館**なら**は、あそこです。(Where is the library? If given that you're talking about the library, then it's over there.)

#### G3.15.5 & L as an uncertainty embellishment for conditionals

E.g. **もしよかったら**、映画を見に行きますか。 (past conditional; If by any chance it's ok with you, go to watch movie?; 見に is the adverb of 見る)

E.g. **もし**時間がない**なら、**明日でもいいよ。(contextual conditional; If by chance given that there's no time, tomorrow is fine as well.)

# G3.16 Prohibition, requirement and permission

Expressing the idea that something must not be done, must be done, or that it's ok to do/not do is common in Japanese.

## G3.16.1 Prohibition (things that must not be done) ~ては{だめ/いけない/ならない}

There are three adjectives that convey prohibition: だめ、いけない、ならない. Of the three, だめ is casual (ダメ is even more casual, used in friendly settings; [HN]). Also, ならない is used more for general rules, laws and policies that apply for more than one person, so it can be interpreted as the sternest of the three. In terms of sternness, だめ < いけない < ならない.

いけない comes from 行けない which means bad/wrong/naughty, but when used in the prohibitory manner is written in 仮名 alone.

All conjugations of the three adjectives are shown in Table 12. The polite forms taken by いけない and ならない can be explained by interpreting them as present-negative forms of the verbs いける (meaning to go well) and なる (to become) respectively. Though be cautioned, don't mix form with function (§G3.14.2).

Table 12: Prohibition conjugations.

Present prohibition	だめ	いけない	ならない
Past prohibition	だめだった	いけなかった	ならなかった
Present prohibition (polite)	だめです	いけません	なりません
Past prohibition (polite)	だめでした	いけませんでした	なりませんでした

The long-form schema for prohibition is <v te>は{だめ/いけない/ならない}.

E.g. ここに入ってはいけません。 (You must not enter here.)

E.g. それを食べてはだめ! (You can't eat that!)

E.g. 夜、遅くまで電話してはならない。 (You must not use the phone until late at night.)

E.g. 早く**寝ては**なりませんでした。 (I wasn't allowed to sleep early.)

E.g. **死んでは**ダメだよ! (You can't die!)

E.g. 泳いではなりません。 (Do not swim.)

The contractions for expressing prohibition involve the following replacements. Note that the {だめ/いけない/ならない} must not be omitted for contracted prohibition.

The second form is used for verbs with endings in {ぐ,む,ぬ,ぶ}; their て-forms use で.}

E.g. ここに入っちゃいけません。 (You must not enter here.)

E.g. それを食べちゃだめ! (You can't eat that!)

E.g. 夜、遅くまで電話しちゃならない。 (You must not use the phone until late at night.)

E.g. 早く**寝ちゃ**なりませんでした。 (I wasn't allowed to sleep early.)

E.g. 死んじゃダメだよ! (You can't die!)

E.g. 泳いじゃなりません。 (Do not swim.)

Side note: 「死んじゃった」 is actually a contraction of 「死んでしまう」, where しまう is an auxiliary verb meaning "to do accidentally", and でしまう is contracted to じゃう, then conjugated into the past tense as じゃった. It's got nothing to do with the 死んじゃ we see in this section, which comes from 死んでは.

Finally, the  $5 \approx / U \approx$  contractions here are slightly feminine.

# G3.16.2 Requirement (things that must be done)

Requirement is expressed as the negation of prohibition. The <v te> is the one that is negated, and there are three grammatical schemae that can be used. All are correct, and are all used at least in formal writing, so learn them all.

The three long-form grammatical schemae for requirement:

E.g. 毎日学校に**行かなくては**なりません。 (I must go to school everyday.)

E.g. 宿題をしなくてはいけなかった。 (I had to do homework.)

2. <v negative>と{だめ/いけない/ならない}. This uses the expected consequence conditional (§G3.15.3). The literal meaning is: if you don't do something, the expected consequence is no good. This is the easiest form, and is used even outside of the expected consequence characterisation.

E.g. 毎日学校に**行かないと**なりません。 (I must go to school everyday.)

E.g. 宿題をしないといけなかった。 (I had to do homework.)

3. <v conditional-negative>{だめ/いけない/ならない}. This uses the conditional form (§G3.15.1). For requirement, because the verb is negated, the conditional-negative always contains ~なければ.

E.g. 毎日学校に行かなければなりません。 (I must go to school everyday.)

E.g. 宿題をしなければいけなかった。 (I had to do homework.)

In casual speech, however, people default to either the <v negative>と{だめ/いけない/ならない} or the contractions that follow. When used to express requirement, the expected consequence conditional と (§G3.15.3) loses the expected consequence nuance (it's used in more situations that what it was originally defined for).

The contractions for expressing requirement involve the following replacements. Note that the {だめ/いけない/ならない} is omitted for contracted requirement.

In short,  $x < T \mapsto x < T \Leftrightarrow x \in T$  at  $x \in T$ .

For the first schema contraction, なくちゃ is the colloquial form of なくては、which is an abbreviation of なくてはいけない. For the third schema contraction, なきゃ is the colloquial form of なければ、which is the conditional-negative form of the verb ある. In a sense, every verb has two colloquial "requirement" forms: …なくちゃ and …なきゃ、based on their negative forms.

Note that these contractions cannot be conjugated into the past tense, i.e. "~なくちゃった", "~なくちゃない", "~なきゃない" do not exist! [TNSJ] If you want to mean requirement in the past, use any of the three long form schemae above. If you want to mean prohibition, use the one contracted schema in §G3.16.1. If you want to mean not a requirement (i.e. okay to not do), use the one schema in §G3.16.3.

Here are the three contracted grammatical schemae for requirement.

- 1. <v negative fragment ending in な>くちゃ.
  - E.g. 毎日学校に**行かなくちゃ**。 (I must go to school everyday.)
  - E.g. 宿題をしなくちゃ。 (I have to do homework.)
- 2.  $\langle v \text{ negative} \rangle \mathcal{E}$ .
  - E.g. 毎日学校に行かないと。 (I must go to school everyday.)
  - E.g. 宿題をしないと。 (I have to do homework.)
- 3. <v negative fragment ending in な>きゃ.
  - E.g. 毎日学校に行かなきゃ。 (I must go to school everyday.)
  - E.g. 宿題をしなきゃ。 (I have to do homework.)

(Notice that the homework example has been changed to present tense; the past tense has no contractions.)

Finally, the なくちゃ contraction here is slightly feminine.

# G3.16.3 Permission (things that are okay to do or not to do) ~てもいい

The schema for permission is simply <allowed v te>も{いい/大丈夫/構わない}. Other permissive enders work too but these three are the most common. 構わない is the negative form of 構う, meaning to mind. For <v te>もいい, the も may be dropped in casual speech.

E.g. 全部食べて[も]いいよ。 (You can go ahead and it it all.; "Even if you eat it all, it's good, you know.")

E.g. 全部食べなくて[も]いいよ。 (You don't have to eat it all.)

E.g. もう帰って[も]いい? (Can I go home already?)

E.g. これ、ちょっと見て[も]いい? (Can I take a quick look at this?)

E.g. 全部飲んでも大丈夫だよ。 (It's okay if you drink it all.)

E.g. 全部飲んでも構わないよ。 (You can drink it all, I don't mind.)

# G3.17 Desires, invitation and suggestions

This section concerns the expression of direct desires and discreet suggestions.

#### G3.17.1 Desiderative form ~たい

Takoboto and most sources simply call this the Town, but desiderative, meaning expressing a desire to, is more descriptive.

Note that ある does not have a desiderative form: inanimate objects cannot desire anything. いる's desiderative form is いたい.

The desiderative form can only be used from the first person, because you cannot read other people's mind and express what they want to do. To refer to other people's desires, use direct or indirect quotations (????). Questions about other people's desires are permitted because we are not making presumptions.

E.g. ずっと一緒にいたい。 (I want to be together forever.)

E.g. 何をしたいですか。 (What do you want to do?)

E.g. 犬と遊びたいですか。 (Do you want to play with dog?)

E.g. オン前に**行きたい**。 (I want to go to a hot spring.)

E.g. ケーキ、食べたくないの? (You don't want to eat cake?)

E.g. 食べたくなかったけど食べなくなった。 (I didn't want to eat, but I became wanting to eat.)

E.g. 食べたくなくなった。 (I became not wanting to eat.; to parse this, split it as 食べた|くな| くなった: eat + negative desire + became.)

#### G3.17.2 Auxiliary adjective ほしい

The 「<nn>が欲しい」 construct means to want <nn>. To express that we want a verb <v> done, or that we want the listener to do <v>, we use the auxiliary adjective ほしい. This auxiliary usage is written in 仮名 alone.

The auxiliary adjective ほしい is actually rarely used in practice, since there are other more appropriate ways to make requests (???). Note that ~ほしい does NOT express that you want to do something yourself; that is expressed by ~たい.

E.g. 大好きぬいぐるみが欲しい! (I want a big stuffed doll!: ぬいぐるみ: stuffed toy)

E.g. 全部食べてほしいんだけど...。 (I want it all eaten but...; This does not say "I want to eat it all": that would be 全部食べたいんだ。)

E.g. 部屋を**きれいにしてほしい**のよ。 (I want the room cleaned up, you know.)

# G3.17.3 Volitional form: invitation ~ うう/~よう/~ましょう

"Volitional" means "relating to the use of one's will". The volitional form is used to express that the speaker is setting out to do something. In simpler terms, it expresses the idea of invitation, and translates to "Let's/Shall we" in English. Refer to §GA.1 for a full table of conjugations. The volitional conjugations for the two exception verbs are best memorised, there's no simple rule explanation (しよう、英よう).

Both casual and polite volitional forms exist, and the polite form must come at the end of the sentence.

Note that the volitional form only has one tense: starting from the present, looking into the future. It cannot be used with a past tense verb like "食べたよう".

E.g. 今日は何をしようか。 (What shall we do today?)

E.g. 今日は何をしましょうか。 (What shall we do today? (polite))

E.g. テーマパークに**行こう**! (Let's go to the theme park!)

E.g. テーマパークに**行きましょう**! (Let's go to the theme park! (polite))

E.g. 明日は何を食べようか。カレーを食べよう! (What shall we eat tomorrow? Let's eat curry!)

E.g. 明日は何を食べましょうか。カレーを食べましょう! (What shall we eat tomorrow? Let's eat curry! (polite))

# G3.17.4 Suggestions {ば/たらどう}

Suggestions are expressed by suffixing  $\lceil \mathcal{E} \circlearrowleft \rfloor$  to the conditional form ( $\wr \mathcal{I}; \S G3.15.1$ ) or the past conditional  $\not \sim \S G3.15.2$ ). In English, the literal translation is "If you do < v>, how is it?" and the natural translation is "How about doing < v>?"

E.g. たまにご両親と**話せばどう**? (How about talking with your parents once in a while?; たまに: occasionally; 話せば is the conditional form of 話す)

E.g. 銀行に**行ったらどう**ですか。 (How about going to the bank?)

# G3.18 Quotation: performing actions on relative clauses

We first came across relative clauses in §G2.10.1, where they are used as noun modifiers using the schema <relative verb clause><nn>.

In order to perform an action (e.g. thinking, saying, hearing, variants of each, or even simply referring to it in a bigger complex sentence) on a relative clause, we use the concept of **quotation**, which encapsulates the relative clause into a unit, upon which we can perform actions. This is an important construct in Japanese as the Japanese seldom affirm definite statements, and prefer to express uncertainty or probability, which requires performing corresponding actions (e.g. thinking) on relative clauses.

#### G3.18.1 Direct quotation 「…」と

The と particle is the quote marker particle, as first seen in §G2.1. The syntax is 「<quote>」と <v>. <v> can be anything like 言う、聞く、呼ぶ (to call)、叫ぶ (to scream)、呟く (to mutter), etc. The <v> doesn't need to immediately follow と; other adverbs and sentence parts-of-speech can come in between, so long as <v> appears in the clause somewhere after と.

E.g. アリスが、「寒い」と言った。 ("Cold", said Alice.)

E.g. 「寒い」とアイリスが田中に言った。 ("Cold", said Alice to Tanaka.)

E.g. 「今日は授業がない」**と**先生から**聞いた**んだけど。(It is that I heard from the teacher "there is no class today"...)

#### G3.18.2 Indirect quotation と、って

Also known as interpreted quotation, indirect quotation quotes *along the lines* of what the speaker actually said. <u>Thoughts</u> and <u>considerations</u> are often expressed as indirect quotes, with the verbs 思う and 考える respectively. The と particle is used here too, except that unconjugated nouns and な-adjective state-of-being must be explicitly declared with な.

In the following examples, the <u>indirect quotation</u> is underlined.

When 何 is used to mean "what", it is read as なに; when it is used to mean "how many", it is read as なん. ([NHK])

E.g. 先生から<u>今日は授業がないと聞いた</u>んだけど。 (I heard from the teacher that there is no class today.; Note the absence of direct quotation marks.)

E.g. <u>カレーを食べようと思った</u>けど、食べる時間がなかった。 (I thought about setting out to eating curry but didn't have time to eat.; DO NOT confuse なかった and なった: the former is the past-negative of ある, and the latter is the past tense of なる.)

E.g. 今、<u>どこに行こうかと</u>考えている。 (Now, I'm considering where to set out to go.; this is an example of the question marker in indirect quotations, §G3.4.4)

E.g. 彼は、これは何<u>だと</u>言いましたか。 (What did he say this is?; Here, the explicit state-of-being assertion だ is compulsory!)

E.g. 彼は、何と言いましたか。 (What did he say?)

E.g. 彼は、<u>これは何かと</u>言いました。 (He asked what this is.)

E.g. 彼は<u>高校生だと</u>聞いたけど、信じられない。 (I heard that he is a high school student, but I can't believe it.)

The casual version of the と particle is って. Specifically, <quote>と<v> can be shortened to <quote>って. The verb is dropped and the speaker will hope that the listener can **understand everything from context!** Usually, the omitted verb after って is 言った ("to say"), so if it's any other verb, don't drop it.

E.g. 今、時間がないと聞いたんだけど、本当? (I heard you don't have time now, is that true?)

E.g. 今、時間がないって聞いたんだけど、本当? (I heard you don't have time now, is that true?)

The following are examples of contextual guessing in action. The omitted verb is assumed to be 言った by default.

E.g. 今、時間がないってけど、本当? (You said you don't have time now, is that true?)

E.g. 智子は来年、海外に行くんだって。 (Tomoko said that she's going overseas next year.)

E.g. もうお金がないって。 (I already **told** you I have no money.)

E.g. え? 何だって? (Huh? What did you say?)

#### G3.18.3 って as a replacement for topic particle は

or can be used to talk about practically anything, not just as the informal form of the quotation marker  $\mathcal{E}$ . It is used everywhere in casual speech, usually to bring up a topic.

E.g. 明日って、雨が降るんだって。 (About tomorrow, I hear that it's going to rain.; first って is a replacement for は, second って contains the hidden verb "to hear". A bit weird. I wouldn't use the trailing って like this; I'll just omit it.)

E.g. アリス**って**、すごくいい人でしょう? (Alice is a very good person, right?; でしょ[う] is the [formal] conjectural form of です.)

# G3.19 Definitions and descriptions with the abstract という/って (and slang つう)

言う means to say, and when used in the abstract way, is written as いう. It can be used with the  $\succeq$  particle to define, describe and to refer to something itself.

#### G3.19.1 Definition という

言う has a second meaning, "to call/name". However, since nothing is actually said, it is common to write it in 仮名 only (also ok to write it in 漢字).

E.g. これは、日本語で何といいますか。 (What do you call this in Japanese?; 言う here means to call/name)

E.g. 私は、アリスといいます。 (I am called Alice.; 言う here means to call/name)

In the following examples, the <called>という<thing> schema is used.

E.g. これは、何**という**魚ですか。 この魚は、鯛といいます。(What is this fish referred to as? It's known as Tai.)4

E.g. ルミネというデパートはどこにあるか、知っていますか。 (Do you know where the department store called "Lumine" is?)

E.g. 「友達」は、英語で「friend」という意味です。 (The meaning of "tomodachi" in English is "friend".)

# G3.19.2 Referring to relative clause という{の/こと and $\{c_0/c_0/a_0/c_0\}$ and $\{c_0/c_0/c_0\}$ and $\{c_0/c_0/c_0\}$

When a relative clause is encapsulated with  $\lceil \xi \rfloor$ , it must be followed by a verb. Sometimes, we want to simply refer to the relative clause in a bigger complex sentence, and in this case the \ 5 verb serves as a generic verb (it can but in this usage it doesn't mean that you're saying the quote). The schema  $\langle quote \rangle$ という $\{ O/ こと \}$  is a very common construction.

E.g. 主人公が犯人だったという{の/こと}が一番面白かった。 (The most interesting thing was that the main character was the criminal.)

E.g. 日本人はお避けに弱いという{の/こと}は本当? (It is true that Japanese people are weak to alcohol?)

E.g. 独身だという{の/こと}は、嘘だったの? (Was it a lie that you are single?)

<sup>&</sup>lt;sup>4</sup>This example can also be written as 「この魚は何といいますか。」([HN]), but could technically be misconstrued as "About this fish, what does it say?". Prefer the <alled>という<thing> schema.

E.g. リブート**という{の/こと}**は、パソコンを再起動する**という{の/こと}**です。(Reboot means to restart your computer.)

E.g. みきさんが洋介別れたということだ。ということは、みきさんは、今彼氏がいないということ?そう。そういうこと。 (I heard that Miki-chan broke up with Yousuke. Does that mean Miki-chan doesn't have a boyfriend now? That's right. That's what it means.; ということだ specifically indicates hearsay or conjecture about others' feelings)

If the relative clause can be inferred from context, it can be replaced with a generic way of doing somthing, using the pre-noun adjectivals こういう、そういう、ああいう、どういう (and the こんあ、そんあ、あんあ、どんあ forms too).

E.g. あんたは、いつも**こういう**時に来るんだから、困るんだよ。 (It's because you always come at times like these that I'm trouble.)

E.g. **そういう**人と一緒に仕事をするのは、嫌だよね。 (Doing work together with that type of person would be unpleasant, huh?)

E.g. **ああいう**人と結婚できたら、幸せになれるとお見ます。 (I think if you can marry that type of person, you can become happy.)

E.g. 大学にいかないって、どういう意味なの?(What do you mean, "I'm not going to university"?)

Finally,  $\supset \mathcal{T}$  is not only a short form for  $\mathcal{E} < v >$  after quotations. It is also a short form for the generic verb  $\mathcal{E} \lor \mathcal{I} \supset$  and any following particles, so <quote $>\mathcal{E} \lor \mathcal{I} \supset$  <particles> can be shortened to <quote $>\mathcal{I} \subset \mathcal{I} \supset$  Again, the speaker will hope that the listener can **understand everything** from **context**.

E.g. 来年留学する**という{の/こと}**は、智子のこと? (The studying abroad next year thing, is that Tomoko?)

E.g. 来年留学するって智子のこと? (The studying abroad next year thing, is that Tomoko?)

There's a further abbreviation of  $\supset \mathcal{T}$  to  $\mathcal{T}$  (and replacement of  $\mathcal{E}$  with  $\mathcal{T}$ , which is slightly easier to say), but this only works for the generic verb. For actually said things, this contraction is invalid! This is stepping into the territory of native lazy speak, I'd say don't worry about this too much.

E.g. **て**ことは、みきさんは、いま彼氏がいない**て**こと? (both て replaced という; the second one could've also replaced the trailing こと)

E.g. **て**いうか、もう帰らないとだめですけど。(ていうか instead of というか for rephrasing and refining definitions, §G3.19.3)

E.g. みきさんが、明日来ないって。 (Miki-chan says she isn't coming tomorrow.; "みきさんが、明日来ないて。" is wrong!)

#### G3.19.3 Rephrasing and refining definitions with というか、connector

The definition expression  $\&\&\vee \Im$  [§G3.19.1] can be suffixed with the question marker & to add a questioning element, useful for rephrasing or redefining something. This is common in casual speech. As a connector, it tags to the thing that's being rephrased, as in <to rephrase> $\&\&\vee \Im$ , <rephrase>.

E.g. みきちゃんは、あんたの彼女でしょう?う~ん、彼女**というか**、友達**というか**、なん**というか**....{} (Miki-chan is your girlfriend, right? Um, you might say girlfriend, or friend, or something...)

E.g. お酒は好き**というか**、ないと生きていけない。(I like alcohol, or rather, I can't live on without it.; 生きていけない is the negative potential form of 生きていく (meaning to live on). This is tricky to parse. The presence of けない correctly hints to us that some negative potential form is in use, but it is not the negative potential form of 生きている (that would be 生きていられない). The presence of いけない might also wrongly lead us to think 生きる is prohibited (that would be 生きて<u>は</u>いけない). The correct way to parse is to recognise that け must be the え form of some く verb, which leads to 生きていく. To disassociate from the prohibition いけない, recognise that the は particle is missing, which is required by the prohibition schema てはいけない.)

E.g. 多分行かないと思う。**というか**、お金がないから、行けない。 (Don't think I'll go. Or rather, I can't go because I have no money.)

E.g. **というか**、もう帰らないとだめですけど。 (Rather than that, I have to go home already.)

#### G3.19.4 Referring to relative clause with annoyance つう (slang)

The generic verb &&&& can be shortened to  $\Im\Im$ . It is harder to say (violates core slang principle of making things easier to say, §G3.24), but it has a hard, hissing sound, so it is used to convey anger. It is masculine. It can sometimes be further shortened to just  $\Im$ .  $\Im\Im$  is the  $\Im$ -from of  $\Im\Im$ .

E.g. **つうか**というか、なんでお前がここにいんいるんのよ! (Or rather, why are you here?!)

E.g. 宿題で時間がない**つって**と言ってんのに、みきちゃんとデートしに行ったらしい。 (Although he's saying he doesn't have time because of homework, I hear he went on a date with Miki-chan.; デートする  $\rightarrow$  デートし (stem); らしい: appearance, based on evidence/trustworthy hearsay)

E.g. 明日は試験だぞ。**つって**も、勉強はしてないだろうな。 (Yo, tomorrow's the test. Even if I say that, you probably didn't study anyway, huh?; してない is a contraction of していない (from している))

E.g. だから、違うんだ**つう**の! (Like I said, you're wrong!)

The annoyance can be further emphasised using っつう.

E.g. だから、違うんだっつうの! (Like I said, you're wrong!)

#### G3.19.5 Referring to relative clause with exasperation ってば/ったら (slang)

To take annoyance to the next level, the generic verb 「という」's conditional form 「といえば」 (§G3.15.1) and past conditional form 「といったら」 (§G3.15.2) can be abbreviated to ってば or ったら respectively. The (abbreviated) conditionals of という are used to express the exasperation of repeating yourself multiple times, or with someone not listening to you.

E.g. もう行くってば! (I told you I'm going already!)

E.g. あなたったら、いつも忘れるんだから。 (Because you're always forgetting.)

#### G3.19.6 Expressing disagreement or dissatisfaction (whiningly) with だって

だって is a conjunction used to express disagreement or dissatisfaction whiningly.

E.g. しないとだめだよ。**だって**、時間がないからできないよ。 (Have to do it, you know. But (even so), can't do it because there is no time.)

E.g. 行かなくかなくてもいいよ。**だって**、みんな行くって。私もいかないと。 (Don't have to go, you know. But (even so), everybody said they're going. I have to go too.)

# G3.20 Trialling something out or attempting something

The "try" in English is heavily overloaded. In Japanese, there are separate grammatical expressions for each sense of "try". We've already seen one sense: <v>ようにする, meaning to try to make sure that  $\langle v \rangle$ , as in putting in effort to make a habit of  $\langle v \rangle$ .

This section concerns two other senses: trialling something out, and attempting to do something.

#### G3.20.1 Trialling something out with the auxiliary verb てみる

This is expressed with <v te>みる, using the auxiliary verb みる (from 見る). Think of it as <v> and see (the outcome). Further conjugations follow rules of the 見る verb. The polite form is て みます.

E.g. お好み焼きを初めて食べてみたけど、とてもおいしかった! (I tried eating okonomiyaki for the first time and it was very tasty!)

E.g. お酒を**飲んでみました**が、すごく眠くなりました。 (I tried drinking alcohol and I became extremely sleepy.; 眠く is the adverbial form of 眠い)

E.g. 新しいデパートに**行ってみる**。 (I'm going to check out the new department store.)

E.g. 広島のお好み焼きを食べてみたい! (I want to try eating Hiroshima okonomiyaki!; みたい is the desiderative form of みる)

# G3.20.2 Attempting something with $\langle v \text{ volitional} \rangle$ と{する/ $\langle v \rangle$ }

This is expressed with  $\leq v$  volitional  $\geq z + 3$ . Attempting to do something requires exercising the will to set out to do something, hence the involvement of the volitional form. The volitional (and (2) together convey the information that we're discussing attempting. Further conjugations follow the rules of the verb する.

E.g. 毎日、勉強を**避けようとする**。 (Everyday, she attempts to avoid study.: 避けよう is the volitional form of 避ける.)

E.g. 無ややりに部屋に入ろうとしている。 (He is attempting to force his way into the room.)

E.g. 早くな**寝ようとした**けど、結局 は徹夜した。(I attempted to sleep early but ended up staying up all night.)

E.g. お酒を**飲もうとした**が、奥さんが止めた。(he tried to drink alcohol but his wife stopped him.)

To describe the attempt itself with another verb  $\langle v \rangle$  (e.g. to think to attempt, to decide to 

E.g. 勉強をなるべく**避けようと思った**。(I thought I would attempt to avoid as much as possible studying.: なるべく: as much as possible)

E.g. 毎日事務に行こうと決めた。 (I decided to attempt to go to the gym everyday.)

# G3.21 Giving and receiving objects and favours

Giving and receiving gifts is a big part of Japanese culture. There are four verbs of interest:  $\mathcal{B}\mathcal{F}$ る、やる、くれる、もらう.

The act of giving is associated with the imagery of the gift/favour "going up" to the recipient, and the act of receiving is associated with the imagery of the gift/favour "coming down" from the

giver. This leads to the verbs for giving (first person) あげる (上げる), and giving (second person) くれる (whose honorific version of 下さる).

# G3.21.1 Giving [as a favour] [て]あげる、[て]やる、[て]くれる

There are three verbs for the act of giving, each with their own use.

• あげる: to give (first person, or third person from giver's POV). The speaker must use あ げる when the speaker is giving something, and the auxiliary verb <v te>あげる when the speaker is doing someone a favour.

E.g. 私が友達にプレゼントを**あげた**。 (first person; I gave present to friend.; the sentence ordering can be mixed up, e.g. 「私がプレゼントを友達にあげた。」)

E.g. これは先生にあげる。 (first person; I'll give this to teacher.)

E.g. 学生がこれを先生にあげる。 (third person; The student give this to teacher (looking at it from the giver's POV).; changing POV to that of recipient warrants a change to くれる)

E.g. 車を買ってあげるよ。 (first person; I'll give you the favour of buying the car./I'll buy the car for you.)

E.g. 代わりに行ってあげる。(first person; I'll give you the favour of going as your substitute.; かわりに: as a substitute for)

E.g. 友達が父にいいことを**教えてあげた**。 (third person; Friend gave the favour of teaching something good to my dad (looking at it from giver's POV).; changing POV to that of recipient warrants a change to くれる)

- ・ やる: to give (first person), when the receiver is a pet/animal. This is never used for people, but is included here to point out that やる here means "to give" and not "to do" (colloquial). E.g. 犬に餌をやった? (Did you give the dog food?; 餌: food for animals)
- くれる: to give (second person, or third person from recipient's POV). The speaker must use くれる when someone else is giving something to the speaker, or the auxiliary verb <v te> くれる when someone else is doing the speaker a favour.

As the recipient, the speaker uses くれる to emphasise the action of giving, and もらう to emphasise the action of receiving.

E.g. 友達が私にプレゼントを**くれた**。 (second person; Friend gave present to me.)

E.g. これは、先生がくれた。 (second person; Teacher gave this to me.)

E.g. 車を買ってくれるの? (second person; Will you give me the favour of buying a car?/ Will you buy me a car?)

E.g. 代わりに行ってくれる? (second person; Will you give me the favour of going as my substitute?/Will you go as my substitute?)

E.g. 先生がこれを学生に**くれる**。(third person; The teacher give this to student (looking at it from the recipient's POV).; changing POV to that of giver warrants a change to あげる)

E.g. 友達が父にいいことを**教えてくれた**。 (third person; Friend gave the favour of teaching something good to my dad (looking at it from recipient's POV).; changing POV to that of giver warrants a change to あげる)

To better illustrate the difference between first and second person ( $\delta \mathcal{H} \delta$ ), compare the following sentences.

E.g. 先生が**教えてあげる**んですか。(Teacher, will you be giving the favour of teaching to (anybody *other* than the speaker)?)

E.g. 先生が**教えてくれる**んですか。(Teacher, will you be giving the favour of teaching to (anybody *including* the speaker)?)

When speaking as the recipient of an action or favour, as a recipient the verb  $\langle h \rangle$  must be used.

E.g. 私が全部食べてあげました。 (I gave the favour of eating it all.; it's incorrect to use 食べて くれる here as "I" am not receiving the favour)

E.g. 友達がプレゼントを私に**くれた**。 (Friend gave present to me.; it's incorrect to use あげた here because "I" am not the giver)

# G3.21.2 Receiving [as a favour] [て]もらう

There is only one verb for receiving,  $\& 5 \ 5$ . To indicate who the speaker is receiving something from, use the from-marker particler  $\ b \ 5$ . The past form  $\ b \ 5 \ 5$  is much more commonly used, to indicate that the speaker received something. The auxiliary verb  $\ < v \ te > b \ 5$  is used when the speaker is receiving the favour of someone doing  $\ < v \ te > b \ 5$  for their sake.

Important: for  $\mathfrak{G}\mathfrak{G}\mathfrak{G}$ ,  $\mathfrak{C}$  marks the giver! <receiver> $\mathfrak{D}^{\sharp}$ , <giver> $\{\mathfrak{C}/\mathfrak{D}^{\sharp}\mathfrak{G}\}$ . The subject is performing the receiving, and the target of receiving is the giver.

E.g. 私が友達にプレゼントを**もらった**。 (I received present from friend.)

E.g. 友達からプレゼントをもらった。 (I received present from friend.)

E.g. これは友達に買ってもらった。(About this, I received the favour from friend of buying this.)

E.g. 宿題をチェックしてもらいたかったけど、時間がなくて無理だった。 (I wanted to receive the favour of homework checking, but there was no time and it was impossible.; もらう  $\rightarrow$  もらいたかった)

As a non-typical use case,  $\vartheta \dot{\varsigma} \ddot{\varsigma}$  can be used by the giver speaker if they want to emphasise that they are the one from whom the receiver received something.

E.g. その時計は私からもらったのよ。 (He received that watch from me.)

# G3.21.3 Soliciting favours (≠ request) with auxiliary verbs てくれる、てもらえる

Not to be confused with making requests  $(\S G3.22)!$  Asking for favours is softer and less direct: "would you do X for me", while making a request is more direct: "please do X".

The previous sections dealt with expressing the *actual event* of giving a gift or favour. The *solicitation* of a positive favour can be expressed as a question with <v te> $\tau <$  $\tau <$ 0? or <v te> $\tau <$ 5 $\tau <$ 3? Because the speaker is the recipient of the favour,  $\delta$ 1 $\tau <$ 3 is not applicable.

Note the potential form of もらえる. 「もらいますか?」 is used to when discussing or suggesting the idea of having someone else perform a favour. 「もらえますか?」 is a direct and polite way to request a favour. [IG]

- E.g. 「写真を取ってもらいますか?」 (Shall we ask that passerby to take a photo for us?)
- E.g. 「写真を取ってもらえますか?」 (Excuse me, could you take a photo for us?)

 $\sim \tau \leqslant \hbar \delta$  is used to ask for favours, but when its imperative form is used, it becomes a command  $\sim \tau \leqslant \hbar \delta$  [§G3.22.4].

E.g. あなたが、私に千円を**貸してくれる**? (Will you give me the favour of lending 1000 yen?; 貸す: to lend)

E.g. 私が、あなたに千円を貸してもらえる? (Can I receive the favour of you lending 1000 yen?)

The examples include the explicit giver and receiver. They are usually omitted if obvious.

E.g. 千円を貸してくれる? (Will you give me the favour of lending 1000 yen?)

E.g. 千円を貸してもらえる? (Can I receive the favour of you lending 1000 yen?)

The request can be made softer by using the negative てくれない? てもらえない? (and their polite forms てくれません。、てもらえません。).

E.g. ちょっと静かにしてくれない? (Won't you be a little quiet?)

E.g. 感じで書いてもらえませんか。 (Can you write this in kanji for me?)

The solicitation of a negative favour can be expressed as a question as <v te-negative>でくれる? or <v te-negative>でもらえる?. Basically negate the <v te> and attach で instead of て, then either くれる? or もらえる? as before.

E.g. 全部食べないでくれませんか。 (Can you not eat it all?)

E.g. 高いものを**買わないでくれる**? (Can you not buy expensive things?)

#### G3.22 Making requests ( $\neq$ favours)

Not to be confused with asking for favours (SG3.21.3)! Asking for favours is softer and less direct: "would you do X for me", while making a request is more direct: "please do X".

The following sections discuss four ways to issue requests, in decreasing order of politeness:

# G3.22.1 Honorific requests with ~てください。、~て

ください。 is the most common way of making requests. It is a special conjugation of くださる, the honorific form of くれる (§G3.21.1, §G3.21.3). ~ください must come at the end of the sentence or relative clause, just like です、ます.

On its own, くれる/ください can mean "please give me/hand me an object" as a transitive verb, using the schema <object>をください. This is useful for ordering items at a store.

E.g. それをください。 (Please give me that.)

E.g. それをくれる? (Can you give me that?)

E.g. 「それをください」とお父さんが言った。 (Father said, "Please give me that".)

ください can also mean "please do for me" as an auxiliary verb, with the schema <v te>ください. Negative requests are made the same way as with solicitation of favours (§G3.21.3), using <v te-negative>でください.

Table of Contents, §GA.1

E.g. 漢字で書いてください。 (Please write it in kanji.)

E.g. ゆっくり話してください。 (Please speak slowly.)

E.g. 落書ききを書かないでください。 (Please don't draw graffiti.; 落書き: graffiti)

E.g. ここに来ないでください。 (Please don't come here.)

In casual speech, the  $\langle \mathcal{H} \rangle$  is commonly dropped, so the naked te-form (or naked te-negative form) is used for making requests. Potential confusions with  $\supset \mathcal{T}$ , which is a short form for the indirect quotation <quote $> \mathcal{L} < v >$  [§G3.18.2] or the generic verb <quote $> \mathcal{L} \lor \mathcal{I}$   $\supset \mathcal{I}$   $\subset \mathcal{I}$  [§G3.19.2].

E.g. 日本語で話して。 (Please speak in Japanese.)

E.g. 消しゴムを貸して。 (Please lend me the eraser.; 消すゴム: eraser)

E.g. 遠いところに行かないで。 (Please don't go to a far place.)

## G3.22.2 Casual requests with ~ちょうだい。

頂戴 is 謙譲語 (humble language) for the transitive verb "to receive" and the auxiliary verb "please give me/do for me" (as ~をちょうだい/~てちょうだい). It is usually written using 仮名 alone. When written in 漢字, it is used as part of very formal expressions like 頂戴致します (致す: to do (humble)).

The grammatical rules for ちょうだい are exactly the same as ください, so it must come at the end of the sentence or relative clause. The same schemae apply: <object>をちょうだい and <v te>ちょうだい.

E.g. スプーンをちょうだい。 (Please give me the spoon.)

E.g. ここに名前を書いてちょうだい。 (Please write your name here.)

# G3.22.3 Polite firm requests with ~なさい/~な

なさい is a special honorific conjugation of する, and is a soft (polite) yet firm way of issuing a command. Common example usage situations include a mother scolding her child and a teacher wanting a delinquent student to pay attention. The schema is <v stem>なさい.

E.g. よく聞きなさい! (Listen well!)

E.g. ここで**座りなさい**。 (Sit here.; **座**る: to sit)

E.g. やめなさい! (Stop!)

In casual speech, さい can be dropped, leaving <v stem>な. Do not confuse this (e.g. 返信しな) with the imperative-negative form (e.g. 返信するな、§G3.22.4), which is <v dict>な!

E.g. まだいっぱい合うから、たくさん**食べな**。 (There's still a lot, so eat a lot.; 食べな is the contraction of 食べなさい)

E.g. それでいいと思うなら、そう**しな**よ。 (If you think that's fine, then go ahead and do it.; しな is the contraction of しなさい)

#### G3.22.4 Imperative form

The imperative form is the most direct and is thus rarely used in everyday conversation. It is a coarse type of speech that's only really used in fictional works, or in places where a stern command

must be given (e.g. traffic stop signs). Refer to §GA.1 for a full table of conjugations. Here, する、来る and くれる are exceptions (しろ、こい、くれ).

 $\sim \tau \leqslant \hbar \delta$  is used to ask for favours [§G3.21.3], but when its imperative form is used, it becomes a command  $\sim \tau \leqslant \hbar$ .

E.g. 好きにしろ。 (Do as you please.)

E.g. あっち**行け**! (Go away!)

E.g. 頑張れ! (Keep at it!; imperative form of 頑張る)

E.g. 早く酒を**持ってきてくれ**。 (Hurry up and bring some alcohol.; 持つ  $\rightarrow$  持ってくる  $\rightarrow$  持ってきてくれ)

E.g. 日本語で話してくれ。 (Speak in Japanese.)

E.g. 消しゴムを**貸してくれ**。 (Lend me the eraser.; 消すゴム: eraser)

E.g. 遠いところに**行かないでくれ**。 (Don't go to a far place.)

E.g. 止まれ。 (Stop (road sign).)

E.g. やめろ! (Stop!)

E.g. 死ね! (Die!)

Do not confuse this (e.g.  $\hat{\mathbf{g}}$ 信するな) with the polite firm request contraction  $\sim$ な (e.g.  $\hat{\mathbf{g}}$ 信じな, \$G3.22.3), whose schema is <v stem>な!

E.g. それを食べるな! (Don't eat that!)

E.g. 変なことを言うな! (Don't say weird things!)

#### G3.23 The number system

Read the supplementary article on Tofugu.

Finally we reach the point in the textbook that talks about the number systems in the Japanese language. There are three counting languages, based on the origins of the words: 和語 (Japanese language), 漢語 (Chinese origin/Sino-Japanese word), and 外来語 (loanword of Western origin).

The 漢語 counting method is the most common (いち、に、さん、し、よん、ご、ろく、しち、はち、く、じゅう). However, 4 is most often pronounced as よん (from 和語) to avoid the homophone with  $\stackrel{\checkmark}{\mathcal{H}}$  (death), 7 is most often pronounced as なな (from 和語) to avoid confusion with いち, and 9 is most often pronounced as きゅう to avoid the homophone with  $\stackrel{\checkmark}{\mathcal{H}}$  (suffering). Above 10, the reading is almost always よん and なな.

The 和語 counting method (ひ、ふ、み、よ、い、む、な、や、こ、とお) is exclusively used for small numbers from 1 to 10 (and exceptions like 20 days/-th day, 20 years old, sometimes 30 and 40). The exception is the reading for 4 (よん) and 7 (なな), which are almost always used regardless of how big or small the number is.

The 外来語 counting method follows English pronunciations (ワン、ツー、スリー、フォー、ファイブ、シックス、セブン、エイト、ナイン、テン) and is most notably used for the セット counter (for sets). It is rarely used for pure counting.

It is customary to write large numbers only in numbers as even 漢字 can become difficult to decipher. Even though Japanese uses a new word for every  $10^4$  (like Chinese, and instead of the  $10^3$  divide used by English and other languages), when written in numerals, the same  $10^3$  divide is used. E.g. 一萬 is written 10,000 or 1000.

#### G3.23.1 Numbers smaller than 1

Zero in Japanese is  $\xi$ , but more commonly pronounced as either ゼロ or マル. For reading decimals, we say 点 for teh dot, and read each individual number after the decimal point.

For negative numbers, simply say 「マイナス」 before the number.

E.g. 
$$-29.0021$$
 is マイナス、 $\stackrel{\stackrel{\iota}{=}}{=} \stackrel{\iota}{+} \stackrel{\iota}{+} \stackrel{\iota}{+} \stackrel{\iota}{+} \underbrace{}_{\iota}$ 、 $\operatorname{text}\{\dot{a}\}\{\tau\lambda\}$ 、ゼロ、ゼロ、 $\stackrel{\iota}{=}$ 、 $\stackrel{\iota}{=}$  、 $\stackrel$ 

#### G3.23.2 Dates

Read the main article on Wikipedia.

A date is formally written as YYYY 年 MM 月 DD 日. For instance, at the time of writing, today's date is 2024412960.

The date can alternatively be written using the Japanese regnal (counting up from the monarch's ascension) calendar, using the format 元号 n 年 (元号: era name). n starts as 1 in the Gregorian year the era's emperor ascends to the throne (also known as the 元年, "origin year" of era), and counts up to 2 the following Gregorian year. For instance, at the time of writing, today's date is 令和 6 年 1 2 月 6 日. The year 令和 6 年 can be abbreviated to R6 as well. Because the final year in a previous era is the same as the first year in the following era, during years of transition there are two ways to refer to that year (e.g. 2019 is both  $\widehat{\Psi}$ 成31 and  $\widehat{\diamondsuit}$ 和 1).

For the modern eras (starting from 1868), each emperor corresponds to one era. Each emperor inherits their era's 元号 posthumously as <元号>天皇, so it is rude to refer to the emperor using the era name! The reigning emperor is to be referred to as 天皇陛下 ("His Majesty the Emperor") or 今上天皇 ("current emperor").

The eras are summarised in Table 13.

Table 13: Modern eras in the Japanese regnal calendar.

<b>元号</b>	Emperor	元年	Abbreviation range	Notable years
朝治 Meiji	환경 Mutsuhito	1868・明治1	M1-M45	
大正 Taishō	ましひと 嘉仁 Yoshihito	1912・明治45・大正1	T1-T15	
昭和 Shōwa	裕仁 Hirohito	1926・大正15・昭和1	S1–S64	1945 = 昭和20
平成 Heisei	あきひと 明仁 Akihito	1989・昭和64・平成1	H1–H31	
れい か 令和 Reiwa	を 徳仁 Naruhito	2019・平成31・令和1	R1-present (令和7)	2020 = 令和 2 2025 = 令和 7

#### G3.23.3 Systemic reading changes for counters

Once acquainted with the basic three numbering systems, the next thing is to gain exposure to the various counters (similar to the Chinese language). Pronunciations morph a little based on a largely deterministic set of rules, as shown in Table 14. Detailed examples are in the supplementary PDF.

The known counters 枚、台、秒、番、日、駅 do not encounter these reading changes.

Table 14:	Systemic reading	changes of num	eric counters. T	he じゅう row alv	ways admits U =	, but that pron	unciation is rare.	$^{\dagger}$ Informal pro	nunciation.

G3.23.4 Ordinals counters  $\sim$  的 / 第  $\sim$ 

Read the discussion on Reddit.

The 自 suffix or 第 prefix can be attached to any of the counting numerals to indicate ordinal position. Note that 第 forces 漢語 readings of certain counters (notably  $\stackrel{\circ}{\exists} \rightarrow \stackrel{\circ}{\exists}$ ), as shown by example in §SB.24.

Use of the  $\exists$  suffix is preferred when:

- in slightly casual settings
- order is not predetermined or fixed (e.g. rankings)
- order is not significant (e.g. rankings)

Use of the 第 prefix is preferred when:

- in slightly formal settings
- the order is predetermined and fixed (e.g. chapters in a book, episodes of a show, questions
- the order is significant (e.g. first impression, first bank)

#### G3.24 Casual and slang speech

Just like how English slang is designed for communication efficiency (or style), and is pretty wack when compared to proper standard English, Japanese slang is the same. Slang vocabulary is growing with each new generation. Japanese slang is also heavily influenced by local dialects, though most of the content here is suited for the greater 東京 area.

In Japanese slang, anything goes and rules that apply to written Japanese are often broken, but you have to break them correctly. This is something that requires real practice with real people in real-world situations. Generally, the fundamental goal of slang is to make things easier to say by reducing mouth movement: many sounds are shortened or slurred together for that purpose.

E.g. ここは**つまんない**つまらないから、私**んち**の家**火**行こう。 (It's boring here, let's go to my place.; つまらない: boring)

E.g. **ったく**<sup>まったく</sup>、いつまでこんな**とこ**<sup>ところ</sup>で、グズグズ**すんだ**<sup>するんだ</sup>よ。 (Good grief, when are you going to linger in this kind of place until?; グズグズする: to linger/hesitate)

#### G3.24.1 Sentence ordering

A complete grammatically correct sentence typically ends with a verb.

The usual ordering comprises of six elements [IG]:

- 0. <topic>は
- 1. <いつ>に (when)
- 2. <どこ>で (where)
- 3. <誰>が (who)
- 4. <誰>と (with who)
- 5. <どの>ように (how)
- 6. <何>を**する** (verb)

In Japanese slang, this is often bent. In conversations, it's typical to say the first thing that comes up in our thoughts, without thinking about how to structure the whole sentence properly. Often, this first thought is the verb. Once the verb has already out of your mouth, you'd then follow up with an explanation of what you mean: the surrounding context and such.

E.g. それは何? (proper; What is that?)

E.g. 何それ? (slang; What is that?; a contraction of 何?それ。)

E.g. 見た?あの人? (Did you see? That guy?)

E.g. もう食べた?昨日買ったアイス。 (Have you eaten it? The ice cream I bought yesterday.)

#### G3.24.2 Seeking positive confirmation with じゃない and じゃん

じゃない is an い-adjective that can be used as a question to weakly assert the positive (with a seeking confirmation tone, like the ね particle). It expresses the nuance that you're relatively sure but it's still a question. じゃん is its slang contraction, and can be attached to the end of any sentence and any part-of-speech. regardless じゃない is slightly feminine, while じゃん is neutral.

E.g. サラリーマンだから、残業はたくさんするんじゃない? (Because he's a salaryman, he probably does a lot of overtime (don't you think?).)

E.g. まあ、いいじゃない。 (Well, it's probably fine (don't you think?).)

E.g. まあ、いいじゃん。 (Well, it's probably fine (don't you think?).)

E.g. ほら、やっぱりレポートを書かないとだめ**じゃん**。 (See, as I thought, you have to write the report.)

E.g. 誰もいないからここで着替えてもいいじゃん。 (Since there's nobody, it's probably fine to change here.)

E.g. たかし君は、ここにいる?知らない。あっ!やっぱゃっぱり、いるじゃん! (Is Takashi-kun here? Dunno. Ah! See, he's here!)

The questioning, seeking confirmation tone can be strengthened by adding the question particle  $\dot{\mathcal{D}}$  ( $\mathcal{C} \approx \lambda \dot{\mathcal{D}}$ ), even in informal settings.

E.g. 駅の近くにカラオケがある**じゃんか**。うん、あそこのすぐ 隣。(There's a karaoke place near the station, right? Yes, it's right next to it.; すぐ: immediately/directly, 隣: next to/adjacent)

#### G3.24.3 Showing contempt for an action with auxiliary verb やがる

The auxiliary verb やがる (used as <stem>やがる) indicates hatred, contempt or disdain for another's action. This is derogatory and is only used inside of movies, comic books and games.

E.g. あんなやつに負けやがって。じゃ、どうすんだよ? (Losing to a guy like that. Well, what are you going to do?)

E.g. やる気か?だったらさっさと来やがれ! (You want to fight? If so, then hurry up and come on!: ~やがれ is the imperative form of ~やがる)

## G3.24.4 The 何 mispronunciation and filler word なんか

何か means "something" and its correct reading is なにか, but in slang it is often contracted to なにか.

E.g. **なんか**<sup>何</sup>か食べる?

Also, なんか is a filler word like "like..." in English. It has no special meaning, though it may express slight uncertainty about the word that comes immediately after. This filler word is written in 仮名 only and has got nothing to do with the word 何か for "something".

E.g. 今日は、なんか忙しいみたいよ。 (I guess he's like busy today.)

E.g. なんかね。お風呂って超気持ちいいよね! (Like, baths feel really good, huh?)

E.g. お母さんが、なんか明日まで戻らないんだってよ。 (Mom said she's not coming back until like tomorrow.)

E.g. なんかさ。ボブは、私のことなんか本当に好きかな? (Hey like, does Bob like really like somebody like me?; さ particle (§G3.25), かな question particle (§G3.25.1)).

# G3.25 More sentence ending particles な、さ and gender-specific ones わ、ぞ、ぜ

な、さ are casual forms of the ね、よ particles respectively, which were introduced in §G2.12.

• \$\mathcal{Z}\$: a rough casual form of \$\mathcal{A}\$ (to express seeking and expectation of agreement, like "right?/ isn't it?" in English), and is preferred when  $\Delta$  sounds too soft or reserved for what you're trying to say.

E.g. 今、図書館に行くんだよな。 うん、なんで? (You are going to the library now huh? (seeking explanation) Yeah, why?)

E.g. 日本語は、たくさん勉強したけどな。まだ全然わからない。大丈夫よ、きっとわかるよ うになるからさ。ならいいけどな。 (I studied Japanese a lot, right? But I still don't get it at all. No problem, you know? Because you'll become able to understand for sure. If so, it would be good.)

•  $\mathfrak{Z}$ : a very casual form of  $\mathfrak{Z}$  (to express that you're informing something new, like "you know..." in English), and is used like the English filler "like...". It's not a very sophisticated manner of speech, but it's over-used and an easy habit to fall into, just like how "like" is over-used in English.

あの**さ**… うん。この間**さ**… うん。ディズニーランドに行ったんだけど**さ**、なんか**さ**、すご い込んでて… うん。何もできなくてさ… (Hey...{} Yeah. This one time...{} Yeah. I went to Disney Land and it was really crowded...{} Uh huh. Couldn't do anything...{}; 間: period of time during, 込む: to be crowded)

The following three are sentence-ending particles used purely for emphasis and have no further special meaning. They make your statements sound much stronger and gender-specific.

• か: feminine emphasis version of よ (to express that you're informing something new, like "you know..." in English).

E.g. もう時間がないわ。 (There is no more time.)

• ぞ、ぜ: masculine/"cool" emphasis versions of よ (to express that you're informing something new, like "you know..." in English).

E.g. おい、行くぞ! (Hey, we're going!)

E.g. これで、もう終わりだぜ。 (With this, it's over already.)

Note that females can use  $\mathcal{E}/\mathcal{E}$ , and males can use  $\mathcal{D}$  too, for coolness or softness respectively.

#### G3.25.1 Question particle かな and gender-specific ones かしら、かい、だい

The  $\mbox{$\mathcal{L}$}$  (casual  $\mbox{$\mathcal{L}$}$ ) particle can be combined with the question particle  $\mbox{$\mathcal{L}$}$  to form  $\mbox{$\mathcal{L}$}$ , typically used when the speaker is considering something.  $\mbox{$\mathcal{L}$}$  is the feminine version of  $\mbox{$\mathcal{L}$}$ .

E.g. 今日は雨が降るかな? (I wonder if it'll rain today.)

E.g. いい大学に行けるかな? (I wonder if I can go to a good university.)

E.g. いい大学に行ける**かしら**? (I wonder if I can go to a good university.)

 $\beta V$  (only for yes/no question) and EV (only for open-ended question) are masculine question particles.

E.g. おい、どこに行くんだい? (Hey, where are you going?)

E.g. さきちゃんって呼んでもいいかい? (Can I call you Saki-chan?)

E.g. 一体いつに帰ってくるつもりだったん**だい**? (What time were you planning on coming home exactly?)

E.g. 俺は土曜日、映画を見に行くけど、一緒に行く**かい**? (I'm going to see a movie on Saturday, want to go together?)

#### G3.26 Example conversations

Here are two example conversations to apply what we've learnt in this entire "essential grammar" section.

• アイス:加賀先生、ちょっと質問を聞いてもいいですか。 (Kaga-sensei, is it ok to ask you a question?)

加賀先生:はい、いいですよ。 (Sure.)

アリス:「Hello」を日本語で**何と言えば**いいですか。(How do you say "Hello" in Japanese?; quotation + conditional form of 言う)

加賀先生:そうね。だいたい、「こんにちは」**と言うと思います**よ。ただし、書く時は「こんにちわ」**じゃなくて**、「こんいちは」と書かなくてはなりません。 (Well, mostly, I think

people say "konnichiwa". However, when you write it, it is not "konnichiwa"; you must write "konnichiha"; nested quotation + quotation; negative sequence of states)

アリス:そうですか。他に何かいい表現はありますか。(Is that so? Are there any other good expressions?; 他: other (Do not confuse with 彼!) "Other something good expression, exist?") 加賀先生:これも**覚えといて**ね。朝は、「おはよう」と言うの。でも、上の人には「おはようございます」と言ってください。 (Do remember this too (in preparation for the future). In the morning, everybody says "ohayou". But, to a higher person, please say "ohayou-gozzaimasu".; 覚える  $\rightarrow$  覚えておく  $\rightarrow$  覚えとく  $\rightarrow$  覚えといてください (te-form request of casual form of 覚えておく))

アリス:はい、わかりました。間違えないようにします。いい勉強になりました! (Ok, I got it. I'll try not to make that mistake. That was very informative ("it became good study")!)

• 洋介: お!アリスだ。あのね、質問を聞いてもいい? (Oh! It's Alice. Hey, can I ask you a question?)

アリス:何? (What's up?)

洋介: ちょっと英語を**教えてもらいたい**んだけどさ、もし時間があれば、教えてくれない? (I want to learn English, so if you have time, can you teach me? 教えてもらいたい is the desiderative form of 教えてもらう.)

アリス:え?英語を勉強するの? (Huh? You're going to study English?)

洋介: うん、アメリカで留学**してみたいなと思って**ね。去年も**行こうとした**けど、お金がなくて… (Yeah, I was thinking about trying out studying abroad in America. I attempted going last year too, but I didn't have money.; 留学してみたい + な sentence ending particle + quotation + 思って; 行こうとする: to attempt to go)

アリス: そうなの?いいよ。いつ教えてほしいの? (Really? No problem. When do you want me to teach you?)

洋介:いつでもいいよ。 (Anytime is good.)

アリス:じゃ、来週の木曜日からはどう? (Then, how about from next Thursday?)

洋介: うん、いいよ。ありがとう! (Yeah, that's good. Thank you!)

ありす:勉強を**急けたり、来なかったりしないで**ね。 (Don't shirk on your studies or not come, ok?: 怠ける: to laze)

洋介: そんなことしないよ! (I won't do anything like that!)

#### G4 Special expressions

This section is named "special expressions" because except the first few subsections, most of the grammar here applies to more specific use-cases. However, this "special expressions" section as as whole is necessary for everyday conversations.

#### G4.1 Causative, passive and causative-passive forms

We finally learn the last three major verb conjugations.

# G4.1.1 Causative form $\sim$ $\overset{*}{\bigcirc}$ {せる/す}

The causative form of verbs indicate that someone was made to perform the verb. It has two senses: making somebody do something, and letting someone to do something. Disambiguation between the two senses is based on context!

When the causative form is used with  $\delta \mathcal{F} \delta / \langle \lambda \delta \rangle$ , it almost always means to "let someone do". Otherwise, it usually means "make someone do".

For detailed conjugation rules, refer to §GA.1. All causative form verbs are 3-verbs. Further conjugations follow 3-verb rules.

When listening,  $\sim 0$  is the signal for passive voice, though for 3-verbs there is potential conflict with the potential form.

E.g. 全部食べさせた。 (Made/let someone eat it all.)

E.g. 全部食べさせてくれた。 (Let someone eat it all.)

E.g. 先生が学生に宿題をたくさん**させた**。 (Teacher made students do lots of homework.)

E.g. 先生が質問をたくさん**聞かせてくれた**。 (Teacher let someone ask lots of questions.; 聞く  $\rightarrow$  聞かせる (causative)  $\rightarrow$  聞かせてくれる (to give the favour))

E.g. 今日は仕事を**休ませてください**。 (Please let me rest from work today.; 休む → 休ませる (causative) → 休ませてください (desiderative of causative, "let-do" sense))

E.g. その部長は、よく 長 時間 **働 かせる**。 (That manager often makes people work long hours.; 働 く (to work)  $\rightarrow$  働かせる (causative))

When asking for permission to let someone do something (including letting yourself do something), it's more common to use the  $\lceil \sim \tau \in VV \rfloor$  grammar (§G3.16.3).

E.g. お手洗いに**行かせてくれません**か。 (Can you let me go to the toilet? (sounds like a prisoner, even in English))

E.g. お手洗いに**行ってもいい**ですか。 (Is it ok to go to the toilet?)

In very rough/casual slang, the causative form may be expressed with the  $\mathfrak{I}$ -verb ending  $\sim \mathfrak{I}$ . For detailed conjugation rules, refer to §GA.1. All causative form verbs are  $\mathfrak{I}$ -verbs. Further conjugations follow  $\mathfrak{I}$ -verb rules (with  $\mathfrak{I}$  ending).

E.g. 同じことを何回も言わす 言わせるな! (Don't make me say the same thing again and again!)

E.g. お腹空いているんだから、なんか**食べさしてくれ**<sup>食べさせてくれ</sup>よ。 (I'm hungry, so let me eat something.: 食べる  $\rightarrow$  食べさす  $\rightarrow$  食べさしてくれる  $\rightarrow$  食べさしてくれ (imperative))

#### G4.1.2 Interlude I: passivisation, direct and indirect/adversative passives

Read the supplementary materials on [TFG1] and [TFG2].

There is no such thing as a "suffering passive": there is nothing in the language that indicates that someone is suffering from a passive verb. The "suffering" connotation comes the passive verb indicating that the experiencer has no control over the performed action. ([TK])

Note that parts-of-speech (e.g. object, subject) are purely grammatical (syntactic) roles. An entity being the performer of the action or the receiver of the action's effects are semantic roles. Semantic roles do not change under passivisation (otherwise the sentence's meaning changes), whereas grammatical roles may change.

(SL) In English, passivisation can only be applied to a sentence containing a transitive verb. When it occurs, the object is promoted to the subject position, and the subject is demoted to an oblique (a non-required argument).

In Japanese, passivisation is a bit more flexible: intransitive verbs can be passivised too.

We now distinguish between the direct and indirect/adversative passives in Japanese.

• Direct passive (transitive only): used to express that the transitive verb was done to someone/something (subject experiencer; marked by  $\mathcal{D}^{\sharp}$ ), by someone (origin oblique/optional performer; marked by  $(\zeta)$ . The effect that the action has on the experiencer is very obvious. since the verb is done directly to them (promoted to subject grammatical role). The subject (demoted to an oblique) is often omitted as it's not important. The Japanese direct passive is equivalent to the English passive.

The semantic performer is the syntactic origin after passivisation and marked by  $\ell \subset \ell \subset \mathcal{L}$ . This usage of に as origin rather than destination is very similar to もらう's usage (§G3.21.2.) [TFG]), since the passive subject is the receiver (experiencer) in the transaction (action).

E.g. ピカソに**キスされた**。 (I was kissed by Picasso.)

E.g. タバコが**吸われた**。 (A cigarette was smoked.)

• Indirect passive (both transitive and intransitive): used to express that someone (origin performer; marked by  $\mathcal{E}$ ) did a <u>transitive/intransitive verb</u>, involving an optional direct object (only for transitive verbs; marked by を), and it had an effect on someone (experiencer; marked by はが; [TK]). There is no equivalent in English. The adverastive nuance is not guaranteed, though very likely present in indirect passive sentences.

E.g. (私は) (あのおじさんに) タバコを吸われた。(I got smoked on (by that man).:[TFG1])

In the above example, the passive verb is 吸われた, the experiencer is me, and the performer is あのおじさん (marked by origin particle に). The indirect passive emphasises that this act of smoking was done to me, and that I did not have control over it, creating the nuance that the act was a nuisance.

E.g. ブラット・ピットに目の前でタバコを**吸われて**、気絶するかと思った。(I got smoked on by Brad Pit right in front of me, and I thought I was going to faint.; 氨純: loss of consciousness: more natural translation would be "Brad Pitt smoked right in front of me, and I thought I was going to faint."; [TFG1])

In the above example, the indirect passive is used, but the effect may not be adversative depending on the context: I could be fainting from the smoke, or from the fact that it's Brad Pitt.

Except for a few cases, the indirect passive is always formed with verbs that were intentionally performed by some *one*. The performer of the verb (marked by  $\mathcal{l} \mathcal{l} \$ 

E.g. 私は本に頭に落ちられた。 (My head was fallen on by a book.; [TFG1]) Unnatural sentence: the performer should not be an object.

E.g. 突然雨に降られた。 (All of a sudden, I was rained on.; 降る is intransitive; [TFG1])

E.g. だろが隣の学生にピアノを朝まで弾かれた。(Hanako had the student next to her play the piano on her until morning.; a more natural translation is "Hanako was adversely affected by the student next to her playing the piano until morning."; [Wiki])

For a deeper treatment of the passive voice, refer to the postlude (§G4.2).

#### G4.1.3 Passive form ~ うれる

The passive voice in Japanese is often used in written essays and articles. Read more about passivisation in §G4.1.2.

For detailed conjugation rules, refer to §GA.1. All passive form verbs are る-verbs. Further conjugations follow る-verb rules. Note that for る-verbs and 来る, the passive form is identical to the potential form (~られる); disambiguation requires context and is otherwise impossible.

When listening,  $\sim 0$  is the signal for passive voice, though for 3-verbs there is potential conflict with the potential form.

In Japanese, the standard SOV sentence schema is  $\langle \text{subject} \rangle \mathcal{D}^{\tilde{s}} \langle \text{object} \rangle \mathcal{E} \langle \text{transitive v} \rangle$ , or  $\langle \text{performer} \rangle \mathcal{D}^{\tilde{s}} \langle \text{experiencer} \rangle \mathcal{E} \langle \text{transitive v} \rangle$  in semantic terms. After passivisation into the **direct passive**, it becomes  $\langle \text{performer} \rangle \mathcal{E} \langle \text{experiencer} \rangle \mathcal{D}^{\tilde{s}} \langle \text{transitive v passive form} \rangle$ . Notice that the semantic performer is now the syntactic origin (marked by  $\mathcal{E}$ ), and the semantic experiencer is now the syntactic subject (marked by  $\mathcal{D}^{\tilde{s}}/\mathcal{E}$ ). This is very similar to  $\mathcal{E} \mathcal{D}^{\tilde{s}}$  susage of  $\mathcal{E}$  as a origin particle (§G3.21.2, [TFG]), since the passive subject is the receiver (experiencer) in the transaction (action).

E.g. ポリッジが誰かに**食べられた**! (The porridge was eaten by somebody!)

E.g. みんなに変だと言われます。 (I am told by everybody that (I'm/it's) strange.)

E.g. 光の速さを超えるのは、不可能だと**思われる**。 (Exceeding the speed of light is thought to be impossible.)

E.g. この教科書は多くの人に**読まれている**。 (This textbook is being read by a large number of people.)

E.g. 外国人に質問を**聞かれた**が、答えられなかった。 (I was asked a question by a foreigner, but I couldn't answer.)

E.g. このパッケージには、あらゆる物が**含まれている**。 (Everything is included in this package.; あらゆる: all, 含む: to contain)

In a similar sense to how it's more polite to address someone indirectly, and how it's more polite to ask negative questions than positive ones (§G3.4.2), the passive form makes the sentence less direct because the subject (now the experiencer) does not directly perform the action. In increasing levels of politeness of expressing "what will you do?":

- 1. (active voice) どうする?
- 2. (active voice, polite) どうしますか。
- 3. (passive voice, polite) どうされますか。
- 4. (??? voice, 尊敬語, S???) どうなさいますか。
- 5. (??? voice, 尊敬語, less certainty, S???) どうなさいますでしょうか。

With increasing indirection and politeness, the sentence grows longer and longer.

E.g. 領収証はどうされますか。 (What about your receipt?)

E.g. 明日の会議に**行かれる**んですか。 (Are you going to tomorrow's meeting?; passive voice deliberately used for politeness)

# G4.1.4 Caustive-passive form ~ ひせられる

The causative-passive form is used to express the idea that the action of "making someone do something" was performed to that person, or in short, the idea that someone was made to do something. The verb is first conjugated to the causative then the passive, never the other way round.

For detailed conjugation rules, refer to §GA.1. All passive form verbs are 3-verbs. Further conjugations follow 3-verb rules.

The causative-passive form is a variant of the passive voice, so the & particle marks the *origin*, i.e. the performer of the action.

When listening,  $\sim$   $\overset{*}{\bigcirc}$ せられ is the signal for causative-passive voice.

E.g. 朝ごはんは食べたくなかったのに、食べさせられた。 (Despite not wanting to eat breakfast, I was made to eat it.)

E.g. 日本では、お酒を**飲ませられる**ことが多い。 (In Japan, the event of being made to drink is numerous.)

E.g. あいつに二時間も**待たせられた**。 (I was made to wait 2 hours by that guy.)

E.g. 親に毎日宿題を**させられる**。 (I was made to do homework everyday by my parents.; 親: parents)

The following shortened causative-passive form only exists for 5-verbs with  $* \ 5$ -ending.

In very rough/casual slang, the shortened causative-passive form (derived from the shortened causaive form, §G4.1.1) may be used. This form only exists for 5-verbs with the exception of those with a  $\dagger$ -ending in dictionary form, because wherever the shortened causative form ends with ~さす, the shortened causative-passive form would have 「…さされる」 in it, which is not allowed.

E.g. 学生が廊下に**立たされた**立たせられた。 (The stuednt was made to stand in the hall.; 立つ: to stand)

E.g. 日本では、お酒を**飲まされる**<sup>飲ませられる</sup>ことが多い。 (In Japan, the event of being made to drink is numerous.)

E.g. あいつに二時間も**待たされた**<sup>待たせられた</sup>。 (I was made to wait 2 hours by that guy.)

#### G4.2 Postlude: a deep dive into passivisation in Japanese

Read the article chain starting from [TMJK1].

This website is a teachers' reference, and I obtained it from a Quora answer. For the interest of time and for the sake of not losing focus on the main task at hand (learning how passivisation works in Japanese), I'll be taking notes after translating the website. I hope that one day I'll be able to read such websites directly without the help of translation. What's holding me back at the moment is lacking a fair bit of grammar knowledge and a lot of vocabulary knowledge...

# G4.2.1 Introduction into the passive voice 受動態

Read the main article on [TMJK1].

The passive voice (受身、受動態) has multiple interpretations. There are distinct subsets of passive voice (expressions A and B on TMJK's Venn diagram) that are highly similar. At the beginner level, where the students' grammar and vocabulary knowledge are very limited, it is not possible to cover the nuances between similar usages. Instead, we'll first study parts of A and B that are as far away as possible from where they may overlap, such that their differences are more perceivable and gentler to learn. Some beginner-level grammar will be used; such grammar is not meant for natives but is useful for non-native learners.

There are over ten types of passive voice, if we want to pedantically differentiate them all.

#### G4.2.2 Classifications of the passive voice

Read the main article on [TMJK2].

The reason passive voices are difficult for students is that they have to learn so many forms in one day, at one go.

From the みんなの日本語 textbook, there are six:

- 1. 私は部長に**褒められました**。 (I was praised by my boss.; 褒める: to praise (transitive)) 私は部長に仕事を**頼まれました**。(I was requested by my boss to do work.; 頼む: to request/entrust to (transitive))
- 2. 私は誰かに足を**踏まれました**。 (My foot was stepped on by someone. **踏む**: to step on (transitive))

私は母に漫画の本を**捨てられました**。(My manga books were thrown away by my mom.; 捨てる: to throw away (transitive))

- 3. 大阪で展覧会が開かれます。 (The exhibition will be held in Osaka.; 開く: to open (business) (intransitive))
  - 大阪で国際会議が**行われます**。 (An international conference will be held in Osaka.; **行**う: to perform/carry out (transitive))
- 4. この美術館は来月**壊されます**。 (This art museum will be demolished next month.; 壊す: to break/demolish (transitive))
  - この美術館は200年前に**建てられました**。 (建てる: to construct (transitive))

- 5. 日本の車はいろいろな国へ輸出されています。 (Japanese cars are exported to many countries.; 輸出する: to export (transitive))
  - 洗濯機はこの工場で組み立てられています。 (Washing machines are assembled in this factory.; 組み立てる: to assemble (transitive))
- 6. 「源氏物語」は紫 式部によって**書かれました**。 (The Tale of Genji (Heian-period classic) was written by Murasaki Shikibu.; 書く: to write (transitive))

電話はグラハム・ベルによって**発明されました**。 (The telephone was invented by Graham Bell.; 発明する: to invent (transitive))

There are two particles 「に」 and 「より」 associated with the passive voice. To learn them both in one day is asking too much from learners. みんなの日本語 also misses out passive intransitive verbs such as 「雨に降られた。」.

From the 大地 textbook, there are four:

- 1. 私は先生に**呼ばれました**。 (I was called by my teacher.; 呼ぶ: to call out to (transitive)) 私は先生に注意されました。 (I was reprimended by my teacher.; 注意する: to reprimend)
- 2. (†) 私は子どもにカメラを**壊されました**。 (I had my camera broken on by my child.; 壊す: to break/demolish (transitive))
  - (†) 私は雨に**降られました**。 (I was rained on.; **降**る: (of precipitation/ash) to fall (intransitive))
- 3. 大阪で会議が**開かれます**。 (The meeting is held in Osaka.; 開く: to open (business) (intransitive))
  - 金沢は小 京都と言**われています**。(Kanazawa is said to be a Little Kyoto (small town with historical features reminiscent of Kyoto).; 言う: to be called/defined (transitive))
- 4. 源氏物語 は 紫 式部によって**書かれました**。 (The Tale of Genji (Heian-period classic) was written by Murasaki Shikibu.; 書く: to write (transitive))
- Here, (†) are examples of the intransitive passive. The 「~と言われています」 construct (言う  $\rightarrow$  言われる (passive)  $\rightarrow$  言われている (progressive passive)  $\rightarrow$  言われています (polite progressive passive)) is very often used in the passive voice ("it is said that...").

The burden on learners can be significantly reduced by dividing the teaching up into parts. For the six forms in みんなの日本語, we can group them into two groups:  $\{1,2\}$  and  $\{3,4,5,6\}$ . The first two kinds involve emotion, while the last four don't.

Furthermore, a distinct feature of the Japanese passive voice is the adversative passive interpretation (迷惑の受勢). However, whether an action is adversative depends less on the sentence structure, and much more on the meaning of the verb used. There is therefore nothing inherently in the grammatical rules and syntax that suggest adversativity. The passive voice can be used for both positive and negative emotions, even if the passive voice always conveys the idea that the experiencer has no control over the action and its performer.

E.g. 私は先生に**養められました**。(non-adversative; I was praised by my teacher.; 褒める: to praise (transitive))

E.g. 私は先生に**しかられました**。 (adversative; I was scolded by my teacher.; しかる: to scold (transitive))

To start off, fix the experiencer to always be "me", and fix the sentence structure to be  $\lceil \frac{1}{2} \rceil$   $\langle \frac{1}{2} \rangle$  The experiencer will change later as we progress further  $\langle \frac{1}{2} \rangle$  GeV.

#### G4.2.3 The grammar rules of passives

Read the main articles on [TMJK3] and [TMJK4].

For the sake of ease of understanding, we categorise the passive voice into two broad groups:

• 直接受身のグループ (direct passive group). Broadly speaking, in this group, the subject (suffixed by は/が) has something done to them <u>directly</u> by someone (suffixed by に).

Members include:

- ・ 直接受身 (direct passive), a.k.a. 直接対象の受身 (direct target passive)、相手の受身 (other party passive)
  - <experiencer> $\{\mathcal{D}^{\sharp}/l\sharp\}$ <performer> $l\mathbb{Z}$ <v transitive passive>, where <experiencer> IS the promoted object of the corresponding active voice sentence.
- ▶ 中立の受身 (neutral passive)
- 間接受身のグループ (indirect passive group). Broadly speaking, in this group, the subject (suffixed by は/が) has something done to them <u>indirectly</u> by someone (suffixed by に).

Members include:

- ▶ 間接受身 (indirect passive)
  - <experiencer> $\{\mathcal{D}^{\sharp}/l\sharp\}$ <performer> $l\mathbb{Z}$ <v transitive passive>, where <experiencer> is NOT the promoted object of any active voice sentence.
- ▶ 迷惑の受身 (adversative passive)
- ▶ 持ち主の受身 (possessive passive)
  - <experiencer-owner> $\{\mathfrak{D}^{\sharp}/l\mathfrak{T}\}$ </experiencer> $l\mathfrak{T}$ </exv transitive passive>, where <experiencer> is NOT the promoted object of any active voice sentence.
- ▶ 自動詞の受身 (intransitive passive)
  - <experiencer>{ $\begin{subarray}{c} \begin{subarray}{c} \begi$

At the end of the day, from this landscape, the syntax is mostly the same.

We now look at the direct, indirect, possessive and indirect passives more closely. Here are their definitions (定義).

1. **直接受身** (direct passive).

<experiencer> $\{\mathcal{D}^{\sharp}/l\mathfrak{T}\}$ </experiencer> $l\mathfrak{T}$ </ev>
v transitive passive>, where <experiencer> IS the promoted object of the corresponding active voice sentence.

• There is a corresponding active voice sentence.

[能動文] 太郎はジョンを殴った。 (Taro punched John.; 殴る: to punch (transitive))

[受動文] ジョンは太郎に殴られた。 (John was punched by Taro.; 殴る: to punch (transitive))

• Adversative nuance is not guaranteed (depends on the passivised verb).

[迷惑の意味がない] 私は先生に褒められた。 (I was praised by my teacher.; 褒める: to praise (transitive))

[迷惑の意味がある] 私は先生にしかられた。 (I was scolded by my teacher.; しかる: to scold (transitive))

• Exists in English.

Because the direct passive is equivalent to the English passive, the direct passive is easy for English speakers to understand.

2. **間接受身** (indirect passive).

When translating indirect passives into English, purposely place the origin at the end of the sentence as "by <origin>", then the rest of the sentence is usually expressed as "<experience> got <v passive> on by <origin>".

<experiencer> $\{\mathcal{D}^{\sharp}/l\sharp\}$ </experiencer> $l\mathbb{Z}$ </e>v transitive passive>, where <experiencer> is NOT the promoted object of any active voice sentence.

• There is no corresponding active voice sentence.

のうとうぶん となり せき [能動文] 隣の席の人が大声で話した。 (The person in sitting next to me spoke loudly.; 話す: to speak (transitive))

[受動文] 私は隣の席の人に大声で話された。 (I was spoken to loudly by the person sitting next to me.; 話す: to speak (transitive))

The passive sentence contains the experiencer semantic role 「私」 (syntactic subject). In the closest equivalent active sentence, this subject does not take on the semantic experiencer role (of the verb 話す). Another way to think about this: the semantic experiencer (syntactic subject) in the passive sentence was not promoted from a grammatical object of any active sentence. Therefore, there is no corresponding active sentence.

The *indirect* passive is named as such because 「私」 was not directly affected by verb 「話す」, only *indirectly* so.

• Adversative nuance is guaranteed.

See above point.

• It is difficult to translate to English.

The indirectness of the indirect passive has no equivalent in English.

3. 持ち主受身 (possessive passive). The possessive passive is sometimes grouped together with 間接受身のグループ, and sometimes considered to be in a category of its own.

<experiencer-owner> $\{\mathcal{D}^{\sharp}/l\sharp\}$ <performer> $l\sharp$ <ownee> $\sharp$ <v transitive passive>, where <experiencer> is NOT the promoted object of any active voice sentence.

E.g. (私は)スリに**財布を**取られた。(My wallet was stolen by a pickpocket.; スリ: pickpocket, 取る: to steal (transitive))

The *possessive* passive is named as such because the direct object (suffixed by  $\mathcal{E}$ ) of the passive verb belongs to the subject (suffixed by  $\mathcal{U}/\mathcal{D}^{\sharp}$ ).

• There is no corresponding active voice sentence.

『能動文』弟が**私の携帯を**壊した。 (My younger brother destroyed my cell phone.; 携帯: mobile phone; 壊す: to break/destroy (transitive))

[受動文] **私は**弟に**携帯を**壊された。 (I got my cell phone destroyed by my brother.; 壊す: to break/destroy (transitive))

In the possesive passive sentence, the experiencer semantic role is 「私」 (syntactic subject). In the closest equivalent active sentence, 「私」 is merely a label to 財布 and does not take on the experiencer semantic role. Therefore, there is no corresponding active sentence.

• Adversative nuance is not guaranteed (depends on the passivised verb).

[迷惑の意味がある] (私は) 田中さんに日本語をけなされた。 (adversative; I got my Japanese disparged by Tanaka-san.; けなす: to speak ill of/disparage (transitive))

[迷惑の意味がない] (私は) 田中さんに日本語を褒められた。 (non-adversative; I got my Japanese praised by Tanaka-san.; 褒める: to praise (transitive))

#### Some usage pointers.

 When the passive sentence involves body parts of the owner, the direct passive is unnatural.

[自動詞の受身、自然] (私は) 隣の人に満貨電車で足を踏まれた。(I got my foot stepped on on me by someone next to me on a fully-booked train.; more natural translation is "My foot was stepped on by someone next to me on a fully-booked train." 遊む: to step on (transitive))

#### [直接受身、不自然] 私の足が踏まれた。

• When the passive sentence involves possessions of the owner, the direct passive is also possible.

[自動詞の受身、自然] (私は) 田中さんにパソコンを壊された。 (I got my computer broken on me by Tanaka-san.; 壊す: to break/destroy (transitive))

[直接受身、自然] 私のパソコンが田中さんに壊された。 (My computer was broken by Tanaka-san.)

• When the passive sentence involves parties related to the owner, the direct passive is also possible.

[自動詞の受身、自然] (私は) 先生に息子をけなされた。 (I got my child disparaged on me by his teacher.; けなす: to speak ill of/disparage (transitive))

[直接受身、自然] 私の息子は先生にけなされた。 (My child was disparaged by his teacher.)

4. **自動詞の受身** (intransitive passive).

<experiencer> $\{\mathcal{D}^{\sharp}/\mathcal{U}^{\sharp}\}<$ performer $>\mathcal{U}<$ v intransitive passive>.

• There is no corresponding active voice sentence.

• Adversative nuance is not quaranteed.

[迷惑の意味がある] 恋人に逃げられた。 (adversative; I had my lover run away on me.; 逃げる: to run away (intransitive))

[迷惑の意味がある] 子どもに泣かれた。 (adversative; I had my child cry on me.; 泣く: to cry (intransitive))

[迷惑の意味がある] 雨に降られた。 (adversative; I had the rain fall on me.; 降る: (of precipitation/ash) to fall)

[迷惑の意味がない] 綺麗な女性に微笑まれて、ドキドキした。 (non-adversative; I got smiled on by a pretty lady, and my heart pounded.; 微笑む: to smile (intransitive))

[迷惑の意味がない] 私は風に吹かれていた。 (non-adversative; I got blown on by the wind.; 吹く: (of the wind) to blow (intransitive))

[迷惑の意味がない] 彼女に甘えられると、結構嬉しい。(non-adversative; If I get fawned on by her, I will be fairly happy.; 甘える: to fawn on/give lots of attention and praise (intransitive verb))

[迷惑の意味がない] 先生に 喜 ばれた。 (non-adversative; I got being pleased on by the teacher.; 喜 ぶ: to be delighted (intransitive))

#### Some usage pointers.

• Among intransitive verbs, non-volitional ones (非意志) are harder and less natural to passivise. A notable exception is 降る for precipitation/ash.

[非意志、自然] 雨に降られた。 (I had the rain fall on me.; 降る: (of precipitation/ash) to fall (intransitive)))

[非意志、不自然] 雨に止まれた。 (止む: to cease/stop/be over (intransitive))

[非意志、不自然] ドアに急に開かれました。

[非意志、不自然] 石に突然、落ちられました。

[非意志、不自然] 電気に消えられて、困りました。

[非意志、不自然] 涙に不意に出られて、恥ずかしかった。

Even though all these attempted intransitive passive verbs have the adversative nuance, they are nonetheless considered unnatural. (Perhaps for a reason only accessible to higher level learners...)

# G4.2.4 Indirect passives to convey adversative emotions, and involving a third person subject 間接受身のグループ

Read the main article on [TMJK5].

Indirect passives can be purposefully used to convey negative feelings evoked from an indirect

- If the speaker has only a general relationship with 聞中さん or アンさん, the speaker state say the following objectively (客観的事実を述べます):
  - [A1、能動文] アンさんは海外へ引っ越した。 (Ann-san moved abroad.; 引っ越す: to change residence (intransitive))
  - [B1、能動文] 田中さんはアンさんに花束を贈った。 (Tanaka-san gifted Ann-san a bouquet.; 贈る: to gift (transitive))
- However, if the speaker likes アンさん and sees 田中さん as a love rival, then the actions of ア ンさん and 田中さん in A1 and B1 would be unpleasant, even if their actions did not directly affect the speaker. The speaker would therefore use the *indirect* passive voice to express their feelings.
  - [A2、受動文] (私は)あんさんに海外へ引っ越されて、寂しくてたまらない。(I got Ann-San moved abroad on me, and I feel unbearably lonely.; たまらない: intolerable/unbearable)
  - [B2、受動文] (アンさんに花束を贈ろうと思っていたのに、)(私は)田中さんに先に贈られ てしまった。(Despite me thinking of gifting a bouquet to Ann-sann, I got Tanaka-san gifting before me on me.: しまう: to do/happen unintentionally (AUX))

The subject/experiencer in passive sentences is a person, and is most commonly 「私」. If so, it is often omitted (省略されます). If the subject/experiencer is not a human, then it would be something similar to a person, such as an organisation a person belongs to.

In §G4.2.2, we fixed the subject/experiencer to 「私」. We now vary this. The subject/experiencer can be a third person/party (第三者) that is neither the speaker nor the origin/performer of the passivised action. To do this, simply state the third party subject explicitly, suffixed with はカガ

- [C1#、受動文] 田中さんはアルバイトに休まれました。 (Tanaka-san had a day off taken on him by the part-timer.; 体む: to take a day off (intransitive))
  - [D1#、受動文] E.g. 川口さんは友達に手紙を読まれました。 (Kawaguchi-san got his letter read on him by his friend.; 読む: to read (transitive))

However, the above sentences would sound incomplete to the native ear. They are missing the feelings of the third party.

(The # here mean "may be acceptable to some readers"; courtesy of SL.)

- [C2、受動文] 田中さんはアルバイトに休まれて、とても困りました。 (Tanaka-san had a day off taken on him by the part-timer, and was very troubled.; 休む: to take a day off (intransitive))
  - [D2、受動文] 川口さんは友達に手紙を読まれて、恥ずかしい思いをしました。 (Kawaguchisan got his letter read on him by his friend, and he felt embarrassed unintentionally.; 読む: to read (transitive), しまう: to do/happen unintentionally (AUX))

When the feelings of the aggrieved party is made explicit, the indirect passive flows more naturally.

#### G4.2.5 The three passive voice particles に、から、によって

Read the main articles on [TMJK5], [TMJK6], [TMJK7].

The  $\ensuremath{\mathcal{L}}$  particle marks the origin/performer of the passive voice. The origin/performer in the indirect passive group can only be suffixed by  $\ensuremath{\mathcal{L}}$ .

[間接受身] 私は友達に夜遅く遊びに来られました。 (I got visited for playing late at night on by my friend.; 来る: to come (intransitive))

In direct passive sentences, three particles are possible:  $\mathcal{L}$ ,  $\mathcal{D}$ ,  $\mathcal{L}$ ,  $\mathcal{L}$ . The default particle is still  $\mathcal{L}$ , and there are some cases where  $\mathcal{L}$  can't be used, or another particle is more suitable.

#### Some rules of thumb:

• For passivised verbs that act on people, express the origin's emotion, or have a sense of mobility or direction, both に、から can be used to mark the origin/performer.

Examples of verbs expressing emotion: 愛する、憎む (to hate)、好む (to like)、嫌う、恐れる (to fear)、惜しむ (to regret/be stingy)、尊敬する、軽蔑する (to scorn)、怪しむ (to suspect).

Examples of verbs with a sense of mobility or direction: 招待する (to invite)、呼ぶ、誘う (to invite/tempt), 振り向く (to turn around)、迎える (to go out and greet).

[直接受身] 私は先生{に/から}褒められた。 (act on people; I was praised by my teacher.; 褒める: to praise (transitive); Both に、から are possible, によって is more formal and not used here.)

[直接受身] ジュリエットはロミオ**{に/から**}愛されました。 (emotion; Juliet was loved by Romeo.; 愛する: to love (transitive))

[直接受身] 周恩来は今も中国の人々{に/から}尊敬されている。(emotion; Zhou Enlai is still respected by the Chinese people today.; 尊敬する: to respect (transitive))

[直接受身] たなかさんは、刑事{に/から}怪しまれた。 (emotion; Tanaka-san is suspected by the detective.; 怪しむ: to suspect (transitive))

[直接受身] 私は先生**{に/から}**声をかけられた。 (mobility/direction; I was called out to by my teacher.; 声をかける: to call out to (expression/intransitive))

[直接受身] 突然、友達{に/から}呼び止められた。 (mobility/direction; Suddenly, I was stopped by my friend.; 呼び止める: to call and stop sb/sth (transitive))

[直接受身] あまりにひどい恰好だったので、みんな{に/から}振り向かれた。 (mobility/direction; Because I looked very bad, I was turned around to by everyone.; 恰好/格好: appearance, 振り向く: to turn around (expression/transitive))

[直接受身] 田中選手はチームメイト{に/から}温かく迎えられた。(emotion; The contestant Tanaka was warmly welcomed by his teammates.; 迎える: to go out and greet (transitive))

• For passivised verbs that refer to a give-receive transaction, because  $\ensuremath{\mathcal{L}}$  already marks the receiver, it cannot be used again in the same sentence to mark the origin (giver) in the same transaction.  $\ensuremath{\mathcal{D}}$   $\ensuremath{\mathcal{B}}$  must be used to mark the origin.

Examples of verbs related to give-receiving: 授与する (to award)、旋す (to hand over)、送る (to send)、贈る (to gift)、与える (to bestow/give to someone of lower status).

kung.jwe@gmail.com

[直接受身] 本は先生**{から**}学生に競された。 (give-receive; The book was passed to the student by the teacher.; 渡す: to hand over (transitive))

[直接受身] 花束は部長{**から**}田中さんに贈られた。 (give-receive; The bouquet was given to Tanaka-san from boss.; 贈る: to gift (transitive))

[直接受身] 卒業証書は校長先生先生**{から**/によって**}**学生に授与されました。 (give-receive; The graduation certificates were awarded to the students by the principal.; 授与する: to award (transitive))

[直接受身] 金メダルは総理大臣**{から/によって}**優勝者に授与された。 (give-receive; The gold medal was awarded to the champion by the Prime Minister.; 授与する: to award (transitive))

If the sentence contains  $\ell \mathcal{Z}$  to mark the *location* destination of the verb, then  $\ell \mathcal{Z}$  can still be used (because it's a different sense in the same sentence) to mark the origin.

[直接受身] 私は先生{に<del>/から</del>}お寿司屋さんに誘われた。 (I was invited to the Sushi restaurant by teacher.; 誘う: to invite (transitive))

• For *formal* passivised verbs that refer to a give-receive transaction (same as previous point but formal), and for verbs that involve creation of a work, によって is used. As an exception, the 罰する verb (to punish (transitive)) must use によって.

Example verbs related to creation: 描く (to draw)、作曲 する (to compose (music))、発明する (to invent)、発見する (to discover)、作る、書く (to write).

[直接受身] 卒業証書は校長先生先生**{から**/によって**}**学生に授与されました。 (give-receive; The graduation certificates were awarded to the students by the principal.; 授与する: to award (transitive))

[直接受身] 金メダルは総理大臣**{から/によって}**優勝者に授与された。 (give-receive; The gold medal was awarded to the champion by the Prime Minister.; 授与する: to award (transitive))

[直接受身] 運命はベートーベン{によって}作曲された。 (creation; "Fate" was composed by Beethoven.; 作曲する: to compose (music) (transitive/intransitive))

[直接受身] 東京都庁 は丹下健三氏{によって}設計された。(creation; The Tokyo Metropolitan Government Building was designed by Mr. Kenzo Tange.; 設計する: to design (transitive))

[直接受身] アメリカ大陸はコロンブス**{によって**}発見された。 (creation; The American continent was discovered by Columbus.; 発見する: to discover (transitive))

[直接受身] 田中氏は法律{によって}罰せられた。 (punish; Mr. Tanaka was punished by the law.; 罰する: to punish (transitive))

Further exploration of the passive voice will be left to a future date.

#### Basic rules/observations better expressed via prose:

- All present-negative forms end with 「~ない」.
- The conditional form for all verbs is the same: change the last sound to  $\overset{\sim}{\bigcirc}$  and attach  $\slash$ .
- The conditional-negative forms all end in 「~なければ」, which is obtained from replacing い in 「~ない」 with ければ、This replacement rule also applies for い-adjectives, replacing the trailing 「~い」 for 「~ければ」.
- The volitional form for exception verbs kind of follow the rules of 3 verbs: drop 3 and replace with 3, but additionally there's also a "hint of past tense" in there, explaining the 3 sound in 4.
- The imperative-negative form for all verbs is the same, just attach な to the dictionary form.

#### Exceptions:

- 行く's past-positive form is 行った, not "行いた". Only 行く uses ~った; all other ~く verbs still use ~いた.
- ある's present-negative form is ない, not "あらない".
- くれる's imperative form is くれ, not "くれる".

The following table is a condensed version, showing where the rules come from.

### GB.6.1 チュートリアル動画 胡桃「雪晴梅香」Collected Miscellany - "Hu Tao: Fragrance in Thaw" JP/EN

璃月人は生活に根付く伝統重んじる。その節でも特に重視されるのが、冷かの終わりを告げ る葬儀だ。葬儀のしきたりは実に煩雑だが、それを一手に引き受けるのが大常道である。(The people of Liyue value tradition, and their traditions are embodied in all manner of rites. Of these, the rites that mark life's end are of utmost importance. Liyue's funeral rites are complex, and only Wangsheng Funeral Parlor can conduct them to the satisfaction of all.)

胡桃が料理を完璧調理した時、確率で微妙な品質の料理を追加獲得できる。 (When Hu Tao cooks a dish perfectly, she has a chance to obtain a Suspicious dish of the same kind.)

サクルタラ 前方へと突進にお見舞い、経路上の敵にダメージを与えられる。また、ダッシュ時には短時間姿 を消し、小柄な敵をすり抜けることが可能だ。 (Hu Tao's Normal Attack can combo up to six strikes, dealing Physical DMG to enemies. Hu Tao's Charged Attack consumes a set amount of stamina to lunge forward, dealing Physical DMG to enemies in her path. Hu Tao also has a unique effect when sprinting, allowing her to briefly disappear and pass through certain small foes.)

元素スキルでは、一定のHPを消費し、周囲の敵をノックバックさせ、質蝶の舞状態に入る。この形、胡桃の攻撃は炎元素に変化する。この変化は、元素付与の影響を受けない。後に、中断耐性の上昇し、HP上限を基準に、攻撃力がアップする。 (Hu Tao consumes part of her HP to cast her Elemental Skill, knocking nearby enemies back and entering the Paramita Papilio state. This converts her attack DMG to Pyro DMG, which cannot be overridden by another elemental infusion. Her resistance to interruption is also increased, and she receives an ATK increase based on her Max HP when entering this state.)

冥蝶の舞状態は持続時間の終了、または胡桃の退場により解除される。 (Paramita Papilio ends after a set duration or when Hu Tao leaves the field.)

天賦「蝶隠の時」解放後は、冥蝶の舞状態終了時に、胡桃を除いた、チーム全員の会心率は一定時間上がる。(After unlocking the Talent "Flutter By," ending Paramita Papilio increases the CRIT Rate of all of Hu Tao's party members other than herself for a set duration.)

また、冥蝶の舞状態時、胡桃の 世前撃は、敵に血梅香効果を与える。血梅香効果の敵は、一定時間 ごとに、炎ダメージを受ける。同一ターゲットの付与できる血梅香効果は、同時に最大一つまで だ。持続時間は胡桃だけが更新できる。 (Moreover, while Paramita Papilio is in effect, Hu Tao's Charged Attacks apply the Blood Blossom effect to enemies it hits. Enemies affected by Blood Blossom will take Pyro DMG at set intervals. This effect automatically expires after a while. Hu Tao commands a blazing spirit to deal Pyro DMG in a large AoE When her Elemental Burst hits enemies Hu Tao regenerates a certain percentage of her Max HP A maximum of five enemies can affect this percentage Additionally, using this skill when Hu Tao's HP is low Deals greater DMG and regenerates more HP Hu Tao's unique fighting style often imperils her As such, she must coordinate with her teammates And choose the right moment to use her skills and manage her HP Hu Tao often begins by using her Elemental Skill to enter the Paramita Papilio state Then she alternates between Normal and Charged Attacks to deal Pyro DMG Applying Blood Blossoms onto enemies She then leaves the field, using the CRIT Rate increase from "Flutter By"

To increase her teammates' damage output When Hu Tao's HP is low She can choose a group of enemies upon which to unleash her Elemental Burst Dealing Pyro DMG and regenerating her HP Wangsheng Funeral Parlor conducts rites of utmost solemnity, and its staff are used to speaking little Making Hu Tao's liveliness seem an ill fit Her elders once criticized her mischief-making But having seen her immaculate conduct of the parlor's affairs They could do naught but admit their error Life and death are but two halves of an endless cycle Life leads unto death, and death unto new life — why, then, should death be taboo? Hu Tao has had the wisdom to see this, though some of her elders have yet to do so

- GB.6.7 チュートリアル動画 ヴァレサ「ヒーロー見参!!」 Collected Miscellany "Varesa: Hero Incoming!" (Source JP/EN)

架樹園を手伝うヴァレサからは、おっとりとした、些か内気な印象を受ける。(Tending her orchard by day, Varesa is just a mild-mannered fruit farmer, maybe even a little shy.)

「頭突き~!」 ("Headbutt!")

だが、仮面をつけると、雰囲気が一変するようだ。 (But when she dons her mask, she completely transforms.)

「ジャスティス!!」 ("It's justice o'clock!")

「お売かけ?それとも...試合?」 ("Are we going on a trip? Or... to a competition?")

ヴァレサは落下攻撃を軸に戦い、高速ダッシュが可能な 雷 元素アタッカーだ。 (Varesa is an Electro damage dealer who specialises in Plunging Attacks and has a rapid Sprint.)

で始をつけると、「猛烈パッション」 じょうない になり、あらゆる攻撃が強化され、より高いダメージを与えられる。この状態に入る方法は、主に落下攻撃となる。 (After donning her mask, Varesa enters the Fiery Passion state. In this state, each of her attacks gains a unique buff and deals increased DMG. Typically, Varesa uses a Plunging Attack to enter the Fiery Passion state.)

Attack, Varesa will quickly execute a Charged Attack then leap into the air. By tapping Normal Attack again, she will plunge down at the enemy, dealing AoE Electro DMG, and recovering a set amount of Nightsoul points. After reaching maximum Nightsoul Points with this method, Varesa will enter the Fiery Passion state and gain 1 extra charge of her Elemental Skill.)

「くらえ、渾身の一撃!」 ("One fell swoop!")

元素エネルギーが最大時の元素爆発では、強力な飛び蹴りで 蕾 範囲ダメージを与える。元素爆発発動後、夜魂値が上限まで回復し、猛烈パッション状態となる。 (When Energy is full, Varesa can use her Elemental Burst to deliver a powerful flying kick that deals AoE Electro DMG. This will also restore Varesa's Nightsoul points to maximum, and send her into the Fiery Passion state.)

また、この状態で落下攻撃を放ってから短時間クールタイムを無視して、より少ない元素エネルギーで特殊な元素爆発を1回発動できる、これは落下攻撃ダメージとみなされる。(After performing a Plunging Attack in the Fiery Passion state, the cooldown of Varesa's Elemental Burst is ignored for a short period, during which she can execute a single special Elemental Burst that costs less Energy, and deals Plunging Attack DMG.)

戦闘中、ヴァレサは元素スキルで敵陣に突撃し、通常攻撃ボタンで高く跳び上がった後、落下文撃を繰り出して夜魂値を溜め、猛烈パッション状態に入る。この状態中、先ほどの手順を繰り返して大ダメージを与え、機を見計らい、少ない元素エネルギーの、または通常の元素爆発を発動するといいだろう。 (In battle, Varesa strikes at the enemy with her Elemental Skill, then leaps up into the air with a tap of her Normal Attack. Tapping Normal Attack again, she plunges down, gains full Nightsoul points, and enters the Fiery Passion State. Now, Varesa can continue with this same attack routine to deal increased DMG, peppering in high- or low-Energy-cost Elemental Bursts at opportune moments as needed.)

燃素を利用できるナタのエリアにいる時、チームにヴァレサがいる状態で料理を使用すると、燃素を一定値回復する。 (In areas with Natlan's Phlogiston mechanics, if Varesa is in the party, your own characters can eat food to replenish phlogiston.)

また、特定の移動状態にあるキャラから切り替えると、ヴァレサは夜魂の加護状態で登場。する。(Furthermore, if the active character is in a specific movement state, Varesa can take the field already in the Nightsoul's Blessing state.)

| では、それをやる理由は人それぞれだ。例えば威嚇のためによく使われる仮面だが、ヴァレサの場合、勇気を与える道具となっている。 (People often do the same thing for very different reasons. Take masks, for instance: Some wear them to intimidate other people, while Varesa wears hers to gain courage.)

いつか仮置を被らず鞭えたら、と願っているようだが、仮置を被ること首体、勇気のいる行為だとは気づいていないらしい。(She longs for the day when she no longer needs her mask to feel confident, not realizing that sometimes, it takes more courage to don one's mask than not to.) 無論、仮置には他の役割もある… 以前チュエンマーケットを訪れた際、精巧かつ創意溢れる仮置が並んでいた… 残念ながら、権には仮合わなそうだったが。 (Of course, there are masks for all kinds of occasions… Chuwen Fair sells quite a range, actually. I've browsed them before.

# GB.6.8 チュートリアル動画 エスコフィエ「包丁の円舞」 Collected Miscellany - "Escoffier: A Waltz of Scoring Cuts" (Source JP/EN)

Outstanding works of art and meticulously made, though, sadly... they don't really suit me.)

「科学教」理のシェフ「カーネル・デセール」エスコフィエよ。カトラリーの準備も完了」」("Well met. I am Escoffier, Patissiere Supreme and master of precision gastronomy. Utensils at the ready!") エスコフィエは味芳全体を治療できる永元素のサブアタッカーだ。酸の永前性と永前性を下げ、チームメンバーの攻撃をサポートする。 (Escoffier is an off-field Cryo Damage dealer with group healing abilities. She can also decrease enemies' Cryo and Hydro resistance, boosting the DMG dealt by her teammates.)

元素スキルー回押しでは、敵に 氷範囲ダメージを与え、マルチスペクトル 調理マシナリーを起動する。これはフィールド上のキャラクターを追尾し、一定時間ごとに 周囲の敵に 氷 ダメージを与える。長押しでは、フィールド上に 調理マシナリーを設置する、マシナリーは元素攻撃を 吸収し、吸収した元素エネルギーが一定量に達すると、美味しい料理を生成する。(Tap Escoffier's Elemental Skill to deal AoE Cryo DMG to surrounding enemies, and activate her All-Spectrum Multi-Use Cooking Mek. The Cooking Mek will follow the active character, and periodically deal Cryo DMG to surrounding enemies. Hold Escoffier's Elemental Skill to place the Cooking Mek on the field. The Cooking Mek can absorb Elemental Attacks. When the amount of Elemental Energy absorbed reaches a threshold, delicious dishes will be produced.)

「最高の一品よ!」 ("The pinnacle of excellence!")

元素爆発では、草越した包丁さばきを披露して、氷範囲ダメージを与え、チーム全員の HP を回復する。その後しばらく、定期的にフィールド上 キャラの HP を回復する。回復量 はエスコフィエの攻撃力 に依存する。 (With her Elemental Burst, Escoffier displays her exceptional knife skills, dealing AoE Cryo DMG and restoring HP to all party members. Additionally, for a period of time, the active character will periodically regain HP based on Escoffier's ATK.)

低温保存で鮮度を保持する食材を急速冷凍できれば、非常に便利だ。 (Keeping ingredients fresh means keeping them cool, a skill which is second nature to Escoffier.)

エスコフィエの元素スキルや元素爆発が敵に命中すると、チーム内の水・氷キャラの数に応じて、敵の水耐性・氷耐性が下がる。エスコフィエは水・氷キャラと組ませると、耐性デバフを最大限に活かし、フィールド上キャラの火力をアップできる。(After Escoffier's Elemental Skill or Burst hits an enemy, their Hydro and Cryo Resistance will be decreased based on the number of Hydro and Cryo characters in the party. By teaming up with Hydro and Cryo characters, Escoffier can maximize her Resistance Reduction and boost her team's damage output.)

 support for her team. When Energy is full, Escoffier unleashes her Elemental Burst, restoring HP for the entire party and bringing the fight to a graceful close.)

権も万剣はよくがうが、エスコフィエの繊細な技術には敵わない。だが権の経験から言えば、高い技術が幸福をもたらすとは限らない——。技術には危険が伴うのだ。しかし、いくら警告したところで、真理の探求を止めることはできないし、純粋な情熱を否定はできない。幸い、彼女は料理に関心があるだけだ、それだけならば… 杞憂というものだろう。 (Though I too possess skill with a blade, I cannot hope to match Escoffier's technical finesse. In my experience, however, cutting-edge technology doesn't always spell happiness — The more intricate it is, the more perilous it tends to be. Of course, warnings like these can do little to curb humanity's quest for excellence, and I cannot deny the sincerity of such enthusiasm. Thankfully, Escoffier's passion lies exclusively in culinary techniques. It's just cooking, after all — what could possibly go wrong?)

#### GB.6.9 チュートリアル動画 スカーク「冷界の静けさ」 Collected Miscellany - "Skirk: The Silence of a Frostbound Realm" (Source JP/EN)

「これまでの旅でお箭は む の 方 を 示し、 強者であることを 証 明した。 私 と 対等に 言葉を 交 わ す 資格がある。」 ("You've proven your strength to me along your journey, and earned the right to speak to me as an equal.")

「教えるのは一度だけだ。」 ("I'll only demonstrate this once.")

スカークは特殊なエネルギー「蛇の狡智」を使用する 泳 アタッカーだ。 通常 攻撃や 完素爆発で 戦闘を行うが、この完素爆発は完素エネルギーではなく、「蛇の狡智」を使って発動する。(Skirk is a Cryo DMG dealer who inflicts DMG through her Normal Attacks and Elemental Bursts. Her Elemental Bursts do not rely on Elemental Energy, but a special kind of energy known as "Serpent's Subtlety".)

元素スキルー回挿しでは「蛇の狡智」を一定量 獲得して、「七種一関」 状態に入る。このとき、通常立攻撃、 繁下攻撃は、元素付与によって他の元素に変化しない ボダメージとなる。中断耐性が上がり、通常攻撃と重撃の範囲が広くなる。長押しでは、「蛇の狡智」を獲得し、中断耐性がアップした状態で、高速移動をし続ける。 (By tapping her Elemental Skill, Skirk will gain a certain amount of Serpent's Subtlety and enter the "Seven-Phase Flash" state. While in this state, Skirk's Normal, Charged, and Plunging Attacks will deal Cryo DMG that cannot be overridden by other Elemental infusions. This state also increases her resistance to interruption and the AoE of her Normal and Charged Attacks. By holding her Elemental Skill, Skirk will gain a certain amount of Serpent's Subtlety, increased resistance to interruption, and will continuously move at high speed.)

チームの仲間が、水関連反応を起こすと、歩かくに虚様がの裂け目が生成される。「七相一関」 状態のスカークが重撃、または元素スキルの長押しで高速移動すると、虚境の裂け目を吸収し、「蛇の狡智」を獲得する。 (When a party member triggers a Cryo-related reaction, a Void Rift will be created near your opponent. When Skirk uses a Charged Attack in her Seven-Phase Flash state or holds her Elemental Skill to move swiftly. She will absorb Void Rifts and gain a certain amount of Serpent's Subtlety.)

「星々よ、静かに眠れ。」 ("Another star goes out.")

蛇の狡智が 50以上のときに元素爆発を発動すると、蛇の狡智を全て消費して連続攻撃を行い、水範囲ダメージを与える。また、発動時に持っていた 50 を超える分の蛇の狡智に応じて、近きないがアップする。 (When Skirk has at least 50 Serpent's Subtlety, unleashing her Elemental Burst will expend all of her Serpent's Subtlety, performing consecutive attacks tthat

deal AoE Cryo DMG. At the same time, the DMG dealt by an instance of this Elemental Burst can be increased by the amount of Serpent's Subtlety points over 50 points when it is unleashed.) スカークは戦闘に際して受け身ではなく、積極的に戦い方を変えることで相手の不意を突く。 (Instead of simply responding to a crisis as it unfolds, Skirk prefers to catch her opponents off guard by switching up her fighting style.)

「七相一関」状態の時、彼女は蛇の交替を消費せずに元素爆発を発動する、この場合、周囲の一定範囲内にある虚境の裂け首を吸収し、スカークの通常攻撃のダメージが上がる。(When Skirk is in the Seven-Phase Flash state, her Elemental Burst can be unleashed without expending any Serpent's Subtlety. Using her Elemental Burst at this point will absorb the Void Rifts around her in a fixed AoE, increasing her Normal Attack DMG.)

水または氷キャラの仲間と協力して戦うと、スカークの元素爆発および七相一閃モードでの 通常攻撃のダメージが上がる。 (When fighting alongside companions who wield Hydro or Cryo, Skirk's Normal Attack DMG dealt in the Seven-Phase Flash state, as well as her Elemental Burst DMG, will be increased.)

武芸の習得には多様な術の会得が不可欠だ。第一方から「師」となった彼女なら、よく知っているはずだ。スカークがチームにいるとき、チーム全員の元素タイプが水と氷のみからなる場合、それぞれの元素スキルレベルが1上がる。 (Only by constantly learning and adapting may a person become a true martial artist. Having gone from being a disciple to a master herself, Skirk must have acquired her own understanding of this. When Skirk is in the party, and all other party members are either Hydro or Cryo, party members' Elemental Skill Level is increased by 1.)

スカークは戦闘に長けており、様々な戦闘スタイルを見せる。仲間の協力のもと、完素スキルの一回押しで敵に攻撃を仕掛け続け、電望撃と元素爆発をタイミングよく発動することで、虚境の製け首を吸収し、凄まじい攻勢で敵を一掃する。また、元素スキルの長押しで、フィールド上にある虚境の製け首を吸収し、溜まった「蛇の狡智」で元素爆発を発動して、首の前の敵を粉砕する。(Skirk is a skilled warrior, who is capable of adapting her fighting style to tackle whatever comes her way. With the support of her teammates, Skirk can tap her Elemental Skill while keeping up a steady barrage of Normal Attacks. Then unleash a Charged Attack or Elemental Burst at just the right moment, absorbing nearby Void Rifts and sweeping the battlefield with a ferocious offensive. Skirk can also choose to hold her Elemental Skill to absorb Void Rifts on the field, building up enough Serpent's Subtlety to unleash her Elemental Burst and crush all that lies in her path.)

俺から見たスルトロッチは、決して師にはなれそうにない人物だ。だから今まで通り兄の予言が実証されると、俺の運命に対する不満はさらに深まった。幸い、今のところスカークは、「極悪騎」の悪い部分を受け継いでいないようで、ほっとした。しかし、幸いと言えるのはそこだけだ。 梦くが運命から逃れようとする一方で、生き残るためその束縛に首ら足を踏み入れる者もいる、これは不可抗力なのだ。この先も、こうした馬鹿げたことは起こり続けるだろう。俺はまだ色んな問いの答えを探している――貴様もそのはずだ。今回はここまでにしておこう。後のことは、また会う時に。(I never believed that Surtalogi was cut out to be a teacher, so when my brother's prophecy came true, as always, I found myself resenting fate all the more. Fortunately, thus far at least it seems that Skirk has not inherited the corrupt nature of her master, "The Foul" — an undeniable relief. Yet in the end, that is all it is, and nothing more. Just as many struggle to escape their fate, others are pushed into its jaws to survive. Senseless, yet inevitable... A cruel irony, indeed. But who knows what the future holds? Perhaps more of such ironies lie ahead. There

are many questions to which I still seek answers... As I'm sure you do, too. For now, let us leave it at that. We will, no doubt, have much to discuss when next we meet.)

#### SB.23 Days of the month: $\stackrel{\text{th}}{\exists} / \stackrel{\text{h}}{\exists} / \stackrel{\text{lth}}{\exists}$

Read the main article on Tofugu. Also see Instagram reel.

For calendar days, the 和語 counting system (日) is used for {2nd-10th, 14th, 20th, 24th}. All other numbers use standard 漢語 counting system (日). Furthermore, {17th, 27th} use 七, and {19th, 29th} use 九.

For ordinal days [§SB.24], there are two rules. The  $\sim\{\stackrel{\epsilon}{\exists}/\stackrel{h}{\exists}\}\stackrel{b}{\exists}$  schema follows the rules of day intervals [§SB.25], so 和語 counting system ( $\stackrel{b}{\exists}$ ) is used for {2nd-10th, 20th} only. Furthermore, {1st-31st, 49th} use the formal readings: {17th, 27th} use  $\stackrel{b}{\rightleftarrows}$  ( $\stackrel{b}{\rightleftarrows}$  OK for disambiguation) and {19th, 29th, 49th} use  $\stackrel{h}{\to}$ . On the other hand, the  $\stackrel{b}{\Longrightarrow}\sim \stackrel{h}{\boxminus}$  schema follows these simplified rules: the standard 漢語 counting system is used for all numbers, and {9th, 19th, 29th, 49th} use  $\stackrel{h}{\to}$ .

For day intervals [§SB.25], the 和語 counting system (旨) is used for  $\{2nd-10th, 20th\}$  only. All other numbers use the standard 漢語 counting system (日). Furthermore, days intervals  $in\{1-31, 49\}$  days use the formal readings:  $\{17, 27\}$  days use 七 (七 OK for disambiguation) and  $\{19, 29, 49\}$  days use 九.

For o'clocks and hour intervals [§SB.26], if the ones place is 4, 7 or 9, then  $\overset{*}{\boxminus}$ ,  $\overset{{}^{\downarrow}}{\vdash}$ ,  $\overset{{}^{\downarrow}}{\vdash}$  are used, ad infinitum.

#### SB.25 Counting days: $\{\ddot{\Xi}/\ddot{\Pi}\}\ddot{\Pi}$

Read the main article on Tofugu.

The  $\lceil \sim^{\frac{ph}{6}} \rfloor$  suffix here means "interval". While typically dropped in the absence of ambiguity, it is necessary here to distinguish day intervals from days of the month (§SB.23; [WB]).

For formal settings and specifically **days and hours** (with the exception of day of month  $\overset{\text{$^{*}}}{\leftarrow} \overset{\text{$^{*}}}{\vdash}$ ),  $\overset{\text{$^{*}}}{\leftarrow}$  is preferred over  $\overset{\text{$^{*}}}{\leftarrow}$ , though the latter may be used for disambiguation with  $\overset{\text{$^{*}}}{\rightarrow}$ .

#### VB.4 Directions

Read the main articles on JWA and KH.

For the four cardinal directions, the 訓読み readings are 東・西・南・北. The corresponding 音読み readings are 東・西・南・北.

日本では「東西南北」の順です。 Japan uses EWSN (hence the 東西南北).

西洋では「北南東西」の順です。 The Western world uses NSEW order.

中国では「東南西北」の順です。 China uses ESWN.

When forming the four intercardinal directions and eight secondary intercardinal directions, there is ambiguity in the ordering of constituent cardinals. All permutations are possible, but there are some rules for when to use which:

- When describing something native to Japan, use Japanese ordering.
- When forming international and Western concepts, such as compass directions, use Western ordering (this is standardised by the World Meteorological Organisation). Note that secondary intercardinal directions take the form <cardinal>-<secondary cardinal>.

The readings of the intercardinal and secondary intercardinals are simply the concatenation of the unmodified constituent 音読み readings. The only exception is when cardinals describing direction spans come together, in which case *rendaku* occurs, so we have 東西 and 南北.
